# INDEX MATERIARUM

## OCEANOGRAPHIA PHYSICA ET NAVIGATIO

*Abinger.* Mensurae magneticae. a - 1742
**Ablatio** ex aëris temperatura etc. a - 1637
*Aboukir.* Relicta submarina. a - 372
**Absorptio** vaporis aquarum in spectro solari ultrarubro. a - 1580
**Abyssorum** oceanographica studia. a - 525, 533, 688
**Academia** marina Gallica. Communicationes. a - 472
**Aciarum** magneticum. a - 155
*Açores.* Meteorologia. a - 1622, 1624
**Actinometria.** a - 1470
**Acustica** methodus ad scandalia ducenda. a - 863
**Aegeum.** Aestus abnormes. a - 1299
—. Historia geologica. a - 635
**Aegyptus.** Consessus Unionis Geographicae. a - 490

# INDEX MATERIARUM

## GENERALIA - NAVIGATIO

Navigatio.

*Navigationis historia - Itinera :* a - 1, 9, 20, 26, 43, 83, 94, 100, 101, 123, 134, 138

*Navigatio plana et litorea - Navigatio astronomica - Instrumenta - Tabulae - Ephemerides - Navigatio radiogoniometrica - Studia pro navigatione :* a - 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 210, 211, 212, 213, 216, 221, 222, 223, 227, 229, 231, 232, 233, 234, 235, 236, 238, 240, 241, 242, 243, 245, 247, 249, 252, 254, 255, 256, 259, 261, 262, 266, 268, 271, 275, 276, 277, 278, 282, 283, 287, 288, 293, 294, 295, 296, 297, 301, 342

*Securitas maritima - Operae pro vitae rerumque conservatione - Adsistentia - Destructio et recuperatio navium :* a - 307, 308, 309, 311, 312, 313, 314, 316, 318, 319, 320, 323, 327, 329, 332, 341, 342

*Signalationes maritimae (fixae, fluctuantes, luminosae et per radio, sonorae et ultrasonorae) - Libri pharorum, lanternarum, signalationum - Communicationes :* a - 344, 350, 351, 353, 359, 361, 367, 368, 369, 373, 374, 375

Operae maritimae.

*Operae portuales - Tunnels - Canales maritimi - Effossiones fundi marini :* a - 382, 387, 392, 395, 397, 407

*Operae submarinae - Mersiones - Scaphandrarii - Cava :* a - 413, 414, 415, 416, 417, 418, 421

Varia.

*Res nauticae - Folklore - Storia politica, militaris et mercatoria marium - Vocabularia nautica - Legislatio nautica :* a - 426, 428, 432, 446, 447, 450, 452, 453, 472, 474, 494, 496, 498, 499, 505

*Biographiae et necrologiae :* a - 513, 519, 555, 558, 563

## OCEANOGRAPHIA PHYSICA

Generalia.

*Instituta oceanographica - Relationes publicae - Conventus et conferentiae - Oceanographiae historia - Ars docendi - Bibliographiae :* a - 567, 604, 610

*Expeditiones oceanographiae et scientiae causa susceptae - Studia et quaesita oceanographica :* a - 643, 644, 662, 680

Geologia Maris.

*Geologia generalis bacini oceanici - Marium origo - Vestigia veterum marium :* a - 734, 738, 739, 741, 742, 753, 781, 782, 784

*Litora et orae maritimae - Erosiones :* a - 810, 816, 817, 827, 833

*Sedimenta :* a - 869

*Topographia submarina - Marini fundi configuratio :* a - 872

Geographia Maris.

*Geographia descriptiva et oeconomica :* a - 900, 902, 906, 910, 913, 916, 922, 924, 927, 928, 934, 941, 945

*Relevationes hydrographicae (geodeticae, topographicae, bathymetricae) - Instrumenta hydrographica et bathymetrica - Naves hydrographicae :* a - 1038, 1039, 1040, 1041, 1042, 1044, 1045, 1047, 1048, 1049, 1050, 1052, 1056, 1058, 1059, 1060, 1061, 1062, 1063, 1065, 1067, 1068, 1069, 1070, 1071, 1073, 1074, 1075, 1079, 1084, 1086, 1087, 1089, 1090, 1093, 1095, 1096, 1098, 1100, 1102, 1103, 1104, 1105, 1106, 1107, 1109, 1110, 1111, 1113, 1114, 1115, 1116, 1117, 1118, 1120, 1122, 1123, 1124, 1125, 1126, 1127, 1132, 1133, 1134, 1135, 1136, 1138, 1140, 1142, 1146, 1147, 1148, 1149, 1164, 1166, 1168, 1172, 1173

*Chartographia - Atlantes - Portulani :* a - 1175, 1178, 1179, 1180, 1181, 1182, 1185, 1186, 1187, 1189, 1192, 1193, 1200, 1203, 1205, 1206, 1207, 1208, 1209, 1210, 1212, 1220, 1221, 1222, 1223, 1224, 1225, 1240

*Maritimi Portus - Canales - Aestuaria :* a - 1248, 1251, 1258, 1264, 1265, 1266, 1270, 1273, 1278, 1279, 1281, 1286, 1287, 1288, 1295, 1307, 1312, 1314

### Chemia et Physica Maris.

*Chemia et Physica - Salsedo et temperatura - Transparentia - Densitas - Evaporatio - Aquae chemici componentes :* a - 1317, 1320, 1321, 1322, 1323, 1324, 1330, 1333, 1340, 1349, 1350, 1351, 1353, 1354, 1355, 1358, 1360, 1362, 1367, 1368, 1369, 1370, 1371, 1372, 1373, 1374, 1375, 1376, 1377, 1378, 1379, 1380, 1381, 1382, 1386, 1387, 1391, 1392, 1394, 1395, 1397, 1399, 1400, 1406

*Energia marium - Penetratio energiae solis radiantis :* a - 1411, 1413, 1415, 1417, 1418

### Maris Dynamica.

*Circulatio oceanica - Currentiae :* a - 1424, 1427, 1431, 1432, 1438, 1439, 1446

*Aestus et apparatus mareographici - Maris livellus :* a - 1458, 1466, 1469, 1470, 1471, 1494

*Undarum motus :* a - 1498, 1499, 1501

*Hydrodynamica theorica :* a - 1502, 1503, 1504, 1505, 1506, 1507, 1508, 1509, 1510, 1511, 1512, 1513, 1514, 1515, 1516, 1517, 1518, 1520, 1522, 1523, 1524

### Geophysica.

*Meteorologia :* a - 1525, 1526, 1528, 1530, 1532, 1535, 1537, 1540, 1542, 1547, 1549, 1550, 1553, 1558, 1559, 1560, 1561, 1563, 1564, 1566, 1567, 1568, 1572, 1575, 1576, 1586, 1587, 1588, 1593, 1594, 1596, 1598, 1599, 1600, 1601, 1603, 1604, 1605, 1608, 1609, 1613, 1616, 1618, 1624, 1630, 1631, 1632, 1633, 1636, 1651, 1652, 1663

*Vis magnetica :* a - 1696, 1700, 1701, 1703, 1712, 1724, 1726, 1734, 1735, 1739, 1741, 1743, 1744, 1749, 1752, 1754, 1755, 1756, 1757, 1759, 1762, 1764, 1767, 1776, 1778, 1781, 1795, 1797

*Gravitas :* a - 1798, 1799, 1800, 1801, 1802, 1805, 1807

*Sysmologia et vulcanismum bacini oceanici:* a - 1808, 1810, 1811, 1913, 1822, 1823, 1824

## OCEANOGRAPHIA BIOLOGICA

### Generalia.

*Instituta - Musea - Aquaria - Relationes annuae - Congressus et conferentiae - Biographiae - Expeditiones oceanographicae :* b - 1, 8, 9, 11, 14, 29, 30, 34, 35, 40, 43, 44, 48, 54, 59, 63, 69

### Anatomia et physiologia.

*Cytologia et histologia :* b - 91, 92, 93, 94, 97, 98, 103, 105

*Apparatus musculorum atque apparatus scheletricus - Quæstio de motu - Vesica natatoria :* b - 110, 113, 114, 115, 116, 121, 122, 123, 125, 130, 132, 133, 134, 135, 136, 137, 143

*Apparatus nervorum - Organa sensuum :* b - 149, 152, 153, 155, 157, 161, 165, 166, 167, 168, 171, 173, 179, 180, 181, 182, 186, 188, 190, 195, 198, 199, 200, 205, 215

*Apparatus respirationis - Effectus salinitatis :* b - 216, 217, 218, 227, 236

*Apparatus digestionis atque alimentatio :* b - 239, 240, 244, 249, 258

*Apparatus urogenitalis :* b - 263, 265, 272

*Gleandulae et Hormones :* b - 275, 277, 278, 279

*Color et influentia pigmentorum :* b - 281, 289, 291, 298, 299

*Regeneratio, autotomia et muta :* b - 302, 303, 304, 305, 306, 308

*Varia :* b - 327, 330

### Procreatio.

*Maturitas sexualis - Cellulae sexuales - Physiologia fecundationis - Caracteres sexuales secundarii - Genetica :* b - 334, 346, 348, 349, 351, 352, 353, 354, 355, 358, 361, 362, 363, 372, 377, 382

### Progressus embryonalis et accretio corporis.

*Embryologia - Accretio larvalis - Metamorphosis :* b - 389, 390, 394, 395, 396, 397, 400, 401, 413, 424, 429, 430, 433, 438, 439, 440, 441, 445, 448

### Biochemia.

*Chemia biologica et metabolismum vitale - Actio substantiarum chemicarum in organismis :* b - 459, 460, 468, 475

*Compositio chemica organismorum marinorum :* b - 490, 491, 492, 508, 520, 522

### Oecologia.

*Hydrobiologia - Adaptatio loco ambienti :* b - 541, 562, 571, 572, 577

*Geographica distributio animalium :* b - 598, 600, 605, 617

*Migrationes at marchatura :* b - 621, 625, 626, 630, 635

*Animalium societas - Biocenosis - Symbiosis :* b - 645, 646, 647, 648, 658

*Parasiti - Pathologia et teratologia :* b - 659, 663, 664, 669, 671, 672, 673, 679, 680, 682, 683, 693, 700, 705, 706, 707, 708, 709, 713, 715, 716, 717, 718, 721, 737

### Plancton et Benthos.

*Zooplancton et phytoplancton :* b - 760, 761, 762, 769, 770

### Zoologia Systematica et Descriptiva.

*Bacteria :* b - 782, 786, 787

*Protozoa :* b - 796, 803, 808, 809, 812, 814, 815, 819, 820, 821

*Porifera :* b - 825, 829

*Coelenterata :* b - 833, 844

*Vermes :* b - 874, 883, 885, 890

*Echinodermata :* b - 900, 913, 914, 917

*Mollusca :* b - 922, 927, 928, 929, 932, 949, 950, 951, 952, 954, 958

*Arthropoda :* b - 989, 996, 1004, 1006, 1009, 1015, 1036, 1076, 1077

*Pisces et Cyclostomata :* b - 1086, 1091, 1092, 1094, 1102, 1108, 1109, 1110, 1120, 1129, 1130, 1131, 1138, 1161, 1175, 1176, 1184, 1185, 1189, 1190, 1195, 1196, 1202, 1204, 1215, 1223, 1224, 1225, 1234, 1235, 1237, 1247, 1248

*Mammalia ;* b - 1276, 1282

*Varia :* b - 1286, 1292, 1294, 1297, 1299, 1302, 1303

### Botanica.

*Plantae marinae - Algologia :* b - 1310, 1316, 1317, 1322, 1323, 1329, 1333, 1338, 1348, 1350, 1357, 1362

### Palaeobiologia.

b - 1373, 1376, 1382, 1383, 1388, 1393, 1399, 1407, 1408, 1430, 1431, 1433, 1440, 1442, 1464, 1466, 1486, 1489, 1512

### Phylogenia.

b - 1515, 1516, 1523

## PISCATUS

### Generalia.

*Instituta, Stationes, Laboratoria - Relationes et activitas :* b - 1541, 1561

*Congressus - Bibliographia piscatoria :* b - 1576, 1587

*Expeditiones oceanographicae :* b - 1594, 1596

### Piscatus oeconomia. Legislatio.

*Ratio productionis - Piscatorum mercedes et adsistentia - Pactiones :* b - 1604, 1607, 1617, 1618, 1625, 1642, 1644, 1654

### Biologia Piscatui Applicata.

*Hydrographia et Hydrologia - Influentia temperaturae in piscaturam - Piscicultura et tutela piscium :* b - 1669, 1670, 1671, 1677, 1681, 1690, 1691, 1692, 1694, 1695, 1696, 1697, 1698, 1699, 1703, 1710

### Portus ad piscandum.

b - 1714, 1715, 1716, 1717, 1718

### Methodus et Instrumenta Piscationis.

*Retia et instrumenta :* b - 1720, 1723, 1733

*Piscatus hamatilis et mechanica :* b - 1762, 1763, 1766, 1770, 1776

*Classiculae piscatoriae :* b - 1802, 1808

### Loca ad Piscandum.

b - 1837, 1852, 1861, 1863, 1864, 1867

### Fructus piscationis.

*Species edules et commerciales, piscatio et industria :* b - 1896, 1897, 1936, 1968, 1969, 2024, 2035, 2051, 2054

*Aestimatio alimentaris :* b - 2072, 2075, 2078

### Industria et commercium fructuum piscatus diversis regionibus.

*Aegyptus :* b - 2119, 2120

*Gallia Coloniaeque :* b - 2154, 2157, 2158, 2159, 2160

*Italia Coloniaeque :* b - 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190

*Palestina :* b - 2200, 2201

*Varia :* b - 2209, 2214

### Subproducti Fructuum Piscationis.

b - 2222, 2241

### Conservatio.

b - 2248, 2258, 2259, 2279, 2287, 2313, 2315

# INDEX AUCTORUM

Abou-Samra Abd-El-Galil Ibrahim : b - 2119
Adamovitch N. : a - 1038
Adams N. I. Jr. : a - 1759
Adams Oscar R. : a - 1039, 1040, 1175, 1185
Alberici E. : b - 1373
Alfonsi Tranquilli B. : b - 1720. 2258
Aliberti G. T. : b - 659
Allner W. : a - 183
Almagià G. : a - 1
Almagià R. : a - 1178
Aloj G. : b - 492
Altazin E. : b - 2259
Amato A. : a - 734
Andreaus F. : a - 426
Andreotti G. : a - 1808
Andrews Loring B. : a - 184
Andrissi G. L. : a - 185
Anelli D. : b - 171
Angel J. : a - 900
Antipa Gr. : b - 1, 645, 1669, 1670
Aramabourg C. : b - 1376
Arcangeli A. : b - 646, 996
Arcidiacono F. : b - 1968
Arredi F. : a - 1502
Arvanitaki A. : b - 186
Athanassopoulos G. D. : b - 1671
Aubert J. : a - 428
Auger P. : a - 1752
Aujeszky L. : a - 1525
Avers H. G. : a - 1044

Bachrach E. : b - 2035
Baedeker K. : a - 902
Bahous E. : b - 2200
Baratta M. : a - 9
Barigozzi C. : b - 91, 92
Barlow E. W. : a - 186, 1526
Barroso G. : b - 1286
Bartels J. : a - 1696
Beaugé L. : a - 872
Beauvallet M. : b - 281
Beccari N. : b - 149
Béguinot A. : a - 513
Belloc G. : b - 1594, 1723, 1969, 2024
Bellon Uriarte L. : b - 1310
Bemporad Giulio : a - 187, 1042
Benazzi M. : b - 188
Bennet M. G. : a - 1528
Berg L. S. : b - 1515
Bergmann L. : a - 1317
Bernard Augustin : a - 1179
Bernardini G. : a - 1700, 1701
Berner L. : b - 334
Bertarelli F. : b - 2072
Bertel R. : b - 782
Bertin L. : b - 389, 390, 621
Bertocchi A. : a - 1248
Bertolini F. : b - 216, 217, 239, 240, 922, 1086
Beutin Ludwig : a - 432
Bianchi d'Espinosa R. : a - 567
Biecheler B. : b - 1516
Bini G. : b - 2182

ROMAE
EX TYPIS JOHANNIS BARDI
1936-XV

# ABBREVIATIONES

**a.** - annus, anno, année, an, año
**Aardr.** - Aardrijkskundig
**Abb.** - Abbildungen
**Abh.** - Abhandlung(en)
**Abt.** - Abteilung
**Acad.** - Academia, Académie, Academy
**Accad.** - Accademia
**Akad.** - Akademia, Akademie, Akademi, Akademiia; Akademische
**Algol.** - Algologique
**Amer.** - America; American, Americano
**Anat.** - Anatomia, Anatomie, Anatomy; Anatomico(a), Anatomique, Anatomical, Anatomisch
**Ann.** - Annales, Annali, Annals, Annaler, Annalen, Anais, Analele; Annuel, Annual
**Annot.** - Annotationes, Annotations
**Annu.** - Annuario, Annuaire
**Anu.** - Anuario
**Anz.** - Anzeiger
**App.** - Appendice, Appendix
**Aquic.** - Aquiculture
**Arb.** - Arbok
**Arbeit.** - Arbeit(en)
**Arch.** - Archivium , Archivio, Archive(s), Archiv, Archivo
**Arct.** - Arctic
**Ark.** - Arkiv(et)
**Arsb.** - Arsbok
**Arsber.** - Arsberetning
**Ass.** - Associazione, Association
**Astron.** - Astronomia, Astronomie, Astronomy; Astronomico(a), Astronomique, Astronomical, Astronomisch
**Austr.** - Australian
**Avd.** - Avdelning

**Bacteriol.** - Bacteriology, Bacteriologie; Bacteriological, Bacteriologisch
**Bacteriol.** - Bactériologie; Bactériologique
**Batteriol.** - Batteriologia; Batteriologico(a)
**Bd.** - Board
**Begr.** - Begründet
**Beitr.** - Beitrag, Beiträge
**Ber.** - Bericht(e)
**Biol.** - Biologia, Biologie, Biology; Biologico(a), Biologique, Biological, Biologisch, Biologisk
**Bl.** - Blatt, Blätter
**Bol.** - Boletim, Boletin
**Boll.** - Bollettino
**Bot.** - Botanica, Botanique, Botany, Botanik; Botanical, Botanisch, Botanisk
**Brit.** - Britain; British
**Bul.** - Buletin, Buletinul
**Bull.** - Bulletin, Bulletijn, Bulletino
**Bur.** - Bureau
**Calif.** - California
**Camp.** - Campagnes

**Canad.** - Canadian
**Cat.** - Catalana
**Centr.** - Centrale, Central(e)
**Chem.** - Chemistry; Chemical
**Choz.** - Chozjajstvo
**Cienc.** - Ciencias
**Circ.** - Circulaire, Circular
**Cl.** - Classe
**Col.** - Colonie, Colony; Colonial(e)
**Coll.** - Collegio, Collège, College
**Com.** - Commerce, Comercio; Commerciale, Commercial, Comercial.
**Comit.** - Comitato
**Comm.** - Committee, Commission
**Commiss.** - Commissioner
**Comp.** - Comparata, Comparée, Comparative
**Conf.** - Conferentia, Conferenza, Conférence, Conference
**Congr.** - Congresso, Congrès, Congress, Congreso
**Cons.** - Consiglio, Conseil
**Contr.** - Contribution(s)
**Corr.** - Corriere
**C. R.** - Compte(s) Rendu(s)
**Cult.** - Cultura

**Dir.** - Direction, Directorate
**Div.** - Divisione, Division
**Dpt.** - Department
**Dtsch.** - Deutsch

**Econ.** - Economia, Economic, Economy
**Ed.** - Editore, Editeur, Editor
**Engl.** - English
**Eng.** - Engineer; Engineering
**Entomol.** - Entomology
**Erdk.** - Erdkunde
**Ergebn.** - Ergebnisse
**Españ.** - Español (a)
**Exp.** - Experimentalis, Expérimentale, Experimental
**Exped.** - Expedition(s)
**Expéd.** - Expédition(s)
**Expl.** - Exploration(s)

**Fac.** - Facoltà, Faculté, Faculty
**Fenn.** - Fennica
**Fig.** - Figura(e)
**Fis.** - Fisica, Fisiche, Fisicas
**Fisch.** - Fischerei
**Fischerb.** - Fischerbote
**Fischereibl.** - Fischereiblatt
**Fischwirt.** - Fischwirtschaft
**Fish.** - Fishery, Fisheries; Fishing
**Fisher.** - Fisherman
**Fisiol.** - Fisiologia; Fisiologico(a)
**Fisk.** - Fiskeri
**Fol.** - Folia
**Forh.** - Forhandlinger
**Forh.** - Förhandlingar
**Forsch.** - Forschung(en)
**Fragm.** - Fragmenta
**Franc.** - Français

**Gaz.** - Gazette
**Gen.** - Generale, General: Genootschap
**Gén.** - Général
**Geod.** - Geodesia, Geodesy, Geodäsie; Geodetico, Geodetical, Geodätisch
**Géod.** - Géodésie; Géodésique
**Geof.** - Geofisica, Geofisico
**Geogr.** - Geographia, Geografia, Geography, Geographie, Geografiia; Geografico(a), Geographical, Geographisch, Geografisk, Geograficeskii
**Géogr.** - Géographie; Géographique
**Geol.** - Geologia, Geology, Geologie, Geologîia; Geologico(a), Geological, Geologisch, Geologiskîi
**Géol.** - Géologie; Géologique
**Geoph.** - Geophysics; Geophysic(al), Geophysisch
**Geoph.** - Géophysique
**Ges.** - Gesellschaft
**Gesch.** - Geschichte; Geschichtlich
**Giorn.** - Giornale
**Govmt.** - Government

**Handb.** - Handbuch
**Handl.** - Handlingar
**Hidrogr.** - Hidrografinen
**Hist.** - Historia, Histoire, History; Historique, Historical, Historisch
**Histol.** - Histologie, Histology; Histologique, Histological, Histologisch
**Hrsg.** - Herausgegeben
**h. t.** - hors texte
**Hydrobiol.** - Hydrobiologie; Hydrobiologica, Hydrobiologique
**Hydrogr.** - Hydrographie, Hydrography; Hydrographique, Hydrographic(al), Hydrographisch
**Hydrol.** - Hydrologie, Hydrology; Hydrologique, Hydrologic(al), Hydrologisch

**Ichtyol.** - Ichtyologie, Ichtyology; Ichtyologique, Ichtyological, Ichtyologisch
**Idrobiol.** - Idrobiologia; Idrobiologico(a)
**Ill.** - Illustrazione, Illustration(s)
**Imp.** - Imperial, Impérial
**Impr.** - Imprimerie
**Ind.** - Industria, Industrie, Industry; Industriale, Industriel(le), Industrial, Industriell
**Inst.** - Institut, Institute, Instituto, Instituut, Institutt
**Instit.** - Institution
**Int.** - Internazionale, International(e)
**Invest.** - Investigation(s)
**Ist.** - Istituto
**Istol.** - Istologia; Istologico(a)
**It.** - Italia; Italica, Italiano(a)
**Ittiol.** - Ittiologia; Ittiologico(a)
**Izv.** - Izvêstîia

**Jahresber.** - Jahresbericht(e)
**Jap.** - Japonica, Japonenses, Japonaise, Japanese
**Journ.** - Journal

**Kgl.** - Kongelig
**Kl.** - Klasse
**Kol.** - Kolonie; Kolonial
**Komm.** - Kommission
**Kon.** - Koninklik
**Königl.** - Königlich
**Kungl.** - Kunglig

**Labor.** – Laboratorium, Laboratorio, Laboratoire, Laboratory
**Lám.** - Lámina(s)
**Lett.** - Lettere, Lettres
**Linn.** - Linnéen(ne), Linnean

**Mag.** - Magazin, Magazine
**Malacol.** - Malacologia, Malacologie, Malacology; Malacologico(a), Malacologique, Malacological
**Mar.** - Marina(o), Marine, Marinara
**Marit.** - Maritime
**Maritt.** - Marittimo(a)
**Matem.** - Matematica
**Mathem.** - Mathematics, Mathematik, Mathematic(al), Mathematisch
**Mathém.** - Mathématique
**Med.** - Medicina, Medicine, Medizin; Medico(a), Medical, Médizinisch
**Méd.** - Médecine; Médical(e)
**Medd.** - Meddelanden, Meddelelser
**Meded.** - Mededeelingen
**Mem.** - Memoranda, Memoria(e), Memoirs, Memorial, Memorias
**Mém.** - Mémoire(s)
**Meteorol.** - Meteorologia, Meteorology Meteorologie, Meteorologîia; Meteorologico(a), Meteorological, Meteorologisch, Meteorologisk, Meteorologiceskîi
**Météorol.** - Météorologie; Météorologique(s)
**Microsc.** - Microscopie; Microscopique, Microscopical
**Mikrosk.** - Mikroskopisch
**Minist.** - Ministero, Ministère, Ministry, Ministerium
**Miscell.** - Miscellaneous
**Mitt.** - Mitteilung(en)
**Mus.** - Museo, Muséum, Musée, Museum, Museu

**N.** - Nuovo, nouveau, new, neu.
**Nac.** - Nacional
**Nachr.** - Nachricht(en)
**Nat.** - National(e)
**Natur.** - Naturale, Naturel(le), Natural, Naturales
**Natural.** - Naturaliste, Naturalist
**Naturhist.** - Naturhistorisch, Naturhistorisk
**Naturv.** - Naturvidenskabelig, Naturvetensskaplig
**Naturwiss.** - Naturwissenschaft(en); Naturwissenschaftlich
**Naut.** - Nautico(a), Nautique, Nautical, Nautisch, Nautisk
**Naz.** - Nazionale
**Ned.** - Nederland, Nederländisch, Nederlandsch
**Néerl.** - Néerlandais(e)
**Norw.** - Norwegian
**Novit.** - Novitates

**Obs.** - Observatoire, Observatory, Observer, Observatorium, Observatorio
**Occas.** - Occasional
**Oceanogr.** - Oceanografia, Oceanography; Oceanographica, Oceanografico(a), Oceanographic(al), Oceanograficeskij
**Océanogr.** - Océanographie; Océanographique
**Oesterr.** - Oesterreich; Oesterreichisch
**Off.** - Office; Officiel(le), Official, Offisiell
**Osserv.** - Osservatorio

**Palaeobiol.** - Palaeobiologia, Palaeobiologie; Palaeobiologica, Palaeobiologisch
**Palaeontogr.** - Palaeontographia, Palaeontographie
**Palaeontol.** - Palaeontologia, Palaeontologie; Palaeontologisch
**Paleontol.** - Paleontologia, Paleontology; Paleontologico(a), Paleontological
**Paléontol.** - Paléontologie; Paléontologique
**Parasitol.** - Parasitologie, Parasitology
**Parassitol.** - Parassitologia
**Pathol.** - Pathologie, Pathology; Pathologique, Pathological
**Pêch.** - Pêcheries
**Perm.** - Permanent(e)
**Pescher.** - Peschereccio
**Philipp.** - Philippine
**Phys.** - Physique, Physics, Physik; Physical, Physisch
**Physiol.** - Physiologia, Physiologie, Physiology; Physiologique, Physiological, Physiologisch
**Piscicult.** - Piscicultura, Pisciculture
**pl.** - planche, plate
**Pol.** - Polonais(e), Polish, Polisch
**Pont.** - Pontificia
**pp.** - pagine, pages
**Proc.** - Proceedings
**Profess.** - Professionale, Professionnel, Professional
**Protistenk.** - Protistenkunde
**Protistol.** - Protistologia, Protistologie, Protistology
**Pr.-Verb.** - Procès-Verbal (Verbaux)
**Pubbl.** - Publicazioni
**Publ.** - Publication

**Quart.** - Quarterly

**R.** - Reale, Regia, Royal(e)
**r.** - rekke
**Rapp.** – Rapporto, Rapport
**Rass.** - Rassegna
**Rec.** - Record(s)
**Rech.** - Recherches
**Rend.** - Rendiconto(i)
**Rep.** - Report(s)
**Res.** - Results
**Rés.** - Résumé
**Résult.** - Résultats
**Resúm.** - Résúmenes
**Rev.** - Revue, Review, Revista
**Ric.** - Ricerca
**Riun.** - Riunione
**Riv.** - Rivista

# I.

# GENERALIA NAVIGATIO

## Navigationis historia - Itinera.

**Almagià Guido** - Sommario esame delle operazioni navali sulle guerre napoleoniche [*Compendium de proeliis navalibus bello Napoleonico perdurante*]. Riv. Cult. Mar., X, 7/8, 45-56. Roma (1935). **a - 1**

**Almeida (de) Joao** - Notas à margem sobre a descoberta do Brasil [*De inventa Brasilia. Notae marginales*] (Av. rés. franç.). Bol. Soc. Geogr., Maio-Out., 51 Ser., 35-37. Lisboa (1933). **a - 2**

Discussion du problème débattu de la découverte du Brésil par Pedro Alvares Cabral; exploration de la côte brésilienne par les Portugais avant la découverte « officielle » de ce pays par Cabral; rapprochement entre la découverte du Brésil et celle de l'Amérique par Colomb qui aurait été instruit dans les secrets de la navigation atlantique par les Portugais.

**Anderson R. C.** - The Royalists at Sea, 1651-1653 [*De regis fautoribus eorumque activitate maritima 1651-1653*]. Mar. Mirr., XXI, 1, 61-90. London (1935). **a - 3**

In addition to the description already published at some length in Mar. Mirr. (IX, p. 34; XIV, p. 320; XVII, p. 135) of the operations of the Royalist fleet and of the Parliamentary forces opposed to it during the years 1648, 1649 and 1650, in the present paper are followed the fortunes of Prince Rupert's command from its leaving Toulon in 1651 to the arrival of its last surviving ship at Nantes in 1653.

**Anger H.** - Rätebund. Neue Forschung im Felde [*Respublica Sovietica. Inquisitiones novae. Navigationes scientiae causa susceptae*]. Peterm. Mitt., LXXX, 3, 88. Gotha (1934). **a - 4**

Kurze Notiz (der Sowjetskij sewer Nr. 5, 1933, Moskau, entnommen) über den ersten erfolgreichen Versuch, Waren auf dem nördlichen Seewege von Archangel nach dem Lena-Delta zu befördern.

**Austen H. C. M.** - Sea Fights and Corsairs of the Indian Ocean. Being the Naval History of Mauritius from 1715 to 1810 [*De proeliis navalibus deque piratis ad Oceanum Indianum pertinentibus. Historia navalis insulae Mauritii ab a. 1715 ad a. 1810*]. R. W. Brooks. Govmt. Print. Port Louis, Mauritius (1934). **a - 5**

**Balbo Italo** - Croisière sur l'Atlantique [*De navigatione quadam speculatoria per Oceanum Atlanticum*]. 46 pl., 1 carte, 269 pp., Plon, Paris (1934). **a - 6**

Traduction française du journal de bord d'une escadre de vingt-quatre avions menant à bien un vol en masse de 20.000 kilomètres.

**Ballard G. A.** - The Three British Armoured Corvettes [*Tres corbitae Anglicae armis instructae*]. 6 pls., 3 diagrs. Mar. Mirr., XXI, 1, 12-30. London (1935). **a - 7**

Description of three armoured ships of comparatively small displacement, the « Favorite », « Pallas », and « Penelope », which practically had nothing in common with each other except a kind of third-grade tonnage, and not even that in common with their very numerous unarmoured contemporaries classified as corvettes, but represent the only case in which the term « armoured corvette » was used in British service. The ships have been built in 1860-1870.

**Bank S.** - Le dernier port. Le « Tchéljouskine » à Mourmansk [*Portus extremus. Agitur de navi* « Tscheljuskin » *in* Murmansk].( En russe). 4 fig., Karelo-Mourm. Kraj, 3/4, 8-9. Leningrad (1934). **a - 8**

**Baratta M.** - Il porto di Pompei [*Portus Pompejanus*]. Athenaeum, XI, 250-260. Pavia (1933). **a - 9**

**Barents W.**, übers. v. **Schoenborn (von) E.** - Die Reisen des Wilhelm Barents zur Entdeckung der nordöstlichen Durchfahrt in den Jahren 1594-97 [*De navigationibus a Guilielmo* Barents *peractis ad inveniendum transitum nord-occidentalem a. 1594/97*]. 140 S., Becker Verl. Würzburg (1934). **a - 10**

Uebersetzt und bearbeitet aus dem französischen von E. Grafen von Schönborn.

**Barlow Nora** - Charles Darwin's Diary of the Voyage of H. M. S. « Beagle », Edited from the MS. by. . . [*Caroli* Darwin *diarium de navigatione peracta regia navi* « Beagle » *nomine. Editum a manuscripto. . .*]. Ills., maps. xxx + 452 pp., Univ. Press. Cambridge (1933). **a - 11**

The diary printed is contained in eighteen little pocket books, of which a typewritten copy was made in 1891 by the late Mr. Horace Darwin, and it is from this and from the original that the present volume has been prepared by Mrs Barlow, a daughter of Mr. Horace Darwin. It represents a record of Charles Darwin's daily life on board the « Beagle » and of his land excursions and illustrates the terrible discomforts of such a voyage a hundred year ago.

**Bertacchi Cosimo** - Ancora delle antiche misure della terra in relazione alla scoperta di Colombo [*De veterrimis Terrae mensuris quoad inventionem Columbianam*]. Universo, XV, 10, 865–867. Firenze (1934). **a - 12**

L'A. prendendo lo spunto da un breve studio pubblicato recentemente ne « L'Universo », cita misurazioni fatte dai greci e le ammesse corrispondenti lunghezze lineari

del nostro sistema. Tratta poi dell'importante misura araba proponendo lo studio dei diversi valori lineari attribuiti al miglio arabo. Conclude infine che l'incosciente sostituzione di valori arbitrari all'unità lineare araba diede occasione all'inattesa scoperta, da parte di C. Colombo, di un continente nuovo.

**Bistrup H. A. Q.** - Katalog over Litteratur vedrørende Polaromraadenes og Verdenshavenes Opdagelse og Udforskning, Hval - og Sælfangst, Personalhistoria, Tidskrifter, Aarsskrifter og andre Periodica [*Elenchus rerum quae ad inventiones et inquisitiones regionum polo proximarum pertinent. Elenchus extenditur ad balaenarum et phocarum capturam, ad exploratorum historiam, ad ephemerides, annales, periodicasque publicationes*]. 390 pp., Levin & Munksgaard. København (1933). **a - 13**

**Boulenger Jacques** publ. par . . . - Voyages et aventures de François Leguat en deux îles désertes (1690–1698) [*De Francisci* Leguat *navigationibus et fortunis maritimis in duabus quibusdam insulis desertis* (*1690/1698*)]. 234 pp., Plon, Paris (1934). **a - 14**

Histoires, voyages et aventures de dix protestants qui, lors de la Révocation de l'Edit de Nantes, émigrèrent à l'étranger et, secourus par le Marquis de Duquesne réfugié en Hollande, consentirent à aller coloniser une des Mascareignes, l'île Rodrigues.

**Brander J.** - Het eiland Jan Mayen en de overwintering aldaar van 1633-1634 [*De hiemali mora in insula* Jan Mayen *ab a. 1633 ad a. 1634*]. Pl., carte, 103 pp., Ed. par « Histor. Genootsch. Oud-Westfriesland ». Hoorn (1934). **a - 15**

**Breitfuss Leonid** - Das katastrophale Ende der Driftfahrt des Eisbrechers « Tscheljuskin » [*Calamitosus exitus navigationis navi glacieiruptrici nomine* « Celjuskin » *susceptae*]. Peterm. Mitt., LXXX, 3, 87. Gotha (1934). **a - 16**

Ausrüstung, Reisebeschreibung, gegenwärtige Lage.

**Broek D'Obrenan Charlie (van den)** - Voyage aux Iles Galapagos [*De navigatione ad insulas* Galapagos]. 1 carte, 6 photos, Géogr., Terre, Air, Mer, LXIII, 1, 1-19. Paris (1935). **a - 17**

Après quelques brèves remarques concernant l'histoire de la découverte des Iles de Galapagos, les essais de leur colonisation et la composition de l'Archipel, l'A. décrit une visite qu'il a faite à ces îles au cours du voyage de circumnavigation de « la Korrigane » en juillet 1934 avec référence à la richesse de la flore et de la faune marine et terrestre de l'Archipel.

**Burpee Lawrence J.** - John Cabot, who sought Cipangu [*De Johanne* Cabot *qui* Cipangu *quaesivit*]. Figs., Canad. Geogr. Journ., VI, 259-267. Montreal (1933). **a - 18**

**Busch Fritz Otto & Docter Heinz** - Germanische Seefahrt [*Historia navigationum Germanicarum*]. Zahlr. Abb. Brunnen-Verlag, Welli Bischoff. Berlin (1934). **a - 19**

Deutsche Archäologie der Wikinger.

**Cabruja J.** - El barco en la Historia [*Navis apud historiam*]. Rev. Soc. Geogr. Cuba, VII, 1-2. La Habana (1934). **a - 20**

**Chakhovskaja N. D.** - Le dernier voyage du capitaine Scott [*De cap.* Scott *eiusque postrema navigatione*]. (En russe). Ill. 197 + 3 pp., Posrednik. Moskva (1934). **a - 21**

**Chappell Edwin**, Transcr., Edit. & Collat. by. . . - The Tangiers Papers of Samuel Pepys [*Documenta Tingitana ad Samuelem* Pepys *pertinentia*]. Navy Rec. Soc. Publ., LXXIII. London (1935). **a - 22**

The present volume is divided into five parts, three of which are of special interest to naval readers. The volume represents a vivid picture of the life of British Navy in the days of Pepys and an interesting account of the historic incident in which he played such an important rôle.

**Charcot J.** - Voyages aux Iles Feroë [*De navigationibus ad insulas* Feroë]. Fig., 95 pp., Soc. Edit. Géogr. Paris (1934). **a - 23**

Récits de voyages échelonnés sur 30 années, contenant la description de l'archipel et de son évolution au cours de l'époque considérée.

**Charcot J.** - Dans l'Antarctique [*De navigationibus per regiones Antarctidis*]. Géogr., Terre, Air, Mer, LXIII, 3, 238. Paris (1935). **a - 24**

Episode de collaboration anglo-française dans la découverte et l'exploration dans la région antarctique.

**Charine G.** - La campagne du « Tchéljouskine » [*De navigatione, navi* « Tscheljuskin » *peracta*]. (En russe). 1 fig., Izv. Goss. Gheogr. Obstch., LXVI, 2, 329-331. Leningrad (1934). **a - 25**

**Chatterton E. Keble** - To the Mediterranean in « Charmina » [*De navigatione ad Mare Mediterraneum versus, navi peracta* « Charmina » *nomine*]. Ills., sketch-map. xii + 240 pp., Rich & Cowan. London (1934). **a - 26**

Description of the voyage of the « Charmina », a beautiful 6-ton auxiliary yawl, from the Atlantic coast of Brittany south to the Gironde, and thence by the Canal de la Garonne and the Canal du Midi to Sète on the Gulf of Lyons, with a final coastwise passage to Toulon. The author's main purpose is to provide a detailed guide to others who may follow the same track.

**Chokaljskij J.** - Peary et la découverte du Pôle Nord le 9 avril 1909 [*Agitur de* Peary *deque Polo invento die 9 Aprilis 1909*]. (En russe). Meteor. Vestn., 4/7, 154-156. Leningrad (1934). **a - 27**

**Coutinho Gago** - Gaspar Côrte–Real (av. rés. franc.). 2 fig., Bol. Soc. Geogr., Nov. e Dez., 3-20. Lisboa (1934). **a - 28**

Résumé des études de l'Amiral Coutinho, héros de la première traversée aérienne de l'Atlantique Sud, sur les expéditions de Côrte-Real, démontrant sur la base d'une vaste documentation, que toute la côte américaine, de la Floride au Groenland, a été découverte par Gaspar Côrte-Real. Une mention spéciale est faite dans le but de démontrer la priorité des Portugais dans la découverte de l'Amérique, du voyage effectué à ce qu'il paraît par Joao Vaz Côrte-Real à la Terre des Morues (Terre-Neuve) en 1474, c.-à-d. avant l'expédition de Colomb.

**Cresswell M.** - Notes on the History and Development of Navigation [*De historia et progressibus artis navigandi*]. 1 chart. Mar. Obs., XII, 117, 12-14. London (1935). **a - 29**

Part I: Historical, Voyages, Discoveries and Development. Brief account of the development of shipping from the voyages of the Phoeniceans, the epoch-making voyages of Columbus, Vasco de Gama and Magellan, followed by the efforts of Drake, Dampie, Cook and others which were completed by the construction of the Suez and Panama Canals. (To be continued).

**Crouse N. M.** - The Search for the Northwest Passage [*De indagato transitu nordoccidentali*]. Ills., 533 pp.. Columbia (1935). **a - 30**

Description of the preliminary voyages in search for the Northwest Passage. Account of the attempts of Arctic explorers to penetrate the ice barrier and narrative of the successful voyage of Amundsen in 1905.

**Curtis C. D.** - Blake and Vendôme. [Blake *et* Vendôme]. Mar. Mirr., XXI, 1, 56-60. London (1935). **a - 31**

Full English translation of the letters included by Guizot as Appendix XX to volume one of the « History of Oliver Cromwell and the English Commonwealth » giving a full description of Blake's attack on the French squadron, published in reply to the Rev. J. R. Powell's Query n/31 in the October, 1932, issue of « The Mar. Mirr. ».

**Czibulcha (von) Alfons** - Berühmte Weltfahrer. Von Marco Polo bis Sven Hedin [*Totius mundi preclari exploratores. A Marco* Polo *ad* Sven Hedin]. 330 S. Berlin (1933). **a - 32**

**Danjskij R.** - Les vainqueurs de l'Arctique. La campagne héroïque du « Tchéljouskine » [*De navigatoribus qui asperitates Arctidis superaverunt. Agitur de heroica navigatione navi peracta nomine* « Tscheljuskin »]. (Deux édit., en russe et ukranien.). Ill. 82+79 pp., Oukr. Rob.. Kharjkov (1934). **a - 33**

**Delage Edmond** - La guerre sous les mers [*Bellum submarinum*]. Bernard Grasset. Paris (1934). **a - 34**

Histoire de la guerre sous-marine au cours du dernier conflit mondial. Illustrations et descriptions de beaucoup de points et aspects importants et pourtant souvent inconnus, de la guerre sous-marine.

**Delage Edmond** - Images Maritimes [*Expositio picturarum maritimarum*]. Temps, Feuilleton, 19 Janv. Paris (1935). **a - 35**

Chronique de récentes expositions maritimes et de quelque publication, à savoir: l'encyclopédie de l'Illustration qui vient de paraître, à caractère marin et artistique. Quelques idées générales sur l'histoire de la navigation.

**Denucé J.** - De Molukken in de Spaansch - Portugeesche ontdekkingsgeschiedenis [*Insulae Moluccae apud historiam inventionum geographicarum hispanicarum et lusitanarum*]. Tijdschr. Kon. Ned. Aardr. Gen. Amsterdam, LII, 3, 449. Leiden (1935). **a - 36**

Ueber den Namen Molukken. Historische Daten von 1494-1529. Vorlesung mit Lichtbildern gehalten in Rotterdam den 9. April 1935.

**Derjoughine K. M.** - Exploration des mers de l'URSS au point de vue biographique pendant les derniers 15 ans [*De exploratis maribus ad Rempublicam Sovieticam pertinentibus ex biographia exploratorum annum iam quintum decimum*]. (En russe). Troudy 1º Vses. Gheogr. Sjezda (11-18 avr. 1933), 2, 36-45, Soc. Géogr. Etat. Léningrad (1934). **a - 37**

Données sur les explorations de la mer de Barents, la mer de Kara et la mer de Bering.

**Djakonov M. A.** - Quatre mille milles sur le « Sibirjakov » [*De navigatione navis* « Sibirjakow » *quatuor milia milia passuum*]. (En russe). Dess. de L. Kantorovitch., 60 pp. Ed. Soc. Ecriv. Léningrad (1934). **a - 38**

**Djakonov M. A.** - Vingt-cinq ans depuis la découverte du Pôle Nord [*De inventione Poli Nordici vigesimo quinto recurrente anno*]. (En russe). 4 fig., Vestn. Znan., 5, 291-294. Leningrad (1934). **a - 39**

**Dubourcq P. L.** - Ostica, een antieke zeehaven [*Agitur de Ostica, portu vetere maritimo*]. Haagsch Maandbl., 81-91. 's-Gravenhage (1935). **a - 40**

**Floris Peter** - His Voyage to the East Indies in the « Globe », 1611-1615. The contemporary Translation of His Journal Edited by W. H. Moreland [*Agitur de Petro* Floris *eiusque navigatione ad Indias Orientales, navis* « Globe » *auxilio, ab a. 1611 ad a. 1615. Eius diarii translatio in anglicam linguam modernam edita ab* H. W. Moreland]. 3 maps, lxx + 164 pp. Works iss. Hakluyt Soc., Ser. II, LXXIV, London (1934). **a - 41**

Story of the seventh voyage of Captain Peter Floris on board « The Globe » translated into modern English. The Captain was on the service of the East India Company and organized trade in the Bay of Bengala and the Gulf of Siam.

An account of the efforts of the Russians to determine the relation of Asia and America. The two volumes present an authoritative discussion of the two great expeditions conceived by Peter the Great on which were discovered Bering Strait and the northwest coast of North America from the southern tip of the Alaska panhandle to the westernmost of the Aleutian Islands. Volume I contains the English translation of the log books and Official Reports of the first and second expedition, 1725-1730 and 1733-1742. Volume II contains the first translation in English of the account of the sea voyage of the second expedition published in German in 1793, by the naturalist Georg Wilhelm Steller, who accompanied Bering. It is translated and in part annotated by Leonhard Stejneger.

Account of the work of the various seamen - Tasman, Cook, Bligh, Wilson and Bellingshausen, who have all contributed to the discovery of the entire Fiji group, on hand of the text of their journals, which the authors comment with great accuracy.

**Hennessy J.** - History of the Magnetic Compass [*De buxida magnetica eiusque historia*]. 5 figs, Mar. Obs., XII, 120, 149-151. London (1935). **a - 57**

Chinese Services. Norwegian history. Italian compass. Following progress. Sir W. Thomson's compass. « Dead Beat » compass.

**Hennig R.** - Die Geographie des Homerischen Epos. Eine Studie über die erdkundlichen Elemente der Odyssee [*De geographia apud epos Homericum. Studium geographicum Odysseae*]. Neue Wege z. Antike. I. Reihe, Darstell., H. 10, 101 S., B. G. Teubner. Leipzig (1934). **a - 58**

Vf. versucht in der vorliegenden Arbeit an Hand neuester wissenschaftlicher Forschung die Wege Odysseus' durchzuprüfen und behauptet, dass die erdkundlichen Kenntnisse der antiken Griechen viel weitgreifender gewesen sind, als man bis jetzt angenommen hatte.

**Hennig Richard** – Zusammenstellung der wichtigsten geographischen Entdeckungsreisen des Altertums und Mittelalters [*De notandis navigationibus explorandi causa susceptis antiquis temporibus et medio aevo*]. Peterm. Mitt., LXXX, 2, 45-47. Gotha (1934). **a - 59**

Einleitende Bemerkungen über die geplante Arbeit des Vf:s, welche infolge der Wirtschaftsdepression noch nicht veröffentlicht worden ist. Verzeichnis der vom Vf. studierten und an Hand der vorhandenen in - und ausländischen Spezialliteratur kritisch geprüften Entdeckungs - reisen des Altertums und Mittelalters.

**Hermann Albert** - Unsere Ahnen und Atlantis. Nordische Seeherrschaft von Skandinavien bis nach Nordafrika [*De majoribus nostris deque Atlantide. Marium imperium a Scandinavia ad Africam Nordicam*]. 90 Abb., 168S., Klinkhard & Biermann. Berlin (1934). **a - 60**

In diesem neuen Werke über die Atlantis führt Vf. einige Hypothesen vom historischen Standpunkte aus an und behauptet ausserdem seinerseits an Hand von ausgeführten Ausgrabungen und Untersuchungen, dass die Atlantis im südlichen Tunis, und zwar im Tritonschen Tale, sich befunden habe. Dieselbe Meinung ist seinerzeit auch von Berious und Vivien de Saint-Martin ausgesprochen worden. Vf. behauptet die « Atlanten » seien nördlicher Herkunft gewesen, « Leute der Frya », deren Typus noch heutzutage in einigen Berbern erkennbar sei.

**Hoever Otto** - Von der Galiot zum Fünfmaster. Unsere Segelschiffe in der Weltschiffahrt von 1780-1930 [*Navigationis velicae historia* (*1780-1930*). Zahlr. Ill. u. Abb. 518 S., Angelsachsen-Verl. Bremen (1934). **a - 63**

Vf. bringt in den sieben Kapiteln seines Werkes eine erschöpfende Darstellung der Entwicklung der Schiffstypen innerhalb des genannten Zeitraums. Es wird die deutsche Segelschiffahrt geschildert mit besonderer Berücksichtigung der auf der Weser gebauten und beheimateten Segelschiffe. Es sind auch ausländische Segelschiffe beschrieben, weil ihre Typen die Voraussetzung des Baues einiger deutschen Segelschiffe gewesen sind. Ausser der Bauart, beschreibt Vf. auch das Schicksal einzelner Schiffe bis auf ihr Ende, schildert ihre Reisen und Erfolge und die Wechsel des Reeders oder der Flagge.

(S. « Besprechung » v. E. Römer, Seewart, IV, 1, 22-23, 1935).

**Houben H. H.** - Sturm auf den Südpol. Abenteuer und Heldentum der Südpolfahrer [*De exploratoribus regionum antarcticarum eorumque fortunis et rebus gestis*]. 3 Kart., 46 Abb., 306 S., Verl. Ullstein. Berlin (1934). **a - 64**

Lebensvolle Darstellung der gewaltigen Leistung der Entdeckungsgeschichte der Antarktis von James Cook bis zum Admiral Byrd über einen Zeitraum von 260 Jahren.

**Mc Culloch J. H.** - A Million Miles in Sail: Being the Story of the Sea Career of Captain G. C. Dixon [*De Cap.* G. C. Dixon *eiusque vita maritima*]. Ills., 256 pp., Hurst & Blacket. London (1933). a - 103

The book contains an account of forty years of sail, since Captain Dixon went to sea as a child in the « Vaughin », a 900-ton barque commanded by his father sailing from Liverpool to Valparaiso in 1881, and left, as master, the four-masted barque « Elginshire » in Liverpool in 1919. The book represents a very interesting account of the later days of sail, and contains some valuable observations, such as data concerning the height and length of seas, a chapter on the Sargasso, remarks on icebergs, and notes on the bottle-paper records which Captain Dixon kept for 15 years for the U. S. Hydrographic Office.

**Moreland W. H. (Edit.)** - Floris (Peter), his Voyage to the East Indies in the Globe 1611-1615 [*De navigatione Petri* Floris *in Indias Orientales* (*1611-15*). Publ. Hakluyt Soc., LXXIV, 2nd ser., 164. London (1934). **a - 109**

Contemporary translation of his journal edited by Moreland. Peter Floris is Pieter Willemsz. van Elbing who was in the Dutch Service of India about 1600 to 1608. The expedition dealt with here was undertaken on behalf of the East India Company, in London from England to the Coast of Coromandel.

**Murray Marischal** - Ships and South Africa: A Maritime Chronicle of the Cape, with Particular Reference to Mail and Passenger Liners from the Early Days of Steam down to the Present [*Chronica maritima promunturii Bonae Spei. Agitur particulatim de navibus tabellariis et vectoriis a temporibus inventionis navium vaporalium in tempus hodiernum*]. 332 ills., xxvi + 360 pp., Univ. Press. Oxford (1933). **a - 110**

In the first part of his work the author gives a history of steam navigation to South Africa from the year 1825 and tells in the same time the story of the development of the steamship companies giving also an account of the most glorious voyages performed by different ships belonging to those companies; in three chapters he deals with the story of the part taken by South African shipping in the Great War, while two others contain accounts of shipwrecks and disasters. The second part of the volume has two sections, of which the first is entitled « The Shipping Lines and their Story », and the second gives some information on 190 vessels in alphabetical order which have belonged to the Union Castle, and Union Castle Lines.

**Neeser Robert W.** - Historic Ships of the Navy. « Constellation » [*De historicis navibus ad classem pertinentibus. Navis nomine* « Constellation »]. U. S. Nav. Inst. Proc., LXI, 386, 539-544. Annapolis, Md. (1935). **a - 111**

Story of the first « Constellation », a sailing frigate of 36 guns built by « the War and Treasury Departments » at Baltimore, Md., under the terms of the Act of March 27, 1794. Dimensions, armament and staff of the frigate. Its life and career until October 30, 1917, day on which her name was changed to « Old Constellation », in order that her original name might be perpetuated in the Navy. Brief account of the second « Constellation », a battle cruiser of 43,500 tons displacement, and the keel of a third « Constellation » laid on August 18, 1920.

This volume contains the history of Portuguese exploration and covers the whole period of Portuguese expansion from the voyage to the Canaries in 1341 to the first landing in Japan in 1568. It brings to full significance the effort whereby Portugal « discovered half a world in the course of a century ». The author discusses also the Portuguese claim to the discovery of Australia and deals in the last chapter of his work with the nautical and cartographical science of the Portuguese and with the ships and seamen of the period of the great voyages.

Description of a new type of fog beacon invented by Lesli Toplis, London, whose installation has been approved by the Port of London Authority. Greater demand of Marine Training Establishments.

**Brown, Son & Ferguson Edit.** - Astronomical Ephemeris and Nautical Almanac [*Ephemerides astronomicae, manachus nauticus*]. Tables, 608 pp., Brown, Son & Ferguson, Glasgow (1934). **a - 191**

The present volume contains all necessary information for the sun, moon, stars, and planets grouped by months. It gives also the mean places of stars, 1935; right ascension and declination of selected fixed stars; moonrise and moonset, phases of the moon, etc.

**Brutel de la Rivière B.** - Eenige beschouwingen over de ’Kleine Zeewart [*Considerationes de parva navigatione maritima*]. Tijdschr. voor Econ. Geogr., XIV, 15 nov., 333-335. ’s–Gravenhage (1933). **a - 192**

**Burgess J. Tom.** - Knots, Ties & Splices [*De nodis, ligaturis, plumbaturis*]. E. P. Dutton & Co. New York (1934). **a - 193**

A handbook for all who handle ropes. Revised and rewritten by Commander J. Irving.

**Caldo Lorenzo & Sconzo Pasquale** - Misure del diametro orizzontale del Sole [*De mensuris diametri horizontalis Solis*]. Boll. Soc. Sc. Nat. ed Econ., XV (1933), 19-23. Palermo (1934). **a - 194**

Si dà specificamente conto delle misure del diametro solare eseguite all’Osservatorio di Palermo nell’anno 1932. I risultati delle osservazioni non consentono ancora, per la scarsità del materiale raccolto, emettere un qualsiasi giudizio intorno alla variabilità del diametro solare.

**Cañete (de) del Pinar** - Observaciones de precision con el sextante [*De perfectis observationibus peragendis, sextantis auxilio*]. Fig. e tav., 159 pp., Observatorio de Marina. San Fernando (1934). **a - 195**

Seconda edizione sull’impiego del sestante per osservazioni di precisione. L’opera fu redatta per la prima volta nel 1895: espone in dettaglio il metodo di Gauss delle altezze eguali e dà molti esempi di calcoli nonchè una teoria degli errori del sestante.

**Castagnaro Michele** - Osservazioni inerenti allo spostamento della circonferenza d’altezza causato da un errore del cronometro [*De circumferentia altitudinis. Quaestio de eius amotione, erroris chronometrici causa*]. 8 fig., Riv. Maritt., LVII, suppl. tecnico, fasc. luglio-agosto, 49-57. Roma (1934). **a - 196**

Disamina accurata di codesto errore prodotto da quello del cronometro, disamina non sempre fatta a fondo sui trattati. L’A., anzi, conclude che alcune asserzioni fatte comunemente non rispondono alla realtà.

**Clark E. S.** - An Inexpensive Handmade Sextant [*De sextante manufacto nulla impensa*]. 9 fig., U. S. Nav. Inst. Proc., LX, 377, 908-912. Annapolis, Md (1934). **a - 197**

Hints for the construction of a wooden frame sextant, the prize of which is Doll. 0.68. Materials and tools necessary for construction.

**Collins E. B.** - A New Formula for Azimuth [*De nova quadam formula azimuthali*]. U. S. Nav. Inst. Proc., LX, 377, 973. Annapolis (1934). **a - 198**

This formula, based on haversines, is: Haversine $Z = \sin (S - L) \sin (S - h) \sec h \sec L$. This haversine of the azimut is now taken directly from the tables. An example is given.

**Conrad Fritz** - Astronomische Ortsbestimmung und Kimmtiefenmessung auf See [*Puncti determinatio astronomica mensuraque depressionis horizontis ad mare*]. 40 Abb., 9 Taf., Veröff. Marineobserv. Wilhelmshaven, 7-111. Berlin (1933). **a - 199**

I. Einleitung. II. Arbeitsplan, Beobachtungsgerät, Hilfspersonal. III. Methoden. IV. Die Kimmtiefen: 1. Statistische Untersuchung. 2. Ausgleichung. 3. Vergleich der Ergebnisse verschiedener Kimmtiefenuntersuchungen. V. Die astronomischen Beobachtungen: 1. Der terrestrische Schiffsort. 2. Das Material, seine Aufbreitung, sein Genauigkeitsgrad. 3. Ausgleichung. 4. Beziehung der Kimmabstände zu den meteorologischen Elementen. 5. Vergleich der Beobachtung und Berechnung der Kimmtiefen. VI. Zusammenfassung. – Literaturverzeichnis.

**Craven Francis S.** - Graphic Interpolation in Azimuth Tables [*Interpolatio graphica tabularum azimuthalium*]. 6 tables, U. S. Nav. Inst. Proc., LXI, 384, 222-228. Annapolis, Md. (1935). **a - 200**

Description of a graphic method of interpolation in azimuth tables, which is not only simple and free of mathematics, but also faster than arithmetical interpolation when solving a number of azimuths, as when preparing a time-azimuth-curve for swinging ship. The present exposition of the method is a demonstration through the solution of several problems, rather than an academic explanation. The method utilizes cross-section paper, and the illustrations of the problems solved were prepared with this kind of paper.

**Cugle Charles** - Cugle's Two–Minute Azimuths: Latitude 0º to 55º; Declination 0º to 23º; Same and Contrary Names [*Tabulae azimuthales*]. E. P. Dutton & Co. New York (1935). **a - 201**

Author gives an Azimuth Table which is interpolated so closely that he believes that the two-minute intervals of time will do away of all interpolations now required in the finding of Azimuths. The book is set in large plain type which can be read without the use of reading spectacles and is legible at night.

**De Pace V.** - I radiogoniometri [*De apparatibus radiogoniometricis*]. Alta Frequenza, 14 fig., III, 5, 598-621. Milano (1934). **a - 202**

Si dà cenno delle idee e dei principi da cui è derivata la radiogoniometria, e si mette in rilievo che questo ramo della radiotecnica trova nella nautica le sue applicazioni più importanti (determinazione del punto nave). Si richiamano poi i punti principali della teoria del radiogoniometro, con particolare riferimento ai radiogoniometri navali. Si tratteggia infine la teoria delle deviazioni nei rilevamenti radiogoniometrici, dovute all'influenza dello scafo e dei conduttori di bordo investiti dall'onda elettromagnetica della stazione da rilevare.

**Dijèvre** - Réflexions sur la navigation de demain [*De futura arte navigandi*]. Rev. Marit., août, 184-203. Paris (1934). **a - 203**

**Driencourt L.** - Le Planisphère de Mercator et la Navigation maritime ou aérienne par relèvements radiogoniométriques pris du bord [*D-planisphaerio Mercatoriano deque navigatione mari tima et aëria ex relevationibus radiogoniometricis in navi peractis*]. 1 pl., h. t., Ann. Hydrogr., XIII Ser. III, 87-97. Paris (1934). **a - 204**

Généralité sur le problème des projections utilisables pour le point du navire fait à l'aide de relèvements radiogoniométriques pris du bord. Formules à employer pour le calcul simultané par points des deux séries de courbes d'un calque spécial en projection de Mercator. Navigation dans les régions polaires. Formules pour le calcul des séries de courbes pour le calque dans ces régions.

**Egal André** - Mesure de la vitesse des vaisseaux marins, sous-marins, aériens par couples thermo-électriques compensés [*De navibus, submarinis, aëronavibus. Quaestio de dimensa velocitate per paria thermoelectrica compensata*]. 3 fig., Génie Civ., CVI, 12, 286-287. Paris (1935). **a - 205**

L'A. avait fait connaître précédemment une méthode de mesure de la vitesse des fluides et de l'énergie thermique qu'ils peuvent transporter avec des dispositifs, dans lesquels l'appareil est fixe et le liquide mobile. Dans la présente note il illustre l'application de son appareil dans un cas contraire, c.-à.-d. lorsque le fluide est fixe et l'appareil mobile, et plus précisément, en montant son dispositif sur un vaisseau marin, sous-marin ou aérien, et en réalisant ainsi un nouveau loch électrique.

**Fallot Maurice** - Les alliages fer-platine. Point de Curie et moments magnétiques [*De ferri cum platino mixtionibus. De puncto* Curie *deque momentis magneticis*]. 1 fig., C. R. Acad. Sc., CIC, 2, 128-129. Paris (1934). **a - 208**

Il s'agit des alliages réversibles et irréversibles suivant le % de platine.

**Fawcett R. P.** - The Cathode Ray Direction Finder [*De radiogoniometro cum radio cathodico*]. Naut. Magaz., Sept., 208-210. Glasgow (1934). **a - 209**

**Feldhusen W.** - Zur Vereinfachung der nautisch-astronomischen Rechenarbeit auf See [*De marinis calculis nautico-astronomicis ad simplicitatem ducendis*]. 2 Abb., 3 Taf., Seewart, IV, 1, 14-19. Deutsche Seew. Hamburg (1935). **a - 210**

Vf. macht einen Vergleich zwischen der Methode zur Vorausberechnung von Gestirnshöhen, die sich auf die Benutzung der Tafel über die « Aenderungen von Gestirnshöhen in einer Zeitminute » stützt und von welcher im Heft 4 des « Seewart », 3. Jahrg. berichtet wird, und der vom Vf. vorgeschlagenen Methode (s. H. 4 u. 5 des « Seewart », 1933), die eine « Sehnenmethode » ist. Der Vf. sucht hier die folgenden Fragen zu beantworten: 1. Wie gross sind die maximalen Fehler der beiden Methoden bei gleichem Stundenwinkelintervall ? und 2. Wie gross sind bei gleichem maximalem Fehler die zugehörigen Stundenwinkelintervalle ?

**Freiesleben H. C.** - Recherches sur la dépression de l'horizon [*Inquisitiones in depressionem horizontis*]. 2 fig., Rev. Hydrogr., XI, 2, 124-128. Monaco (1934). **a - 211**

Extrait de Der Seewart. 2, S. 60 Hamburg (1934). Aperçu de l'ensemble des recherches faites jusqu'ici sur la valeur de la dépression de l'horizon de la mer en fonction des diverses causes décelables avec les moyens dont on dispose à bord. Le contre-amiral dans la retraite Dr. Conrad a entrepris dernièrement des études à ce propos dont l'A. donne les résultats.

**Freiesleben H. C.** - Nautische Spezialrechenschieber [*Regula peculiaria pro calculis nauticis*]. 1 Taf. Seewart, III; 6, 262-267. Hamburg (1934). **a - 212**

Beschreibung des Baues und des Gebrauchs vom Azimutrechenstab von R. Nelting, welcher auf der Merkatorfunktion aufbaut; Schilderung der Position Line Rule von Bygrave, deren Zweck es ist, für die Standlinienbestimmung nach der Höhenmethode Höhe und Azimut zu berechnen, und der französischen Standortrechenmaschine Le Sort. Die vorliegenden Ausführungen zeigen verschiedene Möglichkeiten, das Rechnen nach Art eines Rechenschiebers durch besondere Konstruktionen für Navigationsrechnungen auszunützen.

**Gadow** - Azimut und Grosskreisberechnung [*De calculis azimuthalibus deque elementis circuli maximi*]. Seewart, 1, 1-8. Hamburg (1934). **a - 213**

**Giulietti Giulio** - Di una particolare applicazione di materiali magnetici presentanti alta permeabilità in campi magnetici deboli. Bussola acustica [*De quadam peculiari applicatione materiarum magneticarum, alta permeabilitate praeditarum, in campis magneticis debilibus. Buxida acustica*]. 3 fig., Rend. R. Ist. Lomb. Sc. e Lett., serie II, v. LXVII, 11/15, 498-502. Milano (1934). **a - 214**

Indicato il concetto base del dispositivo ideato dall'A. per la costruzione della sua bussola acustica, egli descrive l'apparecchio concretato ed indica i vari casi in cui può impiegarsi. Infine l'A. segnala che tale bussola si presta anche a raffronti di permeabilità magnetica tra metalli diversi e ad un particolare sfruttamento della corrente amplificata per azionare dispositivi elettromeccanici, destinati, per esempio, a manovre di direzione.

**Harms M.** - Zur Beobachtungstechnik des Libellensextanten [*Ratio sive technica observationum, sextantis libella praediti auxilio*]. Ann. d. Hydrogr., LXII, 1, 31-33. Berlin (1934). **a - 215**

Auslegung an Hand der von Herrn Dr. Michler mitgeteilten Beobachtungsreihen mit Hilfe des Libellensextanten (« Ann. d. Hydrogr. », 1933, S. 254), die zu gerade entgegengesetzten Folgerungen führt, mit besonderer Berücksichtigung des Gebrauches vom Libellensextanten in der Luftschiffahrt.

**Hernández J.** - La visión a través de la niebla [*Visus per caliginem*]. Rev. Gen. de Marina, LVII, marzo, abril y mayo. Madrid (1934). **a - 216**

**Hinkel Hulbert** - Longitude by H. O. 211 [*Tabulae longitudinis*]. U. S. Nav. Inst. Proc., LXI, 386, 499-500. Annapolis, Md. (1935). **a - 217**

The author recommends the equation

$$\csc\frac{t}{2} = \frac{\sec s \csc (s-h)}{\sec \varphi \csc p}$$

which, *mutatis mutandis*, is employed in astronomical navigation since a very long time.

**Huber Anton** - Kimmtiefenmessungen auf der Fahrt des Vermessungsschiffes « Meteor » im Sommer 1928 nach Island und Grönland [*De dimensa horizontis depressione inter navigationem navis* « Meteor », *aestate 1928, in Irlandiam et Groënlandiam*]. 3 Tab., Veröff. Mar. Observ. Wilhelmshaven, « Kimmtiefenmess. Reichsmarine », 10-16. Berlin (1930). **a - 218**

Bericht über die vom Vf. im Hochsommer 1928 auf der Reise des Vermessungsschiffes « Meteor » nach Island und Grönland ausgeführten Kimmtiefenbeobachtungen in Verbindung mit Messungen der Luft- und Wassertemperatur mit zwei Pulfrichschen Kimmtiefenmessern mit Trommelablesung. Einige Ausführungen über die Genauigkeit der Kimmtiefenmessungen und über die Faktoren, die sie beeinflussen. Schwankungen der Temperatur mit der Höhe. Nutzen der Temperaturmessung in Masthöhe zur Berechnung der Kimmtiefe oder eventuell zur Verbesserung der Korrektion.

**Hury C. & Taylor C. E.** - Navigational Compasses Gyro versus Magnetic [*Buxidae gyroscopicae in locum buxidarum magneticarum*]. Many text figs & figs. on pl. Journ. Am. Soc. Nav. Engrs., XLVI, 4, 417-450. Washington (1934). **a - 219**

After an historical review of navigational compasses there follows a small treatise on gyrocompasses.

**Immler W.** - Die Grad-Uhr [*Horologium in gradus divisum*]. 4 Tab., Ann. d. Hydrogr., LXIII, 6, 245-247. Berlin (1935). **a - 220**

Vf. schlägt vor, für astronomische Ortsbestimmungen ein Chronometer zu gebrauchen, welches, ähnlich wie Sekunden-, Minuten- und Stundenzeiger, ein grosses in Bogenminuten geteiltes Zifferblatt hat, ein zweites Zifferblatt mit den Zehnergraden, und ein drittes, das die Einergrade enthält, und gibt einige Beispiele der Ortsberechnungen mittels eines solchen Chronometerwerkes mit Gradzifferblatt an.

**Imperato I. E.** - Arte Navale [*Ars nautica*]. 2 vol., Hoepli. Milano (1934 & 1935). **a - 221**

**Jacobick K. J.** - Der Plath'sche Libellensextant in der Bordpraxis [*De sextante libella praedito e systhemate* Plath *quoad navigationis practicam*]. 1 Abb., 2 Tab., 1 Taf., Seewart, IV, 1, 10-14. Deutsche Seew. Hamburg (1935). **a - 222**

Vf. behauptet, dass der für die Luftnavigation mit gutem Erfolg von der Firma Plath herausgegebene Libellensextant in seiner heutigen Vollkommenheit auch die Nautiker der Seefahrt interessieren muss, und berichtet über die Ergebnisse einer Ausprobierung dieses Instrumentes an Bord in der Praxis, die er durchgeführt hat. Sämtliche Beobachtungen sind mit dem Trommelsextanten Nr. 13401 durchgeführt worden und haben gezeigt, dass der neue Libellensextant ein nautisches Instrument von grosser Wichtigkeit ist, welches unbedingt zur sicheren Navigierung beitragen wird.

**James Jules** - A Handy Aid to the Navigator [*Instrumentum quiddam practicum navigatoribus auxilium*]. 5 figs., U. S. Nav. Inst. Proc., LXI, 386, 493-495. Annapolis, Md. (1935). **a - 223**

Description of a mechanical application of a logarithmic scale printed on the bottom of Mooring and Manoeuvring Board n. 2665, which greatly facilitates its use and expands its field of applications. It makes available to all officers a handy device for the exact conversion of all sorts of units with no interpolation whatsoever. If adopted for navigational work and piloting, it will be found to be practically indispensable.

**Jansen Frank** - The Pratt Protractor and Plotting Scale [*Apparatus reportator e systhemate* Pratt *atque modulus ad delineandum*]. 5 figs., U. S. Nav. Inst., LX, 382, 1740-1744. Annapolis, Md. (1934). **a - 224**

Mr. Herbert Pratt, one of the Author's pupils at the University of Southern California, has invented an instrument which will enable the navigator not only to project the line of position but also to plot the line of position in his workbook or on a blank sheet of paper for any latitude from the equator to 60° north or south. Description and rules are given here.

**Jones Spencer H.** - Aluminium-Surfaced Mirrors in Astronomy [*De speculis superficie praeditis alluminica pro astronomia*]. Nature, CXXXIV, 3388, 522. London (1934). **a - 225**

On the probability that aluminium-surfaced mirrors will in time entirely displace silvered mirrors for astronomical purposes generally. Process perfected by R. Ritschl.

Calcul de la déclinaison du soleil et de l'équation du temps. Tableaux de la déclinaison du soleil et de l'équation du temps pour l'année 1934. Quelques remarques concernant l'altitude, la réfraction, la parallaxe et la différence de l'angle horaire du centre et du bord supérieur du soleil. Tableaux des différences des angles horaires du centre et du bord supérieur du soleil. Tables crépusculaires.

**Marguet F.** - Sur la courbe d'égal azimut et son emploi en navigation [*De curvatura aequali praedita* azimut *eiusque utilitate quoad artem navigandi*]. 1 fig., C. R. Acad. Sc., CCI, 1, 36-38. Paris (1935). **a - 233**

Généralité sur les courbes d'azimut. Cas particuliers. Erreurs sur la position des courbes dans ces cas.

**Marguet F.** - Le Point azimutal [*Positio navis per* azimut]. Rev. Marit., janv., 60-65. Paris (1935). **a - 234**

**Martinez G.** - Note sul calcolo dei sistemi ottici. III. Sistemi di lenti sottili e applicazioni della teoria del Seidel [*De systhematis opticis eorumque calculo. Lentes subtiles et theoria Seideliana*]. Boll. dell'An. Ottica It., a. VIII, 4-5, 371-406. Firenze (1934). **a - 235**

Formole del 1° ordine per un sistema di lenti sottili. Aberrazioni di una sola lente sottile, con rifrazione centrale.

**Mason W. A.** - Fallacy of the Time Sight [*De erroribus in observationibus peragendis quoad coeli condiciones*]. 1 fig., U. S. Nav. Inst. Proc. LXI, 383, 76-79. Annapolis, Md. (1935). **a - 236**

In a previous article (U. S. Nav. Inst. Proc. June, 1934) the author has called the attention to the fact that the time sight is still in general use and preferred by a majority of officers of the U. S. Merchant Marine. In the present article he compares the results obtained from an observation for longitude worked out by means of a time sight, with observations worked out by using any of the line of position methods. He emphasizes the advantages of the last.

**Mason W. A.** - Two Old Lights Rejuvenated [*De instauratis duabus veteribus observationibus*]. 1 fig., U. S. Nav. Inst. Proc., LXI, 386, 523-526. Annapolis, Md. (1935). **a - 237**

The author rejuvenates the back sights, viz. the observations made with the sextant while facing the horizon in the opposite direction to that of the body observed. He also deals with the observations of sunset or of sunrise when the lower or upper limb of the sun is in the visible horizon. In such a case sextant is useless. Both these arguments were treated in old navigatory books.

**Masouin M. J.** - Manuel de navigation côtière. Préface de M. P. Renaud [*Liber manualis de navigatione ad litora*]. Nombr. fig., 1 pl., vi 253 pp., Gauthier-Villars. Paris (1934). **a - 238**

**Matousseviteh N.** - Conditions de la navigations dans le Nord [*De navigationis conditionibus in regionibus septentrionalibus*]. (En russe). Morsk. Sborn., 10, 114-118. Leningrad (1934). **a - 239**

Conditions de la navigation le long de la côte de Mourman et dans la Mer Blanche.

**Maxwell P. S. E.** - Sextants et Miroirs [*De sextantibus et speculis*]. 1 pl. avec 4 fig. h. t., Rev. Hydrogr., XI, 2, 139-140. Monaco (1934). **a - 240**

Sur les derniers progrès des sextants, particulièrement à l'égard des miroirs. L'Hydrographic Department de la Marine Royale Britannique a pris à l'essai des sextants hydrographiques et des sextants de navigation.

**Mc Isaacs Alvin C.** - Meridian Altitudes by « H. O. 208 » [*De meridianis altitudinibus per « H. O. 208 » calculatis*]. U. S. Nav. Inst. Proc., LXI, 385, 384. Annapolis, Md. (1935). **a - 241**

Author gives a rule to simplify the application of « Meridian altitude », which is the title for a short and simple form to compute latitude, given by Dreisonstock in « H. O. 208 ».

**Meldau H.** - Der Anschützkreiselkompass, Selbsteuer und Kursschreiber [*Buxidae gyroscopicae autoregulatae quae cursum maritimum in tabulis referunt, a Societate* Anschütz *constructae*]. 44 Abb., 84 S., Verl. A. Geist, Bremen (1935). **a - 242**

Eine wesentlich neue selbständige Fassung der bekannten Darstellung des Kreiselkompasswesens im Lehrbuch der Navigation von Meldau und Steppes, 1931. Neu ist bloss ein Absatz über die Zahlenverhältnisse im Kreiselkompass, die die begrifflichen Zusammenhänge zweckmässig erweitern.

**Melentiev P. V.** - Nomographie [*Nomographia*] (En russe). Moscou (1933). **a - 243**

**Michler Herbert** - Zur Kenntnis der Luftbewegung in Schiffsräumen. Beitrag zur Laderaum–Klimatologie [*De aëris motibus cognoscendis in navis partibus interioribus*]. 1 Taf. a. T., Ann. d. Hydrogr., LXII, 11, 457–461. Berlin (1934). **a - 244**

Ergebnisse von Untersuchungen über die Luftbewegung im Laderaum der Schiffe, in ihrer Abhängigkeit vom Lüfter, der Zuführung frischer Luft und bzw. der Umwälzung der Raumluft. Es wurden Messungen der Wirkung dieser verschiedenen Faktoren ausgeführt, und ausserdem die wesentlichen Einflüsse auf Richtung und Stärke des Luftzuges sowie auf die Ausdehnung der Totluftfelder der verschiedenartigen Anordnung der Lüfter, insbesondere ihrer Einführung in Laderäume, ferner auch der Menge, Stauung und Art der Ladung des betreffenden Raumes untersucht.

**Monfraix M.** - Étude synthétique des compas gyrostatiques [*Explicatio per synthesim buxidae gyroscopicae*]. Bull. Ass. Techn. Mar. & Aéron. XXXIII, 109–133, Paris (1934). **a - 245**

Caractéristique des systèmes gyroscopiques, description de divers types.

**Mueller Hans** - Ueber die Behandlung von Mittelwerten aus einem Beobachtungsmaterial von geringem Umfang. 3. Mitteilung mit einem Abschnitt über Theorie und Praxis der Korrelationsrechnung [*Agitur de confectione valorum mediorum ab observationibus parvi momenti provenientium. Communicatio in qua paragraphus est adiunctus de theoria et practica quoad calculum correlationum*]. 5 Tab., 1 Taf., Ann. d. Hydrogr., LXIII, 6, 224-234. Berlin (1935). **a - 246**

Vf. gibt noch einmal ein voll durchgerechnetes Beispiel über die Anwendungsweise des P-Kriteriums (S.: « Ann. Hydr. », 1934, S. 418) mit besonderer Berücksichtigung der mittleren Fehler bei grossem Beobachtungsmaterial, bespricht das Verhältnis zwischen dem Regressionskoeffizienten und seinem mittleren Fehler und illustriert die Anwendung seines Kriteriums auch bei einem kleinen Beobachtungsmaterial. Nach diesem Abstecher zu den Fragen, die bei der Arbeit mit Korrelation auftauchen, gibt Vf. einige Methoden an, die die ausführliche Berechnung des Korrelationskoeffizienten stark erleichtern und doch allgemein nicht an Genauigkeit einbüssen.

**Mukiyama Daizô** - A Method of Sending Light Signals through Fog [*De signalationibus luminescentibus inter caliginem emittendis*]. 3 figs. Proc. Imp. Acad., X, 7, 407-409. Tokyo (1934). **a - 247**

An important study on the elimination of the scattering of the sun's radiation. The author intends to apply his method to the lighthouse system for ships and aircrafts of foggy lands.

**Petersen P.** - Meteorologische Navigation im Lichte der synoptischen Wetterkarte [*De meteorologia pro navigatione, tabulae synopticae meteorologicae auxilio*]. Seewart, IV, 2, 55-59. Hamburg (1935). **a - 248**

Weitere Beispiele (S.: « Hansa » 20, 17/V, 1930; « Der Seewart », 3, 1933 u. 3, 1934), welche es gestatten, den Wert der meteorologischen Navigation durchzuprüfen. Vf. berichtet über meteorologische Navigation an Hand von einer Auswahl der in den synoptischen Wetterkarten niedergelegten Wetterlagen während der sturmreichsten Monate des Jahres, Dezember bis Ende Februar.

**Pinto Leite** - L'astronomie nautique au Portugal à l'époque des grandes découvertes [*De astronomia nautica Lusitana aetate magnarum inventionum geographicarum*]. L'Astronomie, XLIX juin. Paris (1933). **a - 249**

**Podmore J. C.** - The Slide Rule for Ship's Officers [*Regulum calculatorium ad usum navium praefectorum*]. Figs. and tables, 1 pl., viii + 113 pp., Brown, Son & Ferguson, Ltd. Glasgow (1934). **a - 250**

A treatise on slide rules in general, and applications and examples of calculations for cargo, navigation and general use on board a ship both in port and at sea.

**Poisson H.** - Routes de terre et de mer à Madagascar [*Cursus maritimi et terrestres ad insulam* Madagascar]. Bull. Agence Générale des Col., XXVIe an., mai, 741-809. Paris (1933). **a - 251**

L'A. a accompli des nombreux voyages le long des côtes de Madagascar, et aux îles Mayotte et Europa.

**Prato Vittorio** - Nota circa la determinazione automatica del punto-nave [*De navis puncti determinatione automatica*]. Riv. Maritt., a. LXVII, 10, 91. Roma (1934). **a - 252**

L'A. corregge un'inesattezza in cui era incorso in un precedente articolo a riguardo di un giroscopio per la determinazione continua ed automatica delle coordinate geografiche del punto-nave.

**Romañá Antonio** - Medio siglo de progreso en la determinación de los elementos del movimiento del sol en el espacio, por el método de las velocidades radiales. I y II [*De progressibus semisecularibus in determinandis elementis quoad solis motus spatiales, methodus velocitatum radialium*

*auxilio. II Nota*]. 5 fig., 2 tab., Ibérica, 1067, 248-256. Barcelona (1935). **a - 253**

Continuación de un articulo publicado en el nº 1056, p. 59. *e*) Estudio del movimiento del Sol, deducido de las velocidades radiales de los diferentes tipos espectrales. *f*) Estudio del movimiento del Sol, deducido de las velocidades radiales de enjambres globulares y nebulosas extragalácticas. *g*) Estudio del efecto K. (Continuarà).

**Rust Armistead** - The Range or Direction Finder [*Apparatus distantiae et directionis indicator*]. Naut. Magaz, April. 300-303. Glasgow (1934). **a - 254**

**Schroeder Gustav** - Zur Vereinfachung der astronomischen Rechenarbeit auf See [*De calculis astronomicis marinis in simplicitatem reducendis*]. 1 fig., Seewart, IV, 2, 63-66. Hamburg (1935). **a - 255**

Einige Betrachtungen über die Anregungen von W. Felghusen und F. Wellmann über die Vereinfachung der nautisch-astronomischen Rechenarbeit auf See, welche im « Seewart » veröffentlicht worden sind. Vf. wundert sich, dass keiner der beiden Verfasser die Meridianbreite erwähnt hat und illustriert im vorliegenden Vortrage die Rechenarbeit bei dieser Breite, die « am einfachsten ist ».

**Severino Giuseppe** - Alcune considerazioni intorno al tracciamento della retta d'azimut [*Considerationes de recta delineanda azimuthali*]. Riv. Maritt., LVII, suppl. tecnico, fasc. luglio-agosto, 59-71. Roma (1934). **a - 256**

Breve studio storico-scientifico sul tracciamento della retta d'azimut. L'A. mette in evidenza la priorità del metodo del Comandante Modena, ne mette in rilievo i vantaggi e mostra una semplificazione del metodo stesso.

**Shankland E. C.** - Marconi's Wireless Pilot [*Apparatus radio-pilotus e systhemate* Marconi]. 1 fig., Nature, CXXXIV, 3384, 387-388. London (1934). **a - 257**

On the latest experiences of Marconi on wireless fog beacons. The last apparatus capable to provide a' bee' line course for a ship entering harbour in fog, and whose transmitter may be swung in azimuth to provide a silent zone in order that a ship may navigate at right angles, if necessary.

**Sigatchov N. I.** - Utilisation des instruments électriques de navigation dans les hautes latitudes [*Quo modo utitur instrumentis electricis pro navigatione in altis latitudinibus*]. (En russe). 4 diagr., Morsk. Sborn., 7, 88-97. Leningrad (1934). **a - 258**

**Taylor C. E.** - Simplified Altitude and Azimuth Tables [*Tabulae altazimutales simpliciores factae*]. U. S. Nav. Inst. Proc., LXI, 389, 928-933. Annapolis, Md. (1935). **a - 259**

The author has undertaken a compilation of tables that combine the advantages of the Ogura altitude tables and the Dreisonstok tables for azimuth. The arrangement of tables is shown in accompanying illustrations.

**Thorade A.** - Bericht über Kimmtiefenbeobachtungen an Bord des Vermessungsschiffes « Meteor » auf der Islandfahrt, 29. VII. 6. IX. 1929 [*Relatio de observationibus quoad horizontis depressionem in navi peractis nomine* « Meteor », *navigatione in Islandiam perdurante, a die 29 Julii ad diem 6 Octobris 1929*]. 14 Abb., 3 Tab., Veröff. Mar. Observ. Wilhelmshaven. « Kimmtiefenmess. Reichsmarine », 17-32. Berlin (1930). **a - 260**

I. Instrumente und Beobachtungsmethoden: 1. Kimmtiefenmessungen. 2. Temperaturbeobachtungen. II. Ergebnisse der Beobachtungen: 1. Kimmtiefenmessungen auf der Brücke. Kritische Bemerkungen: Abweichung der vom Vf. abgeleiteten Formeln von denen, die Kohlschütter und Huber aufstellten. Zusammenfassend behauptet Vf.: A. eine Abhängigkeit der Kimmtiefe vom Unterschiede der Temperatur in Augeshöhe und der Wassertemperatur ist nur sehr undeutlich oder gar nicht zu erkennen, B. Massgebend ist der Temperaturunterschied zwischen der Wasseroberfläche und 1 m. darüber; C. Es scheint, als ob dieser Unterschied für Beobachtungen auf der Schanze doppelt so wirksam wäre als für Beobachtungen auf der Brücke und im Mars. D. Die Berücksichtigung der Temperaturunterschiede bedeutet nur eine ganz geringe Verbesserung der Formel für die Kimmtiefe; E. Letztere beruht auf der nicht gerechtfertigten Annahme, dass die Temperatur sich proportional der Höhe ändere. III. Ausblick: 1. Kimmtiefen; 2. Temperaturschichtung.

**Ullrich W.** - Die wichtigsten Regeln für die Behandlung der Magnetkompasse an Bord [*Regulae majoris momenti circa buxidas in navibus constitutas*]. Seewart, IV, 1, 2-6. Deutsche Seew. Hamburg (1935). **a - 261**

Zusammenstellung in 10 Regeln der wichtigsten Punkte für die Behandlung von Magnetkompassen an Bord; im Anschluss an dieselbe werden noch einige kurze Erläuterungen gegeben, soweit solche zum besseren Verständnis der Regeln notwendig erscheinen.

**Van Patten H. T.** - The Slide Rule in Navigation [*Regulum logarithmicum pro navigatione*]. U. S. Nav. Inst. Proc., LX, 378, 1104. Annapolis Md. (1934). **a - 262**

The A. emphasizes the use of the slide rule for navigation purposes.

**Waterman John B.** - Gulf Essential Trade Routes [*Cursus commercialis maximi momenti ad Sinum Mexicanum*]. 6 figs., Naut. Gaz., CXXIV, 11, 7-10. New York (1934). **a - 263**

Outstanding factors in traffic and transportation. Divisions of the coastal section of the Gulf: Texas and Sabine-New Orlans-Gulport, Mobile, Pensacola, Panama City and Tampa. Most important steamship lines. Steamships « West Hika » and « Topa Topa ».

**Weems P. V. H.** - Comparison of British and American Almanacs [*Comparatio inter ephemerides Anglicas et ephemerides Americanas*]. Naut. Magaz., March., 231-237. Glasgow (1934). **a - 264**

**Weems P. V. H.** - Autour de l'Atlantique avec les Lindbergh [*Agitur de aërionavigatione circum Atlanticum una cum* Lindbergh]. 1 pl. h. t., Rev. Hydrogr., XI, 2, 115-118. Monaco (1934). **a - 265**

Moyens employés pendant la navigation, intéressant aussi les navigateurs de surface. Cartes marines et cartes topographiques. Instruments utilisés. Equipement radioélectrique. Le radiogoniomètre. Equipement pour la navigation astronomique. Précision de l'estime. Schème du parcours Bathurst-Natal avec exemple de calcul d'observation.

**Weems P. V. H.** - The Terrestrial Triangle [*Triangulus terrestris*]. 2 figs., U. S. Nav. Inst. Proc., LXI, 386, 533-534. Annapolis, Md. (1935). **a - 266**

After having pointed out that, since the end of the trail in celestial navigation is the plotting of position lines on a terrestrial chart, all celestial triangle calculations must first be converted to the terms and units used with terrestrial chart work, author illustrates, on hand of 2 graphs, a simple method for tabulating the latitudes and the longitudes of the geographical or sub-stellar position of heavenly bodies rather than the Greenwich hour angles and declination. In a graph he shows the earth and celestial sphere showing altitude, latitude, and the relation between the celestial triangle and the terrestrial triangle.

**Whitehead T. N.** - The Design and Use of Instruments and Accurate Mechanism [*De praecisione in instrumentis mechanicis construendis. Agitur etiam de eorum utilitate*]. xii 283 pp., The Macmillan Co., New York (1934). **a - 267**

The book is arranged in two parts. The first is devoted to a discussion of the various errors and the second to traits of design. The work is useful alike to the designer, to the instrument-maker, and to the operator or observer. There is much suggested in the matter of mechanical construction especially in Part II on design that is easy of apprehension to any mechanic, although a casual perusal of Part I is likely to discourage the reader not versed in mathematics. Descriptions of instruments, of methods of constructing them, all of which appear frequently throughout the volume, are very interesting to the user of finer instruments.

**Wolf E.** - Compensaçao rigorosa das Observaçoes em Alturas Iguaes para a determinaçao da Latitude-Hora [*Compensatio rigurosa observationum quoad aequales altitudines, ad temporis latitudinem determinanda*]. Anais Hidrogr., 1, 171-177. Rio de Janeiro (1934). **a - 268**

**Bureau Hydrographique International** - Abbreviations Used on Charts. U. S. Coast and Geodetic Survey - Abréviations employées sur les cartes. U. S. Coast and Geodetic Survey [*De abbreviationibus quibus utitur in tabulis ad* U. S. Coast and Geodetic Survey *pertinentibus*]. (In Engl., & French). Bull. Hydr. Int., V, 96. Monaco (1934). **a - 269**

Texte de la note que porte la carte n° 567 du Coast and Geodetic Survey (Wicomico River); Juillet 1934 en anglais et français.

**Deutsche Seewarte** - Bericht über die 57. Chronometer-Wettbewerbprüfung (1933/34) in der Deutschen Seewarte [*Relatio de LVII a comprobatione chronometrorum (1933/34) in* Deutsche Seewarte]. 1 Tab., Ann. d. Hydrogr., LXII, 6, 257-259. Berlin (1934). **a - 270**

Die Ergebnisse der Untersuchungen von 21 Chronometern sind in einer Tabelle zusammengestellt.

**Deutsche Seewarte** - Azimut des Nordsterns [*Arctos minor eiusque* Azimuth]. 1 Taf., Seewart, III, 6, 275-276. Deutsche Seewarte. Hamburg (1934). **a - 271**

Veröffentlichung der Tafel 3 des Nautischen Jahrbuches: Azimut des Nordsterns in einer neuen Form, die zweckmässiger ist und die Benutzung der Tafel vereinfacht. Die Aufnahme der Tafel in der hier vorliegenden Form ist für die kommenden Jahrgänge des Nautischen Jahrbuchs in Aussicht genommen.

**Deutsche Seewarte** - Beiträge zur Küstenkunde: Zambuanga [*Contributiones in litora studenda:* Zambuanga]. 2 fig., 1 tab., Seewart, III, 6, 278-288. Deutsche Seewarte. Hamburg (1934). **a - 272**

Bericht über Landmarken, Ansteuerung, Leuchtfeuer, Lotsen und Schlepper, Quarantäne, Ankerplatz auf der Reede, Gezeiten, Wind und Wetter, Klima, Hafenanlagen, Stromrichtungsanzeiger, Dockanlagen, Handelsverkehr, Schiffsausrüstung und telegraphische Verbindungen von Zambuanga, 6°54′ N-Br und 122°5′ O-Lg, auf dem süd-westlichen Ausläufer der Mindanao Insel, auf der Südspitze der Zambuanga Halbinsel, an der Basilan Strasse. Die Angaben sind auf Grund eines Informationsmaterials verschiedener Herkunft zusammengestellt worden.

**Hydrographic Service** (Libri novi). Tokyo (1933-34 & 1934-35).

**International Hydrographic Office. Bureau Hydrographique International** - Exhibition of Instruments. Exposition d'Instruments [*Expositio instrumentorum nauticorum*]. Int. Hydrogr. Bull., 1, 1-2. Monaco (1935). **a - 275**

Liste de quelques instruments déjà parvenus au Bureau Hydrographique International de l'Angleterre et qui forment le premier noyau de l'exposition permanente de divers instruments modernes utilisés pour les opérations d'hydrographie, pour la météorologie et pour la navigation.

**International Hydrographic Office. Bureau Hydrographique International** - A Standardized Form of Notices to Mariners proposed by the Directing Committee of the I. H. B. Modèle-type d'Avis aux Navigateurs proposé par le Comité de Direction du B. H. I. [*Monitiones ad usum navigatorum. Liber-typus commendatus a Directione Officii Hydrographici Internationalis*]. (In Engl. & French). Int. Hydrogr. Bull. 1, 12. Monaco (1935). **a - 276**

Information au sujet des réponses parvenues au Bureau Hydrographique International à sa Lettre–Circulaire n° 1-H de 1934.

**Istituto Idrografico della Regia Marina** - Effemeridi astronomiche ad uso dei naviganti per l'anno 1935 [*Ephemerides astronomicae ad usum navigatorum, a. 1935*]. vii-217 pp., Tip. dell'Ist. Idrogr. R. Marina. Genova (1934). **a - 277**

Il volume consta di due parti: nella prima si trovano riuniti gli elementi relativi al Sole, alla Luna ed ai grandi pianeti, poi quelli relativi alle stelle fisse, ed un breve accenno agli ecclissi di Sole e di Luna. La seconda parte contiene diverse tavole di uso corrente nei calcoli della navigazione astronomica. Tutte le *date* e le *ore* a cui si riferiscono gli elementi, comprese le ore sideree nelle tavole per i calcoli di azimut e latitudine con osservazioni della Polare, sono espresse in *tempo civile.*

**Marine Observer** - Marine Meteorology and Safe Navigation [*De meteorologia marina deque securitate in navigatione*]. Mar. Obs., XII, 117, 28-29. London (1935). **a - 278**

Extracts from Merchant Shipping (Safety and Load Line Conventions) Act, 1932. First Schedule. International Convention for the Safety of Life at Sea, 1929.

**Marine Observer** - The Marine Observer's Log [*Ephemeris nautica ad « Marine Observer » pertinens*]. 12 figs., Mar. Obs., XII. London (1935). **a - 279**

N. 117 (January, February, March).

Ice visibility at night and in a fog. The marked change in bird life which is a fairly good indication of the approach to pack ice in the Arctic and the Antarctic. - Butterflies observed in South Atlantic Ocean at a distance from nearest land of 450 miles. - Giant water snake seen in the Indian Ocean. - Photographs of mist rising on edge of Gulf Stream. - Cloud photographs at South Orkneys and South Shetlands. - Discoloured water (Peruvian waters). - Phosphorescent sea (Arabian Sea and Gulf of Aden, Caribbean Sea). - St. Elmo's fire (North Atlantic). - Hail squalls and St. Elmo's fire. - Fogbows (North Pacific Ocean). - Zodiacal light. (North Atlantic Ocean). - Refraction, sun and moon. (River Plate). - Lunar halos observed at sea. (North Atlantic Ocean). - Meteors observed at sea. (South Indian Ocean. South Pacific Ocean. Arabian Sea).

N° 118 (April, May, June).

Phosphorescence (Equatorial Atlantic Ocean) Statics (Western North Atlantic Ocean). Thunderstorm. (North Pacific, Indian Ocean, South African Waters, Caribbean Sea). Iridescent Cloud. (Madras). Lunar Rainbow. (North Atlantic Ocean). Abnormal Refraction. (Gulf of Aden, Straits of Juan de Fuca, Bay of Bengal). Meteors. (Mediterranean).

N° 119 (July, August, September).

Current. (South Georgia, Easterly Set near Cape Verde Arabian Sea, South West Monsoon Season). Tide Rip. (Manipa Strait). Phosphorescence. (Arabian Sea, Malabar Coast, Off Coast of Portugal). Whales. (Coast of Ceylon). Abnormal Magnetic Variation. (Jurien Bay, Western Australia). Volcanic Islet. (Sunda Strait). Submarine Volcano. (Japanese Waters). Floating Pumice Stone. (Japanese Waters). Discoloured Rain. (Buenos Aires). Hurricane. (Spencer Gulf). Whirlwind. (Singapore). Mirage. (Off Cape Finisterre). Lunar Halo and Corona. (North Pacific Ocean). Partial Eclipse of the Moon. (South Pacific). Sand Spouts. (Red Sea). Meteors. (North Atlantic Ocean, Gulf of Guinea). Waterspout. (Carribbean Sea).

N° 120 (October, November, December).

Southern Ocean Ice. Heron at Sea. (North Atlantic). Asuncion Island. (North Pacific). Magnetic Disturbance. (South Indian Ocean). Volcanic Eruption. (Japanese Waters). Submarine Earthquake. (North Pacific). Thunderstorm. (North Atlantic). Typhoon. (China Seas). Cloud Formation. (Peruvian Coast). Mirage. (East Coast of Australia). Solar Halo. (West Coast of South America). Waterspouts. (Mediterranean Sea). Meteor. (Gulf of Aden).

**Navy Department Bureau of Construction and Repair** - The Prediction of Speed and Power of Ships by Methods in Use at the United States Experimental Model Basin Washington [*De navium velocitate atque vi providendis per methodus quibus utitur in bacino typico experimentali ad Americae Status Foederatos pertinente*]. **An.** - Le compas magnétique Stella à double système d'aiguilles [*De buxida magnetica* Stella *duplici praedita systhemate acuum*]. 1 pl., Rev. Hydrogr., XI, 2, 160–162. Monaco (1934). **a - 295**

Description de ce nouvel instrument qui comprend une rose sèche annulaire à moment magnétique très faible et d'un poids réduit: 3,9 grammes contre les 13 grammes pour les roses sèches habituelles.

**An.** - Sextant à bulle perfectionné, type Husun [*Sextans* Husun, *bulla praeditum, ad perfectionem reductum*]. 1 tabl. h. t., Rev. Hydrogr. XII, 1, 159. Monaco (1935). **a - 296**

Dernier modèle perfectionné par la Maison Henry Hughes & Son Ltd. de Londres. Voir cette même VI, 2 du novembre 1929, p. 144.

**An.** - Fog Dissipation [*De caliginis dissipatione*]. Science, Suppl., LXXXI, 2089, 8–9. New York (1935). **a - 297**

Account on a chemical method of fog dissipation by water-absorbing material, described in a report read at the meeting in Philadelphia of the American Philosophical Society; results of the first tests when by spraying a saturated solution of calcium chloride through specially designed nozzles, a sizable path through a pea-soup fog has been obtained. Some considerations as to the nature of fog in general, and sea fog in particular; research carried on at Round Hill by means of a laboratory apparatus which includes an artificial fog chamber with equipment for generating fog. Actual test on an actual fog i. e. a fog bank driven by a southwesterly wind at 13 miles an hour drifted in from Buzzard's Bay, limiting visibility to less than 500 feet, which shows that the approximate cost of clearing a given area for a specified time is within the realm of practicability.

**An.** - Beiträge zur Küstenkunde: Nato, Lagonoy–Golf, Philippinen [*Contributio in litora studenda.* Nato, Logonoy–Golf, *Philippinae Insulae*]. 1 Taf., Seewart, IV, 1, 23–26. Deutsche Seew. Hamburg (1935). **a - 298**

An Hand verschiedener Quellen und Berichte wird Nato, ein kleiner Ort am Lagonoy-Golf an der Ostküste der Insel Luzon beschrieben, mit besonderer Berücksichtigung der Landmarken, der verschiedenen Bänken, der im Lagonoy-Golf liegenden Inseln, der Atulayan Bay.

**An.** - Fahrt durch die Magellan–Strasse [*Transitus per Fretum Magellanicum*]. 1 Tab., Seewart, IV, 1, 28–29. Deutsche Seew. Hamburg (1935). **a - 299**

Zusammenstellung von Kursen, Distanzen und Abständen auf der Fahrt durch die Magellan-Strasse von Kap Virgenes bis Kap Pillar.

**An.** - Ueber die Kräfteeinwirkungen auf den Weg des Schiffes [*De terrestribus elementis eorumque influentia in navis cursum*]. 1 Taf., 2 Tab., Seewart, IV, 2, 70–73. Hamburg (1935). **a - 300**

An Hand von zwei Beispielen ist der Einfluss der Erdumdrehung auf die Richtung einer vom Wind hervorgerufenen Oberflächenströmung besprochen mit besonderer Berücksichtigung der Beziehungen zwischen Windstärke und Stromstärke, des Einflusses des Zustandes der See auf die Stromgeschwindigkeit, und des Einflusses des Seeganges auf das Steuern und somit auf den Weg des Schiffes.

**An.** - Ein einfaches Verfahren zur Bestimmung der Kompassdeviation auf See [*De simplificatione quadam in determinanda buxidae deversione*]. 1 Tab., Seewart, IV, 2, 80–82. Hamburg (1935). **a - 301**

Kurze zusammenfassende Wiedergabe eines Verfahrens zur Bestimmung der Kompassdeviation auf See, das besonders für kleine Schiffe mit geringer Besatzung in der Nord- und Ostseefahrt empfohlen werden kann, weil man dabei ohne Chronometer oder Uhr und ohne Azimuttafeln auskommen kann.

**An.** - Kompass mit dubbel Magnetsysteem [*De buxida duplici praedita systhemate acuum*]. De Zee, May, 282–283. Den Helder (1934). **a - 302**

The A. is directing the attention of the reader to the possibility of fog dissipation. Photographs of clouds, fogs, snow and frost crystals, lightning flashes and the like.

**McKenzie T.** - How « Bayern » was Raised [*Quo modo navis « Bayern » e fundo extracta est*]. Shipbld. & Shipg Rec., XLIV, 18 Nov., 467–470. London (1934). **a - 317**

Details of this rescue made by Metal Industries Ltd. of Glasgow and Rosith.

**Minorsky Nicholas** - Problems of Anti–Rolling Stabilization of Ships by the Activated Tank Method [*Quaestio de stabilitate navium, volutationem vitandi causa, per methodum alveorum*]. 2 figs., Journ. Amer. Soc. Nav. Eng., XLVII, 1, 87–119. Washington D. C. (1935). **a - 318**

After a brief introduction, in which author briefly mentions a few principal methods of ship stabilization which have been actually tried in practice, he investigates the fundamental principles of performance of a theoretically perfect, activated tank stabilizer in order to gain an insight into the problem of a control capable of producing such stabilization. It appears from his study that the choice of controlling system under these requirements is narrowed down to such an extent that it is possible to specify definite characteristics which such control system must possess in order to insure that the roll-quenching efficiency is at all times at its maximum consistent with the amount at the ballast employed as well as with displacement, metacentric height and period of the ship. It is of interest to note that the theoretical conclusions reached in the present analysis have found a complete experimental confirmation.

**Mladiáta János** - Elsülyedt Hajók Kiemelése [*De recuperatione navium*]. 7 fig, Tenger, XXIV, 7/12, 45–55. Budapest (1934). **a - 319**

**Tyrer A. J. & Hoover D. N.** - Bureau of Navigation and Steamboat Inspection [*Officium navigationis et inspectionis navicularum vaporalium*]. 2 figs., U. S. Dpt. Comm., How It Serves You etc. Aug., 45–50. Washington D. C. (1934). **a - 330**

Outline of some of the specific duties carried out by the U. S. Bureau of Navigation and Steamship Inspection. In a first chapter A. J. Tyrer illustrates on hand of the example of the career of a typical American ship the part of the Navigation Law which relates to ownership and sale of vessels, their mortgages and liens, their nationality, their port and tonnage taxes, and their commitments with officers and crew, which is administrated by the Navigation Unit of the Bureau. In a second Chapter D. N. Hoover deals with the Steamboat Inspection Unit of the Bureau and describes its ceaseless vigilance on every American steam-driven and large commercial motor vessel and every foreign ship carrying passengers from an American port.

**Waldmann Kurt** - Die Brauchbarkeit eines Trimmplanes in der Praxis [*De utendo quodam plano pro stabilitate quoad practicam*]. 4 Tabl., Seewart, III, 6, 259–262. Dtsch. Seew. Hamburg (1934). **a - 331**

Vf. schildert vier aus der Praxis stammende Beispiele, welche die Brauchbarkeit des Trimmplanes als Hilfsmittel während der Errechnung der Vorgänge der Beladung und Entladung der Schiffe beweisen.

**Wunch E. W.** - Dynamic Stabilization of Ships [*De navium dynamica stabilitate*]. 2 figs., U. S. Nav. Inst. Proc., LXI, 383, 81–84. Annapolis, Md. (1935). **a - 332**

Analysis of the motions of a vessel afloat. The points through which the forces producing the motion of the vessel appear to act: (1) the center of gravity, and (2) the center of buoyance. Certain mechanical devices used to increase the natural period and diminish the amplitude of roll. Schematic description of Dr. Frahm's antirolling tank, the Fieux' antiroll installation, the Sperry type of stabilizer, and the Japanese system of ship stabilization. Comparison between the various systems.

Author points out that in view of a better security at sea, the efficient use of radio, visual, above-water and under-water sound communication facilities should not be considered a responsibility of radio operator alone, but also of master and deck officers.

**La Roerie G.** - A propos des pavillons des yachts anglais [*Agitur de vexillis in pamphiliis anglicis*]. 4 fig., 1er Bull. Trim. Ass. Amis Mus. Mar., 175–178. Paris (1934). **a - 349**

Quelques données fragmentaires concernant le pavillon anglais avec référence spéciale au pavillon porté par un très joli modèle de yacht anglais du XVIIe siècle, conservé au Musée de la Marine.

**Marcotte Ed.** - L'économie dans la signalisation lumineuse à grande distance [*De oeconomia quoad signalationes luminescentes maximo spatio*]. iv + 38 pp. Ed. « Rev. Opt. Théor. & Instr. ». Paris (1934). **a - 350**

Etant donné que les exigences de la navigation maritime et aérienne nécessitent la construction et l'utilisation de dispositifs de signalisation lumineuse à grande portée, qui sont très coûteux en ce qui concerne leur prix et leur fonctionnement, l'A. discute dans le présent ouvrage les diverses solutions possibles qui permetteraient de réaliser une certaine économie, en partant des résultats d'expériences et des ouvrages de Ribière et surtout de Blondel.

**Marcotte Ed.** - La portée des Feux à éclats et des Signaux colorés [*Agitur de luminibus splendentibus deque signalationibus coloratis eorumque visu*]. Rev. Scient. 28 avr. 258–259. Paris (1934). **a - 351**

Indications sur l'intérêt que présentent les recherches concernant la portée des signaux lumineux en vue d'obtenir de la façon la plus économique le maximum d'efficacité. Bref historique. Normalisation des verres colorés. Objets de nouvelles recherches.

**Mead H. P.** - The Story of the Semaphore. V. Development in the Royal Navy and Other Services [*Historia apparatus semaphorici eiusque progressus quoad classem Regiam aliaque munera*]. 14 figs., 4 pls., Mar. Mirr., XXI, 1, 33–55. London (1935). **a - 352**

Story of the introduction of Pasley's system for semaphore on land and sea, in 1827; the development of the apparatus in 1888; the new method of sending and answering signals; abolishment of the manoeuvring by semaphore in 1895 or 1896; introduction of the real truck semaphore in 1895, which was finally abandoned in favour of wireless in 1905 and 1906. Introduction and development of the use of hand-flags; history of the manual signalling in other countries; night signalling arrangements of telegraphs. Brief description of the various telegraph and semaphoric telegraph stations at Portsmouth. Appendix: Comparison of different semaphore systems.

**Mead Hilary P.** - The History of the International Code [*Novi codicis internationalis historia*]. U. S. Nav. Inst. Proc., LX, 378, 1083–1808. Annapolis, Md. (1934). **a - 353**

Short history of the Code and its continuous progress. Some criticism as to the last edition and to the amount of bunting, which ought to be reduced with the universal advent of radiotelegraphy.

**Middleton W. E. Knowles** - The Principles Underlying the Choice of Visibility Marks [*De selectione signalationum maritimarum eiusque fundamentis*]. 3 tables., Monthly Weath. Rev., LXIII, 1, 17–19. Washington D. C. (1935). **a - 354**

The purpose of this note is to suggest procedures by means of which the estimation of the distance of visibility, or « visual range » by eye, which is probably one of the least satisfactory of all meteorological observations, could be improved. The author claims that some standardization of their technique on the lines he suggests, would greatly improve the quality of these observations.

En el puerto hawaiano de Pear Harbour, base militar norteamericana, han empezado las obras del dique seco mas grande del mundo.

**Gavira José** - Túnel submarino en el Japón [*Transitus submarinus per Japoniam*]. Bol. Soc. Geogr. Nac., LXXIV, 9, 147. Madrid (1934). **a - 391**

Se ha inaugurado un túnel entre Shimonoscki y Moji, que enlaza ferroviariamente a las isals de Hondo y Kiuschiu. Mide el túnel tres kilómetros y tiene especialmente una importancia estratégica.

**Giordano Antonio** - Trieste Traffic Shows Increase [*De progressibus quoad mercium frequentiam portus Tergestini*]. 1 table, Naut. Gaz., CXXV, 7, 19. New York (1935). **a - 392**

Figures showing the progress of shipping in the Port of Triest during the first two months of 1935; increase of the clearings at the Port of Naples during the month of January 1935; construction at this port of warehouses to be operated as general bonded warehouses; building of a new grain silo and a cold storage plant.

**Jessen Otto** - Neue Landgewinnungs - und Landsicherungsarbeiten an der Westküste Schleswig-Holsteins [*De novis operibus foraneis in litoribus occidentalibus* Schleswig-Holstein *nomine*]. 1 Taf., Peterm. Mitt., LXXX, 1, 10-15. Gotha (1934). **a - 393**

Veröffentlichungen im Interesse der Landgewinnungsarbeiten. Arbeitsprogramm, neue Projekte, ausgeführte Arbeiten und gewonnene Ergebnisse. Zum Schluss folgt an Hand einer grossen Karte eine kurze Betrachtung über die allgemeine Tendenz der Küstengestaltung.

**Kearney Thomas A.** - The Golden Gate and San Francisco Bay Bridges [*De pontibus ad regionem* Golden Gate *et sinum Sancti Francisci pertinentibus*]. 8 photos full-page, 1 table, 1 diagr. U. S. Nav. Inst. Proc., LXI, 386, 476-488. Annapolis, Md. (1935). **a - 394**

Attempt to set forth in a brief manner some of the salient features common to the Golden Gate Bridge, which is to span the Golden Gate from Fort Point on the San Francisco shore to Lime Point on the Marin shore, and the San Francisco-Oakland Bay Bridge, which is to cross the Bay from Rincon Hill in San Francisco to Yerba Buena Island, thence to the Oakland Shore. The comparable characteristics of the new bridge buildings as well as the comparable dimensions of the San Francisco-Oakland Bay Bridge and the World's largest bridges are shown.

**Lagoubie A.** - L'Afrique et l'Espagne. Le tunnel sous le détroit de Gibraltar [*De Africa atque Hispania. Transitus submarinus per Sinum Gaditanum*]. L'Afr. Fr., XLIII, Mai, 288-289. Paris (1933). **a - 395**

Travaux de la Commission espagnole créée en 1928. Histoire des divers projets.

**Leeds Charles T., Vanoni Vito A. & Knapp Robert T.** - Solving a Flood and Beach Protection Problem with an Hydraulic Model. A Study of San Gabriel River Mouth at Alamitos Bay Inlet, California [*De inundatione atque tutela cuiusdam sinus moduli hydraulici auxilio resolutis. De perspectis accessibus ad flumen Sancti* Gabriel *in baja* Alamitos (*in California*)]. 15 figs., Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part II, 579-593. Washington D. C. (1934). **a - 396**

Physical condition, by Ch. T. Leeds. Apparatus and technique of model-study, by V. A. Vanoni: general description of laboratory; operating technique: construction of the model of Alamitos Bay, running of tides, production of waves; river-flood, model-surveys. Experimental results and conclusions, by R. T. Knapp. Practical application of laboratory results, by Ch. T. Leeds: the author claims that the model-test clearly indicated the best solution of the complicated problem of flood and beach protection and made it possible to design the necessary control-works with far greater certainty of results than would have been possible by any mathematical calculation.

**Roletto G.** - Porti, Cantieri e Navi d'Italia [*Portus, Navalia, Navesque Italici*]. Vannini, Brescia (1934). **a - 397**

**Smith H. Gerrish** - World Shipbuilding During 1934 [*De maritimis constructionibus totius mundi a. 1934*]. 1 table. Naut. Gaz., CXXV, 1, 7-8 & 33. New York (1935). **a - 398**

Statistical statements on the volume of merchant tonnage construction in the United States and the other countries; trends in employment on new construction and ship repair during the year shown by figures reported by the members of the National Council of American Shipbuilders.

**Steed R. H.** - Singapore Port Development [*Portus* Singapore *eiusque progressus*]. 4 figs., 3 phot. The Far Eastern Rev., XXIX, March, 134-136. Shanghai (1933). **a - 399**

**Toutlemonde Georges** - Le port de Casablanca [*Portus* Casablanca]. 14 fig., Génie Civil, CV, 8, 161-164. Paris (1934). **a - 400**

L'état actuel des travaux dans le port. Extensions successives du port. Trafic de Casablanca de 1912 à 1933.

**Ward Harold** - Holland Defeats the Sea. How the Zuider Zee is Being Overcome by the Hand of Man [*Hollandia mare domat. Agitur de* Zuiderzee *ab hominibus exsiccato*]. 14 figs., 1 map. Nat. Hist., XXXV, 2, 132-143. London (1934). **a - 401**

**Winkers Joseph H.** - Savannah-Georgia's Port [*Civitas* Savannah, *Georgianus portus*]. 5 phot. Naut. Gaz., CXXV, 7, 5-10. New York (1935). **a - 402**

Reminding of some historic facts which show that Savannah is the leading port of the South Atlantic; progress of the port shown by the increase of the ship tonnage volume for the Port of Savannah during the calendar year 1934; services and facilities offered by the port: its harbor improvements and maintenance; improvement in the channel depth of the river and considerable extension of the harbor limits; the business of the port; activity in shipping through the Port of Savannah.

**J. L.** - Le transporteur aérien du phare de Nividic (Ile d'Ouessant, Finistère) [*Ductor aërius in pharo constitutus in* Nividic]. 19 fig., Génie Civil, CIV, 17, 373-378. Paris (1934). **a - 403**

Transporteur sur cable pour assurer les communications avec ce phare - le plus occidental de la France, les bornes de virage des navires entre la Manche et l'Atlantique - pour lequel l'accès était difficile et le plus souvent impossible.

**P. C.** - Le pont levant de 81 mètres de portée sur la terre à Newport, près Middlesbrough (Angleterre) [*Pons pensilis in longitudinem m. 81 in* Newport *apud* Middlesbrough (*in Anglia*)]. 10 fig., Génie Civil, CIV, 20, 441-444. Paris (1934). **a - 404**

Ce nouvel ouvrage, inauguré le 28 février 1934, est destiné à améliorer les communications dans la région industrielle de Middlesbrough. Pont métallique à cinq travées entièrement sondé.

**An.** - Le Canal Albert [*Canalis Albertus*]. 3 phot., 1 carte, 2 pl. Ann. Trav. Publ. Belgique, XXXV, 5, 757-772. Bruxelles (1934). **a - 405**

Inauguration solennelle de la section Lanaye-Lanaken par L. L. M. M. Le Roi et La Reine. Notice distribuée à l'occasion de l'inauguration de la section: I. Quels sont les ouvrages mis en exploitation ? II. Quels sont les avantages offerts à la navigation. III. Description des ouvrages rencontrés. IV. Les deux parties du programme. V. Ce qui reste à faire entre Haccourt et Lanaken. V. Continuation du programme. VI. Les caractéristiques du canal Albert.

**An.** - L'expédition marine de transport dans l'embouchure du fleuve Lena en 1933 [*De subvectione quadam maritima ad accessum fluminis* Lena, *a. 1933*]. (En russe). Bull. Arct. Inst., 5, 216-218. Leningrad (1934). **a - 406**

Compte rendu de l'expédition organisée dans le but de transporter dans la Baie Tixi (embouchure du fleuve Lena) 5240 tonnes de chargement et 2430 tonnes de chargement dans la Baie de Nordwick. La flottille se composa de trois vapeurs de 3100 tonnes et du brise-glace « Krassine ». Dans la présente note l'A. décrit l'état des glaces sur le trajet parcouru entre Léningrad et l'embouchure de Léna, ainsi que les différentes phases du voyage, qui dura du 17 juillet au 28 octobre 1933.

**An.** - Le port de Haïfa (Palestine) [Haïfa *eiusque portus*]. Génie Civil, CIV, 9, 211. Paris (1934). **a - 407**

Note succincte sur les récents travaux en exécution dans ce port. L'une des branches de la pipe-line amenant le pétrole de l'Irak doit aboutir à Haïfa.

**An.** - Les travaux d'amélioration et d'extension du port de Saint Malo–Saint Servan [*De operibus peractis pro restitutione et amplificatione portus* Saint Malo–Saint Servan]. Journ. Mar. March., 23 Nov., 2287-2291. Paris (1933). **a - 408**

**An.** - The Autonomous Port of Havre [*Portus Gratiae*]. 8 figs., Naut. Gaz., CXXIV, 4, 6-9. New York (1934). **a - 409**

Recent works. Passengers traffic. Facilities to increase the efficiency of the port. The Havre Bourse.

**An.** - The New Port of Southampton [Southampton *eiusque novus portus*]. 2 figs., Naut. Gaz., CXXIV, 8, 9-10 & 13 & 29. New York (1934). **a - 410**

Some historical remarks. New works.

**An.** - Port of Valparaiso Expands Services [*Portus* Valparaiso *munera amplificat*]. 4 photos, 2 tables. Naut. Gaz., CXXV, 5, 7-8. New York (1935). **a - 411**

To complete an article published in the July 21st issue of Naut. Gaz. containing information regarding conditions of the Port of Valparaiso, Chile, in the present note is given some information on the expanding of the equipment of the Port with the construction of a refrigerated storage plant, comprising the most up-to-date facilities in this type of installation. In two tables statements are gathered concerning the vessels that entered and sailed from the port during year 1934.

**An.** - The Port of Antwerp Attaining Record Trade Pace [*Antuerpiensis portus summam attingit mercium frequentiam*]. 10 photos, 3 tables. Naut. Gaz., CXXV, 6, 5-8. New York (1935). **a - 412**

Partial recovery of Antwerp, which is easily first among the principal continental North Sea ports, from the effects of the world-wide depression. Statistical statement of its traffic. The proper and natural advantages of the Port of Antwerp; table of the seaborne goods traffic covering the period 1929-1934; favourable influence of the powerful growth of industry and commerce in Belgium upon the brilliant development of Antwerp; the late extensions and equipment of the port; its unlimited possibilities.

## Operae submarinae - Mersiones - Scaphandrarii - Cava.

**Cornish Robert E.** - Improving the Underwater Vision of Lifeguards and Naked Divers [*De visione subaquanea in melius reddenda ad usum navicularum quae nautis auxilium ferunt*]. Journ. Opt. Soc. Amer., XXIII, 430. New York (1933). **a - 413**

The author describes two lens combinations one of which improves underwater vision to such a degree that newsprint may be read by its aid.

**Davis Robert H.** - Deep Diving and Under-Water Rescue [*De scaphandrariis eorumque operibus in maris profunditatibus*]. 40 ills., 62 pp., R. Soc. of Arts. London (1934).

( — ) Rev. in: Nature CXXXV, 3404, 135-136. London (1935). **a - 414**

The four Thomas Gray lectures delivered by the author in February 1934, and dealing with the story of divers and diving from the old times to the flexible and armoured deep-water diving dresses of to-day. Description of diving-bells and submarine observation chambers; illustration of the problem of « decompression »; the more notable operations in deep water for the recovery of treasures or ships; description of the author's own invention, the submarine escape-apparatus, now introduced on H. M. Submarines.

**Dorello Ferdinando** - La deazotazione del palombaro [*De scaphandrariorum deazotatione*]. Ann. Med. Nav. Colon., II, 5-6, 650-662. Roma (1934). **a - 415**

L'A. ha studiato nell'uomo e nell'animale la deazotazione a pressione normale a mezzo dell'ossigeno puro. Risulta che dopo breve tempo di respirazione con detto gas si ha una deazotazione polmonare completa ed una solamente parziale dei tessuti. Ritiene che questo ultimo fatto sia dovuto principalmente alla grande affinità che l'azoto presenta per i grassi dell'organismo. Resta dimostrata l'efficacia dell'ossigeno come mezzo di deazotazione e la sua possibile applicazione anche su organismi sottoposti a pressione superiore alla norma. L'A. si riserva di fare sull'argomento ulteriori ricerche.

**Gavira José** - La maxima immersión humana [*De maxima immersione quam homines attingere possunt*]. Bul. Soc. Geogr. Nac. LXXIV, 8, 485-486. Madrid (1934). **a - 416**

El buzo Raffaelli de la Sociedad Italia de Salvamentos « Sorimo » ha conseguido bajar a una profundidad de 1200 pies (365 metros), utilizando un nuevo tipo de traje.

**Gorry W. A.** - Training Divers [*Scaphandrarii. De exercitationibus*]. 5 figs. on table. U. S. Nav. Inst. Proc., LXI, 393, 1674. Annapolis, Md. (1935). **a - 417**

On the methods employed at the Deep Sea Diving School at the Washington Navy Yard, established in 1928.

**Guerillot A.** - Méthodes de protection des métaux contre la corrosion [*De tutela metallorum in corrosionem*]. 51 fig., 254 pp., J.-B. Baillière et fils. Paris (1934). **a - 418**

Etant donné que l'on estime que l'oxydation détruit chaque année le cinquième de la production mondiale des fontes et aciers, il est extrêmement important de trouver des moyens pour protéger les métaux de cet effet nuisibe de l'oxydation. Dans le présent volume l'A. passe en revue les différents procédés de protection des métaux, à savoir: les méthodes électrolytiques, les procédés thermiques, les procédés de cémentation, les procédés par volatilisation (Shoop), par phosphatation, superficielle (Parker, Bonder), par oxydation; enfin il décrit la protection des métaux contre la corrosion par les peintures, vernis gras, vernis cellulosiques, etc.

**Iredale T., Johnson R. A. & McNeill F. A.** - Destruction of Timber by Marine Organisms in Port of Sydney [*De lignorum destructione per organisma marina in portu* Sidney]. 148 pp., tables, diagr., figs and suppl. pls. Sydney Harbour Trust. Sydney (1933). **a - 419**

Record of the first few years of work inaugurated by Sydney Harbour Trust Commissioners to study marine pile destruction as affecting territory of Port of Sydney, Port Jackson, New South Wales; biological survey; crustacean boring pests, cobra or shipworms; marine animal and plant growths; protective measures and bark protection.

**McMurry C. J.** - Laying Submarine Cable [*De cavis ponendis*]. Electr. Journ., XXXI, 12, 480-481. Cincinnati (1934). **a - 420**

Illustrated description of method of laying a cable of 33.000 V. made by Virginia Electr. & Power Co, under Pamunkey River, West Point, Va.

**Rosani Sergio** - Gli ultrasuoni e il loro impiego per l'esplorazione subacquea [*De ultrasonis ac utilitate ex iis percipienda pro exploratione subaquanea*]. 24 fig., Alta Fr., 2, 168-195. Milano (1934). **a - 421**

Richiamati brevemente alcuni principî teorici sulle onde elastiche e sulla loro propagazione attraverso l'acqua di mare, si descrive il proiettore piezoelettrico, ideato da Langevin, per la produzione delle oscillazioni ultrasonore. Successivamente si esaminano alcuni tipi di apparati da scandaglio e da esplorazione orizzontale, attualmente impiegati sulle navi.

**Sannio Luigi** - Un moderno cavo telegrafico sottomarino: il cavo da S. Amaro (Portogallo) a La Panne (Belgio) [*Hodiernum cavum telegraphicum submarinum a* S. Amaro (*in Lusitania*) *ad* La Panne (*in Belgio*)]. 21 fig., Alta Fr., 4, 444-473. Milano (1934). **a - 422**

Il cavo S. Amaro-La Panne (1930) della Italcable è l'ultimo cavo telegrafico di grande lunghezza che sia stato posato; rappresenta perciò anche oggi una delle più moderne espressioni della tecnica. Dopo alcuni rapidi cenni sullo sviluppo dei cavi con induttanza e sulle difficoltà particolari, che presenta per essi l'attuazione del servizio in duplex, sono sommariamente illustrate le caratteristiche dei cavi muniti di induttanza solo nel tratto mediano ed è esposta, dalla specificazione delle norme di capitolato alle prove in fabbrica ed al collaudo finale, l'opera compiuta dal servizio tecnico della Italcable. I collaudi eseguiti sul cavo in opera confermano la bontà dei procedimenti adottati. Viene ancor fatto cenno dei mezzi tecnici con cui si proteggono i cavi dai disturbi eventuali e parassiti, e sono esposte le esperienze, eseguite per la prima volta durante la posa di questo cavo, per verificare l'effettivo conseguimento di un alto grado di immunità.

**An.** - Tiefsee-Bergungen [*De salvatione e maris profunditatibus*]. 5 Abb., Dtsch. Bergwerks-Ztg., 4, 39-41. Düsseldorf (1935). **a - 423**

Beschreibung eines Unterseebootes, von welchem alle aussen zu leistenden Arbeiten vom Boots-innern aus geleitet und überwacht werden können. Arbeiten, welche in Verbindung mit Spezialvorrichtungen und besonderen Fahrzeugen an der Oberfläche ausgeführt werden können. Spezialeinrichtungen. Beschreibung einer neuen Hebemethode. Möglichkeit einer U-Bootskatastrophe vorzubeugen.

**An.** - Cables Across Belfast Harbour [*De cavis in portu* Belfast]. Electr. Times, LXXXVI, 2233, 225-226. London (1934). **a - 424**

Description of laying of six big submarine cables across bed of Victoria Channel between East and West Twin Islands.

**An.** - The Cable Repair Ship H. M. T. S. « Monarch » [*Navis ad cava submarina inspicienda, nomine* « Monarch »]. Nature, CXXXIV, 3388, 527. London (1934). **a - 425**

Brief description of the ship and of the special gear necessary for carrying out all the operations required in cable laying and repair.

Traduzione di Carlo Coardi. Prefazione di G. Scortecci.

**Benoit Pierre** - Les grandes escales. Océanie Française [*De magnis stationibus maritimis. Oceania Gallica*]. Fig., ill., phot., pl., carte, 152 pp. Editions Alpina sur les presses de l'I. G. D. A. de Novare (Italie). Paris (1933). **a - 431**

Livre à caractère artistique. Impressions de Nouméa, des Nouvelles Hébrides et de Tahiti.

**Beutin Ludwig** - Der Deutsche Seehandel im Mittelmeergebiet bis zu den Napoleonischen Kriegen [*De germanica mercium frequentia per Mediterraneum usque ad bella Napoleonica*]. 3 Bildtaf., xvi + 217 S., Karl Wachholtz Verl. Neumünster i. Holst. (1935). **a - 432**

Der erste Band der Abhandlungen zur Handels- und Seegeschichte im Auftrage des Hansischen Geschichtsvereins hrsg. von Fritz Rörig und Walther Vogel. Das Werk ist auf ein sorgfältiges Studium der italienischen, südfranzösischen und deutschen Archive gegründet und

gibt ein klares Bild der Entwicklung der direkten Schiffahrt der deutschen Seestädte nach dem Mittelmeergebiet vom Ende des 16. Jahrhunderts bis zur napoleonischen Zeit.

**Blake W. T.** - Ports of Call [*De portibus auxiliatoribus*]. Ills., 1 sketch-map, 184 pp., Grayson & Grayson. London (1933). a - 433

This book is written in order to rouse the desire in people for travelling; it describes especially many noteworthy places in and around the Caribbean, the South Atlantic, the Mediterranean, and the waters of Scandinavia.

**Blake W. M.** - Taking Off the Lines of a Boat [*Delineatio linearum caracteristicarum cuiusdam naviculae*]. 4 pls., Mar. Mirr., XXI, 1, 5-11. London (1935). a - 434

The purpose of this article is to show the simplest way in which the lines of a craft can be recorded on paper. Since the aim of the author is practical, he has selected two crafts, i. e. the « Ossie », an Aldeburgh sprat boat, and the « Nellie », a decked boat built by a master of his trade, whose lines he has actually taken off by himself, one being a clincher-built open boat and the other decked and of carvel construction.

**Braikovitch Wladislaw** - Etude historique sur le Droit Maritime privé du Littoral yougoslave [*Studium historicum juris maritimi privati quoad litus Jugoslavum*]. 335 pp., Sémaphore de Marseille. Marseille (1933). a - 435

Madagascar, les Comores, les Iles de France et de Bourbon, le Pacifique français, les Français dans l'Afrique du Sud. Conclusions générales.

**Harrin W. L.** - Best Performances of Transatlantic Express Liners [*De optimis resultatibus a navibus transatlanticis percipiendis*]. 1 table, Naut. Gaz., CXXV, 4n, 10-11. New York (1935). **a - 457**

Table containing statements on the latest and prewar best performances of transatlantic express liners.

**Johnson Charles** - Pirates célèbres du XVIIIe Siècle [*Piratae illustri sec. XVIII*]. N. R. C. Paris (1934). **a - 458**

**Jouzhyne D.** - La vaillance du « Krassine » [*De navis* « Krassin » *egregia navigatione*]. (En ukranien). 167 pp., « Molod. Bolchevik ». Odessa (1934). **a - 459**

**Koppe Wilhelm** - Lübeck-Stockholmer Handelsgeschichte im 14. Jahrhundert [*De Lubecae historia commerciali. Holmiae sec. XIV*]. xv + 299 S. Karl Wachholtz Verl. Neumünster i. Holst. (1935). **a - 460**

Dieser zweite Band der Abhandlungen zur Handels- und Seegeschichte im Auftrage des Hansischen Geschichtsvereins hrsg. von F. Rörig und W. Vogel schildert vor allem die einzelnen kaufmännischen Persönlichkeiten und ihre Organisationsformen.

**La Roerie** - Sur les monstres marins [*De monstris marinis*]. 1 fig., Bull. Soc. Océanogr. France, 80, 1402. Paris (1934). **a - 461**

Quelques réflexions au sujet de l'article de M. François Heyrelles, paru dans le « Bull. » du 15 novembre 1933, sous le titre « Recherches océanographiques au XIIIe siècle ».

**Lion A.** - Schwimmende Inseln im New Yorker Hafen [*De insulis fluctuantibus in portu* New York]. 3 Abb., Umschau, XXXIX, 13, 246-247. Frankfurt a/M. (1935). **a - 462**

Beschreibung einer neuen Art von « Bahnhof », der aus zwei schwimmenden Inseln für Wasserflugzeuge, sowohl für Warenverkehr als auch für Personen-Beförderung besteht, und im East River (Hafen von New York) verankert ist.

**MacGregor Alasdair Alpin** - The Haunted Isles: or, Life in the Hebrides [*De insulis ab Inferis invasis seu de vita in* Hebrides]. Ill., xiv + 320 pp., Alexander MacLecose & Co. London (1933). **a - 463**

**Maddock S. J.** - Sea Shipping Company to Inaugurate New Service to South Africa [*Societas pro navigatione maritima novam in Africam merid. navigationem inaugurat*]. Naut. Gaz., CXXV, 9, 11. New York (1934). **a - 464**

Information on the inauguration of a new American-flag service to South and East Africa, followed by considerations regarding the importance of the African potential markets, and the probable future increase of the commercial exchange between the United States and Canada and British East Africa.

**Magre Maurice** - Pirates, filibustiers, négriers [*Piratae, errones, emptores nigritarum*]. Grasset B. Paris (1934). **a - 465**

**Malgorn Guy** av. collab. **Desmarets** - Lexique technique anglais-français. IIme Edition [*Vocabularium technicum anglicum et gallicum, IIa ed.*]. xx-254 pp., Gauthier-Villars. Paris (1934). **a - 466**

L'A. qui est Lieutenant de Vaisseau, a conçu le présent lexique dans le but d'être particulièrement utile à ceux qui consultent des ouvrages et périodiques en langue anglaise relatifs aux machines-outils, moteurs à combustion interne, T. S. F., constructions navales, etc.

**Maurette F.** - Tour de Pacifique [*De Oceano Pacifico circumnavigato*]. Hachette. Paris (1935). **a - 467**

**McNulty R. R.** - Changing Dual Toll System at Panama Canal [*Agitur de portoriis canalis Panamensis. Quaestio de commutationibus*]. 1 table, Naut. Gaz., CXXV, 5, 9. New York (1935). **a - 468**

Answer to an article published in the February 2nd issue of « Naut. Gaz. » by Mr. Sill, dealing with the most equitable basis for toll assessment at Panama Canal.

**Mentasti G. K.** - Tra gli incanti del Pacifico. Le Isole Hawaii [*De pulcherrimis insulis* Hawaii *in Oceano Pacifico*]. Numer. ill., Vie d'Italia e del Mondo, II, 6, 769-790. Milano (1934). **a - 469**

Aspetto fisico; esplorazione, organizzazione politica delle isole Hawaii. I grandi vulcani. La popolazione. Costumi. Vita commerciale. Il paradiso del Pacifico.

**Modena E.** - Un'avventura sull'Artico (ed altri racconti) [*Eventum in navigando per oceanum Arcticum*]. Riv. Cult. Mar., X. Roma (1935). **a - 470**

In tutti i fascicoli di questa rivista si trovano racconti di vita marinara dell'A. col suo nome o con i pseudonimi Ciai-Ka, Emo.

**Monfreid Henri (de)** - Le naufrage de la «Marietta» [*Naufragium navis* «Marietta»]. 215 pp. Grasset. Paris (1934). **a - 471**

Trois nouvelles décrivant d'une manière pittoresque et poignante le naufrage de la «Marietta».

**Negrotto Cambiaso Federico** - Genova marinara [*De activitate maritima Genuensi sec. XIX et XX*]. 5 tav., Realtà, a. VIII, v. XVI, 1, 8-26, Milano (1934). **a - 472**

L'A. assume come punto di partenza a questo rapido cenno sullo sviluppo del porto di Genova e del suo traffico marittimo, l'avvento della navigazione a vapore che coincide all'incirca con la proclamazione del Regno di Italia. Ecco gli argomenti trattati: Il Porto attorno al 1860. La donazione del Duca di Galliera ed i lavori eseguiti. Sviluppi successivi del Porto e della Marina Mercantile. La costruzione del Consorzio. I lavori dal 1903 al 1914. Sviluppo della Marina mercantile. La guerra mondiale e le sue conseguenze. I benefici effetti del Regime Fascista. Il bacino Emanuele III. I grandi transatlantici di linea. Il bacino B. Mussolini. Vie di accesso. Il «Rex» ed il «Conte di Savoia».

**Niemüller Martin** - Vom U. Boot zur Kanzel [*Bellum navium submergibilium*]. Martin Warneck Verlag. Berlin (1935). **a - 473**

Blätter über den U-Bootskrieg.

**Novo (de) P.** - Posibles causas fisicas de la marinofobia española [*Qua de causa Hispani a navigatione abhorreant*]. Rev. Gen. De Mar., LVII, Julio y Agosto. Madrid (1934). **a - 474**

**Palmer W. C.** - The Activities of the East India Company in Persia und in Persian Gulf (1616-1657) [*Agitur de societate nomine* East India *eiusque activitate in Persia*]. Bull. Inst. of Hist. Res., XI, 42-44. London (1933). **a - 475**

Influence of the Persian commerce and maritime problems on the first Anglo-Indian relations.

**Parkes Oscar** edit. by... - Jane's Fighting Ships, 1934 [*Indices nomine* Jane *longarum navium*]. Ills., photos, tables, Sampson Low, Marston & Co., Ltd. London (1934). **a - 476**

Thirty-eighth annual edition of Jane, appeared in London on December 10, 1934. This new edition seems to be a little more complete than that of last year in the matter of the fleet distribution tables for the various navies, and it contains a number of new photographs of recently completed ships. It contains also a table showing ships laid down by the five principal naval powers during each of the years 1922-33, inclusive.

**Peacock J. C.** - United States Shipping Board Bureau [*Officium pro navigatione ad Americae Status foederatos pertinens*]. 2 figs., U. S. Dpt. Comm. How it serves you etc., Aug., 57-64. Washington D. C. (1934). **a - 477**

After some introductory remarks, emphasizing the vital necessity for the United States of an American merchant marine, author describes the situation of American commerce during and after the war, the foundation of the U. S. Shipping Board and its shipbuilding program, the legislation and executive action of the Board, the divisions of the Shipping Board Bureau, the divisions of the Merchant Fleet Corporation, the Shipping Board Program: first, administering the affairs of the Merchant Fleet Corporation, and second, conducting the more important and permanent work of promoting the development of the American merchant marine, and regulating the rates and practices of privately owned steamship companies of all flags operating to or from American ports.

**Reisenberg Felix** - The Rough Log.-New Sea Laws [*Leges novae maritimae*]. Naut. Gaz., CXXV, 4, 25. New York (1935). **a - 478**

Author points out that the speed and size of vessels, have increased the hazards of internal injuries by geometrical proportion, and claims the necessity of laws, representing the result of an international agreement, concerned with the maximum tonnage allowed for liners to be built, and the maximum number of passengers to be carried per ton of displacement. One of the greatest problems is, as author shows, the complete reorganization of the personnel of the commercial sea service, which needs a better training plan, devised by seamen and conducted by seamen.

**Richter Rud.** - Warum die ozeanographische Terminologie sich nicht durchsetzen kann [*Qua de causa terminologia oceanographica non effici possit*]. 1 Abb., Senckenbergiana, 14, 4/5, 220-231. Frankfurt a. M. (1932). **a - 479**

Unter Hinweisung auf die in 1904 vom Reichsmarineamt und in 1932 von A. Schwarz veröffentlichte ozeanographische Terminologie werden hier die folgenden Ausdrücke erörtert: Tide, Gezeiten: Tide, Tiden. Niedrigwasser, Hochwasser: Niedrigtide, Hochtide. Flut, Ebbe: Steigtide, Falltide. Uebermeereszeit, Untermeereszeit. Tauchbereich. Ausserdem werden neue Vorschläge zur Beseitigung einiger in der Terminologie vorbefindlichen grundsetzlichen Fehler mitgeteilt.

**Roberts Kenneth** - Captain Caution [*Agitur de quodam navis praefecto cui nomen Cautio datum est*]. 10 draws., 1 map., Doubleday, Doran & Co., Inc. New York (1934). **a - 480**

Absorbing story of the war of 1812, containing the description of doldrums, battles, and imprisonments of the heroes of the book, whose historical value is enhanced by the portrayals of ship construction, navigation, guns, and equipment, which are authentic. A map and drawings of ten ships of the period render the story a valuable contribution to literature and history.

**Röhlk Otto** - Hansisch-norwegische Handelspolitik im 16. Jahrhundert [*De commerciali politica hanseatico-norvegica sec. XVI*]. viii + 92 S. Karl Wachholtz Verl. Neumünster i. Holst (1935). **a - 481**

Diese Arbeit bildet den dritten Band der Abhandlungen zur Handels- und Seegeschichte im Auftrage des Hansischen Geschichtsvereins hrsg. von F. Rörig und W. Vogel. Die Geschichte der hansisch- norwegischen Wirtschaftsbeziehungen in der ersten Hälfte des 16. Jahrhunderts mit besonderer Berücksichtigung des Vertrags von Odense 1560 und seiner Folgen.

**Seewert W.** - Die geographischen Grundlagen der deutschen Seestellung [*Momentum maritimum Germanicum quoad Geographiam*]. Ztschr. f. Geopolitik, X, 5, 270-280. Berlin (1933). **a - 482**

**Simpson Edward** - Yarnlets [*Enarrationes maritimae*]. G. P. Putnam's Sons. New York (1934).

(—) Review by Lt. Comm. A. K. Rooks, in «U. S. Nav. Inst. Proc.» LXI, 383, 113, Annapolis, Md. (1935). **a - 483**

The author calls his work «A collection of sketches which may bring out in a way the human side of Navy life, which might be of interest to those non associated with the daily life and experiences of a naval man».

**Smogorzewski Casimir** - Poland's Access to the Sea [*Polonorum accessus ad mare*]. Maps, 468 pp., G. Allen & Unwin. London (1934). **a - 484**

Some considerations concerned with the importance for Poland of a free and secure access to the sea, and the actual state of affairs in Pomorze, Danzig and Gdynia.

**Sobieski Waclaw** - Der Kampf um die Ostsee von den ältesten Zeiten bis zur Gegenwart [*Agitur de dominatione maris Baltici ab antiquis temporibus in hodiernum*]. vi + 269 pp. Markert & Petters. Leipzig (1933). **a - 485**

**Spindler Aro** - La guerra al commercio con i sommergibili [*Agitur de ferendis detrimentis ad mercium frequentiam per naves submergibiles*]. Vol. I: I precedenti. [La guerra sul mare 1914-1918. Pubblicazione dell'archivio della Marina Germanica]. (Tradotto per cura dell'Ufficio Storico della R. Marina dal Capitano di Vascello Raffaele de Courten). [1432 bis] 6 fig., xi–332 pp., Ist. Poligr. dello Stato. Roma (1934). **a - 486**

L'argomento è svolto nei seguenti capitoli: I primi impulsi verso la guerra sottomarina al traffico. La posizione presa dagli Inglesi nelle questioni di diritto marittimo in tempo di guerra. I provvedimenti presi dagli Inglesi nel campo della guerra al traffico dall'inizio del conflitto mondiale fino a metà novembre 1934. Le contromisure ed i progetti tedeschi dall'ottobre al dicembre 1914. L'atteggiamento del governo tedesco nei riguardi della guerra sottomarina al traffico dal punto di vista del diritto internazionale e della politica. I successivi sviluppi nel gennaio 1915. I giorni decisivi dal 1° al 4 febbraio 1915: come si arrivò alla decisione della guerra sottomarina. Fra la decisione e l'esecuzione: dal 4 al 22 febbraio 1915. Sguardo retrospettivo. Il materiale dei sommergibili: i preparativi e le premesse tecnico-militari per la guerra sottomarina. Appendici varie. Bibliografia relativa alle questioni di diritto marittimo in tempo di guerra ed ai provvedimenti inglesi e guerra al traffico. Indice dei nomi di persone.

**Taraknate Das** - La questione del Pacifico vista da un orientale [*Quaestio de oceano Pacifico a viro quodam orientali perspecta*]. Istit. It. per il Medio ed Estremo Oriente. Roma (1934). **a - 487**

L'A. spiega e giustifica la politica navale degli Stati Uniti e considera le ripercussioni della ripresa delle relazioni diplomatiche fra Russia e Stati Uniti e la possibilità di un nuovo conflitto Russo-Giapponese.

**Troup J. A. G.** - On the Bridge [*Praecepta nautica*]. Lich & Covan, Ltd. London (1934). **a - 488**

After a preface, in which author gives a clear interpretation of that portion of the King's » Regulations » referring to the responsibility of captains in Navigation, he presents an important contribution to the science of navigation, with especial reference to the subject of making a passage and the handling of ships.

**Vallese Tarquinio** - Il mare agitato nel dramma shakespeariano [*De tempestatibus apud* Shakespeare]. Ann. R. Ist. Sup. Nav., III, 2, 161-187· Napoli (1934). **a - 489**

Rassegna del teatro shakespeariano per quanto ha tratto al mare: descrizioni di tempesta, di manovre per affrontarle, di calme dopo la tempesta in citazioni dal sommo poeta inglese.

**Vallese Tarquinio** - Cognizioni nautiche dello Shakespeare [*Notiones nauticae shakespearianae*]. Ann. R. Ist. Sup. Nav., IV, 1, 31-60. Napoli (1935). **a - 490**

Richiami nautici nelle opere del poeta. L'A. dimostra com'egli faccia sovente parlare un linguaggio di marinaio ai suoi personaggi.

**Villiers A. J.** - Perros de mar de hoy dia [*De hodiernis nautis*]. Bol. Centro Naval, a. LII, 505. Buenos Aires (1934). **a - 491**

**Wagner Georg** - Die wirtschaftliche Bedeutung des Toten Meeres [*Momentum oeconomicum Lacus Asphaltitae*]. 10 Bild., Umschau, XXXIX, 21, 406-410. Frankfurt a/M. (1935). **a - 492**

Die Bromerzeugung des Toten Meeres beherrscht den britischen Markt. 850 Millionen Tonnen Brom im Toten Meere. Palästina Selbstversorgung an Kalisalzen. Steinsalz im Steinbruchbetrieb. Lots Weib. Der Jordan bringt die Salze. Im Diluvium war das Tote Meer fünfmal grösser als heute. Erdöl zu erwarten. Ein Bad im schweren Salzwasser.

**Wohlenberg Erich** - Ruinen im Wattenmeer [*Antiqua opera inventa in basso fundo quodam marino*]. 8 Abb., Nat. u. Mus., LXII, 1, 25-32. Frankfurt a. M. (1932). **a - 493**

Der Vf. gibt hier eine Schilderung eines neulich gemachten Fundes, und zwar Reste alter Siedlungen im Gebiet der Eidermündung (Westküste Schleswig-Holsteins), welche im Wattenmeer durch die Erosion eines Priels blossgelegt worden sind.

**Wulff Olaf** - A Budapest és Levantei kikötök közötti közvetlen hajòforgalom [*De frequentia mercium a* Budapest *ad portus regionum orientalium*]. (En hongrois). 3 ill., A Tenger, XXV, 1/4, 33-38. Budapest (1935). **a - 494**

**Zimmermann E.** - German Shipbuilding Activities [*De Germanis eorumque constructionibus navalibus*]. Naut. Gaz., CXXV, 8, 26-28. New York (1935). **a - 495**

Overseas traffic. North German Lloyd Far East service. Statistical statements.

**Bibliographia Oceanographica** - Vocabulorum Elenchus prior lexico totius scientiae oceanographicae redigendo. 19 pp., Carlo Ferrari. Venezia (1935). **a - 496**

Raccolta di vocaboli oceanografici nelle lingue: latina, italiana, francese, inglese, tedesca, ricorrenti nella bibliografia. È intenzione della redazione di produrre vari di questi elenchi fino a dare un lessico per quanto è possibile completo per la scienza oceanografica.

**Department of State** - Policy of the United States Toward Maritime Commerce in War [*Praecepta ab Americae Statibus foederatis edita quoad commercium bello*]. U. S. Govmt. Print. Off. Washington (1934). **a - 497**

**Enciclopedia Italiana** - Nave. [*Navis*] 276 fig., Enciclopedia Italiana, XXIV, 341-435. Roma (1934). **a - 498**

Articolo di autori diversi: Belli (Medicina e igiene navale), Cavaglieri (Diritto Internazionale), Fea (Storia moderna della nave e Costruzione navale), Fraccaro (Storia antica della nave), Gleyeses (Architettura navale), Graziani (Diritto privato), Montandon (Etnologia), Nebbia

(Storia della nave dal medioevo al sec. XIX), Zanobini (Diritto amministrativo). Di tale articolo la Direzione Generale dell'Enciclopedia ha curato la pubblicazione come fascicolo separato: Roma. 1935-XIII.

**Ministero delle Comunicazioni. Direzione generale della Marina Mercantile** - La Marina Mercantile Italiana al 31 dicembre 1930–IX. [Relazione del Direttore Generale della Marina Mercantile Italiana a S. E. il Ministro delle Comunicazioni] [*De Italica Marina Mercatoria ad diem 31 Decembris 1930-IX*] 172 tav. f. t., xxvii-1000 pp., Ist. Poligr. dello Stato. Roma (1934). **a - 499**

La Relazione, che è una raccolta di particolareggiate rilevazioni statistiche, consta delle seguenti Parti: Parte I: L'Amministrazione. Parte II: La gente di mare. Parte III: Il naviglio. Parte IV: I servizi marittimi. Parte V: I porti. Parte VI: La pesca. Parte VII: Il demanio marittimo. Parte VIII: I trattati di commercio e di navigazione fra l'Italia ed altri Stati.

**Protectorat de la République Française au Paros. Gouvernement cherifien** - Service du Commerce et de l'industrie. Année 1933. Rapport sur la navigation et le mouvement commercial du Protectorat de la République Française au Maroc [*Munera commercialia et industrialia. A. 1933. Relatio de navigatione et mercium frequentia in Mauretania in tutela Gallorum*]. F. Moncho. xv-50 pp., Rabat, Maroc (1934). **a - 500**

**U. S. Department of Commerce** - Foreign Commerce and Navigation of the United States. The Calendar Year 1932 [*De commercio externarum gentium ac navigatione statuum foederatorum Americae. Kalendarium A. 1932*]. U. S. Govmt. Print. Off. Washington (1933). **a - 501**

**U. S. Department of Commerce** - The United States Department of Commerce. How It Serves You on Land, and Sea, and in the Air [*Sectio commercialis ad Americae Status foederatos pertinens eiusque munera aëre, terra marique*]. Ills., ii-iv, 1-75 pp., U. S. Govmt. Pr. Off., Washington D. C. (1934). **a - 502**

This booklet tells how the Department of Commerce safeguards life, preserves property, and fosters, develops, and promotes the commerce and industry of the United States. It contains a description of the various activities carried on in behalf of the American people by the Branches of this Service Department of the Federal Government. Its contents is as follows: Bureau of Air Commerce, Bureau of the Census, Coast and Geodetic Survey, Bureau of Fisheries, Bureau of Foreign and Domestic Commerce, Bureau of Lighthouses, Bureau of Navigation and Steamboat Inspection, United States Patent Office, United States Shipping Board Bureau, National Bureau of Standards, Business Advisory and Planning Council.

**U. S. Naval Institute** - Naval Customs, Traditions and Usage [*Consuetudines traditionesque maritimae*]. Annapolis, Md. (1934). **a - 503**

This volume due to Capt. Lowette on general naval rules may be of interest not only to American sailors but to every sailor in the world.

**Erre vi** - Cenni sulla pirateria [*De piratis*]. Riv. Cult. Maritt., X, 1/2, 41-56. Roma (1935). **a - 504**

*** *** - Documenti relativi alla politica navale dell'Italia (1922-1930) [*Documenta de Italica politica navali (1922-1930)*]. Riv. Cult. Maritt., X, 7/8, 185-208. Roma (1935). **a - 505**

Estratti di discorsi del Ministro degli Esteri d'Italia.

**An.** - Sculpture d'un vaisseau du XVI<sup></sup>e siècle à Saint–Pierre d'Oleron [*Sculptura alicuius naviculae sec. XVII° in* St. Pierre d'Oleron]. 1 fig. s. pl., 1er Bull Trim. Ass. Amis Mus. Mar., 180. Paris (1934). **a - 506**

Description d'une belle pièce d'iconographie maritime encastrée dans le mur d'une maison de Saint-Pierre d'Oleron.

**An.** - Les idées du grand public sur l'uniforme maritime il y a cent ans [*Opiniones publicae quoad maritimum vestitum abhinc centum annos*]. Ier Bull. Trim. Ass. Amis Mus. Mar., 179-180. Paris (1934). **a - 507**

Deux extraits de presse de l'année 1933 qui rapportent les opinions des Parisiens d'alors sur l'uniforme des marins et qui ne manquent pas de saveur.

**An.** - Tonnage (Statutes, Art. 34). Tonnage (Statuts, Art. 34) [*Navium pondus (Statuti caput 34)*]. (In Engl. & Fr.). Int. Hydr. Bull., VI, 101. Monaco (Princ.) (1934). **a - 508**

Information on the new tonnage figures for the British Empire.

**An.** - Economy of Transport Overseas [*De oeconomia quoad subvectiones transmarinas*]. Nature, CXXXV, 3405, 169-170. London (1935). **a - 509**

Brief outline of the history of the development of freight carrying by steam vessels, and of the early history of cargo ships, followed by the summary of the Thomas Lowe Gray Lecture delivered to the Institution of Mechanical Engineers by Mr. L. St. L. Pendred, especially concerned with tramps and freighters and entitled « A Survey of Ship and Engines ».

**An.** - My Ship [*Navis quae ad me pertinet*]. U. S. Nav. Inst. Proc., LXI, 386, 572. Annapolis. Md. (1935). **a - 510**

Poetry reprinted from the « Nautical Magazine », Glasgow, February 1935, and containing practical advice on navigation.

## Biographiae et necrologiae.

**Ångström Anders** - Axel Wallén. Ymer, 2, 187-195. Stockholm (1935). **a - 511**

Nécrologie de M. le Dr Axel Wallén, né en 1877 mort en 1935, chef de l'Institut de Météorologie et d'Hydrologie à Stockholm.

**Baume Pluvinel M. A. (de la)** - Discours prononcé aux obsèques de M. B. Baillard [*Laudatio funebris in memoriam domini* M. B. Baillard]. 1 photo., Ann. 1935. Bur. Longit., D. 1-D. 4. Paris (1934). **a - 512**

Biographie et résumé des travaux du grand astronome, créateur du Bureau International de l'Heure.

**Béguinot A.** - L'opera scientifica e marinara del capitano Enrico A. D'Albertis [*Henricus* A. D'Albertis. *Opera scientifica et maritima*]. 2 pl., 31 pp., Atti Soc. Ligustica Sc. Lett. Genova (1933). **a - 513**

**Bourgeois** - Discours prononcé aux obsèques de M. L'Amiral Fournier [*Laudatio funebris in memoriam Almiragii* Fournier].. 1 photo, Ann. 1935. Bur. Longit., E. 1-E. 4 Paris (1934). a - 514

Bref résumé de l'œuvre scientifique de l'Amiral Fournier qui pendant toute sa vie a poursuivi l'étude des trois grands problèmes qui correspondent aux trois pires ennemis du marin: la déviation du compas qui engendre les erreurs de route; le cyclone qui peut entraîner la perte du navire, et le plus grave de tous, la brume qui aveugle le pilote et lui enlève tous ses moyens.

**Broglie Emanuel de** - Un grand marin: Tourville [*Agitur de nauta* Tourville]. Planches, Biblioth. Hist. Plon, 315 pp., Paris (1934). a - 515

La carrière militaire du grand marin. Développement des évènements dans l'ordre chronologique, selon lequel ils se déroulèrent dans les mers différentes. Rapports entre Tourville et le Roi Louis XIV.

**Chapman S.** - Arthur Schuster, 1851-1934. 1 photo, Terr. Magn., XXXIX, 4, 341-345. Baltimore (1934). a - 516

Obituary. Life and work of Sir Arthur Schuster, who for many years influenced the work of the various British magnetic observatories. Summary of Schuster's principal papers with especial regard to his fundamental discovery that research in periodicities, cycles, and related phenomena requires, besides purely analytical calculations, such as harmonic analysis or Fourier series, essentially statistical considerations based on the theory of probability.

**Cooper E. R.** - Captain Philip Bacon [*Philippus* Bacon *navis praefectus*]. Mar. Mirr., XXI, 1, 92-93. London (1935). a - 517

A transcript from « East Anglian Notes and Queries », of an inscription on the north wall of the chancel of Coddenham Church, Suffolk, to Captain Filip Bacon, containing a brief history of his life. There is a short notice of the Captain in the « Dictionary of National Biography ».

**Credner Wilhelm** - Axel Hamberg. Peterm. Mitt., LXXX, 2, 54-55. Gotha (1934). a - 518

Nachruf auf Axel Hamberg Professor Emeritus der Geographie an der Universität zu Uppsala.

**Degli Uberti Ubaldo** - L'Ammiraglio Luigi di Savoia [*Almiragius Aloisius* di Savoia]. Paravia. Torino, Milano, ecc. (1935). a - 519

Libro in cui sono riportate tutte le gesta del Duca degli Abruzzi. Da un prologo in Ispagna, si passa attraverso alla vita del Principe fino alla Sua morte in Colonia.

**Djakonov M. A.** - La mort de l'explorateur polaire danois Knut Rasmussen [*Obitus exploratoris danici* Knut Rasmussen]. (En russe). 1 photo, Bull. Arct. Inst., 2, 76-78. Leningrad (1934). a - 520

Nécrologie et brève description des principales expéditions de Rasmussen. Liste des publications de Rasmussen.

**Fleurey (de) Henry** - Le Vice-Amiral Fournier [*Vice-Almiragius* Fournier]. Bull. Soc. Océan. France, 80, 1403. Paris (1934). a - 521

Nécrologie du Vice-Président de la Société d'Océanographie de France, décédé le 6 novembre 1934.

**Freuchen Peter, Mathiassen Therkel & Birket-Smith Kaj (Hrsg.)** - Knud Rasmussens Mindeudgave [Knud Rasmussen. *Opera edita in memoriam*]. 36 Hefte. Gyldendalske Boghandel, Nord. Forl. København (1934). a - 522

Die bedeutendsten Werke Rasmussens, besonders die erste, zweite und fünfte Thuleexpedition, sind hier vollständig oder teilweise wiedergegeben.

**Gavira José** - Muerte de un explorador polar [*Obitus exploratoris polorum* C. E. Borchgrevink]. Bol. Soc. Geogr. Nac. LXXIV, 10, 612. (adrid (1934). a - 523

Noticia de la muerte del explorator sudpolar noruego Carsten Egebert Borchgrevink.

**Gavira José** - Muerte de un oceanografo holandés [*Obitus oceanographi hollandesis* J. P. van der Stok]. Bol. Soc. Geogr. Nac., LXXIV, 10, 624. Madrid (1934). a - 524

Noticia de la muerte del doctor J. P. van der Stok.

**Guariglia Rafael** - El Duque de los Abruzos. Bol. Soc. Geogr. Nac., LXIII, 6, 381-384. Madrid (1933). a - 525

**Harries C. & Thomsen Th.** - Knud Rasmussen. Det Grönl. Selsk. Aarsskr. 1933/34, 12-19. København (1934). a - 526

**Heldring E.** - P. H. Gallé, 1873-1934. 1 fig., Tijdschr. Kon. Ned. Aardr. Gen., Amsterdam, LI, 4, 487-488. Leiden (1934). a - 527

Directeur de l'Institut filial de l'Institut Royal Météorologique néerlandais, professeur de l'École supérieure de la Marine, collaborateur de nombreuses publications d'océanographie, auteur de « La Climatologie de l'Océan Indien ».

**Hesselmann Henrik** - Aleksander Sibiriakoff. (In Swed.). Ymer, 4, 446-448. Stockholm (1933). a - 528

**Hoel Adolf** - Carsten Borchgrevink. 1 fig., Norsk Geogr. Tidsskr., V, 2, 69-71. Oslo (1934). a - 529

Nécrologie.

**Holtedahl O.** - Knud Rasmussen. Norsk Geol. Tidskr., V, 1. Oslo (1934). a - 530

**Isachsen Gunnar** - Adrien de Gerlache. Norsk Geogr. Tidsskr., V, 5, 269-271. Oslo (1935). a - 531

Nachruf. Adrien de Gerlache, belgischer Polarforscher geboren 1866, gestorben 1934.

**Kerr Mark** - Prince Louis of Battenberg, Admiral of the Fleet [*Almiragius Princeps Aloisius* di Battenberg]. Longmans, Green & Co. New York (1934). a - 532

The author writes in the foreword that « this book does not profess to be a complete life of Prince Louis, but only a series of sketches . . . ». Its early chapters are devoted to a trip of Prince Louis through India with the Prince of Whales and his entourage. The remainder of the book treats of the events of his life in chronological order showing steady progress from midshipman to First Sea Lord, and the amount of constructive work he gave to the Navy of his adopted country.

**Koch Nandor** - Kövesligethy Radó (1862-1934). 1 fig., Tenger, XXIV, 7/12, 35-39. Budapest (1934). a - 533

**Lubbock Basil** (transcr. by . . .) - Barlow's Journal of His Life at Sea in King's Ships, East West Indiamen and Other Merchantmen from 1659 to 1703 [*Diarium ad* Barlow *pertinens de eius vita maritima in navibus regiis, nec minus de Indianis occidentalibus et orientalibus ab A. 1659 ad A. 1703*]. Vol. I & II, Hurst & Blacket Ltd. London (1934). **a - 534**

A very interesting contribution to the knowledge of naval conditions in the seventeenth century and a story of life at sea in Restoration days. It has been transcribed from the original manuscript in modern English by Basil Lubbock.

**Mathiassen Therkel** - Knud Rasmussen (In Danish, Engl. Rés.). 1 fig., Sv. Geogr. Årsb. 1934, X, 212-217. Lund (1934). **a - 535**

Obituary.

**Mill Hugh Rob.** - The Life of Sir Ernest Shackleton [Ernest Shackleton. *Biographia*]. Ills., maps., 312 pp., W. Heinemann. London (1933). **a - 536**

**Ogasawaka N.** - Life of Admiral Togo (Transl. by Jukichi & Togo Inonye) [*Almiragius* Togo. *Biographia*]. Seito Shorin. Tokyo (1934). **a - 537**

Opera divisa in otto libri comprendenti le azioni del grande Ammiraglio. Diffuso è il racconto della sua vita in Inghilterra, del periodo della guerra con la Cina e di quella con la Russia.

**Olszewicz Boleslaw** - Jean de Kolno, prétendu précurseur polonais de Colomb [*Johannes* de Kolno *opinatus praecursor Christophori Columbi*]. Rev. Pol. Géogr., XIII, 2/4, 51-65. Varsovie (1933). **a - 538**

**Richter Herman** - Erik Wilhelm Dahlgren (Rés. français). Sv. Geogr. Årsb., 1934, X, 203-211. Lund (1934). **a - 539**

Né en 1848, mort en 1934. Géographe d'histoire et cartographe renommé, ci-devant directeur général de la Bibliothèque Royale de Suède. Il a été reconnu comme le connaisseur le plus éminent de l'histoire de l'exploration de l'Océan Pacifique et a publié plusieurs ouvrages historico-géographiques et cartographiques. Liste de ses publications.

**Rudolphi Hans** - Knud Rasmussen. Peterm. Mitt., LXXX, 1, 18. Gotha (1934). **a - 540**

Nachruf auf den bekannten Nordpolarforscher. Verzeichnis seiner Werke in deutscher, dänischer oder englischer Sprache. Wichtige Beiträge verschiedener Teilnehmer seiner Reisen.

**Shaw Napier** - Sir Arthur Schuster. Quart. Journ. R. Meteor. Soc., LXI, 258, 99-103 (1935). **a - 541**

Obituary with a brief summary of the most prominent works of Sir Arthur Schuster.

**Sherrard O. A.** - A Life of Lord St. Vincent [Lord St. Vincent. *Biographia*]. George Allen & Unwin Ltd. London (1934). **a - 542**

This book has a special value for those who are interested in Naval history for it contains much material now published for the first time. The publication of the book coincides with the 200th Anniversary of St. Vincent's birth.

**Soler Juan Lopez** - Don Vicente Vera Y Lopez. Bol. Soc. Geogr. Nac., LXXIV, 10, 598-603. Madrid (1934). **a - 543**

Biografia y necrologia.

**Somerville Boyle** - Commodore Anson's Voyage into the South Seas and Around the World [*De navigatione a Commodoro* Anson *suscepta per orbem atque ad maria meridionalia*]. Ills., W. Heinemann. London & Toronto (1934). **a - 544**

Anson's life and deeds, described on hand of the accounts of Walter, Pascoe Thomas, John Philips and other sources, in modern English and in the light of modern knowledge.

**Sørensen Jon** - Fridtjof Nansens sage. Trad. en hollandais par Agnes Röntgen [Fridtjof Nansen. *Historia*]. Illustr., 395 pp., D. A. Daamen's Uitg. Mij. N. V. 's-Gravenhage (1934). **a - 545**

**Spiess F.** - Henrik Mohn. Zur hundertsten Wiederkehr seines Geburtstages [*Henricus* Mohn, *centesimo recurrente anno ab eius die natali*]. 1 Phot., Ann. d. Hydrogr., LXIII, 5, 181-182. Berlin (1935). **a - 546**

Gedenkworte, mit besonderer Berücksichtigung der Tätigkeit Mohns in den Gebieten der Meteorologie und der Meereskunde.

**Thorade H.** - Henrik Mohn und die Entwicklung der Meereskunde [*De Henrico* Mohn *et progressibus oceanographicae scientiae*]. 1 Abb., Ann. d. Hydrogr., LXIII, 5, 182-186. Berlin (1935). **a - 547**

1. Geschichtliche Bemerkungen. 2. Mohns Methode. 3. Bjerknessche Kraftfelder. Die Absicht des Vf. der vorliegenden Schrift war es zu zeigen, dass Mohn sich bereits auf dem Wege befand, der bei weiterer Fortsetzung zu den heute allgemein angewandten Methoden der Stromberechnung geführt hätte.

**Turley Charles** - Nansen of Norway [Nansen *Norvegus*]. Second (School). edition, x + 210 pp,, Methuen & Co. Ltd. London (1934). **a - 548**

**Vegard L.** - Ole Krogness and His Work [*De* Ole Krogness *eiusque operibus*]. 1 photo., Terr. Magn. & Atm. Electr., XXXIX, 4, 347-349. Baltimore (1934). **a - 549**

Obituary. The scientific importance of the work and activity of Ole Krogness in the field of the study of cosmic-terrestrial phenomena, of various aurora problems and in the reorganization of Norwegian weather service.

**A. H. K.** - Knud Rasmussen. (En finn.). 1 fig., Terra, 1, 42-44. Helsinki (1934). **a - 550**

**J. D. N.** - Sir Edgeworth David. Rev. Hydrogr., XI, 2, 11. Monaco (1934). **a - 551**

Mort à Sydney (Austr.) dans sa 76ᵉ année, le 28 Août 1934. Il occupa la chaire de géologie à l'Université de Sydney. Il fut Chef du Personnel Scientifique de l'Expédition de Sir Ernest Shackleton à l'Antarctique en 1909.

**J. G.** - Captain R. G. Latta. 1 photo., Mar. Obs., XII, 117, 10-11. London (1935). **a - 552**

Biography by an old shipmate of the Master of the « Empress of Britain ».

**N. R. C.** - Adrien de Gerlache. Tijdschr. Kon. Ned. Aardr. Gen. Amsterdam, LII, 1, 145-146. Leiden (1935). **a - 553**

Océanographe et explorateur des régions polaires, mort en 1934.

**T. C. B.** - Togo. Bol. Centro Naval, LIII, 507. Buenos Aires (1934). **a - 554**

* * * - Contrammiraglio a riposo Luigi Tonta [*De Aloysio* Tonta *Contralmiragio in beneficiis*]. Riv. Marit., LXVIII, 7/8, 81-82. Roma (1935). **a - 555**

Necrologia.

* * * - Senatore Prof. Camillo Manfroni [*Senator Prof. Camillus* Manfroni]. Riv. Marit., LXVIII, 7/8, 82-84. Roma (1935). **a - 556**

Necrologia.

**An.** - 35me anniversaire de l'activité scientifique du Professeur L. S. Berg [*Professor* L. S. Berg, *XXXV*, *recurrente anno ab initio eius activitatis scientificae*]. Bull. Arct. Inst., 6/7, 270. Leningrad (1934). **a - 557**

Bref compte rendu des principaux travaux du savant.

**An.** - Ludwig Amodeus, Herzog der Abruzzen [*Aloysius Amoedeus* Duca degli Abruzzi]. Geogr. Zeitschr., 4, 246. Leipzig (1933). **a - 558**

**An.** - Rear Admiral John Halligan [*Almiragius Johannes* Halligan]. 1 photo, Journ. Amer. Soc. Nav. Eng., LXVII, 1, 165-166. Washington D. C. (1935). **a - 559**

Obituary of the past President of the American Society of Naval Engineers.

**An.** - W. M. Davis [*In memoriam* W. M. Davis]. Nature, 30 june, 973. London (1934). **a - 560**

Obituary.

**An.** - Baron Adrien De Gerlache de Gomery [*De barone Adriano* De Gerlache de Gomery]. Rev. Hydrogr., XII, 1, 7. Monaco, Princ. (1935). **a - 561**

Ancien officier de la Marine belge, ce marin a consacré sa vie à l'étude de la mer. Il fut le premier à tenter l'inconnu d'un hivernage dans la région polaire Antarctique sur son navire la « Belgica » en 1897-99. En 1901 De Gerlache se rendit au Golfe Persique à bord du yacht « Selika » et en rapporta des collections zoologiques. En 1905 de nouveau sur la « Belgica » il alla sur la côte orientale du Groenland. En 1907 et 1909 la « Belgica » travailla dans les mers de Barents, de Kara et dans la banquise du Groenland.

**An.** - Aleksander Sibiriakoff [*Alexander* Sibirjakoff]. (En finn.). Terra, 1, 46. Helsinki (1934). **a - 562**

**An.** - Luigi Palazzo, 1861-1933 [*Aloysius* Palazzo, *1861-1933*]. Terr. Magn., XXXIX, 1, 71-72. Baltimore, Md. (1934). **a - 563**

Obituary.

**An.** - Erich von Drygalski. 1 phot., Umschau, XXXIX, 6, 116. Frankfurt a/M. (1935). **a - 564**

Kurze Biographie und Bericht der von Erich vou Drygalski geleiteten Expeditionen mit besonderer Berücksichtigung der grossen deutschen Südpolarexpedition anf der « Gauss », 1901-1903.

# II.

# OCEANOGRAPHIA PHYSICA

## GENERALIA

### Instituta oceanographica – Relationes publicae – Conventus et conferentiae – Oceanographiae historia – Ars docendi – Bibliographiae.

**Baldwin F. M.** - Marine Station of the University of Southern California [*Agitur de statione maritima ad universitatem in regione Californiensi merid. pertinente*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., part. I, 221. Washington D. C. (1934). **a - 565**

Very brief summary of the routine work of the Station in the direction of trawling and dredging. A preliminary report of some of this work is published in «Science».

**Bassler Ray S.** - Department of Geology [*Agitur de sectione geologica*]. Tables, Rep. U. S. Nat. Mus., 1934, 40-50. Washington D. C. (1935). **a - 566**

Activity of the Department during 1934: accessions, installation and preservation of collections, investigation and research.

**Bianchi D'Espinosa R.** - La partecipazione dell'Istituto Geografico Militare all'Esposizione e al IV Congresso di fotogrammetria di Parigi (1934) [*De Instituto Geographico Militari eiusque participatione Expositionis et Conventus photogrammetrici Parisiis habiti A. 1934*]. Universo, 1, 1-7. Firenze (1935). **a - 567**

A seguito della partecipazione dell'I. G. M. all'Esposizione di Fotogrammetria di Parigi – ed al relativo Congresso – l'A. lumeggia in rapida sintesi le essenziali caratteristiche delle attrezzature fotogrammetriche colà esposte per dedurre che quella appartenente all'I. G. M. (attrezzatura Santoni) è da considerare provvista delle più preziose caratteristiche veramente moderne.

**Chevey P.** - Rapport sur le fonctionnement de l'Institut Océanographique de l'Indochine pendant l'année 1933-34 [*De Instituto Oceanographico Indosinico. Relatio pro A. 1933-34*]. 2 pl., Inst. Océan. Indoch., Stat. Mar. Cauda, 3-21. Saïgon (1934). **a - 568**

Personnel de l'Institut. Son matériel. Recherches scientifiques et techniques: Océanographie physique (hydrologie, températures de surface); Océanographie biologique; Faunistique; Pêche et pisciculture. Utilisation industrielle des produits de la mer et des eaux douces. Rapports avec divers organismes scientifiques.

**Entz Géza** - A Magyar Tengerkutatás [*Inquisitiones oceanographicae Hungaricae*]. 1 fig., Tenger, XXIV, 7/12, 40-44. Budapest (1934). **a - 569**

**Fleming J. A.** - Introduction to the Transactions of the National Research Council [*Introductio in memorias ad* National Research Council *pertinentes*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., part. I, 3-4. Washington D. C. (1934). **a - 570**

Establishment and objects of the American Geophysical Union. Brief account of the annual assemblies of the Union; program and papers presented at the 15th Annual Assembly.

**Fleming J. A.** - The Fifteenth Annual Meeting of the American Geophysical Union [*Agitur de XV° Conventu annuo per Societatem Geophysicam Americanam habito*]. Science, LXXX, 2066, 119-121. New York (1934). **a - 571**

The reports and papers presented at this general assembly were concerned largely with progress in development of the U. S. Weather Service.

**Fleming J. A., Harradon H. D. & Lambert W. D.** - A Short Report of the Fifth General Assembly of the International Union of Geodesy and Geophysics, Lisbon, Portugal, September 1933 [*Relatio compendiosa de V° Consessu plenario Societatis omnium gentium pro Geodesic et Geophysica, habito Olisippone, in Lusitania, mense Septembri A. 1933*]. 1 table, Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., part. I, 24-34. Washington D. C. (1934). **a - 572**

Proposals of the Special Commission of Statutes and Finance; List of the officers elected at the Lisbon assembly by the Union and its associations; summary of the meetings of the Association of Geodesy, of the Association of Seismology, of the Association of Meteorology, of the Association of Terrestrial Magnetism and Electricity, of the Association of Physical Oceanography, of the Association of Volcanology, of the Association of Scientific Hydrology. Resolutions adopted.

**Granqvist Gunnar** - Merentutkimuslaitoksen toiminta vuonna 1933 [*De operibus peractis ab Instituto Oceanographico, A. 1933*]. Merentutkimuslaitoksen Julkaisu, 95, 1-16. Helsinki (1934).

(—) Voir en Suèd.: Havsforskn. inst. skr. 95, Helsinki (1934). **a - 573**

Personnel et direction. Expéditions. Observations du niveau de l'eau. Recherches talassologiques des sta-

tions terrestres. Observations de glace l'hiver 1932-1933. Recherches chimiques. Publications. Administration. Inventaire.

**Harding G. E.** - Meteorology and Climatology in a Teachers College [*Liber de meteorologia et climatologia ad usum magistrorum*]. Monthly Weath. Rev., LXIII, 1, 7-8. Washington D. C. (1935). **a - 574**

The chief purpose of this discussion is to present a brief survey of meteorology as it is taught today in colleges for the preparation of teachers; in such a course the author should attempt to give the student an insight into the physical processes and laws underlying the many different phenomena of weather and climate. In this note a brief outline of a course in meteorology and climatology offered in the teachers college of Pennsylvania is given.

**Helland-Hansen Bjørn** - Det geofysiske institutt [*De Instituto Geophysico*]. Bergens Mus. Årsber. 1933-34, 63-70. Bergen (1934). **a - 575**

Prof. Krogness's death. Visitors. Publication of the « Maud » - expedition. *A*. Hydrographical Section: Investigations, visitors, publications. *B*. Section for theoretical meteorology: Investigations, visitors, publications. *C*. Section terrestrial magnetism and cosmical physics: Investigations, Publications. The geophysical Commission. The Norwegian Geophysical Society.

**Hugo C. F.** - Report on the International Geographical Congress at Warsaw, August 23rd to 31st, 1934 [*Relatio de Conventu Geographico omnium gentium, Varsoviae a die 23 ad 31 mensis Augusti 1934*]. South Afric. Geogr. Journ., XVII, Dec., 35-36. Johannesburg (1934). **a - 576**

Summary of the work made during the congress; excursions and exhibitions.

**Iselin C. O.** - Institutions on the Atlantic Side of Canada and the United States. - Introduction [*De institutis in regione atlantica seu ad Canada seu ad Americae Status Foederatos pertinente. - Introductio*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., part. I, 225-226. Washington D. C. (1934). **a - 577**

Very brief account of the physical investigations in progress during 1933. List of major institutions information has been received from, located on or near the Atlantic seaboard. List of a number of smaller laboratories primarily engaged in biological and physiological researches.

**Lotko S.** - Le Conseil Géodésique de l'Etat. L'Inspection Géodésique de l'Etat [*Consilium Geodeticum publicum. Munera inspectionis geodeticae ad Statum pertinentia*]. (En russe). Gheodesist, 11/12, 5-13. Moskva (1933). **a - 578**

Informations concernant l'institution du Conseil Géodésique de l'État destiné à régulariser et à règlementer les travaux topographiques et cartographiques dans l'URSS. Les buts directs de ces travaux. Fondation d'un organe spécial pour le contrôle des travaux topographiques et cartographiques exécutés dans l'URSS.

**McEwen G. F.** - Report of the Committee on Evaporation, 1933-34 [*Relatio Commissionis pro evaporatione. A. 1933-34*]. (Repr.). Nat. Res. Counc., Trans. Amer. Geoph. Un., 15th Ann. Meet., 296-297. Washington (1934). **a - 579**

List of members of the Committee on Evaporation, of the papers published by some of the members, and summary of requests for various kinds of information regarding the subject of evaporation, especially in relation to practical engineering applications.

**Mecking Ludwig** - Der internationale Geographenkongress in Warschau 1934 [*Geographi omnium gentium Varsoviae conveniunt A. 1934*]. Peterm. Mitt., LXXX, 12, 373-376. Gotha (1934). **a - 580**

Neue Mitglieder der « Union géographique internationale ». Wahl von Präsidenten und Vize-präsidenten. Eröffnungsfeier. Ausstellung der offiziellen Kartographie der Länder. Vorträge und Sitzungen.

**Petersson H.** - Statens Havsforskningsstationer vid Gullmarfjorden [*Stationes publicae Suetiae pro inquisitionibus oceanographicis constitutae*]. Jorden Runt, 505-520. Stockholm (1934). **a - 581**

**Poujche E.** - Service météorologique de la Voie Maritime du Nord [*Servitium meteorologicum ad cursum maritimum Nordicum pertinens*]. (En russe). Meteor. Vestn., 4/7, 179-181. Leningrad (1934). **a - 582**

Sur l'organisation du Secteur Arctique de l'Administration Centrale du Service Météorologique de la Voie Maritime du Nord avec siège à Moscou.

**Prokofjev F.** - Institut de Recherche Scientifique pour la Géodésie, les levés aériens et la cartographie [*Agitur de Instituto pro inquisitionibus scientificis quoad Geographiam, aëriophotographiam et cartographiam*]. (En russe). 2 tabl., Gheodesist, 7/8, 1-6. Moskva (1933). **a - 583**

Fondation de l'Institut Géodésique et Cartographique de l'État, le 24 octobre 1928. Les buts de la nouvelle institution. Plan des travaux de l'Institut pour 1934, concernant l'astronomie et la gravimétrie, la géodésie, les instruments géodésiques, les levés aériens, la cartographie, la méthodologie, l'économie et la standardisation.

**Rittikh P. A.** - Session de la Commission Internationale de l'Année Polaire à Copenhague en Mai 1933 (Météorologie et Aérologie) [*Conventus a Commissione omnium gentium pro anno polari, Hauniae habitus mense Maio A. 1933* (*Meteorologia et Aerologia*)]. (En russe). Meteor. Vestn., 8/10, 257-259. Leningrad (1933). **a - 584**

**Roussinova I. L.** - La Session du Conseil Scientifique de l'Institut Arctique de l'URSS (VAI) [*Agitur de Sectione consilii scientifici ad Institutum Arcticum Sovieticum pertinentis*]. (En russe). Meteor. Vestn., 1/3, 69. Leningrad (1934). **a - 585**

Liste des communications dédiées aux problèmes de la géophysique, et texte de quelques résolutions adoptées.

**Rozner M. J.** (sous la rédaction de.......) - Matériaux de la II^me^ Conférence pour l'Etude des ressources naturelles de la Région du Nord. III. Les transports [*Res collectae perdurante II^a^ Conferentia ad opes naturales studendas in regione nordica. III^a^ Pars: De subvectionibus*]. (En russe). 223 pp., Sev. Kr. Izd. Arkhangheljsk (1933). **a - 586**

Parmi les 18 rapports publiés dans le présent volume les suivants concernent directement l'océanographie et les différents problèmes connexes: A. N. Soboleva - Réorganisation du service hydrométéorologique dans la Région du Nord. N. A. Afanassjev - Le problème du port de Kotlass. G. J. Nalivajko - Exploration du littoral de la Mer Blanche et de l'Océan Arctique en vue de la construction de ports. V. V. Timonov - Exploration hydrologique de la Mer Blanche. A. J. Popov-Vedenskij - Résultats et perspectives de l'étude du régime glaciologique des mers septentrionales. T. P. Marjoutine - Sur la durée de la navigation dans le port d'Arkhangheljsk. T. P. Marjoutine - Sur la durée de la navigation vers le delta du fleuve Indiga. I. D. Protopopov - Sur le régime hydrologique du delta du fleuve Mezenj. A. L. Kirchner - Elaboration des projets pour les ports de la Région du Nord. V. A. Tikhomirov - Perspectives du développement d'un grand cabotage entre les ports du Nord et les ports de la Mer Noire.

**Salistschev K.** - Activité du Secteur Géodésique de l'Institut Arctique Panunionique pour l'année 1934 [*Quaestio de activitate Sectionis pro Geodesia ad Institutum Arcticum Panunionicum pertinentis pro A. 1934*]. (En russe). Bull. Arct. Inst., 1/2, 18-21. Leningrad (1935). **a - 587**

Résumé des travaux exécutés par les expéditions d'exploration géodésique et par les Stations Polaires; résultats de l'élaboration en chambre des matériaux des expéditions de 1923-1933; exécution de quelques travaux particuliers, n'ayant pas un rapport direct aux programmes des expéditions de l'Institut Arctique.

**Schmidt O. J.** - L'exploration de l'Arctique dans l'Union Soviétique [*De navigationibus explorandi causa in regionem Arctidem a Sovietis peractis*]. (En russe). 23 pp., Izd. N.-Izd. Inst. Sov. Atl. Mira. Moskva (1934). **a - 588**

Textes des rapports de la délégation soviétique au Congrès International de Géographie à Varsovie.

**Stålberg Helge** - Internationella Geografkongressen i Warszawa 23-30 Aug. 1934 [*Conventus geographicus omnium gentium, Varsoviae, a die 23 ad 30 mensis Augusti A. 1934*]. Sv. Geogr. Årsb. 1934, X, 221-224. Lund (1934). **a - 589**

Inauguration. Excursions. Réunions des différentes sections, exposition des cartes.

**Thompson T. G. & Utterback C. L.** - Oceanographic Laboratories, University of Washington [*Agitur de laboratoriis oceanographicis in Universitate* Washington]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., part. I, 218-220. Washington D. C. (1934). **a - 590**

Summary of some of the general activities in which the Laboratories were engaged during March 1, 1933 to March 1, 1934. List of 22 scientific papers, published or in course of publication, and 13 other papers for which the experimental work has been completed and which are in preparation. This paper represents the specific work accomplished by the Laboratories.

**Tollner H., Kanitscheider R. & Kopf F.** - Die österreichische Polarexpedition 1932-33 nach Jan Mayen [*De austriaca navigatione ad polos, in insulam* Jan Mayen, *A. 1932-33*]. 49 Photos, 2 Kart., 1 Diagr., 126, Verlagsanstalt Tyrolia. Wien, Innsbruck, München (1934). **a - 591**

Die wissenschaftlichen Ergebnisse sind hauptsächlich erdmagnetischer Art. Schilderung des täglichen Lebens während der Ueberwinterung.

**Twenhofel W. H.** - Division of Geology and Geography [*Partitio geologica et geographica*]. Rep. Nat. Acad. Sc., 1933, 48-53. Washington D. C. (1934). **a - 592**

Report of the Chairman of the Division giving a summary of the progress of the work performed by this Division of the U. S. National Academy of Science with especial reference to accessory minerals in crystalline rocks, batholitic problems, bibliography of economic geology, clay minerals, isostasy, land classification, measurement of geologic time, micropalaeontology, ore deposition, paleobotany, Pan American Institute of Geography and History, petroleum geology, scientific results of drilling, sedimentation, shoreline investigations, Storrow fellowship, stratigraphy, tectonics, reorganization of the division.

**Vaughan T. Wayland** - Institutions on the Pacific Side of Canada and the United States. Introduction [*De institutis constitutis in regione Canadensi et in Americae statibus Foederatis ad oceanum Pacificum spectantibus. Introductio*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., part. I, 215-216. Washington D. C. (1934). **a - 593**

Introduction to the Report of the Committee on Oceanographic Activities of North America during April 1933 to April 1934.

**Voûte E. J.** - International Geografisch Congres te Warschau 23-31 Augustus 1934 [*Conventus geographicus omnium gentium, Varsoviae, a die 23 ad 31 mensis Augusti A. 1934*]. Tijdschr. Kon. Ned. Aardr. Gen. Amsterdam, LI, 6, 869-882. Leiden (1934). **a - 594**

Nouveaux membres; élection du Président; inauguration, orateurs; conférences et réunions (points de discussion), séance de clôture; commissions; publications.

**Association des Amis du Musée de la Marine** - Rapport annuel 1933 [*Relatio annua 1933*]. 2 pl., ii–xv pp. Paris (1934). **a - 595**

Assemblée générale du 12 Juin 1934. Rapport du Conseil d'administration. Vœu émis par l'A. A. M. M. Rapport du trésorier. Liste des dons au Musée de la Marine. Liste des membres de l'A. A. M. M.

**Association de Géographes Français** - Bibliographie Géographique Internationale 1934 (XLIV Bibliographie Annuelle) [*Bibliographia Geographica Internationalis*]. 676 pp., Armand Colin. Paris (1935). **a - 596**

Compilée comme dans les années passées. Elle contient 2899 fiches.

**Bureau des Longitudes** - Liste du Personnel pour l'année 1934. Table des matières [*Elenchus scribarum ministerii pro A. 1934. Tabula materiarum*]. 3 tabl. de matières, ann. 1935, Bur. Longit., F. 1-F, 48. Paris (1934). **a - 597**

Composition du bureau et liste du personnel pour 1934. Trois tables contenant respectivement: (1) les renseignements de l'« Annuaire » groupés par chapitres et par articles principaux, (2) les principaux articles contenus dans les « Annuaires » des années 1930 à 1934 et non réproduits en 1935, et (3) la plupart des renseignements, indiqués par ordre alphabétique, donnés dans les « Annuaires » de 1930 à 1934 en renvoyant au volume qui les contient.

**Bureau des Longitudes** - Annuaire pour l'an 1935 publié par le . . . avec des notices scientifiques [*Annuarium pro A. 1935 ab officio pro longitudinibus editum cum notis scientificis*]. Tabl., cartes, photos, vii + 558 pp., 5 app., Gauthier-Villars. Paris (1934). **a - 598**

Calendrier pour 1935: Calendrier, prédictions, étoiles, études des divers calendriers. Terre, Météorologie, Réfraction, Magnétisme terrestre. Astronomie (coordonnées astronomiques, temps, fuseaux horaires), Soleil, Lune, Grosses planètes, Comètes, Étoiles. Poids et mesures. Statistiques géographiques et démographiques. Supplément pour 1936. Cinq notices. Carte magnétique de la France. Cartes célestes.

**Comité Météorologique International** - Procès-Verbaux des séances de De Bilt, 4-7 Octobre 1933

[*Acta scripta consessuum in* De Bilt *habitorum a die 4 ad 7 mensis Octobris A. 1933*]. Publ. Sécr. Com. Météor. Intern., XVII, 133 pp. Kemink en Zoon. Utrecht. (1934). **a - 599**

Compte rendu des travaux des cinq sessions du Comité Météorologique International. A l'exception des rapports de la Commission Internationale pour la IIème Année Polaire Internationale 1932–33 et de la Commission du Magnétisme Terrestre et de l'Electricité Atmosphérique, toutes les communications présentées ont eu un caractère purement météorologique. Au cours des séances 17 résolutions ont été votées, dont le texte est publié dans les procès-verbaux.

**Conseil Permanent International pour l'Exploration de la Mer** - Séance du Comité Atlantique [*Consessus habitus a Commissione pro Oceano Atlantico*]. Rapp. & Pr.-V. Réun. XCIII, Rapp. Atlant. 1933, 32. Copenhague (1935). **a - 600**

I. Compte rendu de la séance. II. Résolutions adoptées.

**Department of Commerce. Division of Publications** - List of Publications [*Elenchus publicationum*]. ii-xii, 1-144. U. S. Govmt. Print. Off. Washington (1934). **a - 601**

Pamphlet containing a complete list of the publications of the U. S. Department of Commerce either for free distribution by the department or by purchase from the Superintendent of Documents revised and corrected to date of issue. Between the publications are listed also those of the U. S. Coast and Geodetic Survey, of the Bureau of Fisheries, Bureau of Lighthouses, Bureau of Navigation and Steamboat Inspection, and the U. S. Shipping Board Bureau.

**Fédération des Sociétés Françaises de Sciences Naturelles** - Bibliographie des Sciences Géologiques [*Bibliographia scientiarum Geologicarum*]. 356 pp., III, 1932. Paris (1933). **a - 602**

**International Hydrographic Bureau - Bureau Hydrographique International** - Year-Book, Annuaire [*Annuarium*]. (In Engl. & French). 85 pp. Monaco (Princ.) (1935). **a - 603**

États membres du Bureau. Comité de Direction. Services Hydrologiques des différents États cités dans l'« Annuaire ».

**Ministero delle Corporazioni. R. Ufficio Geologico** - Bibliografia geologica italiana per gli anni 1915-1933. N. 1. Lettera *A* [*Bibliographia geologica italica ab A. 1915 ad A. 1933. Littera A*]. (Suppl. al n. 10 del v. LIX del « Boll. R. Uff. Geol. d'It. »), 72 pp., Tipogr. Cuggiani, Ist. Poligr. dello Stato - Libreria. Roma (1934). **a - 604**

**National Academy of Sciences** - Report of the.... Fiscal Year 1932-33 [*Relatio Academiae nationalis scientiarum pro anno fiscali 1932-33*] ii-vii + 172 pp., U. S. Govmt. Print. Off. Washington D. C. (1934). **a - 605**

Letter of transmittal. Act of incorporation. Review of the year 1932-33. Meeting of the National Academy of Sciences: Autumn meeting 1932, Annual meeting, 1933. Report of the National Research Council. Appendices.

**National Research Council of Japan** - Report n. 1, March 1922 [*Relatio, n. 1 mense Martio A. 1922*]. Nat. Res. Counc. Jap., Rep., 1, 1-20. Tokyo (1930). **a - 606**

Foreword: Resuming of the publication of the « Proceedings » n° 1 of the National Research Council of Japan, issued in March 1922, with nothing to follow, owing to the destruction of the manuscripts for n° 2, in the great earthquake and fire of September 1, 1923. I: Historical sketch of the National Research Council. II: The constitution and by-laws of the National Research Council. III: Work of the National Research Council: Publication, Collection of Scientific and Technical literature, Scientific investigation of the Pacific, Other items, Meetings. IV: Officers and members of the National Research Council. V: Standing and National Committees.

**National Research Council of Japan** - Report n. 2-3, April 1922. March 1924 [*Relatio cuius numeri 2-3 inscribuntur, a mense Aprili 1922 ad mensem Martium 1924*]. Nat. Res. Counc. Jap., Rep. 2-3, 21-64. Tokyo (1930). **a - 607**

I: Work of the National Research Council of Japan. II: International scientific meetings and the National Research Council of Japan. III: Officers, Members, Committees. Appendix: Obituary notes of deceased members.

**National Research Council of Japan** - Report n. 4-5, April, 1924, March 1926 [*Relatio cuius numeri 4-5 inscribuntur, a mense Aprili 1924 ad mensem Martium 1926*]. Nat. Res. Counc. Jap., Rep. 4-5, 65-118. Tokyo (1930). **a - 608**

Serial publications of the Council. Meetings. Organization of the Japanese Association for the Advancement of Science. International Scientific Meetings and the National Research Council. Preparation for the Third Pan-Pacific Science Congress. Officers, Members, Committees Appendix: Obituary notes of deceased members.

**National Research Council of Japan** - Report n. 6-7, April 1926. March 1928 [*Relatio cuius numeri 6-7 inscribuntur, a mense Aprili 1926 ad mensem Martium 1928*]. Nat. Res. Counc. Jap., Rep. 6-7, 119-228. Tokyo (1930). **a - 609**

Serial publications. Other publications. Meetings. Organization of a Committee on Dye-Stuff Research. International Scientific Meetings and the National Research Council of Japan. Revision of the Statutes of the International Union of Pure and Applied Chemistry and the National Research Council of Japan. Third Pan-Pacific Science Congress. Officers, Members, Committees.

**Royal Meteorological Society** - Bibliography of Meteorological Literature [*Bibliographia rerum meteorologicarum*]. III, 6, 202-244. London (1935). **a - 610**

List prepared from the meteorological literature received by the R. Meteorological Society from July to December 1934, by the Society with the collaboration of the Meteorological Office.

**Royal Meteorological Society** - Report of the Council for the Year 1934 [*Consilii relatio pro A. 1934*]. 2 append. Quart. Journ. R. Meteor. Soc., LXI, 259, 195-209. London (1935). **a - 611**

Report on the publications, the meetings, lectures and panel of lecturers, the British Rainfall Organization Fund, the finance, the Office Staff, the library, the fellows of the Society.

**Science Advisory Board** - Report of July 31, 1933 and May 28, 1934 [*Relatio die 31 mensis Julii 1933 et die 28 mensis Maii 1934*]. 303 pp., Nat. Res. Counc. Washington D. C. (1934). **a - 612**

Establishment of the Science Advisory Board on July, 1933 through the action of President Roosevelt. Members of the Board. Activities of the Board: *A*. Agriculture, *B*. Bureau of the Budget. *C*. Commerce. *D*. Department of the Interior. *E*. Joint Agencies. *F*. Navy Department. *G*. War Department. H. Specia Bureaus and Agencies. Appendices.

**Secretary of Commerce** - Coast and Geodetic Survey [*Institutum nomine* Coast and Geodetic Survey]. 7 tables. Ann. Rep. Secr. Comm., 1934 (Repr.) 119-139. U. S. Govmt. Print. Off. Washington D. C. (1934). **a - 613**

Review of the year, 1934: the public works program, civil works project, summary of activities, development of methods and instruments, Division of Charts, Division of Hydrography and Topography, Division of Geodesy, Division of Tides and Currents, Division of Terrestrial Magnetism and Seismology.

**Société Géographique de l'État** - Travaux du 1$^{er}$ Congrès Géographique Panunionique, Léningrad, 11-18 avril 1933. Fasc. 1. Résolutions [*De operibus peractis perdurante I° Conventu Geographico Panunionico, Leningradi habito a die 11 ad 18 mensis Aprilis A. 1933. Fasciculus II$^{us}$ Sententiae sumptae*]. (En russe). 56 pp., Ed. Soc. Géogr. Etat. Léningrad (1934). **a - 614**

Résolutions adoptées et votées par le Congrès. Les résolutions intéressant l'océanographie: Résolution sur le rapport de R. L. Samoilovitsch (pp. 7-8), id. sur le rapport de M. A. Loris-Mélikov (p. 39) et id. sur les travaux de la Section Arctique du Congrès (pp. 48-51).

**Vereeniging Nederlandsch Historisch Scheepvaart Museum te Amsterdam** - Jaarverslag 1933 en 1934 [*Relatio annua 1933 et 1934*]. Amsterdam (1935). **a - 615**

Rapport administratif. Fondateurs, membres, acquisitions.

**Woods Hole Oceanographic Institution** - Annual Announcement, Fifth Year, 1935-1936 [*Ratio annua. Agitur de operum ratione pro anno V°, idest 1935-36*]. 12 pp. Woods Hole., Mass. (1935). **a - 616**

Trustees & Officers of the Institution. General information. Buildings. Salt Water supply. Library. Equipment. Staff. Facilities for publication. Program.

**J. W. N.** - Cape Geographical Society [*De Societate geographica in civitate quae nomen habet a Promunturio Bonae Spei*]. South Afric. Geogr. Journ., XVII, Dec., 36-37. Johannesburg (1934). **a - 617**

Brief account of the activity of the Society during 1934.

**K. S. S., C. B. F. & E. G. R. T.** - The Geographical Congress at Warszawa [*Conventus geographicus Varsoviae habitus*]. Geogr. Journ., LXXXIV, 5, 424-429. London (1934). **a - 618**

Continued from the « Journal » for October 1934 (vol. LXXXIV, 4). Account of the work of the Congress, followed by some critics and general considerations pertaining to the study of the geographical phenomena and geographical problems.

**V. E.** - Organisation de la Société Antarctique Américaine [*Ratio et constitutio Societatis Antarcticae Americanae*]. (En russe). Bull. Arct. Inst., 1/2, 25. Leningrad (1935). **a - 619**

Information concernant la fondation à la fin du mois de novembre 1934 de la Société Antarctique Américaine qui travaillera en étroit contact avec le « Club Antarctique » de Londres et la Société Antarctique Néozélandaise.

**An.** - The Scott Polar Research Institute in Cambridge [*De Instituto nomine* Scott *pro inquisitionibus polaribus, Cantabrigiae*]. (En russe). Bull. Arct. Inst., 11/12, 418-419. Leningrad (1934). **a - 620**

Activity, publications and scope of the Scott Institute.

**An.** - The Geographical Congress at Warszawa [*Conventus geographicus, Varsoviae habitus*]. Geogr. Journ., LXXXIV, 4, 341-348. London (1934). **a - 621**

Brief account on a general Assembly of the International Geographical Union and an International Congress of Geography held under the auspices of the former at Warszawa from August 22-31 under the presidency of Dr. Isaiah Bowman.

**An.** - The Fourteenth International Geographical Congress. Warsaw, 1934 [*Agitur de XIV° conventu geographico omnium gentium, Varsoviae habito, A. 1934*]. Geogr. Rev., XXV, 1, 142-148. New York (1935). **a - 622**

Account of the Section meetings, the special papers, the exhibition, the excursions and plans for the next Congress.

**An.** - The Scott Polar Research Institute [*De Instituto, nomine* Scott, *pro inquisitionibus polaribus*]. Nature, CXXXIV, 3395, 818. London (1934). **a - 623**

**An.** - Center for Polar Research at Cambridge, England [*Statio centralis pro inquisitionibus polaribus Cantabrigiae constituta, in Anglia*]. Science, LXXX, 2082, 472. New York (1934). **a - 624**

This new center was opened at Cambridge on November 16 by Stanley Baldwin, Lord President of the Council, in the presence of many veteran Arctic explorers. Brief description of the ceremony.

**An.** - The Annual Meeting of the Smithsonian Institution [*Consessus annuus Institutionis Smithsonianae*]. Science, LXXXI, 2093, 147-148. New York (1935). **a - 625**

Account of the meeting which took place on January 17, 1935 with especial regard to the report by Dr. Charles Abbot, Secretary of the Smithsonian Institution, dealing with the activity and work of the Institution during 1934.

**An.** - The New York University Weather Station [*Statio meteorologica ad Universitatem pertinens in* New York]. Science, LXXXI, 2095, 192. New York (1935). **a - 626**

Brief account of the foundation, equipment and work of a weather station established by the New York University College of Engineering.

**An.** - Anniversary of the Blue Hill Observatory [*Agitur de die anniversario observatorii in* Blue Hill *constituti*]. Science, LXXXI, 2098, 265-266. New York (1935). **a - 627**

Brief account of the celebration of the fiftieth anniversary of the first regular observation made at the Blue Hill Meteorological Observatory, Harvard University, U. S. A.

## Expeditiones oceanographiae et scientiae causa susceptae - Studia et quaesita oceanographica.

**Ahlmann W. son Hans** - Scientific Results of the Norwegian-Swedish Spitsbergen Expedition in 1934. Introduction. General Outline of the Expedition [*Resultatus ex navigatione a Suetiis Norvegisque peracta ad* Spitsbergen *A. 1934. Introductio. Brevia circa navigationem*]. 9 figs., 1 map., Geogr. Ann., XVII, 1-2, 22-28. Stockholm (1935). **a - 628**

**Antonov L.** - La navigation du brise–glace « Krassin » vers la Novaja Zemlja en hiver 1933 [*De navigatione navis glaciei ruptricis* « Krassin » *ad* Novaja Zemlja, *hieme 1933*]. 4 fig., Ghidrogr. i Korablev., 1, 16-23. Leningrad (1934). **a - 629**

**Arctovski Henryk** - L'exploration des régions polaires par coopération internationale [*De exploratis regionibus ad polos proximis, consociata opera omnium gentium*]. La Météorologie, VIII, janv.-mars, 42-69. Paris (1934). **a - 630**

**Auer Vaino** - Results of the Finnish Expedition to Tierra del Fuego in 1928–1929, led by. . . [*Resultatus navigationis Finlandicae ad regionem* Tierra del Fuego *A. 1928-29, duce* Auer Vaino]. Num. figs., charts & pls., 313 pp. Helsinki (1934). **a - 631**

**Bartels J.** - Arthur Schuster's Work on Periodicities [*De operibus ab Arthuro* Schuster *peractis circa periodicitates*]. Terr. Magn. XXXIX, 4, 345-346. Baltimore (1934). **a - 632**

Brief account and list of Schuster's classical papers, dealing with his discovery of the necessity to apply essentially statistical methods based on the theory of probability for research on periodicities.

**Bauer H. A.** - Recent Oceanographic Work in the Russian Arctic [*De recentioribus operibus oceanographicis in regione Arctica ad Russiam pertinente*]. 1 map, Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 209-211. Washington D. C. (1934). **a - 633**

In giving information of the work performed in the Russian Arctic by several Russian expeditions, the A. makes distinction between those sent out for purely oceanographic work and those whose oceanographic program was coordinated with and often subordinated to the aims of an economic or trade expedition. The purely oceanographic expeditions have pursued a well-planned survey over definite sections of the polar shelf, especially within the more accessible part of the Russian polar seas. The paper has been compilated on hand of material issued in several Russian publications.

**Beaglehole J. C.** - The Exploration of the Pacific [*De explorato oceano Pacifico*]. 4 maps, 411 pp., A. & C. Black. London (1934). **a - 634**

Summary of all the exploration made in the Pacific in order to discover the « Terra Australis Incognita ». On the charts are shown the routes covered by the first explorers. Bibliography.

**Bigelov Henry B.** - Woods Hole Oceanographic Institution [*Institutum Oceanographicum cuius nomen* Woods Hole Oceanogr. Instit.]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 228-229. Washington D. C. (1934). **a - 635**

Brief account of the cruises of the « Atlantis » during the year 1933. List of publications on the laboratory investigations for the Woods Hole Oceanographic Institution.

**Bogdanov D. A.** - Expedition to Southern Taimyr in 1933 [*De expeditione ad regionem* Taimyr *meridionalem, A. 1933*] (In Russ. & Engl.). Bull. Arct. Inst., 2, 62-64, 100-102. Leningrad (1934). **a - 636**

Account of an expedition sent out in order to complete the previous work performed which has solved the problem of an open passage from the sea into the Pjassina River, and to investigate the possibility of navigation on the river. As a result of hydrographic observations carried out, it was shown that Pjassina River, Lake Pjassina included, is navigable along her entire length, i. e. that the Avam-Khatanga Tundra Region should be reachable by means of water-way.

**Cannegieter H. G.** - Die Niederländische aerologische Station auf Island während des Internationalen Polarjahres [*De statione aërologica hollandica in Islandia operibus perdurantibus pro anno polari internationali*]. Polarforsch., 1, 3-5. Kiel (1934). **a - 637**

**Charcot J.–B.** - Rapport préliminaire sur la campagne du « Pourquoi–Pas ? » en 1933 [*Relatio prior de navigatione navis* « Pourquoi–Pas ? », *A. 1933*]. Fig., cart. et tabl., Ann. Hydrogr., XIII, Ser. III, 1-85. Paris (1934). **a - 638**

Voir mêmes Ann. 1931-1932 et 1933 sur l'argument. Travaux du « Pollux » et du « Pourquoi-Pas ? » sur la côte Groenlandaise, à Scoresby-Sund et pendant le voyage. Traversée des glaces par le « Pollux » et séjour du bâtiment à Rosenvinge. Rapport sur la navigation par A. Chatton commandant le « Pourquoi-Pas ? ». Mesures de salinité par R. Chevallier et J. Devaux. Prélèvements de sables magnétiques par R. Chevallier. Observations d'histoire naturelle par M. Parat et P. Deach. Observations dans le Hurry Inlet par C. Bertram, D. Lack et B. Roberts. Études physicochimiques sur les eaux de la Manche et de la Seine Maritime par P. Chauchard.

**Charcot J.-B.** - La mission du « Pourquoi-Pas ? » en 1934 [*De missione navis* « Pourquoi-Pas ? », *A. 1934*]. Géographie, Terre, Air, Mer., LXII, 3/4, 175-180. Paris (1934). **a - 639**

Rapport adressé au Ministère de la Marine sur la mission du « Pourquoi-Pas ? » dans les eaux arctiques; le trajet couvert; les conditions météorologiques défavorables; l'état des glaces sur la route du « Pourquoi-Pas ? »; la mission a atteint les deux buts principaux qui lui ont été assignés: récupération du matériel de l'Année Polaire et installation de la nouvelle mission française à Angmagssalik; elle a pu faire aussi d'intéréssantes observations scientifiques.

**Chavanier M. C.** - Mission hydrographique Algérie, Tunisie, Maroc 1933. **De Buen Rafael** - Régime hydrographique dans la mer d'Espagne et le long des côtes portugaises (Croisières du navire « Xauen ») [*Regimen hydrographicum quoad mare Hispanicum et secundum litora Lusitana. Navigatio, navi* « Xauen » *peracta*]. 3 fig. Rapp. & Pr.-Verb. Cons. Int. Expl. Mer., XCIII, Rapp. Atlant. 1933, 22-24. Copenhague (1935). **a - 643**

Compte rendu des stations hydrographiques exécutées en Juillet 1933. Résultats des observations sur les salinités et les températures, les salinités et densités *in situ*, la distribution horizontale de la salinité, faites au cours des croisières du « Xauen » en Juillet 1933.

**De Buen Rafael** - Hydrographie du Détroit de Gibraltar en Mars 1933 (Croisières du navire « Xauen ») [*Fretum Gaditanum. Quaestio de hydrographia, mense Martio A. 1933* (*Navigatio scientiae causa, navi* « Xauen » *peracta*)]. 4 fig. Rapp. & Pr.-Verb. Cons. Int. Expl. Mer, XCIII, Rapp. Atlant. 1933, 25-29. Copenhague (1935). **a - 644**

Compte rendu des résultats des travaux faits pendant une croisière du « Xauen » dans la région du Détroit de Gibraltar, comprenant 8 stations et 59 opérations, dans deux alignements (Cadix-Arcila et Cap Spartel-Cap Trafalgar). Résumé des connaissances acquises, en ce qui concerne: 1° le régime des courants de surface dans la mer d'Alboran, 2° l'existence d'ondes de marée profondes dans la zone inférieure du détroit, 3° la transformation du courant inférieur en courant incliné vers la surface, par l'influence du relief du fond du Détroit de Gibraltar. Impossibilité d'établir une théorie générale satisfaisante sur la façon dont se réalise l'échange des eaux océaniques et méditerranéennes dans le Détroit.

Journ., LXXXIV, 2, 116-121. London (1934). **a - 652**

A. New Friesland (W. L. S. Fleming, in collaboration with J. M. Edmonds). B. Dickson Land (J. Brough and R. H. S. Robertson). C. The Sassen Valley (J. Brough and R. H. S. Robertson). D. Geomorphology: Surface Markings (W. L. S. Fleming in collaboration with O. Gatty). Preliminary statement of the scientific work accomplished by the various parties of the expedition.

**Fraser McLean C.** - Oceanography in British Columbia in 1933 [*De oceanographia in Columbia Britannica, A. 1933*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 217-218. Washington D. C. (1934). **a - 653**

Brief summary of the work on oceanography in British Columbia of which most part was centered in the first half of the year around the program of the Fifth Pacific Science Congress. Completion of the investigation of fiords and initiation of a closer cooperation between the work of the Hydrographic Survey and the Biological Board of Canada. Construction of a new well-equipped survey-vessel the « Wm. J. Stewart », for work in the coastal waters of British Columbia. The major biological problems dealt with. The activity of Fisheries Experiment Station, Prince Rupert, B. C.

**Gardiner Stanley** - L'expédition John Murray dans l'Océan Indien [*De expeditione* John Murray *in Oceanum Indicum*]. 2 fig., Bull. Soc. Océanogr. France, 82, 1434-1438. Paris (1935).

(—) Extract in: Int. Hydrogr. Bull. VI, 103–106. Monaco, Princ. (1934). **a - 654**

L'origine de l'expédition John Murray spécialement organisée pour l'étude du fond et des conditions de subsurface de l'Océan Indien. Rapide comparaison entre l'organisation de l'expédition du « Challenger » (1872-76) et celle du « Mabahiss » armé en Alexandrie le 1 septembre 1933. Personnel de l'expédition. 1ère traversée de la mer Rouge vers Aden, et résultats des sondages effectués, ainsi que de l'étude de la circulation dans les couches d'eau

de cette mer. Troisième croisière d'Aden à Karachi autour du Golfe d'Oman, terminée à Bombay; tracé du trajet du courant de profondeur du détroit de Socotra et étude de plusieurs endroits de la côte d'Arabie, zone azoïque s'étendant à la totalité du golfe d'Oman. Résultats des deux traversées de Bombay à Mombasa et de Zanzibar à Colombo par les Seychelles, avec une croisière spéciale pour la prise d'animaux marins dans la région de Zanzibar. Exploration du fond de la mer au cours de ces croisières et d'une troisième, allant des Maldives à Socotra. Résultat d'un voyage spécial, pour étudier le plateau de Maldives.

**Georgi Johannes**, transl. by **Luon F. H.** (Rev. & Suppl. by Auth.) - Mid-Ice: the Story of the Wegener Expedition to Greenland [*Inter glacies. Historia navigationis a* Wegener *susceptae in Groenlandiam*]. 24 pls., xiv-247 pp., Kegan P. & Co., Ltd. London (1934). **a - 655**

**Gherardi W. R.** - The Oceanographic Activities of the Hydrographic Office and the United States Navy During April 1933 to April 1934 [*De activitate oceanographica Officii Hydrographici et Classis ad Americae Status Foederatos pertinentium, mense Aprili A. 1934*]. 8 figs., Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 188-200. Washington (1934). **a - 656**

Brief summary of the oceanographic activities of the Hydrographic Office and the United States Navy during the year, April 1933 to April 1934, which were more varied and related to areas more widely separated than during recent former years: United States naval survey. Charts from U. S. Naval surveys. Sonic soundings obtained by U. S. Naval vessels. List of oceanic depths. Chart of unsounded areas of the North Pacific Ocean. Bathymetrical chart of the Caribbean Sea. Current-charts. Temperature-charts. Mechanical extraction of oceanic data. Dynamic oceanographic surveys. Navigator's Sailing Directions or Pilots. Gravity-reports. Magnetic charts.

**Ghernet E. S.** - Expedition of the « Sadko » in 1934 [*De navigatione in navi* « Sadko » *A. 1934*]. (In Russ. & Engl.). Bull. Arct. Inst., 1/2, 11-13, 48-50. Leningrad (1934). **a - 657**

Brief account of the floating of the ice-breaker « Sadko » which sank at a depth of 22m. near Kandalakscha in 1916. Description of her first voyage started after repair was made, on July 22, 1934 with the scope of establishing a polar station on Cape Olovianny (Severnaja Zemlja ) or on Lonely Island, as well as to take the wintering party on Serghej Kamenev Islands. Ice-conditions on the route of the « Sadko »; scientific material collected during the drift of the « Sadko », which is of especial value inasmuch as it was collected in a region, which, owing to the extreme difficulty of access, had not yet been explored, i. e. the central part of the Kara Sea.

**Glen A. R.** - The Oxford University Expedition to Spitsbergen, 1933 [*De navigatione ad* Spitzbergen *ab Universitate Oxoniensi peracta A. 1933*]. 1 map., 4 tables, 12 photos. Geogr. Journ., LXXXIV, 2, 104-135. London (1934). **a - 658**

Paper read at the Evening Meeting of the R. Geographical Society on 19 February 1934, containing a general account of the main work of the expedition sent out by the Oxford University Exploration Club in order to renew its Arctic work in 1933 and chiefly concerned with the exploration of the New Friesland ice-cap in the north-east of the main island of West Spitsbergen and the western coastal belt of the same region from Mossel Bay to the beginning of the Stubendorf Mountains, as well as the coast line of the Widje Bay and of the Ice Fjord. The paper is followed by 6 appendices which form a preliminary statement of the scientific work done by the expedition, and by a report of the discussion, which followed the lecture of the paper.

**Glen A. R. & Keith D. B.** - The Oxford University Arctic Expedition, 1935-36 [*De navigatione ad regiones arcticas ab Universitate Oxoniensi peracta A. 1935-36*]. 3 figs., Nature, CXXV, 3416, 604-606. London (1935). **a - 659**

Brief account of the program of the new Oxford University Arctic Expedition, the plans of which are to carry out a topographical and geological survey of the unknown north and east coasts of Greenland, and of as many of the northern and eastern islands as time and ice conditions permit. In addition to the surveys, researches on the ionosphere, atmospheric ozone, electrical disturbances, and terrestrial magnetism will be carried on at the base of the expedition at Rijp's Bay over the whole year, and two winter stations are to be maintained on the inland ice, and finally a fairly comprehensive biological program is planned, which will mainly consist of a study of the birds, correlated with the conditions of marine fauna on which they feed.

**Habert M.** - Rapport préliminaire sur les travaux de la mission française de l'année polaire 1932-1933 au Scoresby-Sund [*Relatio prior de operibus peractis a missione Gallica, A. 1932-1933, ad* Scoresby-Sund]. 1 tabl. h. t., Ann. Hydrogr., XIII, Ser. III, 153-179. Paris (1934). **a - 660**

Report on the oceanographic work of the Coast and Geodetic Survey which for the year 1933–34 has been confined largely to the offshore surveys on the Atlantic, Gulf, and Pacific coasts. This survey has been extended to the limit of the continental shelf or to depths of one to two thousands fathoms and all the work is controlled by radio–acoustic sound–ranging resulting in an accurate delineation of the floor of the ocean over which the surveys extend. Account of the progress of the tidal work and current observations made by the Survey. Some hints as to the program of work during the coming year.

Zahlr. Tab., Kart. u. Zeichn., Kemink en Zoon N. V. Utrecht (1935).

( — ) Résultats scientifiques de l'Expédition du « Snellius » dans les parties orientales des Indes Néerlandaises 1929-1930 (même éditeur, Utrecht). **a - 683**

Das Sammelwerk besteht aus den folgenden Teilen: I. Vorbereitung und Ausrüstung. II. Meereskunde. III. Meteorologie. IV. Chemie. V. Geologie. VI. Biologie.

**Samoilovitsch R. L.** - Ma dix-huitième expédition [*Agitur de XVIII*ª *navigatione ab Auctore peracta*]. (En russe). Photos, 2 cartes h. t., 116 pp., Edit. Inst. Arct. URSS. Léningrad (1934). **a - 684**

**Samoilovitsch R. L.** - Expedition on the Ice-Breaking Steamer « Sedov » in 1934 [*De navigationibus in navi glaciei-ruptrici nomine* « Sedov », *A. 1934*]. (In Russ. & Engl.). Bull. Arct. Inst., 10, 354-357, 390-393. Leningrad (1934). **a - 685**

Brief account of the expedition on board the ice-breaker « Sedov » organized by the Chief Administration of the Northern Sea Route under the leadership of Prof. R. L. Samoilovitsch, Director of the Arctic Institute. Staff of the expedition. Equipment of the ship. Route of the expedition. Discovery of a great depth east of the Cape Zhélaniya. Principal task of the expedition: determination of the size and the boundaries of a shoal in the northern part of the Kara Sea, against which had run in 1932 the ice-breaker « Taimyr ». Hydrological sections made in the region under consideration. Topographical survey of Wiese Island; magnetic observations; results of the hydrological observations; analysis carried out in the hydrochemical laboratory on board the ice-breaker; investigations allowing to plot a dynamical chart of the Kara Sea; results of the investigation embracing the entire biological complex of the Kara Sea, its bottom and ice conditions.

**Schmidt O.** - Scientific Results of the Expedition 1933-1934 on the S/S/ « Cheliuskin » [*Resultatus scientifici e navigatione peracta navi sovietica* « Cheljuskin », *A. 1933-34*]. (In Russ. & Engl.). Bull. Arct. Inst., 6/7, 259-261, 285-287. Leningrad (1935). **a - 686**

Summary of the results of observations carried out during the voyage and after the wreck of the ice-breaker « Cheliuskin » with especial regard to the exploration of the Chukchee Sea which represents the least investigated part of the Soviet Arctic. Information as to the cartographic, meteorological, hydrological, hydrobiological, zoological work performed; observations on the effect of the ice on the hull of the ship; elaboration of a new method for forecasting the approach of ice-jams on hand of observations of the tiniest waves passing over the ice which are invisible to the eye.

**Schmidt P.** - Conquête scientifique des mers de l'Extrême-Orient [*Agitur de cognitione scientifica ultimarum regionum orientalium*]. (En russe). 4 Fig., Vestn. Znan., 7, 414-418. Leningrad (1934). **a - 687**

Descriptions des travaux hydrologiques et hydrobiologiques conduits dans la Mer de Bering en 1932 et 1933.

**Schuchert Charles** - Lauge Koch's Explorations in East Greenland [*De explorationibus a* Lauge Koch *peractis in Groenlandia orientali*]. Amer. Journ. Sc., XXVII, 160, 307-309. New Haven, Conn. (1934). **a - 688**

Organization and equipment of the Danish East Greenland Exploration party of the summer 1933. Knowledge secured concerning the East Greenland geosyncline and the orogenic histories of the Caledonian and Variscan deformations. Some new knowledge obtained concerning the East Greenland coast from 68° to 60° N. Lat. (Cape Farewell) which is very little known. Collections of fossils gathered by the party.

**Schulz C.** - Die Russische Arktisexpedition [*De navigatione Russica in regiones arcticas*]. Geogr. Zeitschr., 1, 25-27. Leipzig (1934). **a - 689**

**Sewell Seymour R. B.** - The John Murray Expedition to the Arabian Sea [*De navigatione a Johanne* Murray *peracta in mare Arabicum*]. 3 Figs., Nature, CXXXIV, 3392, 685-688. London (1934).

( — ) See also: Geogr. Journ. LXXXIV, 2, 154-156. London (1934). **a - 690**

Brief description of some results of the Expedition. Topographical, hydrographic and biological results.

**Skogsberg Tage** - Hopkins Marine Station, Pacific Grove, California - Report on Hydrographic Work in Monterey Bay in 1933 [*Statio maritima in* Hopkins. *Relatio de operibus hydrologicis in baja* Monterey *peractis*, A. 1933]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15 th Ann. Meet., part I, 220-221. Washington D. C. (1934). **a - 691**

Brief account of the work performed, which has been the continuation of the program of 1932. Conclusions of the analysis of the condition of the Bay. Besides the discovery of the fundamental hydrographic rhythm of the region, the most important fact to be noticed is that Monterey Bay waters are but secondarily affected by local meteorological conditions.

**Slastnikov G.** - Travaux de l'équipe de la barque à moteur « Arktik » de l'expédition scientifique et commerciale à la Novaja Zemlja en 1934 [*De operibus peractis a manipulo in motoscapha* « Arktik » *navigante inter navigationem ad* Novaja Zemlja, *scientiae et commercii causa susceptam, A. 1934*]. (En russe). Bull. Arct. Inst., 11/12, 406. Leningrad (1935). **a - 692**

Bref résumé des travaux exécutés dans les différentes baies du littoral de la Novaja Zemlja en vue de leur exploration hydrologique, hydrobiologique et hydrographique.

**Spender Michael** - Alfred Wegener's Greenland Expeditions, 1929 and 1930-31 [*De navigationibus in Groenlandiam ab Alfredo* Wegener *peractis, A. 1929 et 1930-31*]. Geogr. Journ., LXXXIV, 6, 515-521. London (1934). **a - 693**

A summary containing information on the organization and scientific results of Alfred Wegener's Greenland expeditions on hand of the following publications: « Wissenschaftliche Ergebnisse der Deutschen Grönland - Expedition Alfred Wegener 1929 und 1930-1931 ». « Alfred Wegeners letzte Grönlandsfahrt », unter Mitwirkung von Dr. Fritz Loewe herausgegeben von Else Wegener, and « Im Eis vergraben », by Johannes Georgi.

Description du 46 - ème voyage polaire du bateau de recherches soviétique « Persej » effectué en automne 1933.

**Vaughan Wayland T.** - Oceanographic Research at the Scripps Institution of Oceanography [*Investigationes oceanographicae in* « Scripps Institution of Oceanography » ]. 1 table, Nat. Res. Counc., Trans. Amer. Geoph. Union, 15 th Ann. Meet., part. I, 222-225. Washington D. C. (1934). **a - 695**

Improvements. Expeditions and oceanographic data. Physical oceanography and marine meteorology. Chemistry. Microbiology. Phytoplankton. *Foraminifera*. Physiology of marine Invertebrates. Fish-biology. Marine bottom-deposits.

**Wiese W.** - Expedition on the Ice-Breaking Steamer « Lütke » in 1934 [*De navigatione navis glaciei-ruptricis nomine* « Lütke », *A. 1934*]. (In Russ. & Engl.). Bull. Arct. Inst., 10, 351-353, 388-390. Leningrad (1934).

( — ) See also Geogr. Rev. XXV, 2, 339-340. New York (1934). **a - 696**

Principal task of the expedition: passage in the course of one navigation-season from Vladivostok to Murmansk along the northern sea-route. Staff of the expedition. Condition of the ice during the voyage, which lasted from June 28th to September 20th, 1934. Program of the scientific work carried on during the expedition: determination of temperature and salinity of the surface layer of the sea, chemical analysis of water-samples collected, mapping of the ice, observations on elements of the waves, determination of specific gravity, salinity and air contained in the ice, soundings, meteorological observations, collection of hydrobiological material, with particular attention paid to the plankton.

**Zinger Max.** - La campagne de Léna [*De navigatione scientiae causa ad flumen* Lena]. (En russe) fig., 1 carte h. t., 86 pp., Obl. Izt., Leningrad (1934). **a - 697**

Comptes rendus de la première expédition de la Léna du brise-glace « Krassine », des navires du port d'Arkhangheljsk « Staline », « Pravda », « Volodarskij » et du vapeur d'Omsk « Pervaja Pjatiljetka » autour de la péninsule de Tajmyr jusqu'à l'embouchure du fleuve Léna et la Baie de Tixi.

**An.** - Polar Stations of the USSR [*Stationes Russicae in poli regionibus*]. (In Russ. & Engl.). Bull. Arct. Inst., 5, 227-254. Leningrad (1934). **a - 712**

Some information on the activity of the polar stations at Calm Bay (Tikhaja) on Franz-Joseph Land and on Cape Cheljuskin.

**An.** - Orders Handed to the Heroes of USSR and to Members of « Cheliuskin » - Expedition [*Numismata heroicis navigatoribus Russicis navis* « Celjuskin » *assignata*]. (In Russ. & Engl.). Bull. Arct. Inst., 6/7, 255-259, 282-284. Leningrad (1934). **a - 713**

Text of the address pronounced by M. I. Kalinin, Chairman of the Central Executive Committee of USSR on July 23rd, 1934, on the occasion of the handling of orders and deeds to the people who had taken part in the ice-breaker's « Cheliuskin » rescue-expedition.

**An.** - Expedition on the Ice-Breaker « Lütke » [*De navigatione navis glaciei-ruptricis nomine* « Lütke »]. (In Russ. & Engl.). Bull. Arct. Inst., 6/7, 262-263, 293. Leningrad (1934). **a - 714**

Brief information on the expedition sent out by the Chief Administration of the Northern Sea Route with the object to effect a through-voyage from Vladivostok to Arkhangel and to study the hydrology of the Chukchee and the East-Siberian Seas.

**An.** - Second Trade Expedition to the Lena River [*De altera navigatione ad flumen* Lena *commercii causa*]. (In Russ. & Engl.). Bull. Arct. Inst., 8/9, 305, 348-349. Leningrad (1934). **a - 715**

Information on an expedition to be sent out to the Lena River for the purpose of transporting in one season about 8000 tons of goods from Murmansk to the mouth of the Lena River (4300 km.); the staff of the expedition; program of the hydrographical, hydrological and geophysical investigations to be carried out on board the ice-breaker « Yermak », with especial consideration to the ice-conditions and distribution.

**An.** - Le voyage jubilaire du navire d'expédition « Persej » [*De* $L^a$ *navigatione navis* « Persej »]. Bull. Arct. Inst., 10, 375. Leningrad (1934). **a - 716**

Courte note sur le 50 -ème voyage du navire « Persej » dans les latitudes polaires; le « Persej » a couvert au cours de ses voyages dans l'Arctique 60.000 milles environ, dont plus de 5.000 milles à travers les glaces.

**An.** - L'expédition de Kara [*De navigatione ad mare nomine* Kara]. (En russe). Bull. Arct. Inst., 11/12, 410. Leningrad (1934). **a - 717**

Bref compte rendu de l'expédition, à laquelle 31 unités ont participé, dont 28 vapeurs sous bandières étrangères. Au cours de cette expédition pour la première fois les vapeurs étrangers ont été approvisionnés par du charbon soviétique. Tous les vapeurs ont pu rentrer à Mourmansk, après leur voyage jusqu'à la Yakoutie.

**An.** - Premier voyage polaire du brise-glace « Sadko » [*De prima navigatione ad polum navis glaciei-ruptricis nomine* « Sadko »]. (En russe). Bull. Arct. Inst., 11/12, 411. Leningrad (1934).
**a - 718**

Trajet parcouru par le brise-glace; conditions des glaces; travaux exécutés.

**An.** - Retour du « Malyghine » [*Reditus navis* « Malyghin »]. (En russe). Bull. Arct. Inst., 11/12, 411. Leningrad (1934).
**a - 719**

Information du retour le 27 septembre 1934 du brise-glace « Malyghine » à Arkhangheljsk, après avoir escorté à travers les glaces les navires de l'expédition dans la Mer de Kara et avoir construit une station radio-météorologique au Cap Sterlegov dans l'embouchure de la rivière Lenivaja.

**An.** - Les voyages d'automne du bateau d'expédition « Persej » [*De navigationibus autumnalibus navis* « Persej »]. (En russe). Bull. Arct. Inst., 11/12, 411-412. Leningrad (1934).
**a - 720**

Information sur deux voyages du « Persej » entrepris dans le but d'étudier la distribution de la « biomasse » de la faune benthonique dans le Golfe de Kola et de sa transformation par suite de l'abaissement général de la Mer de Barentz, ainsi que d'établir la limite des glaces entre Novaja Semlja et Spitsbergen pendant la saison d'automne.

**An.** - Voyage polaire du navire pour l'expédition « Knipovitch » [*Navigatio ad polum navis* « Knipovitch »]. (En russe). Bull. Arct. Inst., 11/12, 412. Leningrad (1934).
**a - 721**

Bref compte rendu du voyage qui a duré 52 jours et au cours duquel 5000 milles environ ont été couverts. L'expédition a accompli des travaux hydrographiques et hydrobiologiques dans la Mer de Kara et la Mer de Pétchora.

**An.** - Three English Expeditions to Greenland [*De Anglicis tribus navigationibus in Groenlandiam*]. (In Russ.). Bull. Arct. Inst., 11/12, 421-422. Leningrad (1934).
**a - 722**

Brief account of the J. M. Wordie Expedition, the Oxford University Expedition to Ellesmer Land, and the Martin Lindsay Expedition.

**An.** - Oceanographic Cruises of the « Président Théodore-Tissier » - Croisières océanographiques du « Président Théodore-Tissier » [*Navigationes oceanographicae navi* « Président Théodore-Tissier » *peractae*]. (In Engl. & French). Int. Hydrogr. Bull., II, 32-33. Monaco, Princ. (1935).
**a - 723**

Brief summary of an article by Ed. Le Danois, published in the « Revue Scientifique », Paris, 9th March 1935, which summarises the first results of the scientific cruises of the French vessel « Président Théodore-Tissier » belonging to the Office des Pêches Maritimes to the Canary Island, the western entrance to the English Channel, the herring fishery areas in the North Sea and the Atlantic Ocean along the 45th parallel of N. lat., where complete oceanographic stations were made.

**An.** - Scott Polar Research Institute [*Institutum cui nomen est* Scott Polar Research]. (In Engl. & French). Int. Hydrogr. Bull., II, 46-48. Monaco, Princ. (1935).
**a - 724**

On hand of an article published in « The Polar Record » n° 9, 1935, an account of the opening ceremony of the new building of the Scott Polar Research Institute, Lensfield Road, Cambridge, is given, as well as a few extracts from the notes concerning hydrographic expeditions which appear in the same publication.

**An.** - Les expéditions de l'Institut Arctique en 1933 [*De navigationibus ab Instituto Arctico peractis, A. 1933*]. (En russe). Izv. Gos. Gheogr. Obstch., LXVI, 2, 325-328. Leningrad (1934).

# GEOLOGIA MARIS

## Geologia generalis bacini oceanici – Marium origo – Vestigia veterum marium.

**Amato A.** - L'attività del servizio geologico in Tripolitania, nel primo anno della sua istituzione [*De Officio geologico in Tripolitania. Quaestio de activitate, primo recurrente anno ab institutione*]. Boll. Geogr., 5-6, 121-126. Tripoli (1934). **a - 734**

**Arkell W. J.** - The Jurassic System in Great Britain [*De systhemate jurassico in Britannia*]. Ills., maps., xii–682 pp., Clarendon Press. Oxford (1933). **a - 735**

Part I deals with modern ideas of the classification of strata and the divisions of geological time, since the times of William Smith and Alcide d'Orbigny onwards. In part II the author discusses the relations between deposition, contemporaneous earth–movements, and the floor on which the Jurassic strata were deposited. Part III consists of detailed stratigraphy, illustrated by many maps and over fifty photographs of characteristic Jurassic exposures - sea-cliffs, inland scarps, quarries, etc. In part IV the author makes an attempt at a palaeogeographical reconstruction of the British area in Jurassic times and applies his knowledge of modern coral–reefs to the elucidation of their distribution in the Jurassic sea.

**Aubert de La Rüe Edgar** - Premiers résultats d'une mission géologique aux Nouvelles Hébrides [*De missione geologica ad Novas Hebudas. Resultatus priores*]. C. R. Acad. Sc., CC., 8, 681-683. Paris (1935). **a - 736**

Compte rendu d'une série d'observations géologiques intéressantes sur la constitution de l'archipel des Nouvelles Hébrides qui prouvent l'origine continentale de ce groupe et mettent en évidence la présence d'un socle cristallin, l'extension des terrains sédimentaires tertiaires et probablement aussi secondaires, et l'existence d'au moins deux séries volcaniques distinctes. Certaines petites îles qui à première vue semblent exclusivement madréporiques, sont en réalité formées par des tufs volcaniques jaunes, sur lesquels sont édifiés les récifs coralliens, aujourd'hui soulevés.

**Bassler R. S.** - Report on the Department of Geology [*Relatio a Sectione Geologica redacta*]. 1 Table, Rep. U. S. Nat. Mus., 1932, 67-76. Washington D. C. (1932). **a - 737**

Account of the progress and work of the Department of Geology of the U. S. National Museum during the fiscal year ending June 30, 1932. Accessions. Installation and preservation of collections. Investigations and research. Distribution and exchange of specimens. Number of specimens under Department.

**Bucher Walter H.** - The Deformation of the Earth's Crust: an Inductive Approach to the Problems of Diastrophism [*De corticis terrestris deformationibus. Quaestio de diastrophismo*]. Diagrs., maps., xiv–518 pp., Univ. Press, Princeton (N. J.), Humphrey Milford. London (1933). **a - 738**

Author gives a revision of the data of the existing theories on earth–history and evolution; points out the two types of crustal elevations and depressions; discusses a great deal on isostasy, formulates some hypothesis as to the structure of the bottom of the Arctic and Atlantic oceans, and such of the Pacific; and in the last chapter summarizes his main personal views concerned with the deformation of earth's crust.

**Carandel J.** - Las condiciones del modelado erosivo en la vertiente mediterránea de la Cordillera Bética [*Condiciones meteorologicae, geologicae et hydrologicae zonae mediterraneae in* Cordillera Bética]. 4 lams., Bol. Soc. Españ. Hist. Natur., Enero-Fevrero, 39-62. Madrid (1935). **a - 739**

Temperaturas, vientos tipicos. Cursos fluviales de la vertiente, sus características. Gradientes. Aforos. El modelado erosivo. Trabajos conexos.

**Carter Neal M.** - Fiords and Fiord Formation [*De fiordis, quomodo formantur*]. Ann. Rep. Biol. Board Canada, 1933, 71. Ottawa (1934). **a - 740**

Brief account of further investigations of the fiord and fiord channels adjacent to the strait of Georgia, i. e. of Seechelt inlet, Narrows arm, Toba inlet, and several tributary channels. Results of a preliminary hydrographical survey of the area under consideration, bottom soundings, study of the stagnation of deep strata of water, result of dredging, study of the sedimentation of the glacial mud in the Toba inlet and the dissemination of the cold, silty water of this inlet.

**Chiesa Cesare** - Su alcuni nuovi fossili miocenici della Sirtica (Cirenaica) [*De fossilibus novis miocenicis Sirtidos* (*in Cirenaica*)]. Missione Scient. della R. Acc. d'It. a Cufra (1931-IX), III, 229-237. Roma (1934). **a - 741**

I fossili studiati appartengono al Miocene inferiore e medio (Langhiano ed Elveziano) e provengono dalle località site tra l'Oasi di Marada e la costa della Gran Sirte.

**Cipolla Francesco** - Tracce di antichi mari nel gruppo montuoso di Cammarata (prov. di Agrigento) e singolare piegamento quaternario [*Vestigia veterum marium in montibus* Cammarata (*in provincia Agrigentina*). *Agitur etiam de singulari quadam plicatione aetatis quaternariae*]. Boll. Soc. Sc. Nat. ed Econ. di Palermo, XV, 8-11. Palermo (1933-34). **a - 742**

**Cockfield W. E. & Lees E. J.** - The Occurrence of Marine Triassic in Southern Yukon [*Aetas triassica marina in regione meridionali* Yukon *nomine*]. Trans. R. Soc. Canada, Ser. 3, XXV, 4, 101-104. Ottawa (1931). **a - 743**

On hand of a study of fossils collected in 1929 and 1930 in the vicinity of lake Laberge and Lewes river to the north of the lake, the authors cite sufficient evidence to show the existence of marine Triassic in the area under consideration treating also the relations of the rocks of the series studied, to surrounding rocks.

**Coleman A. P.** - An Interglacial Champlain Sea [*Agitur de mari quodam interglaciali* Champlain *nomine*]. Amer. Journ. Sci., XXIV, 142, 311-315. New Haven, Conn. (1932). **a - 744**

Critical review of a memoir by Ernst Antevs on «Late–Glacial Correlations and Ice Recessions in Manitoba», published in «Memoirs», 168, Geol. Surv. Canada, 1931 with some evidence on peculiar conditions observed in several places along the St. Lawrence beds, where marine shells are covered with boulder clay or morainic deposits and therefore are interglacial.

**Cooke C. W.** - Tentative Correlation of American Glacial Chronology with the Marine Time Scale [*Collegatio inter glaceologicam chronologiam Americanam et schalam chronologicam marinam*]. Journ. Acad. Sc., 22, 310-312. Washington D. C. (1932). **a - 745**

Description of eight marine Quaternary terraces distinguished by the author on the east coast south of New York, which may be of preglacial and interglacial ages. Correlation between the formation of the terraces and the spasmodic uplifts of the lands or possibly with halts in the lowering of sea level as the ice sheets temporarily ceased growing.

**Cooke H. C.** - Studies of the Physiography of the Canadian Shield. III. The pre-Pliocene Physiographies, as inferred from the Geologic Record [*De physiographia plateae Canadensis. III. Physiographiae prae-pliocenicae ex adumbrationibus geologicis*]. 1 Fig., Trans. R. Soc. Canada, ser. 3, XXV, 4, 127-180. Ottawa (1931). **a - 746**

In the present third of a series of papers, the author attempts to infer the pre-Pliocene physiographies from a study of geologic records. Although this might seem at first sight a hopeless task, because rocks other than pre-Cambrian are found only around the edges of the Shield, nevertheless the careful consideration of the nature and succession of these rocks, and their relations, has yielded results of surprising interest, which are illustrated here by the author.

**Cooke H. C.** - Land and Sea on the Canadian Shield in Precambrian Time [*De terra atque mari in platea canadensi, aetate prae-cambriana*]. 7 Maps., Amer. Journ. Sc., XXVI, part I, 154, 428-441; part II, 155, 457-474. New Haven, Conn. (1933).

( — ) See: Summary by Bain George in Amer. Journ. Sc. XXVII, 160, 303-306. New Haven, Conn. (1934). **a - 747**

After emphasizing the difficulties in the definition of the sea and land relationship in Precambrian time, the author comments the maps he has elaborated, claiming that those cannot be considered as paleographic maps in the proper sense of the word because the boundary between land and sea could only be approximately known. In the text of the paper he illustrates the seven following maps elaborated: Keewatin period, Timiskaming period, Lower Huronian period, Middle Huronian period Upper Huronian period and Keweenawan period. For each map the different opinions existing on the boundary between land and water are reported.

**Daly Reginald Aldworth** - The Changing World of the Ice Age [*Agitur de variabilitate omnium animantium, aetate glaciali*]. 149 Ills., 29 tabl. xix–271 pp., Yale Univ. Press. New Haven, Conn. (1934).

( — ) See Review by R. F. Flint in « Amer. Journ. Sc. », XXIX, 171, 306-309. New Haven, Conn. (1935).

( — ) Nature, CXXXVI, 3439, 491-492 by H. D. London (1935).

( — ) Science, LXXXI, 2108, 516-517 by H. L. Fairchild. New York (1935). **a - 748**

Text of lectures delivered for the Silliman Lectures at Yale University early in 1934 on the far-reaching secular effects of the Pleistocene glaciers, especially the great ice sheets of the northern hemisphere. Author gives information on the probable extent of the ice sheets, their volume, contemporaneous existence, and effect on sea level, as well as a record of sea and lake associated with them. In a chapter on earth's deformation and recoil author makes an attempt at quantitative evaluation of plastic and elastic elements in the uplift of the crust following relief of ice load. In another chapter he deals with the question of high sea levels of the Pleistocene and present strandlines and illustrates with some modification the Glacial Control theory concerned with the coral reefs origin.

**De Lury J. S.** - The Auto-Traction Hypothesis and the Formation of Batholiths [*De hypothetica autotractione deque formatione batholitorum*]. 1 Fig., Trans. R. Soc. Canada, ser. 3, XX, 4, 199-222. Ottawa (1931). **a - 749**

The present paper is the first attempt made by the author to develop the auto-traction hypothesis, which he has presented in a previous paper, and to test it in more detail. In his hypothesis the author compares the earth-crust in many ways to a continental ice-sheet, with especial regard to the movement of both. In the light of this hypothesis he discusses the interior of the earth, its vertical and horizontal movements, the building of continents, the fragmentation of continents, the geological evidence of conditions at depth, the igneous problems, the thermal conditions in the crust, the depth of the sheet-zone of flow, the ice-sheets and analogies to crust. He concludes illustrating the applications of the hypothesis calling attention in general way to the bearing on igneous phenomena and on batholiths in particular. Between broader applications of the hypothesis, author mentions the problem of the existence of former continents and continental bridges, the destruction of the continents and bridges, the formation of ocean-deeps and island-festoons.

**Denizot G.** - Sur la structure des îles Canaries, considérée dans ses rapports avec les problèmes de l'Atlantide [*De Insulis Canariis consideratis ex earum correlationibus cum problematis ad Atlantidem pertinentibus*]. C. R. Acad. Sc., CIC, 5, 372-373. Paris (1934). **a - 750**

Relations avec le Miocène marin, non seulement aux Canaries, mais aussi à Madère; avec le Quaternaire marin à la Grande Canarie et à l'île de la Palma. Ces îles sont entourées de larges socles continentaux. Morphologie de ces îles. Conclusion.

**Denizot Georges** - Les phases tectoniques successives aux environs de Marseille [*De phasibus tectonicis subsequentibus apud Massiliam*]. C. R. Acad. Sc., CCI, 1, 90-92. Paris (1935). **a - 751**

Les mouvements tectoniques de la Provence occidentale se sont repartis sur plusieurs époques dès le milieu du Crétacé. Données sur les phases essentielles jusqu'aux cassures des couches miocènes.

**Eberzin A.** - Ueber das Alter der Konglomerate von Kap Pitzunda (Kaukasus) [*De conglomeratis ad promunturium* Pitzunda (*in Caucasica regione*) *pertinentibus. Quaestio de aetate*]. (In russ., deutsch. Rés.). C. R. Acad. Sc. U. R. S. S., III., 3, 194-196. Léningrad (1934). **a - 752**

Ergebnisse einer Untersuchung der unter der Benennung « Pitzunda-Konglomerate » bekannten ober-tertiären Ablagerungen an der Küste des Schwarzen Meeres zwischen Kap Pitzunda und dem Flusse Tschernaja. Vf. stellt fest, dass diese Konglomerate ihrem Alter nach eine Reihe von Stufen und Horizonten des Miozäns und des Pliozäns umfassen; sie bestehen aus gleichen, nur durch ihre eingeschlossene Fauna voneinander unterscheidbaren groben Küstenfazies.

**Fabiani R. & Stefanini G.** - La partecipazione dell'Italia alla XVI Sessione del Congresso Geologico Internazionale [*Sessio XVI^a Conventus Geologici Omnium Gentium. Studia et opera Italica*]. Ric. Scient., a. VI v. I, 2, 109-122. Roma (1935). **a - 753**

**Forrest Edward H.** - The Atlantean Continent: Its Bearing Upon the Great Ice Age and the Distribution of Species [*De Atlantica terra. Quaestio de eius momento pro aetate glaciali atque specierum distributione*]. Ills., maps. 328 pp., H. F. & G., Witherby. London (1933). **a - 754**

This work contains a new method of proof and new subsequent deductions regarding the former existence of a continent connecting Europe with North America.

**Fourmarier P.** - Principes de géologie [*Fundamenta geologica*]. 357 fig., 6 pl., 882 pp., Masson & Cie. Paris (1933). **a - 755**

Après une introduction, dans laquelle l'A. illustre les différentes méthodes de recherches géologiques, il traite les différentes branches de la géologie en partageant son exposé dans les cinq parties suivantes: I. Les différentes espèces de roches - effritement et érosion dans leur rapport au cycle des roches. La Terre comme planète. Les origines de la Terre. II. La formation des roches (sédimentations et vulcanisme). III. Évolution des roches. Plies, dislocations, unions, métamorphoses. Remplissage des espaces vides, théories de diastrophisme, interprétation des cartes géologiques. IV. Les masses continentales. (Description générale des particularités lithologiques et de structure de chaque continent, formation des grands plateaux, le parallélisme des mouvements de plissement successifs, et la distribution des géosynclinaux). V. Géographie physique, y compris la paléogéographie, la climatologie, l'océanographie, le cycle de l'érosion, l'hydrologie, les modifications dues au drainage des eaux, les formes de la terre et les profils des côtes.

**Fromaget Jacques** - Sur l'existence du Trias inférieur à faciès océanique au Sud de Luang-Prabang (Laos) et sur la paléogéographie de l'Asie Sud-Orientale à cette époque [*Agitur de exsistentia aetatis triassicae inferioris instar facierum oceanicarum in parte meridionali regionis* Luang-Prabang (Laos). *Agitur etiam de palaeographia Asiae sud-orientalis eodem tempore*]. 1 fig., C. R. Acad. Sc., CCI, 4, 2. Paris (1935). **a - 756**

Le gisement étudié fait admettre que l'ouverture du petit golfe qui alimenta B. P'a Nip marque l'origine de la disjontion qui donna la Géosynclinal du Haut-Mékong et son diverticule, le Synclinal du Haut-Laos. Cette découverte complète les renseignements déjà donnés par l'A. sur une nouvelle fosse marine. Eclaircissement sur l'évolution des contours des continents à la fin du Permien et au début du Trias.

**Gavira José** - Investigaciones Geologicas en Cabo Verde [*Investigationes geologicae in promunturio Viridi* (*hispanice* Cabo Verde)]. Bol. Soc. Geogr. Nac., LXXIV, 8, 481. Madrid (1934). **a - 757**

Breve nota sobre investigaciones promovidas por la Comisión de Cartografia del Ministerio de colonias portugués. Los resultados se han publicado por I. Bacelar Bebiano en las Comunicaciones de los Servicios Geológicas de Portugal (I, 18, 1932) con el titulo de Geologia del Archipielago de Cabo Verde.

**Georgi J.** - Einige geophysikalische Probleme bei A. Wegeners Grönland-Expedition [*De problematis scientiae geophysicae solutis inter navigationem ab Alfredo* Wegener *peractam in Groenlandiam*]. Nova Acta Leopold., N. F. 1, 2 & 3, 337-339. Halle a. d. Saale (1933). **a - 758**

**Grigorovitch - Beresovskii N. A.** - A Brief Geological and Hydrogeological Description of the Territory to the Manich Sea-canal [*Descriptio brevior geologica et hydrologica territorii ad canalem maritimum* Manich *nomine pertinentis*]. (In Russ., Engl. rés.). Chart, Problems Geol. U. S. S. R., II, 181-202. Moscow (1933). **a - 759**

**Hanzawa Shôshirô** - Geological History of the Ryûkyû Islands [*De historia geologica insularum* Ryukyu]. Proc. Imp. Acad., XI, 2, 58-61. Tokyo (1935). **a - 760**

A very condensed summary of the results obtained by author's geological studies of the Ryûkyû Islands conducted during the years 1929 to 1933. The geological history of these islands begins with the Permian Period: author compares it with the geological history of Taiwan and the main islands of Japan and describes its consecutive phases.

**Hawkes L.** - The Hypothesis of the Continental Drift [*De amotione terrarum continentium*]. Nature, CXXXV, 3409, 342-343. London (1935). **a - 761**

With especial regard to the results obtained by Hans Jelstrup at the station of Sabine I, East Greenland during determination of longitude and its comparison with data obtained in 1870, the author claims, that, in order to test the late Dr. Wegener's hypothesis of « continental drift » some international body has to take up the matter: (1) to inquire what stations have been determined with sufficient accuracy to be of use (2), to consider what further stations shall be established, und (3) to organise periodic determinations every five or ten years in the future.

**Jérénime E.** - Contribution à l'étude pétrographique des trois îles de l'archipel Canarien. Tenerife, Las Palmas, Gran Canaria [*Contributio in petrographiam studendam trium insularum ad archipelagum Canariarum pertinentium.* Tenerife, Las Palmas, Gran Canaria]. 4 pl., tabl., 4 fig., Bull. Soc. Franç. de Minéralogie, LVI, 189-261. Paris (1933). **a - 762**

Le travail se compose d'une partie générale et de trois chapitres dédiés chacun à une des îles. Etude de la formation et évolution des îles et des éruptions; description micrographique des roches.

**Kober L.** - Die Orogentheorie: Grundlinien eines natürlichen Gestaltungsbildes der Erde [*Ratio orogenetica. Lineae fundamentales cuiusdam formationis naturalis Terrae*]. Diagr. u. Karten, 184 S., Bornträger. Berlin (1933). **a - 763**

Im vorliegenden Werke behandelt Vf. in ausführlicher Weise die Grundlagen der von ihm in seinen vorgehenden Werken ausgearbeiteten Orogentheorie, mit besonderer Berücksichtigung der Entwicklung der orogenischen und kratogenischen Landschaften, der Dynamik der bergebildenden Prozesse und, im letzen Teile seines Buches, der Bildung der Kontinente und der ozeanischen Becken im Lichte seiner Theorie.

**Ličkov B. L.** - On the Last Pages of the History of the Black Sea [*De historia recentiore Ponti Euxini*]. (In Russ., Engl. rés.). Problems Geol. U. S. S. R., 89-109. Moscow (1933). **a - 764**

**Lungershausen L.** - Ueber die Stratigraphie der « Balta-Stufe » [*Quaestio de strato nomine* Balta *eiusque stratigraphia*]. (In Russ., Deutsch. rés.). 1 Taf., C. R. Acad. Sc. U. R. S. S., II, 6, 381-388. Léningrad (1934). **a - 765**

Bericht über die Ergebnisse der Forschung des Vf. der sehr eigenartigen sandig-tonigen Neogenablagerungen kontinentalen Typus innerhalb des Dnjepr- und des Bugbeckens, welche unter der Bezeichnung Balta-Stufe bekannt sind. Er veranschaulicht die von ihm ausgearbeitete stratigraphische Aufteilung des Balta-Komplexes nebst seinen equivalenten Neogenschichten auf Grund einer Tabelle über den Bereich der Entwicklung des Baltas, des südlichen Schwarzmeerküstengebietes und der Donauländer.

**McLearn F. H.** - Problems of the Lower Cretaceaous of the Canadian Interior [*De aetate cretacea inferiore in internis regionibus Canadensibus*]. 6 Figs., Trans. R. Soc. Canada, ser. 3, XXVI, 4, 157-175. Ottawa (1932). **a - 766**

The first part of this paper is devoted to chronology and to problems of correlation. In addition, as it is shown in the second part of the paper, some interesting theoretical results may be anticipated concerning the shifting of seas, marginal alluvian plains and coal swamps, as well as the behaviour of the positive of geanticlinal element to the west and other phenomena of the continental interior in Lower Cretaceous time. Under the heading « Problems of Correlation » four sections are considered: a prevailingly marine Lower Cretaceous section in the northern Great Plains, a nonmarine section in the Blairmore and adjacent areas, a mostly non-marine section in the foothills of west central Alberta, and a mixed marine and nonmarine section in the foothills of the northwest. In four palaeogeographic maps the geography of the region in different times is represented: they show clearly the extension and the restriction of the sea.

**Mertie J. B. Jr.** - Notes on the Geography and Geology of Lituya Bay, Alaska [*De baja* Lituya (*in Alaska*). *Quaestio de geographia et geologia*]. 4 Figs., U. S. Geol. Surv., Bull., 836, B, 117-135. Washington D. C. (1932). **a - 767**

Information on Lituya Bay, which is a narrow tidal inlet on the Pacific coast discovered by the French explorer La Pérouse.

**Nagaoka H. & Shirai T.** - Lines of Fissure through Central Japan and the Sea of Japan physically considered [*De fissuris per Japoniam centralem et mare Japonicum e scientia physica consideratis*]. 1 Fig., Proc. Imp. Acad., IX, 8, 382-385. Tokyo (1933). **a - 768**

**Nichols D. A.** - Solifluction and Other Features in Northern Canada Shown by Photographs from the Air [*De solifluctuatione aliisque phaenomenis in Canadensis regione ex aërophotographia*] 8 Pls., Trans. R. Soc. Canada, ser. 3, XXVI, 4, 367-276. Ottawa (1932). **a - 769**

Account of many unusual forms observed while examining aerial photographs taken by the Royal Air Force of Canada, for mapping purpose with especial regard to solifluction, which is an unusual soil flow process which is often noticed in alpine areas, but its widest extent is in the polar and sub-polar regions, raised beaches und terraces which record the oscillations of level throughout the Northern part of North America, eskers, « ispatinows », faults and other structural features.

**Nikolajev I. G.** - The Geological Expedition to the Bulun District [*De navigatione geologiae causa in districtum nomine* Bulun]. (In Russ. & Engl.). Bull. Arct. Inst., 2, 58-61, 102-105. Leningrad (1934). **a - 770**

Account of an expedition sent out by the Central Administration of the Northern Sea Route in order to investigate the possibility of utilization of the coal from carboniferous formations in the lower Lena district for the purpose of navigation. It is shown that the complexity in structure and composition of the coal-beds investigated, diminishes considerably the possibility of the use of their coal as ship fuel.

**Noszky Jenö** - Beiträge zur Kenntnis der Kretazeischen Bildungen des Nördlichen Bakony [*Contributio in formationes cretaceas septentrionales* Bakony *studendas*]. (In Ungar., Dtsch. rés.). Tab. Abb. Földtani Közlöny (Geol. Mitt.), LXIV, 4/6, 99-136. Budapest (1934). **a - 771**

Eingehende Gliederung der kretazeischen Schichten des N-lichen Bakony-Gebirges auf Grund der unter den gegebenen örtlichen Verhältnissen möglich gewesenen lithologischen und paläontologischen Untersuchungen. Feststellung einer kontinuierlichen Sedimentreihe in Bezug auf die Bildungen des oberen Jura und der unteren Kreide im Gebiet der N-lichen Bakony mit einer ununterbrochenen Ueberflutung vom Meer.

**Pench Albrecht** - Eustatische Bewegungen des Meeresspiegels während der Eiszeit [*De motibus eustaticis maris superficiei, aetate glaciali*]. Geogr. Ztg., XXXIX, 5, 329-339. Leipzig (1933). **a - 775**

L'A. donne les résultats de ses travaux et analyse ceux des auteurs principaux qui ont traité l'argument; à savoir: Ramsay, Daly, Gregory etc.

**Pustovalov I.** - Geological Expedition Sent Out by the Arctic Institute to Novaja Zemlja (Western Area) in 1933 [*De navigatione geologica ad* Novaja Zemlja *per Institutum Arcticum suscepta, A. 1933*]. (In Russ. & Engl.). Bull. Arct. Inst., 2, 55-58, 98-100. Leningrad (1934). **a - 776**

Account of the work of the expedition in the area at the western coast of Novaja Zemlja between Inostrantzev Bay and Russian Harbour. Topographical survey and geological prospecting of the coastal plane and the internal mountain area. Results of the stratigraphic section of the region investigated.

**Renz Carl** - Beiträge zur Geologie der Kykladeninsel Amorgos [*Contributio in geologiam studendam insularum Cycladum*]. 1 Abb., Eclogae Geol. Helveticae, XXIV, 2, 131-154. Basel (1933). **a - 777**

**Richey J. E.** - Guide to the Geological Model of Ardnamurchan [*Explanatio in modulum geologicum ad* Ardnamurchan *pertinentem*]. 11 Pls., Mem. Geol. Surv. Scotland, vi + 49 pp. Edinburgh (1934). **a - 778**

This report serves as an explanation to the geological model constructed on the scale of 4 miles to inch, of the Ardnamurchan Peninsula, which is the westernmost part of the mainland of Scotland. It is essentially a condensation of the nemoir on the Geology of Ardnamurchan, by J. E. Richey & H. H. Thomas, which was published in 1930. The illustrations of the report show the three successive centers of intrusion, each surrounded by a remarkable assemblage of ring-dikes and cone-sheets.

**Richter Herman** - Studier över den yttre strandzonens dynamik och morfologi inom södra Östersjöområdets flack-kust. [*De dynamica et morphologia in zona externa orae maritimae maris Baltici meridionalis*]. (Explanatory text to the figures in Engl.). Sv. Geogr. Årsb. 1934, X, 7-55. Lund (1934). **a - 779**

The preglacial development. The interglacial Baltic. The late quaternary changements of the level. The tectonic conditions and the coast-line. Different types of coast. Wind conditions. Changements of the sea-level and the movements of the waves. Offshore bars and reef formations. Currents (To be continued).

**Robaux Albert** - Sur l'existence de l'Eocène supérieur et de l'Oligocène dans la série du Flysch du Sud de la province de Cadix [*De Eocene superiore et Oligocene in serie* Flysch *nomine apud Gades*]. C. R. Acad. Sc., CC., 8, 685-687. Paris (1935). **a - 780**

A compléter les informations déjà données sur l'existence du Crétacé supérieur à la base du Flysch de la province de Cadix (v.: C. R., CC, p. 478, 1935), l'A. illustre dans la présente note plusieurs niveaux qui complètent la série tertiaire vers le haut. Cette série est affectée d'une faille qui ramène le Crétacé au contact de l'Eocène supérieur. L'A. décrit la stratification et la faune du Nummulitique de Cerro de Arguëlles et de Carro del Pico, et démontre que la série nummulitique est bien développée dans tout le Sud de la province de Cadix et que l'on y peut reconnaître le Lutétien complet lorsque les faunes sont bien conservées et permettent des subdivisions, puis l'Eocène supérieur et localement l'Oligocène.

**Rovereto G.** - Epirogenesi postpliocenica delle Alpi Marittime e della Riviera Ligure [*De epirogenesi postpliocenica Alpium maritimarum atque Litoris Ligustici*]. Atti R. Acc. Naz. Lincei - Rend. Cl. Sc. Fis., Mat. e Nat., serie VI, XX, 5-6. Roma (1934). **a - 781**

Lungo la Riviera Ligure, in dipendenza delle Alpi Marittime, il pliocene raggiunge un'altitudine, che è in media di m. 340 superiore a quella che si osserva nel pliocene del restante della Riviera. Ciò è indizio di una epirogenesi, la quale, essendo il terrazzamento quaternario della Riviera nelle condizioni altimetriche ordinarie, è avvenuta nei tempi immediatamente posteriori all'astiano.

**Russo P. & L.** - Essai d'une coordination tectonique de l'évolution de la Méditerranée [*Exemplum evolutionis tectonicae quoad Mare Mediterraneum*]. 7 fig., pl., cartes, croquis, 40 pp. Mém. Soc. Sc. Nat. Maroc, XXXIV, 31 mars. Rabat - Paris - Londres (1933). **a - 782**

**Smit Sibinga G. L.** - Geologie en zwaartekracht in den Indischen Archipel. Critische beschouwing over eenige recente publicaties van Prof. Dr. J. H. F. Umbgrove [*De geologia et gravitatione in Archipelago Indiano. Recognitio critica aliquarum publicationum recentiorum Professoris J. H. F.* Umbgrove]. Tijdschr. Kon. Ned. Aardr. Gen. Amsterdam, LII, 4, 515-524. Leiden (1935). **a - 783**

Critical review of the works of D. Umbgrove appeared in 1932 concerning the stratigraphy of the Neogene and investigations of the gravity in the Indian Archipelago.

**Taricco Michele** - Geologia del foglio Isola di S. Pietro-Capo Sperone (Sardegna) [*De geologia folii nautici, regionem ab insula Scti. Petri ad promunturium* Sperone (*in Sardinia*) *repraesentantis*]. 12 fig., 4 tav. f. t. Boll. R. Uff. Geol. d'It., LIX, 1/2, 1-78, Roma (1934). **a - 784**

Si illustra il foglio suddetto con la descrizione litologica di ogni formazione, con particolare riguardo alle rocce vulcaniche che coprono buona parte dell'area. Di queste sono stati distinti otto gruppi principali colla loro successione, sensibilmente diversi per composizione e per posizione relativa da quella ammessa da altri autori. A partire dalle più antiche si hanno: andesiti e basalti *a*, cui segue una liparite rossa $\tau 4$, una biotite $\tau 3$, commenditi C, lipariti diasprigne od a grossi inclusi neri $\tau 2$, tufi terrosi o litoidi $\tau 1$ ed infine la liparite $\tau$ corrispondente all'ultima e più estesa espansione, che giunge a chilometri 40 nel senso E-O ed a 30 nel senso N-S. Un tipo a sè, decisamente trachitico, si ha nella $\tau t$ dell'isolotto del Toro. Sono dati cenni sulla tettonica, sui fenomeni vari, sulla vegetazione, sulla idrografia, sulle cave.

**Terada Torahiko** - Vertical Movement of Earth's Crust and Growth of Coral Reef [*Motus verticalis corticis terrestris atque accretio scopulorum coralliferorum*]. Proc. Imp. Acad., X, 10, 643-645. Tokyo (1934). **a - 785**

On the striking coincidence of the rate of growth of some reef-building corals with that of the amount of secular subsidence of the earth's crust at the promontories on the Pacific coast of Honsyû, Japan.

**Tollner Hanns** - Die Frage der Westdrift Jan Mayens [*Quaestio de amotione ad occidentem versus insulae* Jan Mayen]. Peterm. Mitt., LXXX, 10, 300-301. Gotha (1934). **a - 786**

Die durch den Vergleich der Längen-und Breitenbestimmungen 1882/83 und 1933 bestätigte Verschiebung und Bedenkungen gegen ihre Richtigkeit. (Literaturhinweisungen).

**Umbgrove J. H. F.** - Over het ontstaan van den Indischen Archipel [*De archipelago Indiano. Quaestio de originibus*]. 1 Map., Tijdschr. Kon. Ned., Aardr. Gen. Amsterdam, LII, 1, 17-24. Leiden (1935). **a - 787**

After a short review of preceding views on this problem the A. gives an account of the conclusions which have been drawn on the basis of Vening Meinesz' gravity expeditions in the East Indian Archipelago during 1923–1932. (See also Gravity Expeditions at Sea 1923-1932. Vol. II by F. A. Vening Meinesz with the collaboration of J. H. F. Umbgrove, Chapter VI, The relation between Geology and Gravity Field in the East Indian Archipelago; Chapter VII, A short survey of theories on the origin of the East Indian Archipelago and Ph. H. Kuenen, Chapter VIII, Relations between submarine topography and gravity field; Ed. by Rykscommissie van Graadmeting en Waterpassing, Delft 1934).

**Undås Isak** - Fra istiden i Trøndelag. I. [*De aetate glaciali in regione* Trøndelag (*in Norvegia*). *I.*]. (Engl. Rés.). 12 Fig., Kgl. Norsk. Vidensk. Selsk. Skr., 1934, 7–62. Trondhjem (1935). **a - 788**

Preliminary results of quaternary investigations undertaken in 1931 and 1932 on the coasts of Trøndelag: levelling of strandlines and shore ridges and projection of the heights in metres; conclusions as to marine limits; marine fossils.

**Vardaniantz L.** - On the Age of the Relief of the Ciscaucasia [*De aetate elationis geologicae in Ciscaucasia*]. (In Russ. & Engl.). C. R. Acad., Sc., U. R. S. S., I, 7, 427-432. Léningrad (1934). **a - 789**

Some evidence concerned with the geological constitution of the Ciscaucasia on hand of the study of the valley of the Kalaus River; author claims that the whole of the actual relief of the Ciscaucasia has been formed in Post-Pliocene only, more exactly in its upper half, i. e. in the presence of primitive Man.

**Vardaniantz L.** - On the Upper Jurassic Orogenetic Phases of the Caucasus [*De phasibus orogeneticis aetatis jurassicae superioris in Caucaso*]. (In Russ., Engl. Summ.). C. R. Acad. Sc. U. R. S. S., III, 5, 390-393. Léningrad (1934). **a - 790**

Author establishes five tectonic phases and the way they are displayed in Caucasus; he illustrates the mountain building which took place in the western part of the Main Caucasus and partly in Transcaucasia and shows that, on the contrary, during the same period, i. e. the Upper Jurassic, no mountain formation took place in the region of the Georgian Military Road, where very probably a sea existed through the whole Upper Jurassic. At the time of the most intensive tectonic phases this sea became a strait which divided the two upheavals, those of Western Caucasus and of Daghestan.

**Vautrin H.** - Sur l'orogénèse du massif de l'Hermon (Syrie) [*De orogenesi montium ad regionem centralem nomine* Hermon *pertinentium* (*in Syria*)]. 1 fig., C. R. Acad. Sc., CXCIX, 1, 82-84. Paris (1934). **a - 791**

Quelques résultats de recherches faites par la Section Géographique du Haut-Commissariat français au Levant sur l'orogénèse du massif de l'Hermon (Syrie) qui est due à une série de mouvements d'échelonnement du Jurassique au Quaternaire, mouvements ayant provoqué la surrection de ce massif, son émersion et sa formation actuelle.

**Vlodavetz V.** - Contribution to the Petrography of Hooker Island [*Contributio in petrographiam studendam insulae* Hooker *nomine*]. (In Russ., Engl. Summ.). 4 Figs., 9 tabl., 4 pls. Trans. Arct. Inst., XIII, 87-112. Leningrad (1934). **a - 792**

This paper contains an account of the results of a study of materials collected by I. M. Ivanov on Hooker Island, Franz-Joseph Land. The author describes on hand of these materials the geological structure of the island, with especial reference to the single strata and their composition.

**Vlodavetz V.** - Observations géologiques et pétrographiques, exécutées au cours de l'expédition du brise-glace « Sibirjakov » en 1932 [*Observationes geologicae et petrographicae inter navigationem navis glaciei-ruptricis nomine* « Sibirjakov » *peractae, A. 1932*]. (En russe). 5 tabl., Trudy Arkt. Inst. (Trav. Inst. Arct.), X, 175–207. Leningrad (1933). **a - 793**

**Woodring W. P.** - Fossils from the Marine Pleistocene Terraces of the San Pedro Hills, California [*Fossilia ad solaria marina pleistocenica in* San Pedro Hills (*in California*) *pertinentia*]. 1 map, 3 tabl. Amer. Journ. Sc., XXIX, 171, 292-305. New Haven, Conn. (1935). **a - 794**

The present paper represents a preliminary account on the discovery of fossils on many of the terraces of San Pedro Hills, which reach an altitude of 1480 feet above sea level and constitute an upland peninsula along part of the southwest side of the Los Angeles Plain. It discusses the chronologic and climatic significance of the fossils, and in three tables gives information on the terraces, fossil localities, and faunal facies, i. e., the section of deposits of twelfth terrace in Highway Cut on Southeast slope of San Petro Hill; the species of southern aspect in mixed tide pool and protected by facies on third and second terraces; the species of Northern and Southern aspect in deposits on first terrace on Leeward side of Hills.

**Woodworth J. B. & Wigglesworth Edw.** - Geography and Geology of the Region Including Cape Cod, the Elizabeth Islands, Nantucket, Marthas Vineyard, No Man's Land and Block Island [*De geographia et geologia regionum quas supra memoravimus*]. 38 pls. Mem. Mus. Comp. Zool. Harvard Coll., LII, xvi-322 pp. Cambridge (1934). **a - 795**

The book gives a good picture of the earlier history of the Cape Cod district, which has a particular importance lying as it does in the zone of the drift border, and underlain by week coastal-plain strata and giving therefore a better record of pre-Late-Glacial events than other parts of New England. The Pleistocene record involve the four glacial stages of the Standard Mississippi Valley section. The memoir is based upon a field work carried out mainly in 1914 and 1915, but begun by the senior author before 1900.

**Young G. A.** - The Geological Investigation of the Canadian Shield (Canadian Portion) 1882 to 1932. Part I, 1882 to 1897, Part II, 1897 to 1912 [*De exploratione geologica plateae Canadensis ab A. 1882 ad A. 1932*]. Trans. R. Soc. Canada, Ser. 3, XXVI, 4, 341-371, XXVII, 4, 67-108. Ottawa (1932-1933). **a - 796**

Summaries of some of the main conclusions contained in accounts of the geology of the Canadian Shield. The I part of the work contains 87 titles of publications mentioned in the foot-notes of the article. The II one contains 127 titles.

**Zahálka Čeněk** - Krĭdový utvar v zàpadnin bassinu anglopařižském a v Čechach. Čàst 5. Turonien a Sénienien (Pokračovani) [*Aetas cretacea in regione occidentali Anglo–Parisina et in Bohemia. Pars V. Aetas turoniana et senoniana*]. (En tchèque, rés. franç.). Tables. Vestn. Kral. Ceské Spol. Nauk, Tr. Mat.-Prirod. (Mém. Soc. R. Sc. de Bohème, Cl. Sc.), I, 1-35. Prague (1934). **a - 797**

Ressemblances remarquables du delta armoricain avec le Crétacique de la Bohême. Présence des roches spongilitiques, des masses de Bryozoaires, les ondulations des couches gréseuses et leur composition analogue. Note des coupes des régions crétacées en France et en Angleterre avec, à côté de chaque zone, le symbole de son équivalent bohémien.

**Zalesky B. & Belikov B.** - Building Stones of the Keret-Sonostrov District (White Sea) [*Saxa aedilicia in districtu* Keret-Sonostrov]. (In Russ., Engl. Summ.). 6 Figs., 8 tables, 2 pls., 1 map. Trans. Arct. Inst., XIII, 115-141. Leningrad (1934). **a - 798**

Results of an exploration of the coast of Kandalakscha Gulf, from the village Keret to the village Sonostrov, carried on in order to find a place for the establishment of a building-stone quarry. Description of the rocks encountered on the shore of the White Sea in the locality under consideration.

**Zubkov A.** - On the Intensiveness of the Deflation Process in the Arctic [*De depressione arctica eiusque intensitate*]. (In Russ., & Engl.).

1 tabl. Bull. Arct. Inst., 8/9, 311-312, 341-342. Leningrad (1934). **a - 799**

Account of the investigation of a most intensive process of surface deflation observed in Novaja Zemlja, where owing to strong winds attaining the force of hurricanes the greatest part of the surface is usually deprived of any snow-cover. The investigation carried on in Russian Harbour in 1932-1933 in respect to the quantitative part of the deflation process showed that the deflation of the Northern Island of Novaja Zemlja amount to 0.1 mm. per 24 hours, i. e. to 36.5 mm. in one year.

**K. A. S.** - La dérive Ouest de l'Ile Jan Mayen ? [*De amotione ad occidentem versus Insulae* Jan Mayen]. (En russe). 1 tabl. Bull. Arct. Inst., 11/12, 417. Leningrad (1934). **a - 800**

Quelques considérations, empruntées à un article publié dans « Petermanns Mitteilungen » n. 10, 1934, concernant la nouvelle détermination du point sur l'Ile de Jan Mayen, faite à l'occasion de la Deuxième Année Polaire Internationale, et qui, malgré les différences constatées, ne semble pas pouvoir constituer une preuve à l'appui de la théorie de Wegener sur la dérive des continents.

**An.** - Geological Work in Providence Bay [*Opera geologica in* Providence Bay]. (In Russ. & Engl.). Bull. Arct. Inst., 6/7, 267 & 294. Leningrad (1934). **a - 801**

Brief program of the work to be carried out in order to complete petrographical und geological investigation of the southern coast of the Bering Sea, between the western shore of Providence Bay and Lake Achan.

**An.** - Geology of the Orkneys [*Regio nomine* Orkneys. *Quaestio de geologia*]. Nature, CXXXIV, 3399, 976. London (1934). **a - 802**

Short note of general character.

## Litora et orae maritimae - Erosiones.

**Alcock F. J. & Miller A. H.** - Plumb-Line Deflections and Gravity Anomalies in Gaspé Peninsula and their Significance [*De perpendiculi deflectionibus deque gravitatis anomaliis in paeninsula* Gaspé *nomine earumque significatione*]. 1 Map., 2 figs., 3 tabl., Trans. R. Soc. Canada, ser. 3, XXVI, 4, 321-333. Ottawa (1932). **a - 803**

After a brief exposure of the geological history of Gaspé marked by many earth movements, the A.A. give an account of their study of plumb-line deflections and gravity determinations, carried out in the hope to throw some light on past or future vertical movements of this region. They illustrate the method used and give the results of computations in connection with the deflections of the vertical in tables I and II and on the map. Some considerations are also given as to the validity of the relations which seem to hold for Gaspé in case greater areas are taken into account, and attention is drawn to the fact that along the Atlantic coast from the international boundary south to Boston, there is a definite and persistent trend to the deflection anomalies, indicating a marked increase in density off the coast.

**Andrade (de) Carlos Bento Freire** - A tectonica do Estuarion do Tejo e dos vales submarinos ao largo da Costa da Caparica, e a sua relaçao com as nascentes termo medicinais de Lisboa (Consideraçoes preliminares). [*De tectonica in aestuario fluminis* Tejo *vallibusque submarinis longe a litoribus nomine* Caparica *eiusque correlatione cum fontibus thermalibus Olisippensibus*]. 1 Carta, 20 pp. Communicaçoes Serv. Geol. de Portugal, XIX. Lisboa (1933). **a - 804**

**Besairie H., Guyelle P., Lenoble A. & Savornin A.** - Etude géologique et magnétique de la falaise de la Mandraka (Madagascar) [*Studium geologicum et magneticum saxorum litoraneorum in regione* Mandraka *nomine* (*in* Madagascar). C. R. Acad. Sc., CC., 19, 1614-1616. Paris (1935). **a - 805**

Compte rendu d'une exploration géologique et magnétique de la falaise de la Mandraka qui fait partie de la grande *cuesta* de l'Etat de Madagascar, exploration entreprise dans le but d'établir si cette *cuesta* est due à l'érosion ou si elle est d'origine tectonique. Résultats de la mesure des éléments du champ magnétique faite en janvier 1935 en 13 stations s'échelonnant le long de la route.

**Blanchard Raoul A.** - Notes sur les côtes de Colombie Britannique et d'Alaska [*De litoribus in Columbia Britannica et in* Alaska]. 1 fig., 3 pl., phot., Rev. de Géogr. Alpine, XXI, 271-287. Grenoble (193 ). **a - 806**

Observations faites du pont du navire par l'A. pendant un voyage le long de ces côtes, entre Vancouver et Skagway.

**Castaldi Francesco** - Forme di erosione eolica nei Campi Flegrei. I. Erosioni nei tufi di Porto Miseno [*De erosione eolica in Campis Phlegraeis. Erosiones in tuphis ad portum Misenum pertinentibus*]. (Bibl.). Riv. di Fis., Mat. e Sc. Nat., a. VIII, ser. II, 6, 403-418. Napoli (1934). **a - 807**

L'A. si occupa, in un'accurata indagine, delle forme di erosione eolica che hanno contribuito, nei Campi Flegrei, alla disgregazione di alcuni apparati eruttivi: ha prescelto quale inizio, il cratere di Porto Miseno, il centrale dei tre apparati vulcanici situati all'estremo limite del golfo di Napoli.

**Cendrero Orestes** - Las dunas de Berria (Santoña, Santander) [*De arenosis molibus ad regionem* Berria (*in* Santoña, Santander) *pertinentibus*]. 2 lam., Bol. Soc. Esp. Hist. Nat., XXXIV, 7, 393-394. Madrid (1934). **a - 808**

Ocupan una extensión de 1800 metros, siendo su anchura media de unos 150. Origenes de estas dunas. Existencia de un gran montón de arena en la base del Brusco. Efecto del viento Noroeste. Plantas que principalmente han contribuido a fijar las dunas.

**Dartevelle Edmond & Schneegans Daniel** - Gisement fossilifère de Futa (Afrique Equatoriale française) et quaternaire de la zone littorale du Congo [*De fossilibus ad* Futa *pertinentibus* (*in Africa Aequatoriali Gallica*) *deque aetate quaternaria in litoribus regionis Congolensis*]. C. R. Acad. Sc., CIC, 26, 1635-1636. Paris (1934). **a - 809**

**Derancourt E.** - Les côtes de la France à l'époque gallo-romaine (II$^{\text{ème}}$ siècle) [*De litoribus Gallicis aetate Romanorum* (*II*$^{o}$ *sec.*)]. 1 carte, croquis, Bull. Soc. Océanogr. France, 81, 1419-1423; 82, 1425-1434; 83, 84, 1460-1467; 85, 1487-1488. Paris (1935). **a - 810**

Dans le présent ouvrage l'A. donne une vue d'ensemble et quelques explications essentielles sur les multiples transformations qui ont, à maintes et maintes reprises, modifié les côtes de l'Océan, de la Manche ou de la Méditerranée. Données de Ptolomée sur l'estuaire de la Seine qui est une preuve tangible des mouvements du sol et des variations de niveau de la mer qui l'ont modelé. Ligne des anciens rivages reportée vers les isobathes de –20 et –22 mètres, au large des côtes françaises. Les variations de la limite du

rivage de Fécamp à Dieppe. La théorie de M. A. Chévremont sur la formation du golfe normano-breton. Témoignages en faveur du rattachement des îles existant actuellement dans ce golfe, à la terre ferme. Immersion de la région sousmarine actuelle comprise entre la côte et les roches Douvres. L'ancien littoral du IIème siècle de la Bretagne et son immersion au cours des siècles. Considérations concernant les côtes de l'ancienne mer d'Aquitaine. L'Océan d'Aquitaine de Gobœum promontorium à Canentelli fluvii Ostia. La Méditerranée. (A suivre).

**Dugué J.** - Les bancs de vase de la côte de la Guyane. [*De vadis lutulentis litorum Guyanensium*]. Bull. Soc. Ing. Col., 87-94. Paris (1933). a - 811

**Freyberg (von) B.** - Alte und junge Strandlinien auf Gotland [*De novis veteribusque lineis litoreis in Gotlandia*]. 15 Abb., Natur u. Volk, LXIV, 10, 387-398. Frankfurt a. M. (1934). a - 812

Auf Gotland lässt sich mit grosser Genauigkeit die Küstenlinie der *Ancylus* - und *Littorina* - Zeit festlegen. Nach einer kurzen Uebersicht der Eiszeit Nordeuropas mit besonderer Rücksicht der Fossilien werden hier die gotländischen Reliefveränderungen, welche durch das Schwanken des Seespiegels entstanden, behandelt. Sehr gut gelungene Bilder mit erklärender Text sind auch eingeschlossen.

Allgemeine und zusammenfassende Wiedergabe der wichtigsten Probleme der Geo-Morphologie: die endogenen und exogenen Faktoren, die Regenformen, die Landschaft im feuchten Klima, die glazialen Formen; das Relief im trocknen Klima, die Küsten und die Inseln. In dieser zweiten Ausgabe seines Werkes gibt Vf. eine Zusammenfassung neuester Theorien und der betreffenden Diskussionen derselben, die im Laufe der letzten 15 Jahre stattgefunden haben, mit besonderer Berücksichtigung der Lehmanschen Theorie der karstischen Geographie, der Theorie Schmitt Hener über die Entwicklung des Küstenreliefs und der Theorie Walter Penck's, die vom Vf. einer eingehenden Kritik unterworfen wird.

**Maze W. H.** - Pot Holes at Green Point, Broken Bay (N. S. W.) and their Significance in Coastal Uplift [*De ollis litoreis in* Green Point, *baja* Broken (*Nova* Galles *merid.*) *earumque momento quoad litorum elationem*]. a - 819

Dead pot holes situated under the sea-level which show a relatively recent movement.

**Melton F. A. & Schriever W.** - The Carolina 'Bays' Are they Meteorite Scarf? [*De baja nomine* Carolina. *Num agitur de ligulis, meteoritibus genitis ?*]. Charts, phot., Journ. of Geol., XLI, Jan.-Febr., 52-66. Chicago (1933). a - 820

The AA. believe that these 'bays' are the product of bolides, but it should be remembered that no bolide has been found in these places.

**Miyare Naomi** - Deformation of the Earth's Crust along the Pacific Coast, Japan Sea Coast and Central Zone of Japan [*De corticis terrestris deformationibus in litoribus Oceani Pacifici, maris Japonici et in Japonia centrali*]. 2 Figs., Proc. Imp. Acad., X, 5, 264-267. Tokyo (1934). a - 821

Reference to opinions of C. Tsuboi and T. Terada. Reproduction of curves showing the deformation of the earth's crust. Corrections for the vertical displacements along various sections of levelling routes. Details will be reported in No. 3, vol 12, of the Bull. Earthquake Res. Inst.

**Nagaoka Hantaro & Shirai Toshiaki** - Continental Margin as Slip-Lines. Contour of Japanese Islands [*Margines continentales deformabiles. Extrema lineamenta Insularum Japonicarum*]. 2 fig. Proc. Imp. Acad., X, 2, 73-75. Tokyo (1934). a - 822

Fourth communication on the argument. General features of the coast lines. Some explanations are given for certain parts: coast of Saurikus Shimakara and Kunisaki Peninsulae, entrance to Kagoshima Bay, Mutsu Bay and Sado I. Form of slip-lines here and there.

**Penck** - Theorie der Bewegung der Strandlinie [*De motus lineae litoreae ratione*], Naturwiss., XXIII, 9, 152. Berlin (1935). a - 823

Abhängigkeit der Strandlinie von der Bewegung des Meeresspiegels und der Küsten. Die Bewegungen des Meeresspiegels und die Bewegungen der Erdkruste. (Aus den Sitzungsber. d. Preuss. Akad. Wiss. am 21. Juni 1934).

**Polynov B. B., Romanov V. V. & Graborskaia O. A.** - On the Soils of the Adzharla Coast of the Black Sea [*De litoribus* Adzharla *in Ponto Euxino*]. (In Russ., Engl. rés.). 1 Fig., Acad. Sc. U. S. S. R., Trans. Dokushaiev Soil Inst., VIII, 4. Leningrad (1933). **a - 824**

**San Miguel de la Cámara M.** - Las rocas eruptivas y metamórficas de la Costa Brava [*Saxa ructuosa et metamorphica ad litus* Brava *nomine pertinentia*]. Mem. Acad. Cienc. y Artes, XXIII, 18/19. Barcelona (1934). **a - 825**

**Smith W. S. Tangier** - Marine Terraces on Santa Catalina Island [*De solariis marinis in Insula Sanctae Catalinae*]. 4 Figs., Amer. Journ. Sc., XXV, 146, 123-136. New Haven, Conn. (1933). **a - 826**

The author presents three lines of evidence for the existence of marine terraces on Santa Catalina Island – the notched salients, the levelled summits and the elevated embayment. In short, contrary to Lawson's conclusions (s. Lawson, A. C. « The Post-Pliocene Diastrophism of the Coast of Southern California », Bull. Dpt. Geol., Univ. Calif., 1, n. 4, 115-160, 1893), from all facts now available it would seem that instead of differentiation there has been a remarkable uniformity in the general later Pleistocene movements of all the southern California islands and the neighboring mainland coast as well.

**Solé Sabarís Lluís** - La llargada real de la Costa Catalana [*De vera longitudine litorum Catalanorum*]. 1 fig., Bull. Centre excursionista de Catalunya. Barcelona (1933). **a - 827**

Estudio de morfometrica catalana.

General division of the Holocene in the Netherlands; discussion as to the origin of the dunes in the neighbourhood of Bergen, the penetration of the canal with the development of a breastwork, the distinction between the young and old dunes, the turf on the basis of the Holocene, the positive change of the coast level in the Holocene and finally a summary of the whole development.

**Trusheim F.** - Eine Titaneisenerz-Seife von Wangeroog [*De arena quae ferrum cum titanio commixtum continet*]. 11 Fig., Senckenbergiana, XVII, 1/2, 62-72. Frankfurt a M. (1935). **a - 830**

Bericht über eine durch eine Sturmflut auf Wangeroog entstandene Sichtung des Dünensandes, wodurch ein schwarzer, erzreicher Gürtel von mehreren Metern gebildet worden ist. Analyse der Erzschicht. Andere Beispiele dergleicher Schichtenbildung von Eisen – und Titaneiserzen – Sande.

**Tsuboi C.** - Undulatory Deformation of the Earth's Crust along the Japanese Sea Coast of Honsyû, the Main Island of Japan [*Deformatio undulatoria corticis terrestris in litore Japonico apud* Honsyû]. 1 Fig., Proc. Imp. Acad., X, 2, 76-78. Tokyo (1934). **a - 831**

Some discussions derived from differences in the results of the last two levellings along the Japanese sea coast of Honsyû. Geographical positions of the points of maximum upheaval or depression.

**Turner S. F. & Foster Margaret D.** - A Study of Salt-Water Encroachment in the Galveston Area, Texas [*De aquae salsae penetratione in sectorem* Galveston (*in* Texas)]. 3 Figs., Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part II, 432-435. Washington D. C. (1934). **a - 832**

Study of the salt-water encroachment along the line from Galveston to Houston, Texas; results of a hypothetical geological section extending from Galveston southward to the edge of the continental shelf; hypothesis of the oscillation of the sea-level within comparatively recent geologic time; results of the analysis or tests of water from 130 wells; determination of the rate and the direction of any movement of the zone of contact between fresh water and salt water.

**An.** - Adriatic Coast of Yougoslavia [*De litoribus hadriaticis ad Jougoslaviam pertinentibus*]. Geogr. Journ., LXXXIII, 4, 345. London (1934). **a - 833**

A short hint of the second volume of Mémoires – translated into French – of the Geographical Society of Beograd on the Dinaric Islands and the Adriatic littoral of Jougoslavia. The character of these Mémoires is principally geological.

## Sedimenta.

**Alcock F. J.** - Relationship of the Devonian and Silurian in Gaspé Peninsula and Northern New Brunswick [*Correlatio inter aetatem Devonianam et Silurianam in paeninsula* Gaspé *et in regione septentrionali, nomine* New Brunswick]. Trans. R. Soc. Canada, ser. 3, XXV, 4, 113-117. Ottawa (1931). **a - 834**

After a short introduction the author illustrates the Silurian succession on hand of a table giving Schuchert's summary of it in the Black Cape und Port Daniel areas on the north side of Chaleur bay, and the Lower Devonian succession at Cape Gaspé according to Clarke. He then shows a convincing evidence of the relationship of the Devonian beds to those of the Silurian in the whole of Gaspé and northern New Brunswick region, and concludes that following the deposition of the Silurian Chaleur bay series upwarping took place, the region was raised above the sea, and a period of erosion was initiated. He compares his conclusions with those of Williams regarding the same problem in the Arisaig district of Nova Scotia.

**Aubert de la Rüe E.** - La constitution géologique des îles Wallis et Futuna [*De geologica constitutione insularum* Wallis *nomine et* Futuna]. C. R. Acad. Sc., CC, 4, 328-330. Paris (193 ). **a - 835**

Etude géologique accomplie au cours d'une mission en 1934, dans le Pacifique austral, des deux petits groupes insulaires, les îles Wallis et Futuna qui n'ont encore jamais été l'objet d'une semblable étude. Une partie de ces îles est également volcanique et basaltique, tandis que l'autre est basse et madréporique. Dans l'Ouest et le Sud de Futuna on trouve une série sédimentaire contenant toute une faune de foraminifères dont quelques unes des formes ont été identifiées. L'A. démontre que les deux groupements d'îles considérés se distinguent nettement l'un de l'autre par leur formation géologique: les laves de Futuna étant plus acides et plus anciennes que celles de Wallis.

**Babet V. & Furon Raymond** - Sur les formations continentales post-hercyniennes de l'Ouest africain (Afrique occidentale et Afrique équatoriale) [*De formationibus continentalibus post-*

*hercynianis in Africae regione occidentali* (*Africa occid. et Africa aequat.*)]. 1 tabl., C. R. Acad. Sc., CCI, 1, 86-88. Paris (1935). **a - 836**

Comparaison entre les formations de l'Afrique occidentale et l'Afrique équatoriale (exposée dans un tableau). En Afrique équatoriale les formations continentales remplissant la cuvette congolaise, sont apparemment continues, en Afrique occidentale elles sont séparées par l'intercalation d'une série marine fossilifère. Nous retrouvons cette même série marine sur la côte équatoriale.

**Berry Edward W.** - Carboniferous Plants Interbedded in the Marine Section of Bolivia [*De carbonificatis plantis inter strata jacentibus sectionis marinae Bolivianae*]. 4 Figs., Amer. Journ.Sc., XXV, 145, 49-54. New Haven, Conn. (1933). **a - 837**

Comments on remainders of plants discovered on carbonaceaous shales interbedded in the limestones and immediately below the marls from which weather the enormous numbers of brachiopods for which the region of Chulpapampa near Apillapampa, Bolivia, is famous.

**Besairie Henri & Hourcq Victor** - Sur la stratigraphie du Jurassique supérieur de Madagascar [*De stratigraphia aetatis jurassicae superioris Madagascariensis*]. C. R. Acad. Sc., CCI, 3, 228-230. Paris (1935). **a - 838**

Tableau selon la classification anglaise sur les zones dont les superpositions ont été reconnues sur le terrain, dans des dépôts généralement calcaires ou gréseux, et leurs équivalences avec les niveaux classiques de l'Europe et de l'Inde.

**Chaput E.** - L'Eocène du plateau de Galatie (Anatolie Centrale) [*Aetas eocenica in* Galatia (*Anatolia Centr.*)]. C. R. Acad. Sc., CC, 9, 767-768. Paris (1935). **a - 839**

Description de la stratification et des faunes des principales assises reconnues du plateau de Galatie du Sud vers le Nord, de la base au sommet de la série éocène et qui contiennent, entre autre, des marbres à fusulinidés et des jaspes rouges à radiolaires.

**Chevalier Auguste & Furon Raymond** - Sur quelques dépôts tertiaires et quaternaires des îles du Cap Vert [*De depositis aetatis tertiariae et quaternariae ad insulas apud promunturium Viride pertinentibus*]. C. R. Acad. Sc., CCI, 3, 226-227. Paris (1935). **a - 840**

Constatation d'une émersion de certaines îles du Cap Vert au cours de la seconde moitié du Néogène entourées d'une mer où vivait une faune chaude. Liaison terrestre entre ces îles et le Sénégal, nombreux volcans sous-marins entre la côte et les îles. Fossiles et subfossiles: algues et mollusques.

**Chevalier Auguste, Joleaud Léonce & Petit Georges** - Les dépôts quaternaires de l'ancien cratère de Pedra de Lume (île de Sal, archipel du Cap-Vert) [*De quaternariae aetatis depositis veteris crateris in* Pedra de Lume *porrecti* (*in insula* Sal *nomine in archipelago apud promunturium Viride*)]. C. R. Acad. Sc., CC, 15, 1334-1335. Paris (1935). **a - 841**

Description d'un ancien cratère à l'île de Sal dont le fond, sensiblement au niveau de la mer et distant de celle-ci de 1 km., constitue une saline exploitée depuis longtemps. L'exploration de la partie Sud de ce cratère permet de penser qu'elle était occupée à une période indéterminée par un marécage avec végétation d'eau douce, lorsque l'eau de la mer l'a envahie brusquement et a tué cette végétation de marais dont les débris non fossilisés sont conservés grâce à la salure. Cette exploration a en outre permis de découvrir des empreintes végétales fossiles, des pinces de crabes et des ossements de tortues fossilisées qui démontrent qu'à l'époque quaternaire l'île de Sal, certainement plus étendue qu'aujourd'hui, devait être rattachée au continent.

**Choubert Boris** - Sur les terrains anciens du Gabon [*De antiquis terrenis ad regionem* Gabon *pertinentibus*]. C. R. Acad. Sc., CC, 2, 149-152. Paris (1935). **a - 842**

Compte rendu d'une étude des terrains sédimentaires anciens de la région comprise entre la frontière du Cameroun au Nord, Ouesso à l'Est et Franceville au Sud. Ces terrains plongent à l'Est sous les dépôts fluvio-lacustres de la cuvette congolaise et, à l'Ouest, sous les terrains marins secondaires et tertiaires de la zone côtière. L'A. établit un certain parallélisme entre la formation de ces terrains te la série de Franceville d'une part, et la série schisto-gréseuse du Bassin du Niari du Bas-Congo, d'autre part.

**Dantin Cereceda Juan** - El paludismo en el Delta del Ebro [*De paludibus in delta fluminis Hiberi*]. Bull. Soc. Geogr. Nacional, LXXIII, mayo, 348-352. Madrid (1933). **a - 843**

**Dieren (van) J. N.** - Organogene Dünenbildung. Eine geomorphologische Analyse der Dünenlandschaft der west-friesischen Insel Terschelling mit pflanzensoziologischen Methoden [*De organogenetica formatione cumulorum arena compositorum. Analysis geomorphologica cumulorum in insula* Terschelling (*Frisia occid.*) *rationum vegeto-sociologicarum auxilio*]. 11 Abb., 32 Zeichn., 2 Kart, viii-304 S. Martinus Nijhoff. 's-Gravenhage (1934). **a - 844**

Akademische Abhandlung, Amsterdam 1934. Die Entstehung der niederländischen Dünenküste vom historisch-geologischen Standpunkt. Die historische Geologie von Terschelling. Dünenbildung auf dem Strande. Entwicklung von Dünentypen; die zu der Dünenbildung beitragenden Pflanzen und deren Assoziationen.

(S. auch Tijdschr. Kon. Ned. Aardr. Gen., 1932).

**Doncieux L., Pavans de Ceccatty R. & Solignac M.** - Sur la présence de fragments de calcaire nummulitique dans certains cailloutis quaternaires de la région de Médenine [*De fragmentis calcaris nummulitici in cumulis saxosis aetatis quaternariae in regione* Médenine *nomine*]. C. R. Acad. Sc., CXCIX, 1, 78-80. Paris (1934). **a - 845**

Description de spécimens récueillis dans deux régions: l'une située au lieu dit Mestaoua, l'autre sur le bord de la route de Djorf à Médenine, dont la surface est constituée par des cailloutis qui y ont affleuré après ablation par érosion de la mince couche supérieure de grès calcaire marin qui les recouvrait. On y a découvert en abondance *Nummulites irregularis* Desh., *N. subirregularis* de la Harpe, *N. globulus* Leym et *N. atacicus* Leym. Cette faune indique très nettement l'âge Lutétien inférieur pour ces deux roches et pose le problème de l'origine des cailloutis, dont on peut conclure que la mer à Nummulites aurait vraisemblablement régné le long du flanc septentrional du vaste bombement des Jefara tunisienne et tripolitaine dont la dépression de la Syrtique constitue le périclinal oriental.

**Dresch Jean** - Essai sur l'évolution du relief dans la région prérifaine (Maroc Occidental) [*De regione praerifana* (*in Mauretania Occid.*) *Quaestiones tectonicae*]. Ill., cartes, 156 pp., Publ. Inst. Hautes-Et. Maroc., XXVI, Larose. Paris (1933). **a - 846**

La région décrite dans le présent volume s'étend dans la dépression entre le Rif et l'Atlas Moyen. L'A. en illustre le climat et l'hydrographie avec maints détails, mais s'occupe particulièrement du relief de la région, abandonnée par les ondes de la terre probablement vers la fin de l'époque Miocène, se transformant ensuite dans un lac ou une lagune, dont les rivières qui la parcourent actuellement, seraient les vestiges. L'A. décrit aussi les mouvements tectoniques qui ont transformé le relief de la zone considérée avec référence spéciale au mouvement graduel d'élévation qu'elle a subi dans le cours des siècles.

**Dyer W. S.** - Stratigraphy and Structural Geology of the Moose River Basin, Northern Ontario [*De stratigraphia et geologia in bacino fluminis* Moose, *in Ontario sept.*]. 1 Tabl., 3 pls., Trans. R. Soc. Canada, ser. 3, XXV, 4, 85-99. Ottawa (1931). **a - 847**

Account of the many new facts learned from the exploratory drilling made in order to penetrate the entire sedimentary section in the Moose River basin. The present description is based primarily on the log of a deeper drill hole « A », but notes on the geology of other parts of the Moose River are added to make the picture complete. It deals with the uppermost Pleistocene formation of the Marine (Champlainian) clay, the Long Rapids formation, the Williams Island formations, the Abitibi River formation, the Moose River formation, and the drilling in the pre-Cambrian. In the chapter dealing with structural geology the structural basins on the Mattagami and Abitibi Rivers, the anticlinal folds at Long Rapids on the Adibiti River, the folds in the vicinity of the Gypsum deposits on Moose River and the age of the folding, are considered.

**Fallot Paul & Doncieux Louis** - L'âge du Flysch de la périphérie de la chaîne calcaire du Rif [*De aetate terrenorum, quae a* Flysch *nomen habent, ad peripheriam catenae calcareae Riffanae*]. 1 carte, C. R. Acad. Sc., CC, 1, 76-78. Paris (1935). **a - 848**

Résultats d'une étude qui démontre que, malgré que l'on avait tenu pour généralement nummulitiques les terrains du Flysch de la périphérie de la chaîne calcaire du Rif, le Crétacé supérieur s'y trouve représenté, ce qui est prouvé par la présence des faunes de Foraminifères.

**Fomitschev V.** - On the Devonian Deposits of the Periphery of the Kuznetsk Basin [*De sedimentis devonicis ad peripheriam Bacini* Kuznetsk *nomine*]. (In Russ., Engl. Summ.). C. R. Acad. Sc. U. R. S. S., II, 2, 122-127. Léningrad (1934). **a - 849**

The writer advances a new hypothesis concerning the three divisions of the Devonian represented along the borders of the Kuznetzkij Basin, where also marine Upper Devonian deposits have been discovered. Description of the stratigraphy of the region under consideration.

**Gripenberg S.** - Studio dei sedimenti del Baltico Nord [*De sedimentis maris Baltici septentr.*]. Fennia. Soc. Geogr. Fenn., 60. Helsinki (1934). **a - 850**

**Kuenen Ph. H.** - Geology of Coral Reefs [*De geologia scopulorum coralliferorum*]. Wetensch. Uitk. Onderz. Snellius–Exped. 1929-1930, V, Part 2, Kemink en Zoon N. V. Utrecht (1934). **a - 852**

Description of the coral reefs examined. Influence of the relative variations of the sea-level on the reefs. Formations of shoals of sand, algæ etc. Opinions on the formation of atolls.

**Llarena (de) J. G.** - Ripplemarks carboniferos de Sama de Langreo (Asturias) [Ripplemarks *carbonifera apud* Sama de Langreo]. 5 lam., Boll. Soc. Espan. Hist. Nat. Madrid (1934). **a - 853**

Observaciones respecto a unos ripplemarks encontrados en la mina La Nalona situada en la vertiente izquierda del valle del Nalón, junto a Sama. Bibliografia.

**Lueders K.** - Grundsätzliches über die Beziehung zwischen Gezeitenstrom einerseits und Wandermaterial und Sediment anderseits [*Observationes fundamentales quoad reactionem inter currentias aestuosas et materias transvectas sedimentaque*]. Ann. d. Hydrogr., LXIII, 5, 189-195. Berlin (1935). **a - 854**

Nach einer kurzen Einführung und Zusammenfassung der vom Vf. im Jahre 1933 in dem Gebiete der Beziehungen zwischen Gezeitenstrom und Wandermaterial im Jadegebiet gezogenen Rückschlüsse, berichtet er über die Ergebnisse seiner Messungen, aus denen es sich ergibt, dass folgende Faktoren einen mitbestimmenden, aber in der Regel nicht messbaren Einfluss auf die oben erwähnten Beziehungen ausüben: 1. die Veränderlichkeit des Meeresbodens; 2. die Veränderlichkeit der Turbulenz des strömenden Wassers; 3. die Wellenwirkung. Ausserdem bespricht er den möglichen Einfluss der Ungleichheit der Flut- und Ebbströmgeschwindigkeitskurven auf das wandernde Material. In dem Absatz über « Gezeitenstrom und Sediment » bespricht Vf. die Ergebnisse von zwei in der Literatur bekanntgegebenen Untersuchungen (von Pratje und Bönecke) und behauptet, dass « unsere Kenntnis von den Stromverhältnissen in der Nordsee, vor allem aber unsere Kenntnis von den Beziehungen zwischen Strom und Sediment viel zu mangelhaft ist, um die schwierige Frage und die verwickeltere Beziehung zwischen Sediment und Gezeitenstrom aufdecken zu wollen ».

**MacCarthy Gerald R.** - The Rounding of Beach Sand [*De arenae rotundatione in* Atlantic Beach]. 5 figs., 5 tables, Amer. Journ. Sc., XXV, 147, 205-224. New Haven, Conn. (1933). **a - 855**

In a previous paper (Amer. J. Sc., XXII, 35–50, 1931) the author had discussed the problem of size distribution of grains in certain of the Atlantic Beach sands. At that time he made no attempt to discuss the even more puzzling question of the distribution of grain shape, and it is the purpose of this paper to discuss certain phases of this problem which have grown out of the previous work.

**Majo E.** - Le crespe di sabbia [*De arenosis sinibus rugisque*]. Riv. di Fis. Met. & Sc. Nat. VIII, 1, 3-10. Napoli (1933). **a - 856**

Beschreibung der oberkarbonischen Sedimente, welche scheinbar westlicher Herkunft sind. Die klimatischen Verhältnisse der Bildungsperiode der Sedimente sind auch geschildert, sowie auch die tektonischen Umwälzungen, welche während des Oberkarbons oder während seiner Anfangsperiode stattgefunden haben.

**Marçais Jean** - A propos d'un gisement de Trias fossilifère dans le Rif oriental [*De triassico quodam deposito fossilifero in regione* Rifana *orient.*]. C. R. Acad. Sc., CC, 8, 687-689. Paris (1935). **a - 858**

Résultats de l'étude d'un des plus importants affleurements triassiques qui sont très nombreux dans le Rif oriental, qui est particulièrement intéressant par sa masse et sa stratification régulière.

**Moorhouse F. W.** - The Recently-formed Natural Breastwork on Low Isles [*De recentiore pluteo naturali in insulis nomine* Low]. 2 pls. Rep. Great Barrier Reef Comm. IV, part I, 4, 35-36. Brisbane (1933). **a - 859**

Account of new coral accumulations forming a breastwork of the shingle bank on the east-south-east edge observed by the A. in March 1931. Some dates as to their formation.

**Neaverson F.** - The Sea–Floor Deposits; 1: General Character and Distribution [*De marini fundi sedimentis. Ium. Peculiaritates generales et distributio*]. 5 pls. Discovery Rep., IX, 295-350, Disc. Comm., Col. Off., London (1934). **a - 860**

**Niino Hirosi** - Concretions and Pseudo-Concretions dredged from the Sea-Bottom around Japan [*De concretionibus et falsis concretionibus quae everriculo a fundo marino ablatae fuerunt circum Japoniam*]. 1 table, 16 pls. Journ. Imp. Fish. Inst., XXX, 2, 117-121. Tokyo (1934). **a - 861**

1. Many kinds of concretions have been dredged from the sea bottom around the Japanese Islands. Among them those formed by apposition of materials on external side show concentric rings, some of which were formed by periodic precipitations of minerals after the concretions had been fully grown. 2. Among gravels of compact shale, sandstone, or tuff dredged from the sea bottom, there are some which show coloured rings formed by periodic precipitations of minerals from the diffusing solutions. Those rings are concentrically arranged, indifferent to the original structure of the gravels. Such gravels are often mistaken for true concretions. (Author).

**Ødum Hilmar** - Marint Interglacial paa Sjaelland, Hven, Møen og Rügen [*De marinis depositis interglacialibus in* Sjaelland]. 44, Danm. Geol. Unders. IV, 2, 10. C. A. Reitzels. København (1933). **a - 862**

**Robaux Albert** - Sur la présence du Crétacé supérieur à la base de la série du Flysch du Sud de la province de Cadix [*De aetate cretacea superiore ad basim seriei quae a* Flysch *nomen habet in regione merid. provinciae Gaditanorum*]. C. R. Acad. Sc., CC, 6, 478-480. Paris (1935). **a - 863**

Etude de la série du Flysch du Sud de la province de Cadix, de ses coupes, stratifications et Foraminifères, dont il résulte que la série du Flysch de la zone considérée est en réalité plus complète de ce que l'on avait cru jusque à présent.

**Robaux Albert** - Extension des formations du Crétacé supérieur, de l'Eocène et de l'Oligocène de la série du Flysch dans le Sud de la province de Cadix [*De formationibus aetatis cretaceae superioris, aetatis eocenicae et oligocenicae ad seriem pertinentibus quae a* Flysch *nomen habet, in regione meridionali provinciae Gaditanorum*]. 1 carte, C. R. Acad. Sc., CC., 11, 955-957. Paris (1935). **a - 864**

Compte rendu d'une étude des différents niveaux de la série du Flysch dans la province de Cadix, qui permet de rectifier les différences stratigraphiques qui semblaient résulter des travaux de D.–K. Gavala en Espagne et de M. M. Fallot et Doncieux dans le Rif Septentrional: ce sont en gros les mêmes épisodes stratigraphiques et les mêmes types lithologiques que, depuis le Sénonien jusqu'à l'Oligocène, nous retrouvons de part et d'autre du Détroit de Gibraltar.

**Rubey William W.** - Settling Velocity of Gravel, Sand, and Silt Particles [*De saxis, arena et particulis lutulentis. Agitur de eorum sedimentationis velocitate*]. 2 figs. Amer. Journ. Sc., XXV, 148, 325-338. New Haven, Conn. (1933). **a - 865**

The uniform settling velocity attained sooner or later by a falling particle depends upon the resistance offered by the settling medium. For small particles this resistance depends chiefly upon the viscosity of the fluid, but for larger particles it appears to be controlled almost entirely by impact. In the present paper the author gives a combination of Stock's law of viscous resistance and the impact formula, which represents a general equation for the settling velocities of large and small grains, contains no empirical constants, and accords very closely with published data on quartz grains but not so closely with data on fragments of galena.

**Rusconi Carlos** - Datos sobre una Capa marina de Edad Pampeana descubierta en Olivos, Provincia de Buenos Aires, con una nota sobre la Ingresion interensenadense [*Notae de sedimento quodam marino aetatis pampeanae in* Olivos *invento*]. **Stetson H. C., Schalk Marshall, Taylor C. W.** - Report on Studies in Sedimentation and Sedimentary Environments [*Relatio de studiis circa sedimentationem et ambientem quo sedimentatio fit*]. Woods Hole Oceanogr. Instit. Rep. 1933, 34-35. Woods Hole, Mass. (1934). **a - 867**

Account of the winter cruises of the « Atlantis » across the continental shelf on which bottom samples were obtained; the analysis of bottom cores obtained in Arctic Basin by the « Nautilus »; direct observations on the rates of transportation and deposition by means of a sedimentation pan: importance of a detailed study to be made of the sediments of several small water bodies in which the geological history of the factors affecting sedimentation is neither long nor complicated; attempt of a study of the part played by the beach cycle in marine sedimentations, including the effects of wave action and lateral travel along the beach.

**Thorp E. M.** - Preliminary Remarks on the Calcareous Shallow-Water Marine Deposits of Florida and the Bahamas [*Observationes priores de marinis depositis calcariis in vadis Floridensibus et in insulis* Bahamas]. Journ. Sedim. Petrol., IV, 3, 111-112, La Jolla, Calif. (1934). **a - 868**

A forthcoming publication will give the results of a four–years' study of the shallow–water marine deposits found along the coasts of southeastern Florida and the Bahamas. Calcareous organic skeletons and their broken parts were found to comprise about 96 per cent of the total deposit. The remaining 4 per cent consist of quartz, magnetite, mica, volcanic glass, and a few other mineral species. Chemically precipitated aragonite is discussed, as are calcareous oolites and ellipsoidal pellets, considered as of faecal origin. One hundred and fifty mechanical analyses are interpreted in relation to sorting and distributing agencies (Author).

**Twenhofel W. H.** - Treatise on Sedimentation. Second Edition [*Tractatus de sedimentatione. Editio IIa*]. 121 ills., XXIX + 926 pp. Williams & Wilkins Co., Baltimore (1932). **a - 869**

Second and largely amplified edition of a treatise on the petrology of sedimentary rocks, without much consideration of the chemical nor petrographic aspects. It contains a large amount of material.

**Vogel Herbert D.** - Sediment-Studies at the United States Waterways Experiment Station [*De sedimentis ad Stationem Americanam pro cursibus maritimis fluviatilibusque constitutam pertinentibus*]. Result of a sediment–movement study whose geographical scope extends from the confluence of the Missouri River and Mississippi River to the mouth of the latter at the Gulf of Mexico.

**Williams M. J. & Bocock J. B.** - Stratigraphy and Palaeontology of the Peace River Valley of British Columbia [*De stratigraphia et palaeontologia in valle fluminis* Peace *in Columbia Britannica*]. 2 tabl. Trans. R. Soc. Canada, Ser. 3, XXVI, 4, 197-224. Ottawa (1932). **a - 871**

The purpose of this paper is to give a concise summary of the stratigraphy and palaeontology of a great part of the Peace River valley including the Dominion Block. It contains the description of the following formations: Pre Cambrian, Pre–mid Devonian, Devonian, Triassic, Jurassic (?), Lower Cretaceous, etc. The fossils of the formations are described and listed. Character and distribution lithology, correlation and age of each formation are dealt with.

Zusammenfassung der letzteren Ergebnisse der Tiefseeforschung mit besonderer Berücksichtigung des Atlantischen Ozeans. Der Band besteht aus den folgenden Beiträgen: W. Stahlberg, Beteiligung Deutschlands an der Tiefseeforschung. V. Schubert, Ozeanographische Instrumente und Methoden. A. Defant, Ist das Tiefseewasser unbeweglich? H. Wattenberg, Der Gehalt des Seewassers an nahrhaften Substanzen. F. Gessner, Das Leben in der Seetiefe. C. W. Correns, Studie der Tiefseesedimentation. G. Wüst, Das Golfstromproblem.

**Gorbatzky G. W.** - Geomorphological Sketch of the Western Part of the Northern Island of Novaja Zemlja Between Melkaja and Northern Sulmeneva Fjords [*Descriptio geomorphologica partis occidentalis in insula septentrionali* Novaja Zemlja *inter bajam* Melkaja *et bajam* Sulmeneva]. (In Russ., Engl. Summ.). 13 figs., 2 tabl. 1 map. Trans. Arct. Inst., XIII, 143-183. Leningrad (1934). **a - 875**

The A. describes on hand of data he has obtained n 1931 when working as a geomorphologist of the expedition of the Arctic Institute of the USSR to Novaja Zemlja, the following orographic units obtained for the region explored, i. e.: 1) submarine relief, 2) strandflat, 3) main massif, and 4) mountain heights. The genesis of the explored fjords is dealt with and the shore–line studied. In his conclusions the author formulates some considerations as to the influence of the former glacial activity on the character of the relief of the region and establishes a chronological scheme of the regressions and transgressions which have taken place at Novaja Zemlja.

**Hernandez-Pacheco E.** - Significación geológica del relieve submarino del Cantábrico [*Significatio geomorphologica quoad tectonicam submarinam regionis Cantabricae*]. Las Ciencias, a. I, 542, 546. Madrid (1934). **a - 876**

Se comenta y esplica ciertas alteraciones del relieve submarino cantábrico en formas de surcos transversales (poteras), denunciadas por los trabajos oceanograficos modernamente efectuados en aguas del golfo de Vizcaya.

**Kuenen Ph. H.** - Geological Interpretation of the Bathymetrical Results [*De bathymetria eiusque interpretatione geologica*]. Wetensch. Uitk. Onderz. Snellius-Exp. 1929-1930. I, Geology, Part I, Kemink en Zoon N. V. Utrecht (1935). **a - 877**

Short review of the soundings, charts and profiles Regional description of the sea–bottom formations. Geological conclusions to be drawn from the new chart. Discussion on a great many tectonic theories concerning the origin of the Indian Archipelago. (Brouwer, Staub, Wegener etc.). Summary of the most important results.

Abrégé de travaux hydrographiques - qui ont permis l'établissement d'une carte de l'entrée à l'ouest de la Manche - réalisés à l'aide d'un appareil de sondage par le son Marti.

**Mayo Banks Claude** - Une représentation de l'aspect du fond de l'Océan Pacifique Nord [*De fundi marini repraesentatione in Oceano Pacifico Nordico*]. 2 tabl. h. t., Rev. Hydrogr., XII, 1, 31-33. Monaco, Princ. (1935). **a - 879**

Représentation basée sur les sondages (17.369 environ) exécutés par le « Ramapo » de la Marine des États-Unis.

**Nakano Masito** - On the Effect of Prevailing Winds upon the Depth of Bays [*De ventis dominantibus eorumque effectu in bajae profunditatem*]. 1 Fig., Proc. Imp. Acad., X, 6, 334–337. Tokyo (1934). **a - 880**

Method of treatment applied to Suttu Bay in Hokkaidò to study the influence of prevailing winds. Chief reasons for choosing this bay for investigation. Discussion on the results. Details will be reported in the Geogr. Magaz.

**Niino Hirosi** - On the Soundings from the Banks of Senoumi in the Suniga Bay, Japan [*De scandaliis peractis in vadis apud* Senoumi, *in baja* Suniga (*Japonia*)]. 3 Figs., 1 map., 9 tabl., 1 pl. Journ. Imp. Fish. Inst., XXIX, March., 69–91. Tokyo (1934). **a - 881**

Physiography of the Suruga Bay and its environs. Topography of the Banks of Senoumi. Soundings from the Banks of Senoumi and their surrounding area: Gravels, Sand, Organisms. Relation in geology, topography and fauna between the banks and the band bordering the Suruga Bay. Literature.

**O' Brien Morrough P. & Rindlaub Bruce D.** - The Transportation of Bed–Load by Streams [*De transvectione materiarum in fluminibus jacentium*]. 5 Figs., 2 tabl., Nat. Res. Counc. Trans. Amer. Geoph. Union, 15th Ann. Meet., Part II, 593-603. Washington D. C. (1934). a - 882

The increasing use of river- and harbour-model has accentuated its importance because of the necessity for selecting a material capable of being moved which will not at the same time form excessively large ripples.- The present paper is the result of a critical survey of available data made to ascertain whether or not a quantitative prediction of bed-movement is now possible. In his conclusions the author claims that from a survey of most of the published data on bed-movement, it is concluded that none of the equations for critical tractive force or rate of bed-movement is sufficiently reliable to be used for design.

**Patte Etienne** - A propos de récents sondages et du volcanisme dans la Mer de Chine [*De scandaliis recentiore tempore peractis deque activitate vulcanica in maribus Sinensibus*]. C. R. Soc. Géol. de France, 16 Janv., 19–20. Paris (1933). a - 883

Observations faites par l'A. sur la région de l'Ile des Cendres.

**Petterson Hans** - The « Johannes Schmidt » Ridge in the Indian Ocean [*De elatione navis « Johannes Schmidt » ex Oceano Indico*]. Nature, CXXXIV, 3375, 29. London (1934). a - 884

Proposition to give this name - of the late great Danish oceanographer - to the ridge running diagonally across the North Indian Ocean, announced in the second report of the John Murray Expedition to the Arabian Sea.

**Riel (van) P. M.** - The Bottom Configuration in Relation to the Flow of the Bottom Water [*De fundi marini configuratione pro currentia quae in profundum fluitat*]. Many maps and figs., Wetensch. Uitk. Onderz. Snellius - Exp. 1929–1930, II. Oceanography, Part 2, Chapt. II. Kemink en Zoon N. V. Utrecht (1935). a - 885

Historical review of the oceanographical research work. Construction of depth charts. Description of the sea bottom in comparison with former ideas. Depths of shelves dividing the different sea basins in connection with bottom currents. The quality of the sea water in and around the basin surrounding the shelf.

**Schmidt Hermann** - Die bionomische Einteilung der fossilen Meeresböden [*De fundis marinis fossilibus. Quaestio de partitione bionomica*]. Geol. & Paläont., XII, 38, vi + 154 S. Berlin (1935). a - 886

**Shepard Francis P.** - Canyons Off the New England Coast [*De abyssis marinis longe a litoribus Novae Angliae*]. 6 figs., 1 table. Amer. Journ. Sc., XXVII, 157, 24-36. New Haven, Conn. (1934). a - 887

Account of the discovery of submarine canyons of awe-inspiring proportions in the area extending east from a point 100 miles south by east from Cape Cod and 40 miles south of the Nantucket Lightship during the charting accomplished by the Coast Survey vessels during summers of 1931 and 1932. Distribution and character of the canyons. Origin of the canyons. Time of canyon cutting.

**Shepard Francis P.** - Detailed Surveys of Submarine Canyons [*Configuratio tectonica particularis abyssorum submarinorum*]. 1 fig., Science, LXXX, 2079, 410-411. New York (1934). a - 888

Illustration of the method used by U. S. Coast & Geodetic Survey in surveying the submarine canyons. Soundings were made at close intervals along these range lines and the exact positions obtained by taking angles to some shore object, when possible.

**Sigematu R.** - Depth of the Seas Southward of Japan Proper [*De maribus Japonicis meridionalibus eorumque altitudine*]. 6 pl., Rec. Oceanogr. Works in Japan, VI, 1, 1-13. Tokyo (1934). a - 889

Results of expeditions and investigations during these last years. Banks and submarine ridges reported.

**Sigematu Ryoiti** - On the Depth of the Sea near Kii Channel [*De maris altitudine apud canalem* Kii *nomine*]. (In Jap.). 1 pl., Suiro Yoho, XI, 365-367. Tokyo (1932). a - 890

**Smith Paul A.** - Submerged Atolls of Palawan [*De submersis atollis in* Palawan]. 1 fig., Geogr. Rev., XXV, 1, 160-161. New York (1935). a - 891

Summary of the last discoveries during the hydrographic survey of Palawan Bank and Palawan Passage, Philippine Island, of a group of submerged atolls in the vicinity of what heretofore has been called Capoas Cluster. On hand of the works of W. M. Davis (S. « The Coral Reef Problem », Amer. Geogr. Soc. Spec. Publ., n° 9, 1928) and those of Dr. Leopold Faustino of the Philippine Bureau of Science, some conclusions are drawn as to the origin and formation of submerged atolls in the region under consideration.

Historique des études de cette fosse située entre S. Miguel et Terceira (Açores). Quelques renseignements sur cet archipel volcanique et sur l'onde volcanique courant sur le fond.

**Thysse J. Th.** - De cerste Jaren van het Jjselmeer [*De aetate primaeva maris* Ijselmeer]. 7 fig., Tijdschr. Kon. Ned. Aardr. Gen. Amsterdam, LII, 4, 481-507. Leiden (1935). a - 893

Die Trockenlegung der Zuiderzee hat sowohl für Schiffahrt und Fischerei wie für Dämme und Abflüsse und Trinkwasserversorgung sehr grosse Veränderungen mitgeführt. Vergleich zwischen der alten Zuiderzee und dem gegenwärtigen Ijselmeer: Variationen der Wasserhöhe, Gezeitenbewegungen, Strömungen, Salzgehalt und dessen Verminderung.

**Uda M.** - Hydrographical Studies Based on Simultaneous Oceanographical Surveys Made in the Japan Sea and Its Adjacent Waters During May and June, 1932 [*Adumbrationes oceanographicae simultaneae in maribus Japonicis maribusque adiacentibus, mensibus Majo et Junio 1932*]. 36 figs., Rec. Oceanogr. Works in Japan, VI, 1, 19-108. Tokyo (1934). a - 894

Investigations carried out with the collaboration of about fifty boats belonging to the fisheries authorities in Japan. The bottom configuration and the deep sea-deposits are described. The actual conditions as to distributions of water temperature, salinity, colour and transparence etc. as well as meteorological conditions of that period are shown. The general trends of currents and the nature of the water characteristic of the Japan Sea are also discussed.

**Veen (Van) Joh.** - Ondulation de sable dans la Mer du Nord [*Quaestio de undulatione arenarum in Mari Nordico*]. 12 fig. h. t. et 7 dans le t. Rev. Hydrogr., XII, 1, 22-30. Monaco, Princ. (1935). **a - 895**

Résultats d'études faites par le navire « Ocean » du Waterstaat sur les mouvements de sable.

**Wrage Werner** - Schlickwattformen im Flusswatt. Zweiter Beitrag zur Kenntnis der Morphologie des Niederelbwattes [*De vadis lutulentis in fluminum delta eorumque forma. Contributio altera in morphologiam fluminis Albis inferioris*]. 1 Taf., Ann. d. Hydrogr., LXIII, 6, 234-237. Berlin (1935). **a - 896**

(Vgl. « Ann. Hydr. », 1931, S. 233). In der vorliegenden Notiz ergänzt Vf. die von ihm bereits früher gemachten Beobachtungen und Bilder und warnt von vornherein gegen den oft gemachten Fehler Beobachtungen in den Meereswatten als selbstverständlich in den Flusswatten vorauszusetzen. An Hand von den veröffentlichten Bildern schildert er die Eigentümlichkeiten der Flusschlickwatten mit besonderer Berücksichtigung der Wattlandschaft zwischen der Haseldorfer Marsch und der Pinnaumündung.

**An.** - General Bathymetric Chart of the Oceans. Fifth Pacific Science Congress, Vancouver, June 1933 - Carte Générale Bathymétrique des Océans. V$^{\text{ème}}$ Congrès de Sciences du Pacifique. Vancouver, Juin 1933 [*Tabula generalis bathymetrica Oceanorum. Conventus V$^{\text{us}}$ Scientiarum causa ad Oceanum Pacificum pertinentium. Vancouver, mense Junio 1933*]. (In Engl. & French). Int. Hydr. Bull., VI, 107-108. (See: « Int. Hydr. Bull. », 9, 1933, p. 167 and III, 1934, p. 60). Monaco (Princ.) (1934). **a - 797**

Text of a letter sent by the General Secretary of the Fifth Pacific Science Congress to the International Hydrographic Bureau in order to communicate the text of a resolution passed by the Congress and concerned with the preparation and publication of the revised edition of the bathymetric chart referred to.

**An.** - A Profile of Shoal Water Depths by Echo Sounding [*De adumbratione vadi cuiusdam haud alti, scandalii per echum auxilio*]. Science, LXXX, 2080, 421-422. New York (1934). **a - 898**

Capt. R. S. Patton, director of the U. S. Coast & Geodetic Survey, has announced a recent improvement in the apparatus to obtain depths by echo sounding. The equipment, now being used in surveys off the Virginia coast, takes 20 soundings a second in depths from 6 to 120 feet, with an accuracy of about one inch. Some details on this instrument, known as the « Shoal Fathometer .»

# GEOGRAPHIA MARIS.

## Geographia descriptiva et oeconomica.

**Almagià Roberto & Milone Ferdinando** - Geografia Universale. Oceani. Oceania [*Geographia totius mundi. Oceani. Oceania*]. Vol. VIII, xii-777 pp, 7 cart., 12 tav. in calc. f. t., 602 fig., n. t., Tipogr. Sociale Torinese. Unione Tipografico-Editrice Torinese. Torino (1934). **a - 899**

**Spekke A.** - La côte orientale de la Baltique et le peuple Letton [*De litoribus orientalibus Maris Baltici deque populo Lettonio*]. Le Monde Slave, R. Sér. X année, II Mai, 219–232. Paris (1933). **a - 943**

**Steers J. A. edit. by**... Scolt Head Island [*De insula* Scolt Head]. Ills. maps., xvi-234 pp., Norf. & Norw. Nat. Soc., W. Heffer & Sons, Cambridge (1934).

(—) See also: Geogr. Journ. LXXXIII, 6, 479–502. London (1934). **a - 944**

The book is an up-to-date account of the work on Scolt Head in a series of specialized papers, some of them deal with the marine fauna of the water around the island, the series of effect produced on it by water movements, the action of waves on shingle transference, the effect of tidal submergence on vegetation and so on.

**Koloskov P. I.** - Description climatologique de la Péninsule de Kamtchatka [*De paeninsula* Kamtschatka. *Descriptio climatologica*]. (En russe). Fig. & tabl., 13 cartes. Izv. Daljnevost. Gheofis. Inst. (Bull. Inst. Géophysique Extr.–Orient), II (IX) 119–145. Vladivostok (1932). **a - 983**

Le matériel dont l'A. s'est servi pour le présent ouvrage, a été recueilli surtout au cours d'observations météorologiques exécutées depuis 1912 jusqu'à 1932 par l'Observatoire Géophysique Central et par l'expédition au Kamtchatka de Rjabouchinskij. Malheureusement, 8 stations seulement ont été faites, ce qui représente un chiffre très exiguë par rapport à l'énorme extension du territoire de la Péninsule. Toutefois l'A. a pu arriver à des conclusions intéressantes concernant la température du sol du Kamtchatka et des eaux qui le baignent. En outre des observations très intéressantes ont été faites sur la distribution de la pression atmosphérique, les mouvements des masses d'air, la direction et la violence des vents.

**Lavrov A.** - La lutte pour la Voie Maritime du Nord [*De cursu maritimo ad regiones septentrionales*]. (En russe). 2 fig., Morsk. Sbornik, 5, 111–120. Leningrad (1934). **a - 984**

A paper read at the Evening meeting of the R. Geographical Society, London, on 18 December 1933, containing the account of an expedition sent out in June 1932 in order to continue the work which Watkins had begun on the British Arctic Air Route Expedition; the scope of the expedition has been to explore the place which Watkins thought would be most suitable for an air port on a Europe-America air line, i. e. the Lake-fjord, and to undertake soundings in the Lake Fjord and Nigertusok. The paper is completed by two appendices: I. Meteorology, by Quintin Riley, and II. Preliminary Account of the Natural History Work, by F. Spencer Chapman followed by a summary of the discussion, which had taken place after the reading of the paper.

Résumé des principaux résultats de l'exploration de l'Arctique par les expéditions soviétiques.

## Relevationes hydrographicae (geodeticae, topographicae, bathymetricae) – Instrumenta hydrographica et bathymetrica – Naves hydrographicae.

**Adamovitch N.** - Coefficient d'expansion et longueur des copies en platine– iridium du mètre international [*Agitur de coefficiente quoad expansionem et longitudinem in reproductionibus platino–iridiatis mensurae metricae internationalis*]. (En russe). 1 tabl., Gheodesist, 7/8, 28-31. Moskva (1933). **a - 1038**

Résultats d'une étude basée sur la mensuration des 30 copies existantes du mètre international fabriquées à peu près en 1880 sous le contrôle direct du Comité International des Poids et des Mesures avec le même alliage fourni par la maison anglaise John Mattey & Co. dont il résulte que c'est plutôt les mètres-étalons qui se sont allongés, et non les copies qui en ont été faites, avec un alliage de platine et d'iridium.

**Adams Oscar S.** - Plane Coordinate–Systems for Individual States [*Systhemata coordinatarum planarum pro singulis Statibus*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 36-38. Washington D. C. (1934). **a - 1039**

Account of a quite extensive study performed by the author and others in the Coast and Geodetic Survey in order to elaborate a plane coordinate-system which should be as extensive as possible, so that rather large regions could be included in public works surveys, publicroads surveys, and others of like nature. This plane coordinate-system is based upon one of the conformal projections. The intent is to compute the $x$ - and $y$ - coordinates of all triangulation-stations on an appropriate grid within each of the states.

**Adams Oscar S. & Claire Charles N.** - Manual of Plane–Coordinate Computation [*Liber manualis ad coordinatas planas calculandas*]. 65 figs. U. S. Dpt. Comm., Coast & Geod. Surv. Spec. Publ. n. 193, 1-271. Washington D. C. (1935). **a - 1040**

Introduction. Nature of surveying. Geodetic surveying. More restricted class of surveying. Need of plane systems covering greater areas. Choice of plane systems. Formulas for Lambert projection and for the transverse Mercator projection. List of States with their respective grids. Explanation of plane or grid azimuth. Computing plane coordinates on the Lambert projection. Applications of the grids to computation. Computation of a first-order traverse in North Carolina. Scale factors. Adjustment of second-order triangulation by variation of coordinates. Adjustment of a quadrilateral with one side fixed entirely and with an opposite side fixed in length. Two short traverse adjustments each beginning and ending on the same control line. Adjustment of a traverse that lies partly in one system of coordinates and partly in a second system. Adjustment of a small arc of triangulation in a overlap section of two systems. Index.

**Belavine A.** - Chambre de reproduction photographique avec focalisation automatique [*De photocamera pro reproductione, focalisatione praedita automatica*]. (En russe). 6 fig. Gheodesist, 3/4, 66-71. Moskva (1933). **a - 1041**

**Bemporad Giulio** - Sulla scelta delle stelle nelle determinazioni di tempo [*De stellis eligendis in temporis determinationibus*]. Mem. Soc. Astr. It., III, 3, 229-233. Milano (1934). **a - 1042**

Si completa e si generalizza una ricerca del prof. Th. Niethammer circa la più conveniente scelta delle stelle orarie per una determinazione di tempo; si dimostra in particolare che, non essendo praticamente possibile osservare stelle aventi tutte una comune declinazione prefissata, conviene che la distanza zenitale media sia alquanto maggiore di quella trovata dal Niethammer.

**Berezekine V.** - Cartes hydrologiques comme indicateurs de terres non encore découvertes [*De tabulis hydrologicis quibus utitur ad inveniendas terras incognitas*]. (En russe). 1 fig. Zap. Ghidrol., 6, 100-102. Leningrad (1933). **a - 1043**

Observations hydrologiques considérées comme point de départ pour l'hypothèse de l'existence d'un haut-fond ou d'une terre dans la région entre 81°-86° long. Ouest et au-delà de 80° lat. Nord. Extrait des travaux de l'expédition hydrologique du Tajmyr.

**Bowie William & Avers H. G.** - Descriptions of Bench Marks [*De libellationibus*]. Tables. U. S. Dpt. Comm. Coast & Geod. Surv., 162-328. Washington D. C. (1933). **a - 1044**

(En russe). 1 carte. Bull. Arct. Inst., 11/12, 404-406. Leningrad (1934). **a - 1051**

Compte-rendu des travaux astronomiques exécutés dans le but de déterminer des points de repère sûrs pour le levé géologique qui devra être fait par l'expédition dans la partie orientale de la Novaja Zemlja, organisée par l'Institut Arctique de l'URSS et pour le levé du littoral depuis Matotchkine Char jusqu'aux Iles Pakhtoussov, exécuté par l'Administration Centrale de la Voie Maritime du Nord.

**Chovan W. J.** - Method of Improving Poor Quality Lead Line [*Methodus ad filum ultimae naturae in melius reddendum in apparatu pro scandaliis*]. Rev. Hydrogr., XII, 1, 168. Monaco, Princ. (1935). **a - 1052**

Abstr. from Field & Engrs. Bull. of U. S. Coast & Geod. Surv. N° 7, 1934.

**Clifford Ch. J.** - Leveling in Massachusetts, Rhode Island, and Connecticut [*De livellationibus in regionibus* Massachusetts, Rhode Island *et* Connecticut]. 4 figs. U. S. Dpt. Comm. Coast & Geod. Surv. Spec. Publ. 181, 1-66. U. S. Govmt. Print. Off., Washington D. C. (1934). **a - 1053**

General statement. History. Instruments and field methods. Computations and adjustments: the 1920 General adjustment, orthometric correction. Bench marks. Cooperation in the preservation of bench marks. Descriptions and elevations of bench marks. Rail elevations.

**Clifford Ch. J.** - Leveling in Maine [*De livellatione in regione nomine* Maine]. 4 figs., tables. U. S. Dpt. Comm., Coast & Geod. Surv. Spec. Publ., 184, 1-68. U. S. Govmt. Print. Off., Washington D. C. (1934). **a - 1054**

This publication contains the descriptions and elevations of bench marks in the State of Maine, the elevations of which have been determined by first-order and second-order leveling executed by the Coast and Geodetic Survey. A short paragraph descriptive of each line is found at the beginning of the list of descriptions and elevations of the bench marks along the line.

**Clowes A. J.** - Hydrology of the Bransfield Strait [*Fretum* Bransfield *eiusque hydrologia*]. Discovery Comm., Col. Off., London, Govmt. Depend. Falkland Isl., 9, Univ. Press. Cambridge (1934). **a - 1055**

**Comola A.** - Il tacheometro e i tacheometri autoriduttori [*De apparatu tacheometrico deque apparatibus tacheometricis autoreductoribus*]. Prove comparative. 24 pp., 8 fig., Tip. Artigianelli (G. Rossi). Torino (1935). **a - 1056**

L'autore ha eseguito alcune prove comparative con i seguenti strumenti: tacheometro autoriduttore Hammer-Fennel; tacheometro autoriduttore Bosshardt-Zeiss; l'autoclivotelemetro del geometra G. Gratarola.

**Couderc René & Danton Jean** - Sur la découverte d'un haut–fond remarquable entre Madère et le Portugal [*De invento notando altofundo inter Maderam et Lusitaniam*]. 1 fig. C. R. Acad. Sc. CC, 15, 1292-1294. Paris (1935). **a - 1057**

Compte rendu de la découverte, le 4 mars 1935, par 35°04′ de lat. Nord et par 12°54′ de long. Ouest, près du point de rupture du câble sous-marin reliant Brest à Casablanca, d'un nouveau banc très remarquable, dont le sommet formé par un plateau de faibles dimensions est à 60 mètres au-dessous du niveau de la mer. Le banc portera, sur les cartes marines, le nom de Banc de l'Ampère, en souvenir du navire-cablier qui l'a découvert.

**De Agostini E.** - La cartografia nelle colonie libiche [*De coloniis Libycis earumque chartographia*]. Riv. Colonie Ital., 6, 445-462. Bologna (1934). **a - 1058**

Due tipi di cartografia rappresentano i territori delle nostre Colonie: *a*) cartografia regolare, limitata alle regioni costiere che interessano la vita del territorio e la sua valorizzazione; *b*) cartografia di ricognizione per i territori rimanenti e per la visione d'insieme.

**Divitijarov N.** - Solution du problème de Pothenot à l'aide de la méthode des approximations consécutives [*De* Pothenot *eiusque problemate pro quadam solutione per approximationem consecutivam*]. (En russe). 2 fig., tabl., Gheodesist, 5/6, 38-42. Moskva (1933). **a - 1059**

Quelques précisions concernant la méthode de solution du problème de Pothenot, telle qu'elle est illustrée dans le cours de R. J. Tiele « Phototopographie dans son développement actuel », pour la détermination de la distance du foyer de l'objectif de la chambre photographique à l'aide d'approximations consécutives (en série), avec référence spéciale au principe de base, dont s'inspire la méthode susmentionnée.

**Drobyschev F.** - Stéréoautographe [*De stereoautographo*]. (En russe). 5 fig. Gheodesist, 7/8, 39-45. Moskva (1933). **a - 1060**

Théorie, méthode de construction, fonctionnement et application d'un appareil destiné au traitement et à l'élaboration stéréophotogrammétrique des négatives des levés superficiels, dans le but d'obtenir un plan topographique.

**Edgell J. A.** - « Echo » Methods of Soundings. Méthodes de sondage par le son [*De scandaliis per sonum*]. (In Engl. & French). 1 fig. Int. Hydrogr. Bull., 1, 12-13. Monaco, Princ. (1935). **a - 1061**

Extrait d'une lettre adressée au journal « The Times », le 28 Septembre 1934, dont il résulte qu'au moyen de sondages par le son on obtient non seulement la profondeur exacte, mais encore le contour même, très net, d'une épave, ce qui est démontré par un exemple de récupération d'une épave située entre les hauts-fonds de l'Inner et de l'Outer Gabbard, à l'entrée de la Tamise.

**Edgell J. A.** - Faux échos par eau profonde [*Falsa echo aquarum peraltarum causa*]. 1 tab. h. t. Rev. Hydrogr., XII, 1, 20-21. Monaco, Princ. (1935). **a - 1062**

Extrait d'une lettre du Contre-Amiral Edgell sur un rapport en argument de l'H. M. S. « Challenger ».

**Elisseev F.** - Essai d'application de la méthode de Heuwelink et étude des sections des cercles de grands théodolites et des instruments universels [*De* Heuwelink *eiusque methodu. Agitur de methodu applicanda ad studendas circulorum sectiones in magnis theodolitis et in universalibus instrumentis*]. (En russe). 11 graph. & tabl., Gheodesist, 1/2, 24-34. Moskva (1933). **a - 1063**

Résultats des recherches et des études accomplies en janvier-mars 1932 par l'Institut des travaux géodésiques fondamentaux de la Direction Géodésique de l'URSS, sur les sections des cercles de 10 grands théodolites de 4 instruments universels. Ces instruments étaient destinés à l'exécution d'observations et de triangulations de 1ère classe et, en partie d'observations astronomiques. L'étude d'un nombre relativement important de cercles a permis d'établir et de définir les qualités et les défauts de la méthode modifiée de Heuwelink qui a remplacé la méthode classique de Bruns dans la nouvelle instruction pour l'exécution de triangulations de 1ère classe, et de formuler quelques considérations d'ordre pratique au sujet.

**Entine I.** - Mesure de la base sur la glace [*De mensuranda basi ad superficiem glaciatam*]. (En russe). 1 fig. Gheodesist, 11/12, 20-23. Moskva (1933). **a - 1064**

Compte rendu des travaux exécutés lors de la triangulation de 1ère classe de la région Kemj-Mourmansk en 1932, au cours de laquelle une des bases a dû être construite sur la superficie du lac Imandra qui se trouve au-delà du cercle arctique à 67°30′ lat. Nord.

**Feierabend V.** - Tableau nomologique de logarithmes à quatre décimales pour la détermination des erreurs en surplus [*Tabula nomologica logarithmorum quattuor notis praedita ad supererrores determinandos*]. (En russe). 1 fig. Gheodesist, 1/2, 21-24. Moskva (1933). **a - 1065**

Description d'un tableau nomographique dont l'emploi peut être fait avantageusement et commodément dans tous les cas qui exigent l'application de logarithmes à quatre termes, comme p. ex. dans le calcul des membres de rectification dans la géodésie, etc.

**Garner C. L.** - Progress of the Geodetic Work of the United States Coast and Geodetic Survey, April 1, 1933 to March 31, 1934 [*De instituto* U. S. Coast and Geodetic Survey *eiusque progressibus in operibus geodesicis a die 1 Aprilis A. 1933 ad diem 31 Martii A. 1934*]. 1 map. Nat. Res. Counc. Trans. Amer. Geoph. Union. 15th Ann. Meet., Part I, 48-53. Washington D. C. (1934). **a - 1066**

Account of the work accomplished during the year, from April, 1, 1933 to March, 31, 1934 by the U. S. Coast and Geodetic Survey, which was the greatest in the history of the Survey. It consisted mainly of triangulation and leveling for furnishing the horizontal and vertical control-nets, astronomical observations, base-measurements, gravity-determinations, and the operation of two international latitude-observatories.

**Gennaro Ida** - Aggiunta alla Nota: « Determinazione di gravità relativa tra l'Istituto Idrografico della R. Marina in Genova e Andrate » [*Additio ad notam: « De gravitatis relativae determinatione inter Institutum hydrographicum Regiae Classis, Genuae et* Andrate »]. Atti R. Acc. delle Sc. di Torino. Cl. Sc. Fis., Mat. e Nat., a. 69, tomo I, disp. 2, 249-251. Torino (1934). **a - 1067**

Viene data una tabella in cui si riportano le anomalie della gravità in varie stazioni presso il meridiano di Mondovì, calcolate con la formula di Helmert 1901 e con la formula internazionale 1930, a complemento delle precedenti Note riflettenti le stazioni anzidette.

**Gougenheim André** - Sur la précision obtenue dans les déterminations de la latitude au moyen de l'astrolabe à prisme [*De obtenta perfectione in latitudine determinanda per astrolabium prismate praeditum*]. 1 tabl. C. R. Acad. Sc., CC, 12, 1015-1017. Paris (1935). **a - 1068**

Résultats d'observations effectuées en octobre et novembre 1933, à l'occasion de l'opération internationale de révision des longitudes mondiales, à San Diego (Californie), avec un astrolabe à prisme. Dans un tableau l'A. reproduit les résultats obtenus au cours des 46 séries d'observations qui ont été faites; au cours de chaque série une soixantaine d'étoiles ont été observées. Les écarts à la moyenne ont été déterminés; les observations ont été faites avec deux instruments: un astrolabe à prisme S. O. M. de grossissement 80 (modèle géodésique) et un astrolabe S. O. M. de grossissement 120.

**Greve Sv.** - Echo Soundings [*De scandaliis per echum*]. 2 tabl., 7 pls. Introd. Rep. Carlsberg Foundation's Oceanogr. Exped. round the World 1928-30. Dana-rep. 1, 79-130. Copenhagen & London (1934). **a - 1069**

Introductory remarks: the echo- sounding apparatus, installation, trials, operation, etc., performance and planning of the work on board the ship, the fixing of soundings, re-checking and compilation, arrangement and tabulation of soundings. Tables of soundings, date, latitude, longitude and depth.

**Gutenberg B.** hrsg. von - Handbuch der Geophysik. Band III, Lief. 3 [*Liber manualis de Geophysica. Vol. IIIum, fasc. IIIus*]. iv — 501-730. Gebr. Bornträger. Berlin (1934). **a - 1070**

Der vorliegende Band enthält eine Arbeit von Walter B. Lambert über Breitenschwankungen, und einen Bericht über die Theorie des irdischen Schwerefeldes von E. A. Ansel.

**Harris G. D.** - A Low Price Station Indicator [*De apparatu parvi pretii qui stationes indicat*]. 3 figs. Science, LXXX, 2063. 38, New York (1934). **a - 1071**

On a long-legged home-made tripod whose cost and labor is no more than 3 dollars. Indications for its construction.

**Huber Otto** (von) -Aménagement photogrammétrique du dirigeable « Comte Zeppelin » au cours de son vol arctique de 1931 et méthodes d'élaboration du matériel photogrammétrique réuni [*De apparatibus photogrammetricis in aëronavi* « Comte Zeppelin » *inter volatum arcticum A. 1931. Agitur etiam de elaborandis studiis photogrammetricis unitis*]. (En russe trad. de l'allem.). 9 fig., 1 tab. Gheodesist, 5/6, 61-69. Moskva (1933). **a - 1072**

Traduction de l'article paru dans « Bildmessung und Luftbildwesen », n° 4, pp. 146-151, 1931, dont il résulte que la photographie aérienne, même lorsqu'elle est exécutée en des conditions défavorables, fournit presque toujours un matériel important au point de vue géographique et cartographique, ainsi qu'océanographique, vu que les levés aériens du mouvement des glaces, tels qu'ils ont été faits au cours du voyage du « Comte Zeppelin » permettent d'obtenir des données très sûres sur les courants de la région survolée.

**Jazev I.** - Instrument pour la détermination de passages avec deux micromètres [*De apparatu ad transitum determinandum duobus praedito micrometris*]. (En russe). 3 figs. Gheodesist, 1/2, 35-39. Moskva (1933). **a - 1073**

Description d'un nouveau type d'instrument pour la détermination de passages des astres muni de deux micromètres autoregistrateurs qui permettent de récupérer l'erreur personnelle entre les observations exécutées par des observateurs différents.

**Judson Lewis V.** - Graduation and Calibration of Precision-Circles [*De gradibus et diametris circulorum*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 38-39. Washington (1934). **a - 1074**

At the annual meeting of the American Geophysical Union in 1932 the author reported on some tests made on the Bureau of Standards circular dividing-engine which demonstrated the high accuracy of that instrument. In the present paper he gives some results of a series of circles graduated on this engine for the United States Coast and Geodetic Survey. These circles intended for use in the 9-inch Parkhurst first-order theodolite, are made of cast sterling silver. The processes of preparation of the circles are circles.

**Kagan V** - Tableau pour le calcul de la convergence des méridiens [*Tabula ad meridianorum convergentiam calculandam*]. (En russe). 1 tabl. Gheodesist, 11/12, 80-81. Moskva (1933). **a - 1075**

Tableau qui permet d'exécuter ce calcul avec une précision jusqu'à 0',1-0',2 sur la base des coordonnées de Gauss du point.

**Kawasaki S.** - Latitude Observations at Greenwich [*De observatis latitudinibus in* Greenwich]. Journ. R. Astron. Soc., M. N. XCV, 33-41. London (1934). **a - 1076**

An investigation of the direction of the wind on the latitude observation made at Greenwich was carried out by using the observations made during the years 1919. 6 to 1927. 1. More than half of the Kimura term in the latitude observations was shown to be due to the wind. It is also to be expected that in all meridian observations at Greenwich a systematic term of semi-annual type will be found.

**Kawasaki S.** - Effect of the Wind on the Observed Latitude at Mizusawa [*De ventorum effectu in latitudinem in* Mizusawa *observatam*]. 3 figs., 8 tables. Jap. Journ. Astr. & Geoph., Trans. & Abstr. XII, 2, 131-150. Tokyo (1935). **a - 1077**

The principal points of the author's investigation can be summarized as follows: 1. It is ascertained that there exists a close correlation between the direction of the wind and the observed latitude, and that it can be represented by a simple harmonic; 2. This correlation seems to remain constant throughout the whole year; 3. The correlation between the velocity of the wind and the observed latitude was also recognized; 4. As the result of the annual variations of the elements of the wind, there arises in the observed latitude a term, which varies systematically during the course of a year. It is remarkable that the phase and period of this variation are quite similar to those of the Kimura term; 5. The mean latitude, determined from the observed data, is apt to be affected by the wind.

**Kimoto V.** - La Aerofotogrametria en el Japón y en Manchuria [*De aërophotogrammetria in Japonia et* Manchuria]. An. Soc. Esp. Estudios Fotogramétricos, IV, 3. Madrid (1934). **a - 1078**

**Kourline D.** - Méthode combinée de phototriangulation [*Methodus combinata pro phototriangulatione*]. (En russe). 4 fig., 3 tabl., Gheodesist, 11/12, 36-40. Moskva (1933). **a - 1079**

Description d'une nouvelle méthode de triangulation qui permet d'accélérer son exécution tout en conservant la même exactitude.

**Kourline D.** - Réduction des photographies aériennes à la même échelle [*De aërophotographiis ad eumdem modulum reductis*]. 6 fig., 1 tabl. Gheodesist, 11/12, 62-67. Moskva (1933). **a - 1080**

Description d'une méthode de réduction des photographies aériennes à la même échelle à l'aide d'une chambre de projection ou des cônes à échelle.

**Krassovskij F. N.** - Déduction simplifiée des formules fondamentales pour le calcul des coordonnées de Gauss-Krüger [*Deductio simplicior formularum praecipuarum ad calculandas coordinatas* Gauss-Krüger]. (En russe). 20 pp. (Dactylogr.). Inst. Géodés. Moscou (1934). **a - 1081**

Vu que probablement pas même le 10 % des personnes qui doivent se servir dans leurs travaux des coordonnées de Gauss-Krüger ne possèdent une instruction géodésique supérieure, l'A. a cru utile de donner un fondement théorique simplifié de ces coordonnées, en se servant comme point de départ des formules de Schreiber pour le calcul des coordonnées géographiques, parce que ces formules sont connues par beaucoup de personnes exécutant des travaux topographiques et géodésiques.

**Lanza L.** - Sulla possibilità d'impiego di un traguardo per rilievi aerofotografici [*De utenda amussi in aërophotographicis adumbrationibus*]. Riv. Aeronautica, XI, 2, 247-249. Roma (1935). **a - 1082**

L'autore dopo avere accennato agli inconvenienti di disgiunzione e di eccessiva sovrapposizione che si verificano spesso nelle serie fotografiche planimetriche eseguite in volo, inconvenienti dovuti principalmente alla difficoltà di stabilire con precisione l'intervallo di scatto, espone il principio su cui si basa un traguardo che consente di determinare l'intervallo suddetto con molta praticità e prontezza e con la massima esattezza.

**La Porte Florian** - Rapport sur la triangulation du Port de Lorient [*Relatio de triangulatione in* Port de Lorient]. Ann. Hydrogr., XIII, Ser. III, 99-109. Paris (1934). **a - 1083**

Plan de la triangulation. Opérations. Topographie. Calculs. Réduction. Coordonnées rectangulaires des points déterminés par l'A. Calcul d'un point par la station.

**Léger M.** - Sondeur à drague [*Scandalium draca praeditum*]. 3 fig. sur pl. Résult. Camp. Scient. accomplies par Albert I, Prince Souverain de Monaco. Fasc. LXXXIX, 349-351. Monaco (1934). **a - 1084**

Ce sondeur est destiné à prendre des échantillons de sable, vase ou gravier constituant le fond de la mer: il ramène un echantillon du fond quel qu'il soit, alors que les sondeurs employés jusqu'à ce jour remontent quelquefois sans rien ramener. Description de l'appareil.

**Lushene J. P.** - Longitude–Determination at Honolulu as Part of the International Program of 1933 [*De longitudinibus determinatis in* Honolulu *ex internationali ratione A. 1933*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 40-41. Washington D. C. (1934). **a - 1085**

Brief account of the study of the phenomenon of the simility of the shapes of the opposite coast-lines of the South Atlantic Ocean, i. e. that each major indentation on the east coast of South America has a corresponding protuberance on the west coast of Africa. This study has brought about a new conception of the nature of the Earth's crust and movements of drift of land-masses which is called the theory of displacement of continents. In this paper an account is given of the second campaign of the world-longitude program carried out at Honolulu during the months of October and November 1933 by the Coast and Geodetic Survey.

**Maljtzev G.** - Modèle pour le traçage du réseau des coordonnées [*Modulus ad rete ordinatarum delineandum*]. (En russe). 4 fig. Gheodesist, 1/3, 92-93. Moskva (1933). **a - 1086**

Description du modèle qui permet d'utiliser des feuilles de papier à rouleau et d'économiser le temps dans l'exécution des tracés.

**Maranca Francesco** - La quota di volo nei rilevamenti aerofotogrammetrici e l'uso delle camere doppie [*De altitudine volatus pro photogrammetricis adumbrationibus deque utenda duplici camera*]. 1 fig. (Nota). Universo, 3, 243-246. Firenze (1935). **a - 1087**

**Mathieson John** - The Story of Arctic Voyages and Explorations. With Bathyorographical Chart of the North Polar Basin, by John Bartholomew [*Historia navigationum et explorationum arcticarum, cum tabula bathyorographica bacini polaris septentrionalis ad Johannem* Bartholomew *pertinente*]. Scott. Geogr. Mag., L, 5, 281-308. Edinburgh (1934). **a - 1088**

Summary of the most important voyages in the Arctic, completed by a bathyorographical Chart of the North Polar Basin on the scale 1 : 14.000.000, which represents a very valuable contribution to the cartography of the polar region and contains the most recent discoveries made in the North.

**Mikhno V.** - Sur la question de l'emploi des garnitures Bulldog dans la construction des signes trigonométriques [*De utendis coniunctionibus* Bulldog *in signis trigonometricis construendis*]. 11 fig., Gheodesist, 3/4, 27-33. Moskva (1933). **a - 1089**

Description des garnitures Bulldog de forme ovale, carrée et ronde, employées pour la jonction des différentes parties des constructions, surtout des constructions en bois, et les avantages que représente leur emploi, surtout en ce qui concerne les constructions trigonométriques. Quelques exemples d'emploi des Bulldog en Allemagne.

**Morgan H. R.** - Effect of Moon's Position on Observed Clock–Corrections [*De lunae positione eiusque effectu in correctiones horologio ferendas*]. 1 table, Nat. Res. Counc, Trans., Amer. Geoph. Union, 15th Ann. Meet., Part I, 46-48. Washington D. C. (1934). **a - 1090**

Possible detection of the influence of the Moon on observed clock-corrections examined by tabulating, according to hour-angle and declination of the Moon, the differences of two definitive clock-corrections, taken on the average of eight hours apart on the same night. The observations, whose results are reported here were taken on the 9-inch transit circle at the United States Naval Observatory on 1,535 nights in the interval 1903-1921.

**Morgan H. R.** - Results of Observations with the nine–inch Transit Circle 1913-1926 [*De resultatibus ex observationibus, cannoculario transitus registrante, novem pollicium longitudine peractis A. 1913-1926*]. U. S. Nav. Observ., II Ser., XIII. Washington D. C. (1933). **a - 1091**

Observations of the sun, moon and planets. Catalogue of 9,989 standard and intermediary stars. Miscellaneous stars.

**Nakano Saburo** - The Longitude and the Latitude of Losap [*De longitudine atque latitudine in insula* Losap]. (In Jap.). Astron. Obs. Rep., II,

129-152; Mem. Astron. Soc. Japan, III, 143-166. Tokyo (1934). **a - 1092**

For the purpose of observing the total solar eclipse of February 14th, 1934, a party of the Tokyo Astronomical Observatory made an expedition to Losap Island of the East Caroline, where the author was engaged in the determination of the longitude and latitude of the observing station and also in the time keeping. The results of the determination are given. (Author).

**Nicolini T.** - Esempio di determinazione di latitudine (Trieste) col metodo del prof. Guarducci [*De latitudinis determinatione, Tergeste, per methodum prof.* Guarducci]. 1 fig., Mem. Soc. Astron. It., VIII, 2, 209-219. Milano (1934). **a - 1093**

Si dà una applicazione del metodo in parola alla latitudine di Trieste, per mezzo di osservazioni eseguite dal 19 al 30 luglio 1932, ed allo scopo di mostrare per disteso l'applicabilità e la convenienza di esso.

**Niederhausen E.** - Praktische Erfahrungen mit dem Funkpeiler. Eine Entgegnung [*De practicis experimentis, radioscandaliorum auxilio peractis. Responsio*]. Seewart, IV, 2, 76-78. Hamburg (1935). **a - 1094**

Vf. beweist, dass der Wert der Langstrahlpeilung häufig in der Schiffahrt unterschätzt wird, und erwähnt mehrere Fälle, in welchen diese Peilungen vom grössten Werte gewesen sind.

**Nistri Umberto** - Sui limiti della convenienza d'impiego dei metodi aerofotogrammetrici di rilievo [*De utendis rationibus aërophotogrammetricis in adumbrationibus peragendis.Quaestio de limitibus*]. Riv. Catasto Serv. Tecn. Erar., 2, 93-97. Roma (1934). **a - 1095**

L'A. esamina la convenienza d'impiego dei nuovi metodi di rilievi aerofotogrammetrici, mettendo in particolare evidenza l'importanza dei risultati tecnici ed economici che possono essere conseguiti mediante un'accorta integrazione di questi nuovi metodi con gli usuali procedimenti topografici, sopratutto per le levate a grande scala. A dimostrazione della tesi, l'A. descrive alcuni tipi speciali di rilievo.

**Nistri U.** - Il fotocartografo multiplo Nistri per le levate a piccola scala [*De photocartographo multiplici* Nistri *in adumbrationibus exigua schala peragendis*]. 4 ill., Riv. Catasto e Serv. Tecn. Erar. II, 2, 138-147. Roma (1935). **a - 1096**

L'A. descrive un suo nuovo apparecchio di restituzione aerofotogrammetrica, derivato sempre dal Fotocartografo, per le carte a piccola scala e per rilievi speditivi. Dopo averne messo in evidenza alcune caratteristiche, espone il procedimento col quale si potrà eseguire una triangolazione aerea a tre dimensioni per zone inaccessibili. Argomentando sull'impiego di camere multiple o accoppiate, esprime la sua convinzione che il problema delle possibilità economiche per alcuni tipi di carte a piccola scala debba trovarsi nel potenziamento della terza dimensione e cioè nella conquista dell'alta quota.

**Noumerov V.** - Calcul des coordonnées Gauss-Krüger [*Ordinatarum* Gauss–Krüger *calculus*]. (En russe). 9 tabl., Gheodesist, 3/4, 33-43. Moskva (1933). **a - 1097**

Commentaire aux 9 tableaux publiés par l'Institut Astronomique de Léningrad pour le calcul des coordonnées géographiques et rectangulaires de Gauss-Krüger pour les latitudes de 36° à 72° avec une précision jusqu'à 0,1 mètre et 0'',01, dont l'application est prévue exclusivement dans les travaux avec l'emploi de l'arithmomètre. Les formules qui constituent la base du problème direct, et précisément du calcul des coordonnées rectangulaires en partant des coordonnées géographiques, sont empruntées au cours de Jordan-Eggert, « Handbuch der Vermessungskunde », III. Band, 1923.

**Numerov V.** - General Formulae for the Development of Perturbing Forces in the Calculation of Absolute Perturbations in Polar Coordinates [*Agitur de perturbationibus absolutis in coordinatis polaribus calculandis. Formulae generales ad virium perturbatricium progressiones calculandas*]. (In Russ. Engl. Summ.). 1 table, C. R. Acad. Sc. U. R. S. S., I, 7/8, 452-457. Léningrad (1935). **a - 1098**

This paper gives the general formulae for the calculation of perturbing forces R, T, and Z by four arguments. The main feature of this work is an attempt to give general formulae for the perturbing forces without resorting to the usual interpolation methods of the development of the perturbing forces into Fourier series by two arguments.

**Ogilvie Noel J.** - The Coast–Line and Islands of Hudson–Bay. An Ideal Field for Geodetic Astronomical Work [*De linea litorea deque insulis in baja* Hudson *nomine ac optimo campo ad opera peragenda geodetico–astronomica*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 41-45. Washington D. C. (1934). **a - 1099**

After a few introductory remarks concerned with the history of the discovery and exploration of Hudson Bay a brief account is given of a considerable precise astronomical work, on the western coast, in connection with the establishment of Interprovincial boundary-terminals and the charting of the coastal waters adjacent to the new port of Churchill, carried on in recent years by the Geodetic Survey of Canada, Department of the Interior.

**Pasini Claudio** - Trattato di Topografia [*Tractatus de topographia*]. 241 fig., Sesta Edizione, viii + 624, Coop. Tip. Mareggiani. Nicola Zanichelli Edit. Bologna (1934). **a - 1100**

L'A. avverte che, in questa sesta edizione, ha soppresso qualche parte che gli parve ingombrante in un trattato che riveste un carattere essenzialmente pratico, aggiungendo, invece, alcune notizie sui più interessanti strumenti che, in questi ultimi anni, andarono ad arricchire il materiale topografico.

**Patton R. S.** - Coast and Geodetic Survey. Its Work in Surveying and Charting the Waters of the United States and Possession, Geodetic Control Survey, and Other Activities [*De instituto* Coast and Geodetic Survey. *Agitur de operibus topographicis et cartographicis peractis in aquis ad Americae Status foederatos pertinentibus atque etiam in regionibus in dicione Americanorum. Agitur etiam de adumbrationibus geodesicis ceterisque activitatibus*]. 2 figs., U. S. Dpt. Comm., How It Serves You etc.. 17-24. Washington D. C. (1934). **a - 1101**

History of Bureau growth. Geodetic surveys. Hydrographic and topographic surveys. Tide and current surveys. Magnetic surveys. Office compilation. Earthquake safeguards. Maps for the aviator. Information valuable for other purposes.

**Pazeljskij N.** - Obtention du tracé d'un plan sur la base de photographies aériennes non-transformées (En ordre de discussion) [*De adumbratione per aërophotographias non transformatas obtenta*]. (En russe). 1 fig. Gheodesist, 3/4, 103-104. Moskva (1933). **a - 1102**

Quelques commentaires et observations critiques à propos du volume de l'ing. N. N. Veselovskij. Elaboration de plans et de cartes sur la base de photographies aériennes non-transformées qui contient beaucoup d'indications utiles toutefois et qui surtout trace de nouvelles lignes directrices en ce qui concerne l'utilisation, dans la topographie et dans la cartographie, des résultats de levés aériens.

**Petrenko A.** - Nuovo sistema di formule tacheometriche precise [*Ratio nova formularum tacheometricarum exactarum*]. (In russo). 2 fig. Gheodesist, 1/2, 82-87. Moskva (1933). **a - 1103**

Sviluppo puramente matematico di formule adatte alla topografia ed atte all'eliminazione o alla diminuzione di errori, quando il lavoro sia convenientemente preparato.

**Petrenko A.** - Une nouvelle méthode d'élaboration de tableaux tachéométriques [*Ratio nova ad tabulas tacheometricas elaborandas*]. (En russe). 1 fig., 4 tabl. Gheodesist, 5/6, 30-37. Moskva (1933). **a - 1104**

Description et illustration de la théorie fondamentale, de l'élaboration et de l'emploi de tableaux tachéométriques nouveaux, proposés par M. Ganjchine, qui permettent de déterminer les différences de niveaux plus rapidement, plus facilement et avec plus d'exactitude que lorsque l'on emploie les tableaux existants, surtout dans le cas d'angles non supérieurs à 10°.

**Petroni Antonio** - Idrofoni. Scandagli acustici e ultrasonori (Continuazione) [*De hydrophonis, scandaliis acusticis et ultrasonoris*]. 12 fig., Riv. Maritt., suppl. tecn. al fasc. 7-8, 15-32. Roma (1934). **a - 1105**

Premesse brevi note sui vantaggi degli scandagli acustici ed ultrasonori rispetto a quelli di carattere puramente meccanico, l'A. esamina i metodi su cui sono basati tali scandagli, metodi che attualmente possono ridursi a due: quello a misura d'angolo e quello a misura di tempo. Svolge infine alcune considerazioni sulla scelta della frequenza degli scandagli a tempo d'eco e sulla velocità di propagazione del suono in mare.

**Piazzolla Beloch M.** - Elementi di fotogrammetria terrestre ed aerea. [*De photogrammetria terrestri et aëria*]. 1 fig., 9 tav., f. t. iv -- 87 pp. Officine Grafiche della «Cedam», Casa Editrice Dott. Antonio Milani «Cedam». Padova (1934). **a - 1106**

Il volumetto ha un indirizzo prevalentemente didattico, con carattere esclusivamente geometrico. Nella prima parte, che tratta dei *fondamentali teorici* e della *fotogrammetria terrestre*, l'A. riassume la consueta teoria. Nella seconda parte, che tratta della *fotogrammetria aerea*, ha cercato di riassumere gli indirizzi più importanti, risolvendo in modo nuovo il problema di determinare il punto di presa dati due punti e una direzione. Nell'*Appendice* ha ricordato alcune costruzioni di Geometria proiettiva più spesso adoperate nel testo, modificandone qualcuna delle consuete, per renderne più facile l'applicazione pratica.

**Pinke F.** - Depth Determination [*Determinatio profunditatum*]. Wetensch. Uitk. Onderz. Snellius-Exp., 1929-1930. II, Oceanography, Part 2, Chapt. I, Kemink en Zoon N. V. Utrecht (1935). **a - 1107**

Different soundings, apparatuses and corrections. Velocity of sound. Influence of currents on wire soundings. Influence of the slope of the bottom. Precision of deep-sea charts.

**Rappleye H. S.** - Leveling in Florida [*De livellationibus in* Florida]. 4 ills., U. S. Dpt. Comm. Coast & Geod. Surv. Spec. Publ. 185, 1-105. Washington D. C. (1934). **a - 1108**

General statement. Instruments and field methods. Computations and adjustments. Bench marks. Cooperation in the preservation of bench marks. Rail elevations. Descriptions and elevations of bench marks. This publication contains the description and elevations of bench marks in the State of Florida, the elevations of which have been determined by first-order leveling executed by the Coast and Geodetic Survey. Approximately 2,050 miles of first-order leveling have been run within the limits of this State.

**Reynolds W. F.** - Manual of Triangulation Computation and Adjustment [*Calculi et correctiones triangulationum. Liber manualis*]. 72 ills. num. tabl. Dpt. Comm., U. S. Coast & Geod,. Surv. Spec. Publ. 138, ii - vi, 1-242. U. S. Govmt. Print. Off. Washington D. C. (1934). **a - 1109**

1. Preliminary computations. 2. Adjustment of a quadrilateral. 3. Adjustment of a net of triangulation by the direction method. 4. Adjustment of a net of triangulation by the angle method. 5. Computation and adjustment of elevations from zenith-distance observations. 6. Special problems connected with the computation of triangulation. 7. General rules and suggestions. 8. Constants, formulas, and tables.

**Richard J.** - La bouteille Richard (petit et grand modèle) [*De buticula* Richard (*modulus parvus et magnus*)]. 1 fig. h. t. Result. Camp. Scient. accomplies par Albert I, Prince Souverain de Monaco. Fasc. LXXXIX, 351-352. Monaco (1934). **a - 1110**

La bouteille connue sous ce nom qui lui a été donné par S. A. S. le Prince Albert I<sup>er</sup> a été décrite en 1902, 1907, 1910. Elle est employée à bord du yacht du Prince depuis 1902. Le grand modèle est décrit ici pour la première fois.

**Richard J.** - Sur trois nouveaux messagers destinés aux opérations océanographiques [*De mandatariis* (*id est apparatibus qui gallice dicuntur* messagers) *ad opera oceanographica peragenda. Agitur de novis typis tribus*]. 3 fig. h. t. Result. Camp. Scient. accomplies par Albert I, Prince Souverain de Monaco. Fasc. LXXXIX, 352-353. Monaco (1934). **a - 1111**

Il s'agit de modèles qui présentent quelques simplifications sur les messagers (destinés à provoquer à un moment donné et à une profondité déterminée le fonctionnement de divers appareils d'océanographie) connus jusqu'à présent.

**Rosenbaum L.** - Determinations of Latitude and Longitude (The Swedish-Norwegian Arctic Expedition 1921) [*De latitudinis et longitudinis determinationibus* (*Navigatio ad regiones arcticas a Suetiis et Norvegis suscepta A. 1931*)]. Formulas and tabl. Geogr. Ann., XV, 1, 25-45. Stockholm (1933). **a - 1112**

The points determined, instruments and publications used, methods of observation and calculation.

**Rothery E. A.** - The Range Finder in Topographical Surveying [*De telemetro pro topographicis operibus*]. Emp. Surv. Rev. July, 400-403. London (1934). **a - 1113**

**Rozhkov V.** - Dispositif pour le dessin topographique [*Apparatus ad topographicas delineationes perficiendas*]. (En russe). 6 fig., Gheodesist, 11/12, 68-71. Moskva (1933). **a - 1114**

Description d'un dispositif composé d'un carré et d'une règle pour l'exécution des dessins topographiques qui peut remplacer 1) la règle proportionnelle, le dispositif de Vernitzkij, la règle à échelle, 2) permet de régler l'angle d'inclination de la calligraphie topographique, et 3) rend mécanique la reproduction des différents symboles topographiques.

**Rude Gilbert T.** - Les progrès récents des levés hydrographiques [*De recentioribus progressibus in adumbrationibus hydrographicis peragendis*]. Rev. Hydrogr., XII, 1, 123-128. Monaco, Princ. (1935). **a - 1115**

Extrait du Report of the Fifth Pac. Sc. Congr. Vancouver (1933).

**Ruggiero Placido** - Importanza e sviluppo della fotogrammetria [*De photogrammetria. Quaestio de eius momento et progressibus*]. Ann. R. Ist. Sup. Nav., 3º, 2, 119-153. Napoli (1934). **a - 1116**

Rapida rivista di quanto s'è fatto a riguardo della fotogrammetria, nel mondo intero. Vasto elenco bibliografico.

**Rusinov I.** - Fondements d'un projet de rationalisation de la production topographique-géodésique et cartographique [*Fundamenta cujusdam rationis ad res topographicas, geodesicas et cartographicas unificandas*]. (En russe). Gheodesist, 3/4, 1-6. Moskva (1933). **a - 1117**

L'A. résume et décrit brièvement les principaux moments du processus de rationalisation qu'il voudrait voir appliquer à la production topographique, géodésique et cartographique de l'Union des Soviets.

**Safonov S.** - Les problèmes actuels de l'Institut Central de Recherche Scientifique pour la Géodésie, les levés aériens et la cartographie [*De hodiernis problematis ab Instituto Centrali Investigationum Scientificarum persolvendis quoad geodesiam, aërioadumbrationes et cartographiam*]. Gheodesist, 7/8, 7-9. Moskva (1933). **a - 1118**

Quelques considérations sur la nécessité de l'unification de la recherche scientifique dans le domaine de la géodésie, des levés aériens et de la cartographie exécutés dans l'URSS qui devraient être toujours faits sous les auspices et le contrôle de l'Institut Central.

**Salistschev K.** - Travaux géodésiques de l'Institut Arctique en 1934 [*De operibus geodesicis ab Instituto Arctico peractis A. 1934*]. (En russe). Bull. Arct. Inst., 5, 225-226. Leningrad (1934). **a - 1119**

Programme des travaux prévus pour l'année 1934 qui doivent avoir pour but de fournir des levés cartographiques aux expéditions soviétiques et de contribuer à la réunion de matériaux pour l'élaboration des cartes des territoires situés le long de la Voie Navigable du Nord.

**Schaffernak Friedrich** - Hydrographie [*De Hydrographia*]. ix — 438 S., J. Springer, Wien & Berlin (1935). **a - 1120**

**Schulz B.** - Die hydrographischen Arbeiten der Deutschen wissenschaftlichen Kommission für Meeresforschung [*De operibus hydrographicis peractis a Germanica Commissione pro Maris exploratione*]. Ber. dtsch. Wiss. Komm. Meeresf., N. F., VII, 196-212. Leipzig (1934). **a - 1121**

**Schumacher Arnold** - Kippthermometertafeln neuberechnet auf Grund der Formeln von W. Hansen [*Tabulae pro thermometris reversibilibus denuo calculatae ex formulis a* W. Hansen *perfectis*]. 4 Tabellentaf., Ann. d. Hydrogr. LXIII, 6, 237-239. Berlin (1935). **a - 1122**

Neuberechnung von Hilfstafeln, für welche aus mathematischen Erwägungen die Näherungsformeln von W. Hansen zugrundegelegt worden sind. Es wurden für das druckgeschützte Thermometer und für das Thermometer mit offenem Schutzrohr Tabellen auf drei Dezimalstellen und auf zwei abgekürzte Dezimalstellen berechnet.

**Simpson A. E.** - Mapping from Aerial Photographs – Etablissement des cartes topographiques d'après les photographies aériennes [*Tabularum topographicarum elaboratio ex photographiis aëriis*]. (In Engl. & French). Rev. Aéronaut. Int., 12. Paris (1934). **a - 1123**

L'A. donne de précieuses indications concernant l'utilisation des photographies aériennes en cartographie. Il expose toute la technique de l'établissement des cartes, d'après ces photographies et indique les précautions qui doivent être prises par le pilote au cours du vol en vue d'obtenir des photographies exactes, ainsi que le tracé des courbes de niveau par les procédés stéréoscopiques.

**Skijar I** - Mécanisation des travaux topographiques [*Operum topographicorum mechanisatio*]. (En russe). 6 fig., 1 tabl. Gheodesist, 5/6, 1-7. Moskva (1933). **a - 1124**

Description d'un cas d'application de la méthode tachymétrique pour l'exécution de levés topographiques ainsi que de l'emploi d'un niveau automatique, avec lequel on obtient des résultats tout aussi exactes qu'avec les instruments non automatiques.

**Smirnov K.** - Théodolites répétiteurs de O. Fennel avec des microscopes–micromètres [*Theodolites repetitores ad* O. Fennel *pertinentes, microscopiis praediti micrometricis*]. (En russe). 10 fig. Gheodesist, 1/2, 17-21. Moskva (1933). **a - 1125**

Description de la dernière création de la maison O. Fennel qui représente un microscope-micromètre dont la construction ressemble beaucoup à celle des appareils similaires construits dans le passé, mais qui, grâce à quelques nouveaux détails de structure, permet d'exécuter les observations plus rapidement et surtout avec beaucoup plus d'exactitude.

**Smirnov K.** - Le nouveau théodolite automatique de la maison Georg Butenschon [*Theodolitis novus automaticus ad societatem* G. Butenschon *pertinens*]. (En russe). 5 fig. Gheodesist, 9/10, 19-21. Moskva (1933). **a - 1126**

Description d'un nouveau type de théodolite qui a le même diagramme de l'instrument Hammer-Fennel, avec la différence qu'il est disposé directement dans le plan du réseau des fils du tube, ce qui permet d'éviter la réfraction des rayons lumineux que l'on observe dans le tachéomètre de Hammer-Fennel. La caractéristique particulière du nouvel instrument est que, tout en étant un théodolite-tachéomètre à répétition, il peut être transformé d'un seul mouvement de main en un tachéomètre automatique. Le mécanisme automatique de Butenschon peut être appliqué à chaque type de théodolite existant.

**Solaini L.** - Il problema del vertice di piramide [*De pyramidis problemate quoad verticem*]. 6 ill., Riv. del Catasto e dei Serv. Tecn. Erar. II, 1, 31-46. Roma (1935). **a - 1127**

Vengono esaminati i principali procedimenti analitici e grafici per la risoluzione del problema del vertice di piramide. Si espongono le soluzioni rigorose, grafiche, di successive approssimazioni, sia del problema del semplice vertice di piramide nel caso generale, e in quello degenere, sia del problema della doppia intersezione, costituendo il problema fondamentale della aerofotogrammetria.

**Soule Floyd M.** - Sounding Velocities in the Pacific [*De scandaliorum velocitate in Oceano Pacifico*]. 17 figs., Proc. 5th Pacif. Sc. Congr,. 873-886. Batavia–Bandoeng (1934). **a - 1128**

This paper is based upon the oceanographic data collected on the last cruise of the non-magnetic vessel « Carnegie » which operated in the Pacific from October, 1928, to November, 1929, and is concerned with the computation of sounding velocities, their variations, and their vertical distribution as observed on the various stations of the « Carnegie », and which at any point are a function of the temperature, salinity, and pressure at the given point.

**Sutherland O. P.** - First-Order Triangulation and Traverse in Louisiana (1927 Datum) [*Triangulatio primi gradus et triangulatio transversalis in* Louisiana. *A. 1927*]. 15 figs., U. S. Dpt. Comm. Coast & Geod. Surv., Spec. Publ. 183, 1-169. Washington D. C. (1934). **a - 1129**

This volume contains the results of all first-order triangulation and traverse in Louisiana that has been executed by the Coast and Geodetic Survey. Data for the subsidiary and intersection stations along the various first-order arcs are also contained. All available descriptions of the triangulation stations are included. This volume is one of a series of publication each of which will contain the geographic position on the new datum of 1927 and the descriptions and other data for all first-order triangulation of a State or occasionally of two States.

**Terada Torahiko** - On a Regularity in Topographical Features of North-East Japan [*De formis topographicis in regione Nord-orientali Japoniae earumque regularitate*]. 2 figs., Proc. Imp. Acad., X, 2, 65-68. Tokyo (1934). **a - 1130**

Recently, connected with the study of river basins in NE-Japan, the Author was led to investigate some structural regularity which seems to prevail in the same district. The method adopted is clearly illustrated.

**Tinoco J. & Carrasco R.** - Operaciones de longitudes [*De longitudine*]. Bol. diario Serv. Meteorol. Nac. I, 21/22. Madrid (1934). **a - 1131**

**Trofimenko I.** - Méthode combinée pour la détermination de la latitude du point [*Methodus combinata ad puncti latitudinem determinandam*]. (En russe). 2 tabl., Gheodesist, 5/6, 42-45. Moskva (1933). **a - 1132**

Illustration d'une méthode pour la détermination de la latitude qui représente une tentative de rationalisation de la dite détermination et qui s'inspire aux principes de base de deux méthodes bien connues, et précisément de la méthode de Talcott (le cas d'observation sur des fils constants) et de la méthode de la mesure des distances zénithales à la même position du cercle.

**Tucci M.** - La IV Esposizione internazionale di fotogrammetria [*Expositio IV^a^ internationalis photogrammetrica*]. Riv. del Catasto e dei Serv. Tecn. Erar., II, 147-151. Roma (1935). **a - 1133**

Cenno sugli strumenti e sulle applicazioni varie della fotogrammetria nel quadro della IV Esposizione Internazionale di Parigi.

**Vanssay (De) De Blavous** - Emploi de l'aviation pour les levés [*De utenda aëronavigatione ad topographicas adumbrationes redigendas*]. 4 fig., Rev. Hydrogr., XII, 1, 14-19. Monaco, Princ. (1935). **a - 1134**

Méthode par la comparaison des longueurs des côtés. Clichés conjugués - Comparaison des angles - Comparaison des longueurs.

**Virovetz A.** - Evaluation de la précision d'une section de triangulation de 1-ère classe [*Agitur de sectione cuiusdam triangulationis primae classis eiusque exacta aestimatione*]. (En russe). 4 fig., tabl., Gheodesist, 11/12, 72-78. Moskva (1933). **a - 1135**

Exposé d'une méthode de vérification qui permet de calculer une partie de la série de 1-ère classe, d'en évaluer la précision, et, le cas échéant, d'en rectifier les erreurs.

**Weir J.** - Latitude Redetermination and Systematic Errors [*De latitudinis redeterminatione deque erroribus systematicis*]. Journ. Roy. Astron. Soc. Canada, XXVIII, 347-356. Toronto (1934). **a - 1136**

An extensive series of observations with the zenith telescope carried out by author and a number of students in order to examine sources of systematic errors. The individual error and tests applied to differences between one observer and another. Separate discussion of several sources of error.

**West Richard** - The Beginning of the Coast Survey [*De instituto* Coast Survey *deque initio eius operum*]. 3 figs. U. S. Nav. Inst. Proc., LXI, 387, 665-670. Annapolis (1935). **a - 1137**

Brief outline of the early history of the U. S. Navy's greatest peacetime service, the U. S. Coast Survey, which has been founded in 1835, with especial regard to Professor Hassler's activity, as first Superintendant of the Survey.

**Wirtz C.** - Tafel der Weglängen in der homogenen Atmosphäre nach Argument wahre Zenitdistanz [*Tabula cursuum per atmosphaeram homogeneam*]. 1 Taf. Ann. d. Hydrogr., LXIII, 6, 240-241. Berlin (1935). **a - 1138**

1. Bemporads Extinktionstheorie. 2. Umrechnung der Extinktionstafel auf wahre ZD. Tabelle der Weglängen.

**Wyatt A. G. N.** - Surveying Cruises of H. M. S. « Challenger » off the Coast of Labrador in 1932 and 1933 [*De navigatione longe a litoribus Labradoricis, A. 1932 et 1933 regia navi* « Challenger » *peracta ad redigendas adumbrationes topographicas*]. 1 map, 2 photos, Geogr. Journ., LXXXIV, 1, 22-53. London (1934). **a - 1139**

Account of the survey of Labrador's coast between Indian Harbour and Cape Chidley on a scale of 1/75.000, made between June 24th and October 5th, 1932: meteorological and ice conditions during the cruise; life on board of the « Challenger »; description of some important or beautiful spots visited; results of the oceanographic observations carried out during the cruise. Description of the work performed, observations made and results obtained during the second survey cruise of the « Challenger » from July 22nd to November 10th, 1933.

**Zebnitzkij V.** - Fondement pour une tachymétrie de haute précision [*Fundamenta pro tachymetria maximae praecisionis*]. (En russe). 6 fig., Gheodesist, 3/4, 94-98. Moskva (1933). **a - 1140**

Résumé et illustration des idées d'Albert Koenig (sur les raisons et les causes des erreurs angulaires personnelles) qui a été le premier à poser les fondements d'une tachymétrie de haute précision.

**Zvonov V.** - Sur le calcul des termes de rectification dans le calcul « non-logarithmique » de l'ordonnée Gauss-Krüger [*De calculandis notis pro emendatione in computatione non-logarithmica ordinatae* Gauss-Krüger]. (En russe). 2 tabl. Gheodesist, 3/4, 43-48. Moskva (1933). **a - 1141**

Description d'une méthode plus avantageuse, au point de vue de la difficulté et de la rapidité de l'exécution, du terme de rectification pour l'ordonnée de Gauss-Krüger, en comparaison avec les méthodes de calcul existantes.

**Bureau Hydrographique International** - Publications. Distribution [*Publicationes. Distributio*]. (In Engl. & French). Bull. Hydr. Int., V, 88-91. Monaco, Princ. (1934). **a - 1142**

Informations concernant la proposition du Comité de Direction du Bureau Hydrographique International visant à une plus large publicité des publications du Bureau. Résumé des réponses reçues de 14 États-Membres du Bureau.

**Bureau Hydrographique International** - Survey of India. Geodetic Report 1933 [*Relatio geodetica officii cui est nomen* Survey of India]. (In Engl. & French). Bull. Hydr. Int., V, 92-93. Monaco, Princ. (1934). **a - 1143**

Résumé du contenu du rapport publié par le Survey of India de ses travaux pour la période d'Octobre 1932 à Septembre 1933.

**Bureau Hydrographique International** - Report of the Marine Department of the Chinese Maritime Customs 1933 [*Relatio sectionis maritimae pro Sinensibus portoriis maritimis, A. 1933*]. (In Engl. & French). Bull. Hydrogr. Int., V, 93. Monaco, Princ. (1934). **a - 1144**

Résumé du Rapport indiquant les activités de la Section Maritime dans les différents districts côtiers et dans le bas Yangtze–Kjang: détails sur l'hydrographie des ports et de leur aménagement; aperçu sur les levés exécutés; quelques détails sur le port de Changhai; liste statistique des épaves et autres accidents.

**Bureau Hydrographique International** - Navires Hydrographes [*Naves hydrographicae*]. 2 pl. avec 4 phot. Rev. Hydrogr. XI, 2, 16-17. Monaco (1934). **a - 1145**

Quelques données sur l'« Hydrograf » et le « Röst » Norvégiens, le « Moresby » Australien, et le « Nautilus » Hellénique.

**Bureau Hydrographique International** - Sondage par le son — XIII [*De scandaliis per sonum — XIII*]. Rev. Hydrogr., XI, 2, 25-64. Monaco (1934). **a - 1146**

Résumé des perfectionnements les plus récents apportés aux appareils d'après les informations fournies par les constructeurs au Bureau. Dans ce résumé les compilateurs ne reviennent pas sur les principes généraux des appareils qui ont déjà été décrits dans la Revue et ils se bornent à signaler les modifications de détail ou les modifications de composition dans les ensembles.

**Commissione di Toponomastica** - Istruzioni per la raccolta del materiale toponomastico italiano [*Praecepta ad res toponomasticas Italicas colligendas*]. Consiglio Nazionale delle Ricerche. Comitato Nazionale per la Geografia, 15 pp., Tip. dell'Ist. Geografico Militare. Firenze (1935). **a - 1147**

Le presenti « Istruzioni » specificano il metodo di attuazione della Raccolta toponomastica, indicando tutte le esigenze a cui si deve ottemperare per raggiungere i fini proposti alla ricerca.

**Deutsche Gesellschaft für Photogrammetrie** - Mehrsprachiges Wörterbuch für Photogrammetrie [*Lexicon photogrammetricum plurilingue*]. 136, Allg. Vermessungs–Nachr. H. Wickmann. Bad–Liebenwerda, Sachs. (1934). **a - 1148**

**Hydrographic Department of the British Admiralty** - General Instructions for the Hydrographic Surveyors of the Admiralty [*Praecepta generalia ad usum vigilatorum hydrographorum ad classis praefecturam pertinentium*]. 10 pl, 122 pp. 7th Ed. H. M. Stationery Office. London (1933). **a - 1149**

**Hydrographic Department of the British Admiralty** - List of Oceanic Depths Received at the Admiralty During the Year 1934 [*Index profunditatum oceani a classis praefectura receptus, A. 1934*]. Tables. Publ. H. D., 322, 1-19 Admiralty. London (1935). **a - 1150**

North Atlantic - East of 20° W; id. 20° W to 50° W; id. West of 50° W. South Atlantic - West Long. South Atlantic - East Long. Mediterranean. Red Sea. North Indian Ocean. South Indian Ocean. North Pacific East Long. North Pacific West Long. South Pacific East Long. South Pacific West Long. South Ocean - West Long. South Ocean - East Long.

**Hydrographic Department, Tokyo** (1933-34 & 1934-35). [*Tabulae hydrographicae*]. 14 Charts based on original data of the Hydrographic Department of the Japanese Navy. – 7 Charts based on data derived from foreign sources. **a - 1151**

**Hydrographic Office Siam** - Rapports sur les travaux exécutés et projetés [*Opera hydrographica perfecta et perficienda* a. 1934]. Bangkok (1934). **a - 1152**

Travaux exécutés au Siam: A) Levés faits au cours de la période: d'avril 1933 à mars 1934: 1) Levés côtiers; B) Cartes ou Diagrammes publiés en 1933–34: 2) Nouvelle édition des cartes existantes; C) Ouvrages ou publications édités en 1933–34. Travaux projetés: *a*) Levés projetés au cours de la période: d'avril 1934 à mars 1935; *b*) Cartes ou Diagrammes en préparation; *c*) Ouvrages ou publications en préparation.

**Hydrographic Service** - [*Tabulae hydrographicae*]. Bangkok Harbour. I: 10.000. Bangkok (1934-35). **a - 1153**

**Hydrographic Service** - Suiro Yohô (Hydrographic Bulletin) [*Bulletinus hydrographicus*]. Tokyo (1934-35). **a - 1154**

**U. R. S. S. Superior Geodetic Survey** - Working Ephemerides of 500 Pairs of Stars for the Determination of Time by the Method of Corresponding Altitudes (Zinger's Method) [*Ephemerides pro D stellis paribus ad tempus calculandum*]. xxii + 245, x + 251, x + 245, x + 271, 4, Vols. Goskartogeodesia. Leningrad -- Moskva (1932). **a - 1155**

**U. S. Coast & Geodetic Survey** - Field Engineers Bulletin n. 7 – June 1934 – Bulletin des Field Engineers n. 7 – Juin 1934 [*Bulletinus* Field Engineers, *N.* $7^{us}$]. (In Engl. & French). Bull. Hydr. Int., V, 93-94. Monaco, Princ. (1934). **a - 1156**

Extrait de la table de matière du Bulletin contenant la liste des articles particulièrement intéressants au point de vue hydrographique.

**U. S. Department of Commerce. Coast & Geodetic Survey** - Formulas and Tables for the Computation of Geodetic Position. Seventh Edition [*Formulae et tabulae ad geodeticam positionem calculandam. Editio* $VII^{a}$]. 4 figs., 5 tables. Spec. Publ. 8, 4-101. U. S. Govmt. Print. Off. Washington D. C. (1933). **a - 1157**

Introductory remarks. Solution of triangles. Spherical excess. Number of decimal places in angles and lengths. Computation of differences of latitude, longitude, and azimuth. Examples of computation: Computation of triangles, first-order position computation, third-order position computation, inverse position computation, inverse solution, table of arc-sin corrections for inverse position computation. Tables. Appendix: Historical data and development of formulas. Dimensions of the spheroid. Formulas and factors for the computation of geodetic latitudes, longitudes, and azimuths. Development of formula for spherical excess. International ellipsoid.

**U. S. Department of Commerce. Coast & Geodetic Survey** - Logarithms of Numbers to Eight Places [*Numerorum octodecimalium logarithmi*]. 180 tables. U. S. Govmt. Print. Off. Washington D. C. (1934). **a - 1158**

**U. S. Department of Commerce. Coast and Geodetic Survey** - Table of S and T Values to Ten Places [*Valorum decadecimalium pro* T *et* S *tabulae*]. Table, 45 pp., U. S. Govmt. Print. Off. Washington (1934). **a - 1159**

**An.** - Travaux de l'Institut Central de Recherche Scientifique pour la Géodésie, les levés aériens et la cartographie, accomplis au cours de la réalisation du Premier Plan Quinquennal Soviétique [*De operibus peractis ab Instituto Centrali Investigationum Scientificarum pro Geodesiam, aërioadumbrationibus et cartographia, prima quinquennali ratione Sovietica perdurante*]. (En russe). Gheodesist, 7/8, 10-13. Moskva (1933). **a - 1160**

Liste des travaux dans le domaine de: A. La construction d'instruments: I. Géodésiques. II. Aérophotogéodésiques. B. L'élaboration des instructions pour l'exécution des travaux topographiques et géodésiques. C. Travaux scientifiques dans le domaine de la géodésie. D. Travaux scientifiques cartographiques. III. Rédaction scientifique des cartes, élaboration du programme et de méthodes cartographiques. E. Travaux dans le domaine de la standardisation. F. Travaux pour l'élaboration des projets d'instruments: I. Géodésiques. II. Aérophotogéodésiques.

**An.** - Hydrographic Office – Denmark. – Service Hydrographique – Danemark [*Servitium hydrographicum – Dania*]. Int. Hydr. Bull., VI, 102, Monaco, Princ. (1934). **a - 1161**

Summary of a booklet published with the title Det Kongelige Danske Søkort-arkiv 1784, 22 Oktober 1934, retracing the history of the Danish Hydrographic Office.

**An.** - Oceanographical Work Carried Out – Travaux Océanographiques [*De operibus oceanographicis peractis*]. (In Engl. & French). Int. Hydr. Bull., VI, 102. Monaco, Princ. (1934). **a - 1162**

Brief account on hand of an article by Rear Admiral W. R. Gherardi on « The Hydrographic Activities of the Hydrographic Office and the United States Navy during April 1933 to April 1934 » published in the « Transactions of the American Geophysical Union ».

**An.** - Woods Hole Oceanographic Institution. Annual Report 1933 – L'Institution Océanographique de Woods Hole. Rapport Annuel 1933 [*Institutum oceanographicum in* Woods Hole. *Relatio annua. A. 1933*]. (In Engl. & French). Int. Hydr. Bull., VI, 106-107. Monaco, Princ. (1934). **a - 1163**

To complete the data of an article concerning the organisation of and the various works undertaken by the Woods Hole Oceanographic Institution and published in « Hydrographic Review », XI, 1, p. 110, a few extracts are given from the Annual Report, 1933, published recently by this Institution.

**An.** - Shoal Fathometer. – U. S. A. – Fathomètre pour petits fonds – Etats Unis. [*Fathometron pro vadis demissis*]. (In Engl. & French). Int. Hydr. Bull., VI, 109. Monaco, Princ. (1934). **a - 1164**

Information on a shoal fathometer whose development has been recently completed by the research section of the U. S. Coast and Geodetic Survey.

**An.** - Hydrographic Surveys, East and West Coasts of the United States of America – Levés hydrographiques de côtes Est et Ouest des Etats–Unis d'Amérique [*De hydrographicis adumbrationibus litorum orientalium et occidentalium Americae Statuum Foederatorum*]. (In Engl. & French). Int. Hydrogr. Bull., II, 28-29. Monaco, Princ. (1935). **a - 1165**

Account of the work of survey parties of the Coast and Geodetic Survey engaged in combined operations from Maine to the Florida Keys on the Atlantic coast and from Mobile to the Mexican border on the Gulf coast, of a new edition of the inland waterway charts from Norfolk to Key West, the offshore surveys on the Maryland and Virginia coast, along the California coast around the Santa Barbara Islands, and in the Aleutian Islands.

**An.** - Hydrographic Expedition Along the Coasts of Provence – Mission hydrographique des Côtes de Provence [*Navigatio hydrographiae causa ad litora Provincialia*]. (In Engl. & French). Int. Hydrogr. Bull., II, 31. Monaco, Princ. (1935). **a - 1166**

Information on a hydrographic expedition on board the tug « Bagaud » on which the sounding apparatus mentioned in « Int. Hydrogr. Bull. », III, 63, 1934, is used.

**An.** - Shoal. – North Atlantic Ocean. Ampère Bank – Haut–fond – Océan Atlantique Nord – Banc de l'Ampère [*Fundus peraltus. Oceanus Atlanticus septentrionalis. Banchus* Ampère]. (In Engl. & French). Int. Hydrogr. Bull., II, 33-34. Monaco, Princ. (1935). **a - 1167**

Extract from the « C. R. Ac. Sc. », 8th April, 1935, in which an account is given of the cruise of the French Cable-Ship « Ampère » made in order to ascertain the depth in the neighbourhood of the break of the telegraph cable from Brest to Casablanca, which had broken at a point about 275 miles W. N. W. of the latter port. The vessel found a very remarkable bank in Lat. 35°04′ N., Long. 12°54′ W. near the break of the cable.

**An.** - Velocity of Sound in Sea Water – Vitesse du son dans l'eau de mer [*De soni velocitate per aquam marinam*]. (In Engl. & French). 1 table, Int. Hydrogr. Bull., II, 36. Monaco, Princ. (1935). **a - 1168**

Brief account of a publication issued by the Netherlands Geodetic Commission (Rijkscommissie voor Graadmeting en Waterpassing) and representing the Volume II of the General Report on Gravity Measurements at Sea from 1923 to 1932 under the direction of Professor F. A. Vening Meinesz. The volume contains a remarkable bathymetric chart of the whole of the Netherlands East Indies Archipelago. In the present note a Table for the velocity of sound in Sea Water, used for the echo soundings made during the cruise, is reproduced.

**An.** - Geographical Positions – Positions géographiques [*Positiones geographicae*]. (In Engl. & French). Int. Hydrogr. Bull., II, 37. Monaco, Princ. (1935). **a - 1169**

Text of an Addition to Special Publication n° 24 of the I. H. B., Part I, April 1930, p. 54; representing Table II. Geodetic positions determined in connection with the hydrographic work carried out in the Colony of Mozambique, Portugal. (Extr. from « Aviso aos Navegantes », n° 2, 17th January 1935, Lisbon).

**An.** - Survey of Approaches of Fedhala Harbour – Levé des abords du Port de Fédhala [*Accessus ad portum* Fedhala. *Adumbratio hydrographica*]. (In Engl. & French). Int. Hydrogr. Bull., III, 31. Monaco, Princ. (1935). **a - 1170**

Brief account of a report recently issued by the Service Hydrographique of the French Navy, in the form of a pamphlet, extracted from the Annales Hydrographiques, 1934, on the 1934 hydrographic survey of the approaches of Fedhala Harbour, Morocco, by the French S/V « Beautemps-Beaupré ».

**An.** - Baffin Island Survey [*Adumbratio hydrographica Insulae* Baffin]. Nature, CXXXV, 3407, 261. London. **a - 1171**

Some interesting information respecting the operations of the Canadian Hydrographic Service during the fiscal year 1933–34, with special regard to a survey of the Baffin Island coast, of which a partial description is given.

**An.** - Soins à donner aux instruments [*De curis et diligentiis instrumentis praebendis*]. Rev. Hydrogr., XI, 2, 206-207. Monaco (1934). **a - 1172**

Notes extraites des instructions données par le Coast & Geodetic Survey au sujet des instruments de levé. Ces notes sont à leur tour extraites de The Military Engineer No 147, Mai–Juin 1934, p. 230, Washington.

**An.** - Entfernungsmessungen mit der Wildschen Invar – Basislatte [*De distantiae mensuris, reguli* Jnvar *auxilio peractis*]. Rev. d'Optique, Jan. 22-23. Paris (1934). **a - 1173**

**An.** - Eine neue Teilstrichenstellung an Feinnivellieren [*Dispositio nova ad livelli graduationes legendas*]. Ztschr. f. Vermessungswesen, Apr., 157-158. Berlin (1934). **a - 1174**

## Chartographia - Atlantes – Portulani.

**Adams Oscar S.** - General Theory of Polyconic Projections [*Theoria generalis proiectionum polyconicarum*]. 48 figs., 1 chart, tables. Dpt. Comm. U. S. Coast & Geod. Surv. Spec. Publ. 57, 2-174. U. S. Covmt. Print. Off., Washington D. C. (1934). **a - 1175**

Attempt to gather into one volume all the investigations that apply to the system of polyconic projections. After the determination of ellipsoidal expressions, the development of general formulas for the polyconic projections, and their classification, author treats the rectangular polyconic and the stereographic meridian projections, as well as the double circular projection. He then illustrates Nicolosi or globular projection, those of P. Fournier, the ordinary or American polyconic projections, the Tissot's indicatrix. In the last part of his work he gives tables of elements of the ordinary, or American, polyconic projection, illustrates the transverse polyconic projection and reproduces a projection for the international map on the scale of 1: 1.000.000, adding at the end tables for the projection of the sheets of the international map of the world.

**Adams O. S.** - Map Projections [*Proiectiones ad tabulas delineandas*]. Journ. Wash. Acad. Sc. XXIV, 5. Washington (1934). **a - 1176**

The A. describes a series of his own solutions of the problem of providing more accurate graticules of geodetic work.

**Ahlmann W: son Hans** - The Cartography of the Coast–Districts of North–East Land and its Environments (The Swedish–Norwegian Arctic Expedition 1921) [*De chartographia litorea ad Terram Nordorientalem* (East Land *in* Spitsbergen) *pertinente. Navigatio a Suetiis Norvegisque ad regiones arcticas peracta A. 1931*]. 10 figs, Geogr. Ann. XV, 1, 9 – 23. Stockholm (1933). **a - 1177**

History of the discovery and mapping of Spitsbergen from the end of the 16th century to present time. Appendices are added concerning the Russian and Norwegian whaling in these regions, and the map of North-East Land, by the Swedish-Norwegian Arctic Expedition, scale 1 : 750000. Pl. II.

**Almagià Roberto** - Il Planisfero di Arnoldo De Arnoldi (1600) [*De Planisphaerio ad Arnoldum* de Arnoldi (*1600*) *pertinens*]. (Pubblicazioni dell'Istituto di Geografia della R. Università di Roma). Serie B, n. 2, 13 pp., 1 cart. f. t. Roma (1934). **a - 1178**

La « Descrittione universale della Terra » è la prima delle carte fatte dell'Arnoldi a Siena e pubblicata nel 1060 da Matteo Florimi. Si accenna ai caratteri esteriori della carta, e la si mette in rapporto con altri due planisferi, di contenuto molto analogo e di identica proiezione (cilindrica quadrata): uno, forse il più antico, uscito dalle officine dei de Jode, ad Anversa, l'altro, di Pietro Plancio, edito ad Anversa nel 1592.

**Bernard Augustin & De Flotte De Roquevaire R.** - Atlas de l'Algérie et de Tunisie [*Atlas Algariae et regionis Tunetanae*]. Fasc. IX, X, XI, XII & XIII. Serv. Cartogr. Gouv. gén. Algérie, Emile Larose. (Paris (1929, 1932, 1933). **a - 1179**

**Cahill B. J. S.** - A World Map to end World Maps [*Orbis Tabula fundamentalis ad omnes mundi tabulas delineandas*]. 4 figs., Geogr. Ann., XVI, 2/3, 97-108. Stockholm (1934). **a - 1180**

Difficulties met with in an adequate mapping of the world. Principles to base the design on, first of all decentralization. Description of three variants within the decentralized octahedral frame (with figures). In an addendum follows a description of another sub-variant type of the orthomeric Butterfly map in which the five zones can be shown completely by replacements of *one* octant diagram.

**Camotius Joan Franciscus** - A Large World Map Dated 1569 Sold at the Sign of the Pyramid in Venice [*Magna orbis tabula A. 1569 in bibliopolio cuius nomen* « *Signum Pyramidis* » *Venetiis vendita*]. 12 sheets. Philadelphia (1933). **a - 1181**

Now in the George H. Beans Library. Reproduction in 12 sheets of the map of Camotius described by R. Almagià. Afterwards another copy of that map was discovered in the National Library of Madrid by Wider. See: Geogr. Journ. Suppl. 44. Nov. London (1933).

**Close C. F.** - A Double Equidistant Projection of the Sphere [*Agitur de quadam proiectione a sphaera dupliciter aequidistante*]. Geogr. Journ., LXXXIII, Febr., 144-145. London (1934). **a - 1182**

**Close Charles** - The « Carte du Monde au Millionième » [*Orbis Tabula milionesimo gradu*]. Geogr. Journ., LXXXIII, 4, 323-324. London (1934). **a - 1183**

Some information on the latest progress of the elaboration of the « Carte du Monde au Millionième »; the sheets lately published.

**Crinò Seb.** - Carte e piante inedite del secolo XVII riguardanti l'isola di Ceylon rinvenute nel Palazzo Pitti, nel Museo degli Strumenti antichi di Firenze e nel British Museum di Londra [*Tabulae et chartae ineditae sec. XVII insulae Ceylonensis in aedibus* Pitti, *in Museo Florentino instrumentorum veterum, in Londiniensi* British Museum *repertae*]. 4 carte, piante olandesi. La Bibliofilia, 1. Firenze (1934). **a - 1184**

**Deetz Ch. H. & Adams O. S.** - Elements of Map Projection with Application to Map and Chart Construction [*Proiectionis chartographicae elementa cum applicationibus ad tabulas elaborandas maritimas et terrestres*]. 79 figs., 10 pls., num. tables. U. S. Dpt. Comm. Coast & Geod. Surv. Sp. Publ. 68, 4th Ed., 1-200. Washington D. C. (1934). **a - 1185**

The first part of the book treats the theoretical side in a form that is as simple as the authors could make it; the second part attacks the subject of the practical construction of some of the most important projections. There is also added a résumé of the systems of map projection which are of special interest in problems of the present day.

**Fester Gustav** - Lamberts Projektion in Anwendung auf den 4., 5., 6. und 7. Erdteil. [*De Lambertiana proiectione ad IVam, Vam, VIam, VIIam Terrae partes applicata*]. 1 Abb. Peterm. Mitt, LXXX, 1, 6-7. Gotha (1934). **a - 1186**

Nachteile der gebräuchlichen Merkatorprojektion. Vergleich zwischen der Merkatorprojektion und Lamberts Projektion. Die mathematische Ableitung von Lamberts Projektion nach der Darstellung von Bouassé.

**Fontoura da Costa** - As Cartas de Marear [*Tabulae nauticae*]. Anais do Club Militar Naval, 5-63. Lisboa (1934). **a - 1187**

Étude sur les cartes de navigation anciennes. Étude, détaillée de la mappemonde de Mercator de 1519. Articles bibliographiques.

**Gackel J. J.** - Matériaux sur la cartographie de la Mer de Kara. I-ère Partie [*Res collectae pro chartographia maris* Kara]. (En russe). 5 tabl., Trudy Arkt. Inst. (Trav. Inst. Arct.), X, 175-207. Léningrad (1933). **a - 1188**

Résultats scientifiques de l'expédition du brise-glace « Sibirjakov ».

**Guarnieri Giuseppe Gino** - L'Atlante nautico di Pietro Cavallino e una scuola cartografica livornese [*Agitur de Atlante nautico Petri* Cavallino *deque schola chartographica liburnica*]. Liburni Civitas, V, 83-95. Livorno (1933).

(—) Livorno e il tramonto della Cartografia Nautica Medievale [*Portus Liburnus pro chartographiae nauticae medioaevalis occasu*]. Boll., 11 nov. 1932, Consiglio Provinciale dell'Economia Corporativa di Livorno. 4 pp., carte. Livorno (1933). **a - 1189**

**Guerne (de) Jules** - Présentation de trois cartes [*Tabulae tres nauticae*]. Résult. Camp. Scient. accomplies par Albert I, Prince Souverain de Monaco, fasc. LXXXIX, 374-376. Monaco (1934). **a - 1190**

Ces cartes concernent les résultats scientifiques des campagnes de l'Hirondelle (1885-1888) et doivent prendre place dans la publication destinée à faire connaître ces résultats de la goélette.

**Haack Herman** - Die internationale Ausgabe von Stielers Handatlas [*De internationali editione Atlantis Stielerii*]. Peterm. Mitt., LXXX, 9, 262. Gotha (1934). **a - 1191**

Diese Ausgabe « Stieler, Grand Atlas de Géographie Moderne » ist keineswegs eine Neuaufgabe sondern eine dem internationalen Zweck streng angepasste Bearbeitung der deutschen Hundertjahr-Ausgabe. Erweiterungen und Ergänzungen. (S. auch Peterm. Mitt. LXIX, 1/2, 7-16; LXX, 1, 9-20) sowie Rez. von Schokkenkamp in Tijdschr. Kon. Ned. Aardr. Gen., 1, 108-109, 1935).

**Kimble George H.** - Some Notes on Mediaeval Cartography, with Special Reference to Behaim's Globe [*Nonnulla de chartographia medioaevali. Agitur particulatim de sphaera ad* Behaim *pertinente*]. Scott. Geogr. Magaz., XLIX, March 15, 91-98. Edinburgh (1933). **a - 1192**

**La Roncière (Ch. de) A.** - Une nouvelle carte de l'Ecole cartographique des Juifs de Majorque [*Charta nova ad scholam chartographicam hebraicam Baleari Maiore pertinens*]. Bull. Sect. de Géogr. du Minist. Educ. Nat., XLVII, 113-118. Paris (1932). **a - 1193**

**Ljoubvin N. I. & Gackel J. J.** Sous la réd. de **Samoilovitsch R. L. & Roudnev D. D.** - Carte de l'Arctique [*Regionum arcticarum tabula*]. Ed. Inst. Arct. URSS, Leningrad (1934). **a - 1194**

Une carte des régions polaires à l'échelle de 1:10.000.000, publiée par l'Institut Arctique de l'URSS.

**Manley Gordon** - The Plancius Map of England, Wales, and Ireland, 1592 [*Angliae, Valliae, Hiberniae tabula A. 1592 ad* Plancius *pertinens*]. Geogr. Journ., LXXXIV, 3, 252-253. London (1934). **a - 1195**

A brief description of a copy of the Plancius Map, of which only one other example appears to be known, which has been found in Bishop Cosin's Library at Durham. Size and other pecularities of the Map. Numerous additions made concerning the coast. Differences between the Plancius Map, and those of Ruther, Saxton and Boazio. Information about other sources used by Plancius.

**Medina (de) Pedro** - El primer mapa del Atlántico, reproducido del Regimento de navegacion, de — [*De priore mappa Oceanum Atlanticum repraesentante*]. 1 pl., 1 facsimile, Bol. Soc. Geogr. Nac. LXXIII, Mayo. Madrid (1933). **a - 1196**

**Myhre J. F.** - Handbook of the Baltic and White Sea Loading Ports including Denmark and Norway [*Liber manualis de portibus mercatoriis Maris Baltici et Maris Albi, Dania et Norvegia inclusis*]. 929 pp., J. Jørgensen & Co., Copenhagen (1935). **a - 1197**

**Philip (Edit)** - Philip's Centenary Mercantile Marine Atlas [*Atlas mercatorius centenarius maritimus* Philip *edidit*]. 44 pl., 220 charts & plans. George Philip & Son Ltd. London (1935). **a - 1198**

Specially designed for merchant shippers, exporters and ocean travellers. Thirteenth and enlarged edition.

**Pobedonostzev D.** - Carte de la Région du Nord [*Tabula regionis nordicae*]. (En russe). 1 carte, Sov. Sever, 4, 125-126. Moskva (1934). **a - 1199**

Description et reproduction d'une carte élaborée par la Commission Polaire de l'Académie des Sciences de l'URSS sur la base de tous les matériaux cartographiques disponibles jusqu'à 1932 y-inclus.

**Poole H.** - An oblique Cylindrical Equal Area Map [*Tabula cum superficiebus aequivalentibus et proiectione cylindrica obliqua*]. Geogr. Journ., LXXXIII, Febr., 142-143. London (1934). **a - 1200**

**Putnins R. V.** - Jaunas Projekcijas Pasaules Karten [*Proiectio nova ad mundi mappam delineandam*]. Geogr. Raksti, III & IV, 180-209. Riga (1934). **a - 1201**

**Ravu H.** - Det Kongelige Danske Søkort Arkiv 1784-1934 [*Regium Archivum chartographicum Danicum*]. Ill., 83 pp., Søkort Arkiv. København (1934). **a - 1202**

**Santoni E.** - Lo stereocartografo Santoni [*De stereochartographo* Santoni]. (Modello II). Riv. del Catasto e dei Serv. Tecn. Erar., 12 fig., I, 3., 216-229. Roma (1934). **a - 1203**

Lo Stereocartografo è uno strumento restitutore per fotogrammetria in quanto permette di ricavare dalle fotografie stereoscopiche del terreno la rappresentazione planimetrica ed altimetrica di queste, secondo le norme della cartografia. L'istrumento è del tipo cosidetto universale essendo atto alla restituzione di prese eseguite sia dall'aeroplano sia da terra.

**Schott G.** - Norwegische Seekarten der antarktischen Gewässer [*Tabulae maritimae norvegicae marium antarcticorum*]. Ann. d. Hydrogr., LXIII, 3, 124-125. Berlin (1935). **a - 1204**

Beschreibung der für die Hvalfangernes Assuranceforening in Snadefjord vom Kapt. H. E. Hansen bearbeiteten vier grossen Kartenblätter im Masstab 1:5.000.000 (60° S-Br.) in Merkatorprojektion, die, jeweils von 50° bis 73° S-Br. reichend, zusammen das subpolare und das sudpolare Meer rings um die Erde darstellen.

**Steinberg S. S.** - Mapping from the Air [*De tabulis perdurante navigatione aëria elaboratis*]. Sc. Monthly, April, 363-366. New York (1935). **a - 1205**

Opportunity given by the aviation to survey and map large areas of the earth's surface at great savings in time and cost. Main characteristics of an air map: its accuracy. Last development of aerial mapping. Brief description of the aerial mapping camera. The stereoscopic use of aerial photography. Employ of air mapping in the United States.

**Steppes O.** - Das Netz der Seekarte (Merkatorkarte) [*Tabula Mercatoriana*]. 2 Taf., Seewart, III, 6, 255-259. Hamburg (1934). **a - 1206**

Nachdem Vf. ausdrücklich betont hat, wie oft man als Ableitungen geometrischer Eigenschaften der Loxodrome und der Seekarte Betrachtungen liest, die einer strengen Kritik nicht standhalten, gibt er in der vorliegenden Notiz eine einfache Bekanntmachung, was mit elementaren Mitteln bewiesen werden kann und was nicht.

**Vera V.** - Huellas de un mapa perdido de Colón [*Agitur de vestigiis cuiusdam amissae tabulae ad* Colón *pertinentis*]. Vida Maritima, XXXIII, Enero–Fevrero. Madrid (1934). **a - 1207**

**Verstelle J. T.** - De Schaal van de Kaart [*De schala tabularum*]. De Zee, 267-271. den Helder (1934). **a - 1208**

**Waart (de) D.** - De schaal van de kaart [*De schala tabularum*]. De Zee, 84. den Helder (1934). **a - 1209**

**Wieder F. C.** - Monumenta Cartographica. Vol. IV & V. Martinus Nijhoff. 's–Gravenhage (1932–33). **a - 1210**

Reproductions of unique and rare maps, plans and views in the actual size of the originals accompanied by cartographical monographs. These two volumes complete the first series of Dr. Wieder's great cartographical collection; the maps reproduced are drawn from two sources, i. e. the « Vingboons Atlas » and « Secret Atlas » of the Dutch East India Company. The volumes are accompanied by very thorough introductions, notes on sources, and bibliographical details.

**Wilson W. Eric** - The Pilot's Guide to the Thames Estuary and the Norfolk Broads, for Yachtsmen [*Liber ad navigandum per flumen Tamesim et longe a litoribus regionis in usum* Norfolk *pamphiliariorum*]. Ills., charts, x + 394 pp., Imray, Laurie, Norie & Wilson. London (1934). **a - 1211**

The present is more than a pilot's guide: it has an historical introduction based on a series of articles in the « Mariner's Mirror », and contains a useful summary of the byelaws of the Port of London Authority. Besides there are useful chapters on elementary navigation, details of tides, etc.

**Bureau Hydrographique International** - E. D. P. D. and P. A. Dangers. – Dangers E. D. P. D. et P. A. [*Periculorum positiones*]. (In Engl. & French). Bull. Hydrogr. Int., V, 94-95. Monaco, princ. (1934). **a - 1212**

Renseignements reçus par le Bureau Hydrographique International apportant des corrections aux informations existantes.

**Geodetic Institute of Denmark** - Map of North Greenland [*Groenlandiae septentrionalis tabula*]. 18 sheets. Geod. Inst. Denmark. Copenhagen (1932). **a - 1213**

Map of North Greenland, scale 1 : 300.000, surveyed by Lauge Koch in the years 1917-1923, showing the geography, sounds, fiords, glaciers, lands, etc.

**Gheodesitscheskoje Oupravlenije (Bureau géodesique)** - La région du Nord [*De nordica regione*]. 1 carte, 1 feuille, Arkhangheljsk (1933). **a - 1214**

Carte de la région du Nord avec nomenclature internationale et nomenclature d'ordre. Projection Hauss-Krüger. Echelle 1 : 50.000; sans relief.

**Ghidrografitcheskoje Oupravlenije (Bureau Hydrographique)** - La Rousskaja Gavanj (Port Russe) sur la Novaja Zemlja [*De* Russkaja Gavanj *in* Novaja Zemlja]. (En russe). 1 carte. Carte n. 1144, 1 · 25.000, 1 feuille. Leningrad (1933). **a - 1215**

**Ghidrografitcheskoje Oupravlenije (Bureau Hydrographique)** - La rive occidentale de la Mer de Barents, de l'Ile Karatchinskij au liman d'Anadyrj [*De litoribus orientalibus Maris* Barentz *ab insula* Karatschinskij *ad Sinum* Anadyrj]. (En russe). 1 carte. Carte n. 1167, 1 : 1.200.000, 1 feuille. Leningrad (1933). **a - 1216**

**Ghidrografitcheskoje Oupravlenije (Bureau Hydrographique)** - Catalogue des Livres et des Cartes. Corrigé jusqu'au 1 juillet 1933 [*Index librorum et chartarum ad diem 1 mensis Julii A. 1933 correctus*]. (En russe). 11 cartes, 84 pp. Leningrad (1933). **a - 1217**

L'Océan Arctique (p. 16-19), la Mer de Barentz, (p. 30-32). L'Océan Arctique et la Mer Blanche (p. 42-43) bibliographie et tableaux.

**U. S. Department of Commerce** - Maps of Latin America [*Tabula Americae Latinae*]. Miscellaneous Series, Bureau of Foreign and Domestic Commerce. Washington D. C. (1932). **a - 1230**

**U. S. Department of Commerce. Coast & geodetic Survey** - Tables for a Polyconic Projection of Maps and Lengths of Terrestrial Arcs of Meridian and Parallels Based Upon the Clarke's Reference Spheroid of 1866. Fifth Edition [*Tabulae ad proiectionem polyconicam chartographicam delineandam. Agitur etiam de arcuum terrestrium longitudinibus, meridianorum et parallelorum ex sphaeroide* Clarke *A. 1866. Editio V*ª]. Tables. Spec. Publ. 5, 3-189. U. S. Govmt. Print. Off. Washington D. C. (1930). **a - 1231**

These tables were published as Appendix 6 to the Coast and Geodetic Survey Report for 1884, and a Special Publication nº 5 in 1900. The constant demand for the tables has necessitated the present edition, in which the tables remain the same as those in the other editions, while the introduction is only slightly different from that of the second edition.

**U. S. Department of Commerce. Coast and Geodetic Survey** - Catalogue of U. S. Coast and Geodetic Survey Nautical Charts, Coast Pilots, Tide Tables, Current Tables, Tidal Current Charts, Airway Maps [*Index tabularum nauticarum, portulanorum, aestuum tabularum, currentiarum et viarum aëriarum*]. Charts & tables. 60 pp. U. S. Govmt. Print. Washington D. C. (1934). **a - 1232**

This catalogue lists information regarding items sold by the Coast and Geodetic Survey of the Department of Commerce. Nautical charts are grouped in the following order: Atlantic and Gulf coasts, Puerto Rico, Virgin Islands, the Canal Zone, the Pacific coast, Alaska, the Hawaiian and Guam, and the Philippine Islands.

**U. S. Government Printing Office** - Maps [*Tabulae*]. 10 pp., Washington D. C. (1935). **a - 1233**

List of maps published by the U. S. Government Printing Office, showing the state of their stock at the time of going to press.

**An.** - Austgrönland. Eirik Raudes Land fra Sofiasund til Youngsund. [*Groenlandia Orientalis. Terra* Eirik Raudes *a* Sofiasund *ad* Youngsund]. Norges Geogr. Opmaaling, 1 f., Oslo (1932). **a - 1234**

1 feuille en couleurs au 200.000-ème.

**An.** - Anais Hidrograficos. Tomo II [*Annales hydrographici. Tomus II*]. Imprensa Nacional. Rio de Janeiro (1934). **a - 1235**

**An.** - The Edition of a Hypsometrical Map of the Arctic [*Chartae hypsometricae regionis Arcticae editio*]. (In Russ. & Engl.). Bull. Arct. Inst., 6/7, 275 & 296. Leningrad (1934). **a - 1236**

Information on the finishing of the plotting of a hypsometrical map of the Arctic to which new material has been added, gathered during surveys carried out by the Arctic Institute on the Chukchee Peninsula, the coast of the East Siberian Sea and on Novaja Zemlja.

**An.** - International Edition of Stieler's Handatlas – Edition internationale du Handatlas de Stieler [*Atlantis Stielerii editio internationalis*]. (In Engl. & French). Int. Hydr. Bull., VI, 114. Monaco, Princ. (1934). **a - 1237**

Information on hand of a notice which appeared in « Petermanns Mitteilungen » nº 9 of 1934, according to which two editions of Stieler's Handatlas will be published henceforth, viz: a German Edition and an International Edition.

**An.** - Views and Sketches on Charts – Vues de côtes et silhouettes données sur les cartes [*Litorum conspectus et tabularum adumbrationes*]. (In Engl. & French). Int. Hydrogr. Bull. II, 35. Monaco, Princ. (1935). **a - 1238**

Text of the order recently issued in Great Britain by the Hydrographer of the British Navy with a view to facilitate the rapid location of positions of views and sketches which appear on British Admiralty charts.

**An.** - Steamer Tracks on Charts - Indication sur les cartes des routes de navigation à vapeur [*Viae maritimae pyroscaphorum in tabulis determinatae*]. (In Engl. & French). Int. Hydrogr. Bull., II, 35–36. Monaco, Princ. (1935). **a - 1239**

**An.** - Map of the Roman Empire [*Imperium Populi Romani. Tabula*]. Nature. CXXXIV, 3395, 807. London (1934). **a - 1240**

Short note of this International Map to 1,000,000, covering the greater part of Scotland North of the Firth of Forth. Latin and modern names.

**An.** - Modèle type d'avis aux navigateurs [*Exemplum signalationis ad usum navigatorum*]. Rev. Hydrogr. XII, 1, 8–13. Monaco, princ. (1935). **a - 1241**

Proposition faite par le Comité de Direction du Bureau Hydrogr. Int. sur la base de réponses de 25 pays ou autorités à la Lettre–Circulaire Nº 1–H du 1934.

This report is the annual revision of the volume Port and Terminal Charges at United States Ports, and supersedes the 1931 edition of the volume and the 1933 supplement thereto. Part 1 contains the charges of the United States Government, and the more important governmental regulations affecting the movement of vessels, freight, and passengers. Part 2 contains the detailed charges by ports.

**U. S. War Department** - The Port of New York (in Three Parts) [*Portus* New York]. Port Series, 20, Bureau of Operations U. S. Shipping Board. Washington (1932). **a - 1302**

**U. S. War Department** - The Ports of San Francisco, Oakland, Berkeley, Richmond, Upper San Francisco Bay, Santa Cruz, and Monterey, California [*Portus quorum nomina in titulo anglico huius schedulae inscribuntur*]. Num. aerophotos, tables. Port. Ser., 12, iii–xii, 1-334. U. S. Govmt. Print. Off. Washington D. C. (1933). **a - 1303**

Revision of the report on the ports in the title concerning the physical features of each port, its organization and practices, regulations governing the movement of ships and goods, port dues and charges, water-and-rail connections, and character and commerce of hinterland. It is illustrated with original charts, diagrams, and photographs, and contains tabular matter showing important commodity movements.

**U. S. War Department** - The Ports of Port Arthur, Sabine, Beaumont and Orange, Texas [*Portus quorum nomina in titulo anglico huius schedulae inscribuntur*]. 14 ills., tables. Port Ser. 14, iii–ix, 1-170. U. S. Govmt. Print. Off. Washington D. C. (1933). **a - 1304**

This report treats a variety of subjects of particular interest to the shipping world, such as physical conditions of each port, its customs and regulations, services and charges, fuel and supplies, water and rail connections, freight ráte situation, and character and commerce of hinterland. It is illustrated with original charts, diagrams and photographs, and contains tabular matter showing important commodity movements.

**U. S. War Department** - The Ports of Baltimore, MD., Washington, D. C. and Alexandria, Va., Part. I: (Revised 1933) The Port of Baltimore, Md. [*Portus quorum nomina in titulo anglico huius schedulae inscribuntur. Agitur particulatim* de Baltimore]. 12 ills., tables. Port Ser. 16, iii–x, 1-348. U. S. Govmt. Print. Off. Washington D. C. (1934). **a - 1305**

Information on port and harbour physical conditions, its custom and regulations, services and charges, fuel and supplies, port and harbour facilities, rail and water communications, the freight rate situation, the commerce of Baltimore and its hinterland.

**U. S. War Department** - The Panama Canal and Its Ports (Revised 1934) [*Canalis Panamensis eiusque portus. Editio recognita A. 1934*]. 23 ills. & maps, tables. Port Ser. 22, iii–xii, 1-84. U. S. Govmt. Print. Off. Washington D. C. (1934). **a - 1306**

Revised report on the Panama Canal and its ports, which covers port and harbor conditions, port customs and regulations, port services and charges, port and harbor facilities, as well as their railroad-sea and other communications and commerce.

**G. P.** - Il Canale di Suez [*Canalis* Suez]. 1 cartina. Riv. Cult. Mar., X, 5/6, 670-681. Roma (1935). **a - 1307**

Cenno storico sul Canale, sui lavori, sulla sua importanza.

**R. de M.** - Les ports de Madagascar [*De portibus Madagascariensibus*]. 3 cartes, 1 prof. Rev. de Madagascar, Janv., 95-118, Impr. Officielle. Tananarive (1933). **a - 1308**

Œuvres accomplies à Tananarive, Majunga, Diego-Suarez, Tulêar.

**An.** - Fifth Anniversary of the Harbour Igarka [*Portus* Igarka, *quinto recurrente anno*]. [In Russ. and Engl.). Bull. Arct. Inst., 8/9, 301-344. Leningrad (1934). **a - 1309**

Importance of this harbour situated in the lower part of the Yenissey River, at a distance of 720 km. from the Kara Sea in connection with the activity and the establishment of the Northern Sea Route, and with the exploitation of the natural resources of Eastern Siberia.

**An.** - A Harbour in Yugorsky Strait [*Portus in strictu* Yugorskij]. (In Russ. & Engl.). Bull. Arct. Inst., 8/9, 317, 347. Leningrad (1934). **a - 1310**

Brief summary of the project of a harbour elaborated by the State Institute for Water Transport Projectings to be built in Yugorsky Strait.

**An.** - The Harbors of Bremen [*Civitas* Bremen *eiusque portus*]. 3 photos., Naut. Gaz., CXXV, 2, 9-11, 32-33. New York (1935). **a - 1311**

Predomination of the flag of United States and of Great Britain in the harbors of Bremen; the increasing freight trade of this port; its passenger traffic; the equipment of the town of Bremen as a model passenger port; the ten basins of Bremerhaven: the free harbors; the improvements of the Lower Weser which has been developed into a farway for ocean-going vessels; the equipment of harbors for transshipment trade.

**An.** - Dutch Port Traffic [*De mercium frequentia per Hollandeses portus*]. 1 table, Naut. Gaz., CXXV, 8, 28. New York (1935). **a - 1312**

Tonnage on decrease. Ship sales to Russia.

**An.** - Traffic at Saint John Increases During 1934 [*Crescit frequentia mercium in portu* Saint

John, *A. 1934*]. 2 photos, 1 table. Naut. Gaz., CXXV, 9, 6-7 & 33. New York (1935). **a - 1313**

Statistical statements showing the development during 1934 of Saint John's exports and imports, its steamhip services, and the cargo tonnage, combining import and export, handled through the port.

**An.** - New York Passenger Traffic and Sailings [*De viatorum frequentia deque navium discessu a* New York]. Tables. Naut. Gaz., CXXV, 10, 12. New York (1935). **a - 1314**

Statistical statements.

**An.** - Services and Sailings from Port of New York [*De navium discessibus a portu* New York *muneribusque ad eas pertinentibus*]. 2 tables. Naut. Gaz., CXXV, 11. New York (1935). **a - 1315**

Statistic statements.

**An.** - Kola-Bucht, Murmansk [*Sinus* Kola *nomine in* Murmansk]. Seewart, IV, 1, 26-27. Deutsche Seew. Hamburg (1935). **a - 1316**

An Hand eines Berichtes, welcher im Handbuch Nordküste Russlands, I. Teil, 1930 veröffentlicht worden ist, werden die Bedingungen der An- und Einsteuerung der Schiffe in die Kola-Bucht angegeben.

Woods Hole Oceanogr. Instit. Rep., 1933, App., 19. Woods Hole. Mass. (1934). **a - 1318**

Note on the account of the Cycle of Temperature in the area under consideration, which has been published in extenso, as Contribution n. 34 of the Institution.

**Brooks Charles F. & Harwood E. Monroe** - A Preliminary Comparison of Monthly Weather with Ocean-Temperature Sequences in the Western Atlantic Region [*Comparatio prior inter meteorologicas menstruas condiciones et temperaturas oceanicas in regione Atlantica occidentali*]. 1 fig., 2 tabl., Nat. Res. Counc., Trans. Amer. Geoph. Union., 15th Ann. Meet., Part. I, 211-214. Washington D. C. (1934). **a - 1319**

A preliminary account of the results of the installations of numerous sea-water thermographs on commercial steamships in the western Atlantic since 1926 made in order to provide accurate sea-temperature data for comparison with weather ashore and to find out to what extent the slowly changing sea-temperatures can be used to anticipate seasonal weather abnormalities. From the sampling mentioned in this paper, it seems possible that the coastal waters may give indication of the air-temperatures of the following month along the middle and north Atlantic seaboard.

**Buchanan J. Y.** - Sur un nouveau type de piézomètre [*De novo piezometro*]. 1 fig., Résult. Camp. Scient. accomplies par Albert I, Prince Souverain de Monaco, fasc. LXXXIX, 357-359. Monaco (1934). **a - 1320**

Description de l'instrument présenté dans sa forme la plus simple par une figure schématique. Dans cette forme il se prête le mieux à la détermination dans la mer de la compression de l'eau de mer sous l'influence du poids d'une colonne donnée d'eau de mer, ou bien de la contraction intégrale due au refroidissement et à l'augmentation de la pression à la fois.

**Carter N. M., Moberg E. G., Skogsberg T. & Thompson T. G.** - The Reporting of Data in Oceanographical Chemistry [*Inscriptio et communicatio datorum ad Chemiam oceanographicam pertinentium*]. 3 tables. (Repr.) Proc. 5th Pacif. Sc. Congr., III, A 5, 26, 2123-2127. Vancouver B. C. (1933). **a - 1321**

Recommendations elaborated by a Committee of representatives from four oceanographical or marine laboratories situated on the Pacific coast of North America for the reporting of data in oceanographical chemistry in order to insure a more uniform mode of procedure in the areas concerned. The Committee recommends that the constituents of sea water be expressed as milligramme-atoms per kilogramme of sea water and that the general chemical nature of sea water as a function of its physical properties be expressed as chlorinity.

**Chabaud M. V.** - Sur un nouveau modèle de thermomètre à renversement pour mesurer les températures de la mer à diverses profondeurs [*De novo thermometro reversibili ad maris temperaturas mensurandas in profunditatibus variis*]. 1 fig., Résult. Camp. Scient. accomplies par Albert I, Prince Souverain de Monaco, fasc. LXXXIX, 353-355. Monaco (1934). **a - 1322**

Description de cet appareil dont quatre ont été embarqués sur la « Princesse Alice » où ils ont parfaitement fonctionné entre les mains du prof. Thoulet, dans une série d'expériences faites à Boulogne, sans avoir cependant subi l'épreuve définitive en eau profonde.

**Chauchard P.** - Repérage des variations de salinité par la méthode des conductivités électriques [*De repertis salsedinis variationibus per conductivitatis electricae methodum*]. Bull. Labor. St.-Servan, X, 1-12. St.-Servan (1932) **a - 1323**

Comparaison des conductivités et des salinités. Application à l'étude d'un estuaire.

**Chauchard Paul** - Le pouvoir reducteur de l'eau de mer sur le littoral et au large (septembre 1931) [*De aqua marina eiusque tenore quoad*

*reductionem praeter et longe a litoribus regionis* St. Servan]. 1 carte geogr. Bull. Labor. St.–Servan, IX, 6-12. St.–Servan (1932). **a - 1324**

Teneur de l'eau de mer en matières réductrices, mesurée au cours d'une croisière du « Pourquoi pas ? » dans l'Atlantique.

**Cherneff S.** - Investigations on Salinity and Temperature in Bourgas Bay and the near Open Sea Waters [*Investigationes in salsedinem et temperaturam in Baja* Bourgas *et in propinquis aquis liberis*]. (In Bulg., Engl. rés.). Trav. Stat. Ichthyol. à Sozopol–Bulgarie, II, 39-57. Burgas (1934). **a - 1325**

**Church Phil. E.** - Surface–Temperatures on the New York to Cape São Roque Steamship-Route [*Agitur de variis temperaturis ad superficialia aquae strata, secundum cursum pyroschaphorum inter* New York *et Promunturium* São Roque]. 1 map. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 204-208. Washington D. C. (1934). **a - 1326**

Account of the results of observations made by means of thermographs installed by the Brazilian Traction and Light Company on three of their vessels which ply between New York and Cape Sao Roque and thence to South American ports. In the present paper only data concerning the Central Atlantic and North Equatorial Current areas are discussed under the following headings: Central Atlantic water. Winter temperatures. Summer temperatures. Annual range. North Equatorial Current. Northern belt. Central belt. Equatorial belt. Annual march of temperature.

**Church Phil. E.** - Studies of the Distribution of Surface Temperature in the Western North Atlantic, Based on Thermograph Records [*Studia, quorum fundamenta ponuntur in termographicis inscriptionibus, quoad temperaturae superficialis per Atlanticum Nordicum Occidentalem distributionem*]. Woods Hole Oceanogr. Instit., Rep. 1933, App., 20. Woods Hole. Mass (1934). **a - 1327**

Elaboration of twenty synoptic charts in addition to the seventy previously made, including the period from January 1929 to April 1933. Tabulation of the mean temperatures by weeks for each degree of latitude for six steamers routes for the period covered by the charts. Comparison between the charts and the wind data in order to see if there is any correlation between surface water movements and wind directions and force.

**Clowes A. J.** - Hydrology of the Bransfield Strait [*De hydrologia in strictu* Bransfield]. Discovery Rep., IX, 1-64. Disc. Comm., Col. Off. London (1934). **a - 1328**

Merentutkimus laitoksen Julk. Havsforskn. inst. Skr., 100, 4-45, i–iv. Helsinki (1935). **a - 1334**

I. General survey: 1. Localities of observation; 2. Observations and instruments; 3. Computation of observations and arrangement of tables. II. Observations in the depth at year-stations, 1933 VII-1934 VI. III. Observations in the depth at summer-stations, 1933 VII - 1934 VI. IV. Surface observations at year-stations, 1933 VII - 1934 VI: 1. Annual means 1933 and 1933 VII - 1934 VI; 2. Observations and monthly means. V. Surface observations at summer-stations, 1933 VII - 1934 VI.

**Gripenberg Stina** - A Study of the Sediments of the North Baltic and Adjoining Seas [*De sedimentis Maris Baltici septentrionalis mariumque adiacentium*]. 45 figs., 28 tables. Merentutkimus laitoksen Julk. Havsforskn. inst. Skr., 96, 8-231. Helsinki (1934). **a - 1335**

I. Introduction. II. Chemical analysis. III. Mechanical analysis. IV. Preliminary treatment. V. The samples. VI. Discussion: organic matter and character, distribution of and depth in sediment; ratio of carbon to nitrogen;

calcium carbonate and Baltic sea water; the Silurian area of the Bothnian Sea; carbonate content of samples from the North Baltic and the Gulf of Finland; Mechanical composition. Bibliography.

**Hachey H. B.** - Surface Water Temperatures for Atlantic Coast of Canada [*De temperatura ad superficiem litorum Canadensium Oceani Atlantici*]. 1 table. Ann. Rep. Biol. Board Canada, 1933, 19. Ottawa (1934). **a - 1336**

Results of a study of the surface water temperature at various points on the Canadian-Atlantic coast in recent years showing an interesting trend in the hydrographic conditions, which is now towards colder conditions, the warm peak having been reached in 1930 or 1931. The occurred changes are illustrated by the monthly means and indicate a large scale movement of Labrador waters through the strait of Belle Isle during the month of August, perhaps due to pressure distribution in the atmosphere.

**Hachey H. B.** - Hydrography of the Waters of the Scotian Shelf [*De aquarum hydrographia ad plateam Novae Scotiae pertinentium*]. Ann. Rep. Biol. Board Canada, 1933, 19-20. Ottawa (1934). **a - 1337**

Results of investigation of the hydrographic conditions as compared with those of the previous season. The most important variations having been found to occur in the inshore area are described in the paper.

**Hachey H. B.** - Effect of Wind Action on Inshore Stratified Waters [*Ventorum effectus in stratificationem aquarum litorearum*]. Ann. Rep. Biol. Board Canada, 1933, 20. Ottawa (1934). **a - 1338**

Description of the marked changes in temperature density and salinity of the markedly stratified waters on the south coast of Nova Scotia in September 1932, effected through the agency of the wind.

**Harwood E. Monroe** - Investigation of Sea Surface Temperatures in the Western North Atlantic [*De temperatura ad aquae superficiem in regione nordoccidentali Oceani Atlantici*]. Woods Hole Oceanogr. Instit., Rep., 1933, 22-23. Woods Hole. Mass. (1934). **a - 1339**

Supplementary information of the work illustrated by Phil. E. Church on page 20 of the same publication.

**Heldt M. H.** - Suppression des calculs pour la détermination du pH par les méthodes électrométriques. Tables de Vellinger (rés.) [*De suppressis calculis ad* pH *determinandum per methodus electrometricas. Tabulae Vellingerii.* (*Compendium*)]. Comm. Sect. VIIe Congr. Int. Aquicult. & Pêche, Paris, 1931, Gr. I, Sect. 1/2, 3. Impr. du Loiret. Orléans (1931). **a - 1340**

L'A. résume les avantages des tables de pH de Vellinger publiées par la Station Océanographique de Salammbô permettant de passer directement du potentiel de l'électrode à hydrogène au pH correspondant. Les pH ont été calculés avec 3 décimales pour les potentiels de 275 à 999 millivolts et des températures de 0° à 40°.

**Hofer E.** - Bestimmung von kleinen Densitäts-Variationen im Wasser [*De minusculis variationibus in aquae densitate determinatis*]. Ztschr. phys. Chem., XXVII, Abt. B., 5/6, 467-472. Leipzig (1934). **a - 1341**

Mit Hilfe eines Apparates, welcher auf demselben Prinzip wie der Apparat von Gilfillan und Polanyi gegründet ist, hat Vf. Densitätsvariationen im Wasser mit einer Genauigkeit bis $5 \times 10{-}7$ gm./ml. gemessen. In der vorliegenden Arbeit berichtet er über die Konstruktion seines Apparates, dessen Standardisierung und die mit ihm erzeugten Densitätsmessungen.

**Howard C. S.** - Report of the Committee of the Chemistry of Natural-Waters, 1933-34 [*Relatio Comitatus pro aquarum naturalium chemica. A. 1933-34*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part II, 322-325. Washington D. C. (1934). **a - 1342**

Personnel of the Committee. List of papers on methods of analysis, especially for the analysis of sea-water, prepared during the year 1932-1933 by workers in the Oceanographic Laboratories. Account of other work on the chemistry of natural waters.

**Irving Laurence** - The Acid-Base Equilibrium in Sea Water [*De acido-basi in aqua maris eiusque aequilibrio*]. Science, LXXX, 2086, 587-588. New York (1934). **a - 1343**

On the attempts to formulate the carbon dioxide system in sea water in terms of the dissociation products of carbonic acid. On the difficulty to be certain from the titration curve whether or not other weak acid acids are present. Some hints of the works of Saunders and Buch on the value of $k_1$ for carbonic acid in sea water from determination of the total $CO_2$ by titration.

**Iselin C.** - Temperature-Salinity Correlation within the Florida Current [*Correlatio inter salsedinem et temperaturam quoad currentiam* Florida]. 1 table. Nat. Res., Counc.Trans Amer. Geoph. Union, 15th Ann. Meet., Part I, 208-209.Washington D. C. (1934). **a - 1344**

Summary of the results of observations on the correlation between temperature and salinity in the Florida current on hand of data collected by the « Bache » expedition (1914), and those of the « Dana » (1928) and the « Atlantis » (May 1933) which throw some light of the average ratio of T to S at mid-depth in the heart of the Current at three points between the Bahama Banks and Cape Hatteras. The author adds some considerations concerning the origin of the waters of the Gulf Stream.

**Iselin C.** - Studies Based on « Atlantis » Temperature and Salinity Observations [*Studia quorum fundamenta ponuntur in temperaturae et salsedinis observationibus in navi peractis nomine* « Atlantis »]. Woods Hole Oceanogr. Instit., Rep. 1933, App., 22-23. Woods Hole, Mass. (1934). **a - 1345**

*a*) Distribution of temperature and salinity in the Western North Atlantic, *b*) the Caribbean observations, *c*) the seasonal changes in the circulation of the Gulf of Maine. Analysis of over 5000 water samples for chlorine by Mr. Woodcock.

**Jacobsen J. P.** - Temperaturmessung mit elektrischem Widerstandsthermometer auf der Kattegatsexpedition im August 1931 [*De temperatura dimensa, thermometri resistentia praediti auxilio, inter navigationem ad* Kattegat, *mense Augusto 1931*]. Medd. Komm. Danmarks Fisk. og Havunders. Ser. Hydrogr. III, 1. København (1935). **a - 1346**

**Jaenicke Johannes** - Habers Forschungen über das Goldvorkommen im Meerwasser [*De investigationibus per* Haber *susceptis ad aurum in aqua marina inveniendum*]. Naturwiss. XXIII, 4, 57-63. Berlin (1935). **a - 1347**

Im Auftrage von dem verstorbenen Forscher berichtet der Vf. hier über dessen Versuche Gold vom Meerwasser zu gewinnen. Ursachen des Misslingens. Bedeutung der Haberschen Analysenmethode für spätere Forschungen.

**Kalle Kurt** - Zur Frage der Festsetzung der Masseinheiten in der meereskündlichen Chemie [*De unificandis mensuris Chimicae oceanographicae*].

2 Tab., Ann. d. Hydrogr., LXIII, 1, 18-23. Berlin (1935). **a - 1348**

Auf Grund einiger Ueberlegungen über die Notwendigkeit der Standardisierung der zu den hydrographisch-chemischen Untersuchungen benutzten Masseinheiten, entwickelt Vf. eine Reihe von Masseinheiten, deren allgemeinen Gebrauch er in der meereskundlichen Chemie vorschlägt und welche er in einer Tabelle nebst der zur Zeit gebräuchlichen Masseinheiten zusammenfasst.

**Kalle K.** - Meereskundliche chemische Untersuchungen mit Hilfe des Zeissschen Pulfrich-Photometers. IV. Mitteilung. Der Einfluss chemischer Stoffe auf die Phosphatgehaltsbestimmung. [*Investigationes oceanographicae peractae, photometri Pulfricii auxilio, a Zeiss constructi. Communicatio IVa. Substantiarum chemicarum influentia in phosphatum determinandum*]. 8 Tab., Ann. d. Hydrogr., LXIII, 2, 58-65. Berlin (1935). **a - 1349**

In der III. Mitteilung der vorliegenden Untersuchungsreihe (Ann. Hydr., LXII, S. 65) wurde eine methodische Untersuchung der Phosphatgehaltbestimmung durchgeführt. In der vorliegenden Mitteilung wird über die hieraus sich ergebenden Nutzanwendungen für die Ausführung der Phosphatreaktion berichtet. Untersuchung der verschiedenen Stoffe, die einen begünstigenden oder hemmenden Einfluss auf die Phosphatreaktion haben können. Ein « Salzfehler » im eigentlichen Sinne des Wortes bei der Phosphatgehaltbestimmung im Meerwasser scheint dadurch nicht vorzukommen.

**Kalle K.** - Meereskundliche chemische Untersuchung mit Hilfe des Zeissschen Pulfrich-Photometers. V. Mitteilung. Die Bestimmung des Gesamt-Phosphorgehaltes, des Plankton-Phosphorgehaltes (lebende Substanz) und Trübungsmessungen [*Investigationes oceanographicae peractae, photometri Pulfricii auxilio, a Zeiss constructi. Communicatio Va. Totius phosphori in substantia planctonica determinatio, mensuraeque turbiditatis*]. 5 Tab., Ann. d. Hydrogr., LXIII, 5, 195-204. Berlin (1935). **a - 1350**

Beschreibung einer Methode zur Bestimmung des Gesamt-Phosphorgehaltes, spez. für Meerwasserproben, welche frei von den Fehlerquellen und Nachteilen der allgemein angewandten Bestimmungsmethoden ist und ausserdem eine neuartige Bestimmung des Gesamt-Arsengehaltes ausser dem Phosphor enthält. Auf Grundlage dieser Bestimmungen wird gleichzeitig durch die Bestimmung des im Plankton vorhandenen « geformten » Phosphors, eine Bestimmung der Menge der lebenden Substanz entwickelt. Die Bestimmungen erfassen gleichzeitig die in anderer Form als Phosphat im Wasser gelösten Phosphorverbindungen. Ausserdem teilt Vf. hier eine Methode mit um den Grad der Trübung in einer Meerwasserprobe festzustellen.

**Karaoglanov Z.** - Chemie des Schwarzen Meeres [*De chemia Ponti Euxini*]. 3 Tab., Arb. Biol. Meeresstation a. Schwarzen Meer in Varna, Bulg., 3, 55-75. Sofia (1934). **a - 1351**

Rektorrede gehalten an der Universität am 8-XII-1932. Angaben vorhergehender Forscher über die chemische Zusammensetzung mit besonderer Berücksichtigung des Schwefelwasserstoffs. Widerlegung der Behauptungen von A. A. Lebedinzeff u. a. russischen Forschern, Uebereinstimmung mit wenigen Ausnahmen mit den typischen Ozeanwässern.

**Keeton H.** - The Sea Surface Temperature Distribution in the Indian Ocean [*De temperatura ad superficiem eiusque distributione per Oceanum Indianum*]. Mar. Obs., XII, 120, 152. London (1935). **a - 1352**

Re-examination of the charts of mean sea surface temperature in the light of the information obtained from the last investigation of the currents.

**Keys Ancel B.** - Studies on Dissolved Organic Substance and Ammonia in the Sea [*De substantia organica deque ammoniaca in mari solutis*]. Woods Hole Oceanogr. Instit., Rep. 1933, 23-24. Woods Hole. Mass. (1934). **a - 1353**

Advantages of the vacuum distillation technique and the new titration procedure with the distillate employed. Some results of ammonia estimations on collected water samples. Some indications on new apparatus constructed in view of the continuation of the above investigations.

**Kitagawa Kiugoro** - Note sur une intégrale de l'équation de la propagation du son dans la mer [*De integrale aequationis quoad soni propagationem per maria*]. Mém. Coll. Science, Sér. A, XVII, 43-49. Kyoto (1934). **a - 1354**

Dans une note précédente l'A. avait établi l'équation de la propagation du son dans la mer et a cherché d'en déterminer l'intégrale sous une forme élémentaire, dont il a déduit certains résultats. Le présent ouvrage a pour objet de trouver sous la forme d'onde radiale et progressive une intégrale de cette équation (Auteur).

**Krogh A.** - with. Coll. of **Krogh Marie** & **Keys Ancel B.** - Studies on Organic Matter 1) Dissolved in Sea Water and 2) Present in Bottom Samples [*De substantiis organicis in aqua marina solutis et in fundi speciminibus praesentibus*]. Woods Hole Oceanogr. Instit., Rep. 1933, 24-25. Woods Hole. Mass. (1934). **a - 1355**

Some results of the application of the methods for the determination of ammonia, organic carbon and nitrogen in sea-water worked out in Copenhagen and applied to a series of samples taken on board the « Atlantis » at stations 1467-68 and sent to Copenhagen. Information on the analysis of a small number of samples taken from the surface-layer of the bottom at depths from 100-5000 meters.

**Liachnitskij V. E.** - Methodik der hydrologischen Untersuchungen bei Hafenforschungen nach den Errungenschaften der letzten 15 Jahre [*Investigationes hydrologicae in portibus studendis. Methodus cuius fundamenta ponuntur in progressibus abhinc 15 annos obtentis*]. (In Russ., Dtsch. Rés.). Mém. Inst. Hydrol., X, 337-343. Léningrad (1933). **a - 1356**

**Marchand J. M.** - Salinity Results Obtained During 1933 [*Resultatus obtenti A. 1933 circa salsedinem*]. 1 Table, 11 th Rep. Fish. & Mar. Biol. Surv., 1933, Ann. C, 81-88. Pretoria, S. Africa (1934). **a - 1357**

Salinity results obtained from analysis of water samples collected during the various survey cruises undertaken by the survey vessel R. S. « Africana » on different sections of the coast of the Union of South Africa during 1933. The salinities were determined with the titration method developed by the Conseil Permanent International pour l'Exploration de la Mer.

**Mitchell Philip H.** & **Rakestraw Norris W.** - The Buffer Capacity of Sea Water [*De aquae marinae capacitate occludendi. (Anglice*: buffer capacity)]. 3 figs., Biol. Bull., LXV, 3, 437-451. Lancaster, Pa. (1933). **a - 1358**

Various sources of error in the method developed by Thompson and Bounar are discussed. The effects of mass movements of ocean water upon the buffer capacity appear to be traceable. References.

**Mitchell Ph.** & **Solinger J. L.** - The Effects of Land Drainage Upon the Excess Bases of Sea Water [*Effectus terreni absorbentis bases quae ab*

*aqua marina excedunt*]. 2 figs., 1 table. Biol. Bull., LXVI, 2, 97-101. Lancaster, Pa. (1934). **a - 1359**

Results of investigations on the effects of land drainage upon the buffer capacity-chlorinity ratio of sea-water.

**Mitchell Philip & Taylor Ivon R.** - The Dissociation Constant of Cresol Red in Sea Water [*Agitur de numero constante quoad rubri creosolici dissociationem in aqua marina*]. 1 fig., Journ. Cons. Expl. Mer., X, 2, 169-172. Copenhague (1935). **a - 1360**

Values for the $pK_1$ of o-cresol red in sea-water at various dilutions were obtained at 30° C. and at 20° C. by the use of the glass electrode and the bicolorimeter. The results are shown graphically. (Author).

**Moberg E. G. & Fleming R. H.** - The Distribution of Nitrogen Compounds in the Sea Near Southern California [*De nitricorum componentium distributione in mari apud Californiam meridionalem*]. 1 table (Repr.) Proc. 5th Pacif. Sc. Congr., III, A5, 18, 2085-2088. Vancouver B. C. (1933). **a - 1361**

In order to give a clear picture of the vertical distribution of the various nitrogen compounds in the vicinity of la Jolla a summary of the concentrations of these compounds in three strata of water of distinct physical characteristics is given in a table, which suggests a number of questions of biological significance, briefly considered here.

**Münster Strøm Kaare** - Phosphatspeicherung in abgeschlossenen Meeresteilen [*De phosphatis in maris partibus clausis*]. 1 Tab., Int. Rev. ges. Hydrobiol. u. Hydrogr., XXX, 3/4, 379-380. Leipzig (1934). **a - 1362**

Vorläufiger Bericht über die in etwa 30 norwegischen Fjorden ausgeführten Untersuchungen. In einer Tabelle werden die Tiefen und Namen der Fjorde sowie die Phosphate (nach Atkins) als mg/ $M^3$ $P_2O_5$ angegeben. Vergleich mit Analysenwerten von einer Station im offenen Meere.

**Okada T.** - Results of the Oceanographical Observations on Board R. M. S. « Syunpu Maru », in the Tugaru Kaikyô (Tugaru Straits). (Aug. Sept., 1932) [*De observationibus oceanographicis navi* « Syunpu Maru » *peractis in freio* Tugaru]. Journ. Oceanogr., VI, 2, 177-208. Kobe (1934). **a - 1363**

(Aug. 1932) [*De observationibus oceanographicis navi* « Syunpu Maru » *peractis in* Hunkwa-Wan. Hokkaidô]. Journ. Oceanogr., VI, 2, 209-240. Kobe (1934). **a - 1364**

**Okada T.** - The Temperatures and Densities of the Sea-Water Along the Japanese Coasts. (Aug.-Sept. 1933). [*Temperatura et densitas aquae marinae praeter Japonica litora*]. Journ. Oceanogr., VI, 2, 247-270. Kobe (1934). **a - 1365**

**Okada T.** - Report of the Oceanographical Observations Taken on Board R. M. S. « Syunpu Maru » in the Mutu-wan in September, 1932 [*Relatio de observationibus oceanographicis navi* « Syunpu Maru » *peractis, mense Septembri 1932*]. (In Jap., Engl. Abstr.). 3 Tables, 73 pls., 1 photo. Journ. Oceanogr., VII, 1, 3-4 & 331-366. Kobe (1934). **a - 1366**

Results of the oceanographical observations taken in the Mutu-wan, a bay on the north coast of Northern Japan, which are summarized under the following headings: Depth to the bottom, Temperature, Salinity and Density, Currents, Chemical Elements, Oxygen, Hydrogen Ion Concentration, Silicates, Phosphates, Color of the Sea and Transparency, Bottom samples, Plankton, Meteorological Observations.

**Paspaleff G. W. & Peneff N.** - Beitrag zur Kenntnis der Hydrologie des Varnaer Sees [*Contributio in cognoscendam lacus* Varna *hydrologiam*]. 2 Tab., 7 Fig., Arb. Biol. Meeresstation Schwarz. Meer Varna, Bulg., 3, 1-16. Sofia (1934). **a - 1367**

Der Varnaer See vor und nach dem Kanal 1908. Die ausgeführten Untersuchungen in Bezug auf Temperatur, Salzgehalt, Schwefelwasserstoff, Uebereinstimmung mit dem Schwarzen Meer. Die Frage über die Bildung von Schwefelwasserstoff.

**Pettersson Hans** - Submarine Daylight and the Transparency of Sea Water [*De luce diurna submarina deque maris perluciditate*]. 6 figs., 1 table. Journ. Cons. Expl. Mer., X, 1, 48-65. Copenhague (1935). **a - 1368**

Description of the construction and use of the submarine actinometer, which is a simple contrivance used by the A. in collaboration with Mr. S. Landberg for measuring submarine daylight. Description of the transparency meter (T. M.) and of the scattering meter (S. M.). The results show that both the T. M. and the S. M. allow of a rapid survey of the optical properties of sea water *in situ*.

**Picotti Mario** - Il regime termico delle acque della Laguna Veneta [*De aquarum ratione thermica in lacuna Veneta*]. Tab. & 1 diagr., Atti R. Istit. Veneto Sc. Lett. & Arti, XCIV, Parte II, 87-103. Venezia (1935). **a - 1369**

Dati di osservazione. Esame dei dati. Conclusioni sul regime termico lagunare.

**Picotti Mario** - Chimie générale (2me Rapport) Développement et approximation de la réfractométrie de l'eau de mer [*Chemia generalis. (Relatio secunda). De aquae marinae refractometria*]. Rapp. Pr.-Verb. Comm. Expl. Scient. Médit., IX (nouv. sér.), 31-38. Paris (1935). **a - 1370**

( — ) V. Memoria CCXXI, R. Comitato Talassografico Italiano. Venezia (1935).

Résumé historique des méthodes pour déterminer la salinité par l'indice réfractométrique. Ce rapport contient un aperçu des recherches océanographiques dans lesquelles cette méthode réfractométrique a été adoptée. Parmi celles-ci l'A. considère seulement quelques-unes, avec des mesures faites dans le seul but de préciser la dépendance entre le dit indice et la teneur totale en sels d'une eau de mer.

**Platania Giovanni** - La superficie di estrema visibilità in mare da alta quota [*De maxima maris perluciditate, a magnis perspecta coeli altitudinibus*]. Ann. R. Ist. Sup. Nav., III, 2, 111-118. Napoli (1934). **a - 1371**

L'A. fa seguito a tre altri suoi lavori: La trasparenza del mare da alta quota. « Boll. Soc. Nat. », Napoli, vol. 41, 1930. La trasparenza del mare e la visibilità da alta quota. « Notiz. tecn. dell'Aeron. » Roma, vol. 6, 1930. Trasparenza del mare e visibilità da alta quota. « Nuovo Cimento », vol. 8, 1931; accenna all'equazione della concoide, da lui ritrovata, ad esperimenti per controllare i risultati da lui ottenuti applicando la proprietà della concoide refratta e dimostra che tali risultati affermano la necessità della conoscenza di tale equazione da parte di coloro che vogliono trattare il problema della visibilità in mare d'oggetti sommersi.

**Rakestraw Norris W. & Lutz Frank B.** - Arsenic in Sea Water [*De arsenico in aqua marina*]. 2 tabl., Biol. Bull., LXV, 3, 397-401. Lancaster, Pa. (1933). **a - 1372**

The data yield two important general results: 1) Failure to bear out the previous findings of Gauthier, who reported a considerable increase in As concentration with depth. On the contrary, although a small amount of the As may be removed from the water at certain stations by Diatoms etc., this process is not nearly so important or general as in the case of phosphorous. 2) Corroboration of the assumption of Atkins and Wilson that the greater portion of the As in sea water is present in the form of arsenite.

**Rakestraw Norris W.** - Studies on the Chemistry of Sea Water [*De aquae maris chemia*]. Woods Hole Oceanogr. Instit., Rep., 1933, App., 28-29. Woods Hole, Mass. (1934). **a - 1373**

Continuation of an intensive chemical survey of the Gulf of Maine; in addition to routine analysis, samples, collected during the trips of the « Atlantis » from June to October 1934, were brought back to the chemical laboratory of the Institution for work on boron, iron, copper, and for other purposes. Study of the significance of nitrite in the nitrogen cycle. Start of a collection of the ash residues of various marine organisms.

**Regnard M. P.** - Sur un dispositif destiné à éclairer les eaux profondes [*Apparatus qui aquas peraltas illuminat*]. 1 fig., Résult. Camp. Scient. accomplies par Albert I, Prince Souverain de Monaco. Fasc. LXXXIX, 361-363. Monaco (1934). **a - 1374**

Il s'agit d'une lampe électrique et d'une pile suspendues sur un cardan et placées dans une nasse. Le tout sera mis en essai dans les grands fonds près des Açores. Dans des expériences faites devant Groix par un fond de 20 mètres environ, la lampe a fonctionné et la nasse a rapporté plusieurs espèces de crustacés.

**Rehner John Jr.** - The Structure of Water and Ionic Solutions [*De aquae structura deque solutionibus jonicis*]. Rev. Sc. Instr., V, 1, 2-3. Lancaster & New York (1934). **a - 1375**

On hand of an important recent publication by Bernal and Fowler (See: Journ. Chem. Phys., 1, 515, 1933) the author gives a summary of a theory of the structure of water and aqueous ionic solutions that is unusually successful in accounting for the behaviour of aqueous systems, and particularly the anomalous mobilities of the ions (OH) and ($OH_3$).

**Revelle R.** - Physico-Chemical Factors Affecting the Solubility of Calcium Carbonate in Sea Water [*Factores physico-chemici qui influunt in solubilitatem carbonati calcici in aqua marina*]. 1 table. Journ. Sedim. Petrol., IV, 3, 103-110. Tulsa, Okla. (1934). **a - 1376**

Results of a quantitative study of the relative effects on the solubility of $CaCO_3$ in sea water of variations in salinity, temperature, hydrostatic pressure, and carbon dioxyde content, which show that it is at least certain that surface sea water at a temperature of 30° C is saturated with $CaCO_3$. A table is presented showing the comparative effects on the solubility of changes in salinity, temperature, depth, and carbon dioxide content. It is shown that except for water in equilibrium with the atmosphere the most important factor controlling the solubility of $CaCO_3$ in sea water is the $CO_2$ content of the water, which, in turn, is chiefly dependent upon the nature and amount of biological activity.

**Revelle R. & Fleming R. H.** - The Solubility Product Constant of Calcium Carbonate in Sea Water [*Agitur de numero constante quoad solutionis productum carbonati calcici in aqua marina*]. 3 tabl. (Repr.) Proc. 5th Pacif. Sc. Congr. III, A5, 19, 2089–2092. Vancouver B. C. (1933). **a - 1377**

Account of an investigation carried out in an attempt to delimit experimentally the solubility product of calcium carbonate in sea water, by means of numerous equilibration experiments. The analytical data obtained corroborate the conclusion of previous workers that surface sea water under tropical conditions of temperature is approximately saturated with calcium carbonate, and show that it is obvious that variations in pH within the normal range of sea water, that is, between 7.7 and 8.2, are more important in the precipitation or solution of calcium carbonate than changes in salinity.

**Revelle R. & Moberg E. G.** - The Probable Rôle of Boron in the Buffer Mechanism of Sea Water [*De boro eiusque effectu in mechanismo occludenti aquae marinae* (*Anglice*: Buffer mechanism)]. 2 figs. (Repr.) Proc. 5th Pacif. Sc. Congr., III, A5, 29, 2147–2151. Vancouver, B. C. (1933). **a - 1378**

Results of the determination of the hydrogen-ion concentration, the titrable base, and the total carbon dioxyde of the sea water carried out on a large number of sea-water samples over a period of several years at the Scripps Institution of Oceanography. The discussion shows that the behaviour of the buffer mechanism of sea water is different from what it would be if it consisted entirely of salts of carbonic acid. Although it is not possible at this time to give a complete quantitative expression of the rôle played by the boron compounds, it is shown that they are the causes of many of the problems that have baffled investigators of the buffer relations in sea water.

**Richard J.** - Sur un appareil destiné à démontrer que la quantité des gaz dissous, dans les grandes profondeurs de la mer est indépendante de la pression [*Agitur de novo apparatu qui demonstrat gas solutum in maris maximis profunditatibus liberum esse a pressione*]. 5 fig. sur pl. **Richardson B.** - Photo–Electric Measurements of the Penetration of Light in Sea Water, and the Results of Laboratory Photo–Electric Measurements of the Absorption Coefficient of Sea Water [*De mensuris photoelectricis quoad lucis penetrationem in aquam marinam. Agitur etiam de mensuris photoelectricis in laboratorio peractis quoad aquae marinae absorptionem eiusque coefficientem*]. 1 table (Abstr.), (Repr.). Proc. 5th Pacif. Sc. Congr. III, A5, 17, 2083–2084, Vancouver B. C. (1933). **a - 1380**

Abstract of a paper which will appear in the « Scripps Instit. Bull », containing the results of a study carried out in order to determine quantitatively the penetration of light for various depths in sea water during the summer, of 1930, in an area seven miles off the coast of La Jolla Calif. by submerging a Burt photo-electric sodium-vacuum cell to various depth levels in the ocean. During the summer of 1931 sea-water samples were brought to the laboratory and the absorption coefficient of sea water determined by using photo-electric cells which were sensitive to a definite band of wave length. These results summarized in a table show that in the laboratory experiments the absorption coefficients are higher than those for pure water.

**Riddel W. A.** - A Study of the Denigé Method for the Analysis of Phosphate in Sea Water [*Methodus* Denigé *ad analysim phosphatorum in aqua marina ducendam*]. Ann. Rep. Biol. Board Canada, 1933, 99. Ottawa (1934). **a - 1381**

In view of several difficulties experienced in the use of the Denigé method for the determination of phosphates in the waters of the strait of Georgia, a preliminary study has been made of several phases of the application of this method. This paper contains a brief summary of the results obtained.

**Riddel W. A.** - The Reduced Strychnine Method for Determining Nitrates in Seawater [*Methodus per strychninam ad nitrata in aqua marina determinanda*]. Ann. Rep. Biol. Board Canada, 1933, 99. Ottawa (1934). **a - 1382**

Description of a satisfactory procedure developed for the estimation of the dissolved nitrates in the waters of the strait of Georgia, involving the use of a Duboscq colorimeter, by means of the reduced strychnine method.

**Schulejkin W.** - Active Films on the Surface of the Sea [*De filmis activis ad maris superficiem*]. (In Russ. & Engl.). 2 figs. C.-R. Acad. Sc. U. R. S. S., I, 7/8, 494-501. Léningrad (1935). **a - 1383**

Author gives an account and an indirect confirmation of an hypothesis concerned with the origin of the quaint distribution of small ripples on the surface of the sea which forms such a fantastic and at the same time an apparently fixed pattern, showing that it depends upon the presence of films consisting of active surface substances. He gives also the description of a method of investigation which has permitted to determine the surface tension immediately upon the surface of the sea, *in situ*. A special apparatus designed for the purpose is also described here.

**Seiwell H. R.** - Studies of Phosphorus and Oxygen Content of Western North Atlantic Basin [*De phosphoro et oxygeno quae continentur in sinu occidentali Oceani Atlantici Nordici*]. Woods Hole Oceanogr. Instit., Rep., 1933, 32-33. Woods Hole. Mass. (1934). **a - 1385**

Summary of a report including a descriptive discussion of the horizontal and vertical distribution of oxygen, the seasonal variations, and a theoretical discussion and calculation of the annual oxygen consumption and its relation to biochemical activity, and of another report on the nutrient phosphorus content of the western North Atlantic Basin. Indication of two other papers prepared for publication.

**Skopintzew B. A.** - The Determination of Iodine in Sea-Water [*Jodii in aqua marina determinatio*]. (In Russ., Eng. Rés.). 10 tables, Trans. Oceanogr. Inst., III, 3, 105-119. Moscow (1933). **a - 1386**

Description of a new method of determination of iodine-content in sea-water, elaborated in order to obtain more exact results than those obtained by the Reith's method. Accuracy and practical advantages of the new method.

**Skopintzew B. A.** - Bestimmung von kleinen Jodidmengen in Gegenwart von viel Chloriden und Bromiden [*Determinatur paululum jodurorum, chloruris plurimis et bromuris praesentibus*]. Ztschr. analyt. Chem., XCII, 175-184. München (1934). **a - 1387**

**Slocum Giles** - Sea Surface Temperature Summary for the Extreme Southeastern Gulf of Mexico 1912-33. [*De maris temperatura superficiali in extrema regione sud-orientali sinus Mexicani*]. 1 table. Monthly Weath. Rev., LXIII, 1, 33 & 6, 204. Washington D. C. (1935). **a - 1388**

Monthly and annual mean sea-surface temperatures in the extreme Southeastern Gulf of Mexico, computed to whole degrees, for the area which comprises the three 1° squares, 23° N. to 24°N., and 84°W. to 87°W., and lies immediately north of the Yucatan Channel, and from 90° W. to 94° W. and from 21° N. to 25° N.

**Soule Floyd M.** - Physical Oceanography of the Grand Banks Region from Data Collected by the International Ice Patrol Service in the Spring and Summer of 1933 [*Oceanographia physica regionis nomine* Grand Banks *ex datis collectis a Servitio internationali pro glacierum vigilantia, vere et aestate A. 1933*]. Woods Hole Oceanogr. Instit. Rep., 1933, 33-34. Woods Hole. Mass. (1934). **a - 1389**

Brief summary of the results of observations on temperatures and salinities carried out during the Ice Patrol season of 1933; data collected for the construction of surface isothermal charts of the region in the vicinity of the Grand Banks of Newfoundland. Results of a post-season northern cruise in the waters between Newfoundland and Labrador. A complete account of the work is published in U. S. Coast Guard Bulletin n. 23.

**Strand Embrik & Ozolinš** - Hydrographische Untersuchungen der Hydrobiologischen Station im Rigaer Meerbusen und im Baltischen Meere. V. [*Investigationes hydrographicae a Statione hydrobiologica peractae in Sinu Cylipeno* (*idest in Sinu Civitatis Rigae*) *et in mari Baltico. V*]. (Lett. Text. Dtsch. Rés.). Tab. Fol. Zool. & Hydrobiol. V, 2; VII, 1, 290-305; 30-37. Riga (1934). **a - 1390**

Diese Untersuchungen sind auf dieselben Linien wie früher ausgeführt worden. Die Angaben sind in Tafeln mit Datum, Zeit, Breite, Länge, t°, S. °/00 wiedergegeben.

**Thompson Thomas G. & Bremner Raymond W.** - The Determination of Iron in Sea Water [*De ferri in aqua marina determinatione*]. 1 fig., 2 tables. Journ. Cons. Expl. Mer, X, 1, 33-38. Copenhague (1935). **a - 1391**

1. A method has been described for the determination of iron in sea water capable of detecting as low as 0.00002 milligram atoms (about 0.001 mg.) of iron per kilo. 2. Fluorides and organic matter interfere with the determination and must be removed. 3. Errors that might be produced by the presence of sulfate ions are compensated by the preparation of standards containing equivalent quantities of these ions.

**Thompson Thomas G. & Bremner Raymond W.** - The Occurrence of Iron in the Waters of the North-East Pacific Ocean [*De ferro reperto in Oceano Pacifico Nord-occidentali*]. 5 figs., 5 tables. Journ. Cons. Expl. Mer., X, 1, 39-47. Copenhague (1935). **a - 1392**

Results of the analysis of surface samples whose collection began in 1931 and extended over a period of two years, with the exception of three months in 1932, in San Juan Channel from the Observation Platform of the field laboratories at Friday Harbor, Washington. A decided seasonal variation in the soluble and insoluble iron content of sea water has been observed. The minimum values occur in the spring and summer and the maximum in the winter. A number of factors influence the distribution of the total iron. The iron content of the open ocean is considerably less than that of coastal and inland waters. A high total content occurs between 800 and 1100 meters, which is the same zone where extremely low oxygen values were secured.

**Tully J. P.** - A Preliminary Oceanographical Survey in Nootka Sound [*Exploratio prior oceanographica regionis* Nootka Sound]. Ann. Rep. Biol. Board Canada, 1933, 101. Ottawa (1934). **a - 1393**

Account of an investigation made during the course an expedition on board the « Wm. J. Stewart » of one stage of the summer physicochemical conditions of the three inlets and of the sea directly contiguous to Nootka Sound. The investigation consisted of sampling the column of water at each of eighteen stations in Nootka sound, and of observations of time, tide, depth, temperature, density, and an analysis for pH and dissolved oxygen, silicates, and phosphates at the standard depths used at the station. Influence of changes in the characteristics of the tidal current or the distribution of the densities and temperatures of the waters around Nootka bank on migration of fish that takes place through this area.

**Tully J. P.** - Investigation into the Coeruleo-Molybdate Method of Colorimetric Analysis for Dissolved Phosphate [*Investigationes in methodum ceruleo–molybdenicam pro analysi colorimetrica phosphatorum solutorum*]. Ann. Rep. Biol. Board Canada, 1933, 102. Ottawa (1934). **a - 1394**

Results of some observations made with a view to determine the relationship between the true and apparent concentrations of phosphate as evinced by the test under application of the coeruleo-molybdate method of Denigé.

**Vatova A.** - L'anormale regime fisico-chimico dell'alto Adriatico nel 1920 e le sue ripercussioni sulla fauna [*De abnormi regimine physico–chimico maris Hadriatici septentrionalis A. 1929 eiusque effectibus in faunam*]. 3 carte, Thalassia, I, 8, 1-49. Venezia (1934). **a - 1395**

## Energia marium – Penetratio energiæ solis radiantis.

**Claude Georges** - Sur l'énergie thermique des mers. La campagne de « la Tunisie » [*Agitur de energia thermica marium. Navis* « Tunisie » *navigatio*]. C. R. Acad. Sc., CC, 12, 993-997. Paris (1935). **a - 1409**

Exposé du second voyage de l'A. dans les mers du Brésil en vue d'organiser une installation technique permettant d'utiliser dans la production d'énergie les différences de température entre les eaux de la surface de la mer et celle qui existe aux grandes profondeurs. Etant donné qu'il avait déjà réussi d'installer des usines fixes côtières et qu'il y avait rencontré de très grandes difficultés pour l'immersion du tube de prise d'eau froide, l'A. a pensé qu'il serait peut-être plus facile d'immerger un pareil tube en pleine mer, à bord d'un bateau pouvant constituer une usine flottante se déplaçant. Dans la présente note il énumère sommairement quelques péripéties de sa nouvelle entreprise.

**Claude Georges** - Sur la campagne de la « Tunisie » [*Agitur de navigatione navis* « Tunisie »]. 1 fig. C. R. Acad. Sc., CC, 17, 1454-1458. Paris (1935). **a - 1410**

Complément à la Note précédente (v. C. R., CC, 993, 1935) concernant la facilité des mouillages en haute mer et par fond de 600 m. à 1000 m. et observations faites au cours des mouillages sur la température sous-marine prise avec deux thermomètres à renversement dont les indications simultanées ne différaient jamais plus de 0°,1. L'A. décrit ensuite l'immersion d'un tube nécessaire pour l'utilisation de l'énergie provenant de la différence des températures de l'eau de surface et de l'eau profonde en vue de fabrication de la glace avec un rendement exceptionnel, grâce à l'eau froide du fond.

**Halbfass Wilhelm** - Kann das Mittelmeer zur Wasserkraftausnützung dienen? [*Num vis hydraulica percipi potest a mari mediterraneo?*]. Peterm. Mitt., LXXX, 1, 17. Gotha (1934). **a - 1411**

Kurze Erörterung eines Projektes den Niveauunterschied zwischen dem Spiegel der tiefsten Depression der Sahara, der Qattara, und dem des Mittelmeeres zu einer Kraftverwertung auszunutzen. (S. auch: Geogr. Journ. LXXXII, 4, 1933).

**Halbfass Wilhelm** - Der Jahreswasserhaushalt der Erde. Ist er quantitativ eine konstante Grösse? [*De aquae terrestris annua oeconomia. Num ea est constans?*]. 1 Tab., Peterm. Mitt. LXXX, 5, 6, 137, 140; 177-179. Gotha (1934). **a - 1412**

Der Vf. erörtert die folgenden Probleme: 1. Wie gross ist der numerische Betrag der Jahresbilanz des Wassers der Erde? 2. Ist dieser Betrag, von periodisch wiederkehrenden kleineren Abweichungen nach unten oder nach oben abgesehen, eine konstante Grösse oder nicht? (Siehe auch Bemerkungen zu diesem Artikel von Prof. Dr W. Meinardus, Peterm. Mitt., LXXX, 7/8).

**Hulburt E. O.** - The Blue Light in Sea [*De maris luce coerulea*]. Science, LXXXI, 2099, 293-294. New York (1935). **a - 1413**

An attempt to explain the interesting observation made by Dr. Beebe during his descents into the sea in the bathysphere during the summer of 1934, that from 200 feet down through the spectroscope the blue in the water is gradually replaced by violet, though at no time of the descent there is any trace of violet or lavender. It seems that the blue fluorescence of the eye when subjected to ultra-violet and violet light may be the explanation of this fact.

**Martin Henry** - Le navire « Tunisie » usine flottante pour l'utilisation de l'énergie thermique des mers chaudes par le procédé Claude–Boucheret. [*Agitur de navi* « Tunisie » *quae considerari potest ac officina fluctuans qua percipi potest marium energia thermica ex methodo a* Claude–Boucheret *inventa*]. 8 fig. Génie Civil, CV, 12, 253-256. Paris (1934). **a - 1414**

Sur le départ du navire de Dunkerque pour le Brésil et sur les travaux que la « Tunisie » devra accomplir sur place.

**Spakovskij B.** - Dispersion of Supersonic Waves in a Liquid [*De undis ultrasonoris earumque dispersione in liquidum*]. C. R. Ac. Sc. U. R. S. S., III, 21 Sept., 588-594. Léningrad (1934). **a - 1415**

Simple theoretical considerations lead the author to deduce that dispersion of sound waves in liquids will only occur if vibratory degrees of freedom contribute appreciably to the specific heat at constant pressure. He communicates the results of measurements of ultrasonic wave-length which have been carried out by using an acoustic interferometer which consists of a piezoelectric oscillator and a reflector, the frequencies of the supersonic waves generated being measured by a wavemeter. Within limits of error of 1 % no change in the velocity of propagation of the waves in water and various organic liquids could be detected.

**Carruthers J. N.** - The Flow of Water through the Straits of Dover as Gauged by Continuous Current-Meter Observations at the Varne Lightvessel (50°56′ N. – 17′ E.) Part II. Second Report on Results Obtained [*De currentiis, in fretis quae ab urbe* Dover *nomen capiunt, ex diuturnis observationibus peractis per apparatum metatorium in navi farum ferente ad* Varne *pertinente constitutum. Pars secunda: Secunda relatio de resultatibus obtentis*]. 7 tables. Fish. Invest., Min. Agr. & Fish., Ser. II, XIV, 4, 4-67, H. M. Stat. Off. London (1930). **a - 1423**

Part I of this report (published in 1928) took account of the period June 1926 to January 1928. In this second part the results from the Varne Drift-Indicators Observations up to the 11th April, 1935, are presented. Section I. Introduction: General remarks as to the extent and nature of data. The material - source, and comments on reliability. Intended applications. Section II. Comments on data. Section III. The water movement of the deeper levels of Dover Straits. Section IV. The seasonal strength variations of the Dover Straits current compared with salinity through the year. 6 Appendices.

**Carruthers J. N.** - A « Vertical Log » Current-Meter [*Apparatus currentiarum metator nomine* « Vertical Log. »]. 6 Journ. Cons. Expl. Mer., X, 2, 151-168. Copenhague (1935).

(—) Voir: Rev. Hydrogr., XII, 2, 63-79. Monaco (1935). **a - 1424**

Vertical log is the convenient name which, for brevity and to avoid confusion, has been proposed for a simple, cheap, and very study current-measuring apparatus recently tested. The purpose of the instrument and detailed description of it. Tests and results. References.

**Chevey P. & Carton P.** - Les courants de la Mer de Chine méridionale et leurs rapports avec le climat de l'Indochine [*De currentiis Maris Sinensis meridionalis earumque correlationibus cum climate Indosinensi*]. 8 pl. h. t. Inst. Océan. Indoch., Note 26-e, 1-13. Hanoï (1935). **a - 1425**

Après une brève remarque contenant une précisation du sens qu'il convient de donner au mot « courant » en océanographie, les A.A. communiquent les résultats des recherches sur les courants marins de la Mer de Chine que l'Institut Océanographique de l'Indochine poursuit d'une façon particulièrement serrée depuis deux ans. Sur 8 planches hors texte sont indiqués: les courants de la Mer de Chine méridionale, le régime des vents sur la péninsule indochinoise, les coupes hydrologiques aux divers secteurs, les isothermes de l'air et de la surface de la mer, en mousson d'hiver de Nord-Est et, en mousson d'été, les isothermes à 50 m. de profondeur, à 100 m. et les lignes d'égal degré de continentalisme pour l'Indochine.

**Deacon George E. R.** - Nochmals: Wie entsteht die Antarktische Konvergenz ? [*Quo modo efformatur cumvergentia antarctica ?*]. 2 Abb., 1 Taf. Ann. d. Hydrogr., LXII, 12, 475-478. Berlin (1934). **a - 1426**

An Hand weiterer Untersuchungen des von der letzten Zirkumpolar-Fahrt des Kgl. Britischen Forschungsschiffes « Discovery II » gewonnenen Beobachtungsmateriales bringt Vf. einen Nachweis, dass die Antarktische Konvergenz erheblich anders entsteht als es in seinen eigenen und in den von H. U. Sverdrup früher gemachten Annahmen zum Ausdruck gekommen ist. (S. auch « Ann. Hydr. », 8,

315, 1934). Vf. behauptet, dass sowohl für die Existenz der Konvergenz als auch für ihre Lage die Bewegungen des Tiefen– und Bodenwassers massgebend sind, weil sie nämlich über den Verlauf der Oberflächen–Strömungen entscheiden. Diese Annahme ist das Gegenteil zu den bisher von Sverdrup und Vf. verfochtenen Ansichten.

**De Buen Rafael** - Hydrographie du Détroit de Gibraltar en Mars 1933 (Croisières du navire « Xauen ») [*Sinus Gaditani hydrographia. Mense Martio 1933. Navigatio speculatoria navis* « Xauen »]. 4 Rapp. Pr.–Verb. Cons. Expl. Mer. Rapp. Atlantique, XCIII, 25-29. Copenhague (1935). **a - 1427**

Bien qu'il reste encore, pour connaître le régime du Détroit de Gibraltar, à déterminer exactement les caractéristiques du courant profond, et son influence dans l'Atlantique voisin, ces recherches ont précisé nos idées sur le régime des courants de surface dans la zone méditerranéenne voisine du Détroit de Gibraltar, sur l'existence d'ondes de marée profonde dans la zone inférieure du détroit, occupée par les eaux salées de la Méditerranée, et sur la transformation du courant inférieur en courant incliné vers la surface, par l'influence du relief du fond du Détroit de Gibraltar.

**Felber O. H.** - Oberflächenströmungen des Nordatlantischen Ozeans zwischen 15° und 50° N. B. [*De currentiis ad superficiem in Oceano Atlantico Sept. inter 15um et 50um l. N.*]. Aus dem Arch. Dtsch. Seew. Hamburg (1934). **a - 1428**

Auf Grund der vom Kon. Nederl. Meteorol. Inst. veröffentlichten Angaben hat der Vf. weiter zwölf monatliche Karten über die allgemeine Oberflächenzirkulation der oben angegebenen Zone ausgearbeitet mit besonderer Berücksichtigung des Aequatorialstroms, des Golfstroms, des Kanarienstroms und der Lage der wichtigsten Konvergenzlinien, d. h. südlich von der Neufundland–Bank und der subtropischen Konvergenzlinie. Die Abweichung des Oberflächenstroms von dem Windtrift ist auch erörtert.

**Goldsbrough G. R.** - Ocean Currents Produced by Winds [*De oceanicis currentiis a ventis excitatis*]. Proc. R. Soc., 148A, Jan. 1, 47-58. London (1935). **a - 1429**

It has been shown by Ekman and Jeffreys that the effect of a steady wind upon a plane rotating sea is to produce a current in a direction inclined to that of the wind. Under certain conditions, the resultant drift of the water is perpendicular to the wind, but the surface current is inclined at an angle of 45° to the wind. A comparison of prevailing winds and the corresponding surface currents at various points of the actual oceans has shown that the angle between the two varies considerably but in general it is less than 45°. There may be many causes for this difference between theory and observation; the purpose of this paper is to examine the effect of the curvature of the earth. It is shown that under the same conditions as those assumed by Ekman and Jeffreys, the angle will not be 45° except in the polar regions, where the law is found to hold. A further result appears from the analysis. The currents formed by winds which circulate in close curves are themselves moving in similar closed curves, but the latter curves are displaced to the westward. An application is made to the motions of the waters in the North and South Atlantic Oceans. (Author).

**Hachey H. B.** - The Replacement of Bay of Fundy Waters [*Aquarum amotiones in baja Fundy*]. 4 figs. Journ. Biol. Board of Canada, I, 2, 121-131. Toronto (1934). **a - 1430**

Comparative values for the replacements of bay of Fundy water have been determined for each year of the period 1924–1930 inclusive, by a consideration of the differences between the annual ranges of temperature at various levels in the bay of Fundy. These differences in annual ranges of temperature may be correlated to some extent with the average amount of drainage water from the St. John river system and the « adverse excess of wind ». (Author).

**Hachey H. B.** - Movements Resulting from Mixing of Stratified Waters [*De motibus ex mixtione aquarum stratificatarum*]. 5 figs. Journ. Biol. Board of Canada, I, 2, 133-143. Toronto (1934). **a - 1431**

Experiments in mixing steadily at one end of a laboratory tank an upper fresh water with a lower salt layer demonstrate surface and bottom movements to the mixing area and an intermediate movement of mixed water away from it, which correspond with observations made in an inlet of the sea into which fresh water discharges. If fresh water is merely added at the mixing area to the tank containing salt water the outward movement is at the surface, and there is no inward surface movement. (Author).

**Hachey H. B.** - The Effect of Storm on an Inshore Area with Markedly Stratified Water [*De tempestate apud litora eiusque effectibus aquarum valde stratificatarum causa*]. 4 figs., 3 tables. Journ. Biol. Board Canada, I, 4, 227-237. Toronto (1935). **a - 1432**

The hydrographical conditions in the water area off the south coast of Nova Scotia were investigated at a time during which a North Atlantic tropical cyclone was forming and subsequently moving along the characteristic track of these cyclones (Hachey 1934). Coincident with the formation and the subsequent movement of such a cyclone and repulsion of offshore surface waters to the south coast of Nova Scotia with consequent removal of intermediate and bottom waters. The mixing of the waters intensified by wind actions, at approaching storm. Markedly stratified waters are thus temporarily replaced by a body of thoroughly mixed water.

**Okada Mituyo** - Estimation of the Steady Surface Current in Coastal Waters Based on the Observation of Salinity and Soluble Silicate Content [*De aestimatione currentiae ad superficiem in aquis litoreis. Aestimationis fundamenta ponuntur in observationibus salsedinis atque etiam in silicato solubili*]. 2 figs., 2 tables. Bull. Jap. Soc. Sc. Fish., III, 3, 121-124. Tokyo (1934). **a - 1438**

Study of the possibility of application of Knudsen's law to determine the steady surface current in coastal waters based on the observation of salinity S, and soluble silicate content P. It allows the determination of the direction without distinguishing sense and the relative speed of the current, but does not give means for determination of the sense and the absolute magnitude of the current.

**Okada Mituyo** - A Graphical Method of Determining Ocean Currents [*Graphica methodus ad currentias determinandas*]. 2 figs., 2 tables. Bull. Jap. Soc. Sc. Fish., III, 5, 231-234. Tokyo (1935). **a - 1439**

To complete a previous study on « Estimation of steady surface current in coastal waters based on the observation of salinity and soluble silicate content » (Bull. Jap. Soc. Sci. Fish., III, 3, 121–124, 1934), the author studies the possibility of determining the sense and the absolute magnitude of the current by his method. He concludes that the method can be employed at least as first approximation, to estimate the horizontal flow of the surface layer.

1. Ort und Zeit der Aussetzung, Art der Flaschenposten. 2. Zeit der Strandung sowie Reisedauer. 3. Lage der Strandungsorte und ihre Abhängigkeit vom Aussetzungspunkte. 4. Abhängigkeit der Verteilung der Strandungsorte von den Windverhältnissen. 5. Verbleib der gleichzeitig ausgesetzten Flaschenposten. Der beschriebene Flaschenpostversuch im grösseren Umfange wurde in Gelegenheit der Ausführung der internationalen hydrographischen Beobachtungen im südlichen Kattegat ausgeführt.

**Schumacher Arnold** - Neuere Arbeiten über den Golfstrom im westlichen Atlantischen Ozean [*De ultimis operibus quoad* Golfstrom *in Atlantico occidentali*]. 1 Taf. Ann. d. Hydrogr., LXIII, 2, 53-58. Berlin (1935). **a - 1444**

Ueberblick über die Studien von Brooks, Church und Harwood, die sich auf Oberflächentemperaturbeobachtungen gründen, und über die Arbeiten von Jacobsen (« Dana »), Iselin (« Atlantis ») und Wüst, die den Golfstrom als Problem der Tiefsee behandeln, nebst mancherlei Angaben über den Golfstrom nach Marmer und anderen Quellen (Vf).

**Tait John B.** - Surface Drift-Bottle Results in Relation to Temperature, Salinity and Density Distributions in the Northern North Sea [*De resultatibus obtentis per buticulas fluctuantes pro resultatibus obtentis ex densitatis et salsedinis distributione in Mari nordico sept.*]. 9 figs. Rapp. Pr.-Verb. Cons. Int. Expl. Mer, 3ème partie, Appendices 1933-1934, LXXXIX, 69-79. Copenhague (1934). **a - 1445**

Advantage of drift-bottle examinations for the study of the self–contained regions of stream-currents prevailing in the North Sea. Evidence of agreement between observations derived from data of temperature and salinity, especially as regards the direction of currents, and, with some variations, also the velocity. Great difficulty in giving « normal » or « average » determinations owing to the eceptional variations in hydrographical and hydrodynamical aspect in the Northern North Sea.

**Takegami Tohichiro** - The Boundary Value Problem of the Wind Current in a Lake or a Sea [*De problemate quoad valorem limitem currentiae per ventum excitatae in lacu et in mari*]. Mem. Coll. Sc., A, XVII, 305-318. Kyoto (1934). **a - 1446**

The effect of the coast on the wind current has already been investigated by W. Ekman and several other investigators, but their solutions are appropriate only when the tractive force of the wind vanishes at the coast; otherwise

they do not really satisfy the boundary condition that the component current normal to the vertical sea wall is nil at the coast. In the present paper the writer investigates exactly the boundary value problem when the tractive force of the wind is nil at the coast, but is uniform all over the sea surface. Taking into account the term of the horizontal «Austausch», he succeeds in obtaining a complete solution for the steady state. (From an abstract of the author).

Summary of a report by T. Gustavson and B. Otterstedt on current observations in the Baltic made by the Swedish Hydrographic Expedition during 1931 on board the «Skagerak», published in «Svenska Hydrografisk-Biologiska Kommissionens Skrifter, Ny Serie: Hydrografi XI».

## Aestus et apparatus mareographici - Maris livellus.

**Berg L. S.** - Niveau de la Mer Caspienne dans les Temps historiques [*De livello maris Caspii, temporibus praeteritis*]. (En russe, rés. franç.). 5 fig., 2 tabl. 4 cartes h. t. Probl. Fis. Gheogr. (Probl. Géogr. Phys. Acad. Sc.), I, 11-64. Leningrad (1934). **a - 1454**

Après avoir résumé les informations concernant le niveau de la Mer Caspienne contenues dans les œuvres: (1) des écrivains de l'antiquité, (2) des écrivains musulmans (X–XV siècles), (3) les données recueillies au XVème siècle, (4) celles du XVIIème siècle, (5) du XVIIème siècle et enfin les études du niveau de la Mer Caspienne accomplies (6) au XIXème siècle jusqu'à l'an 1830 et (7) les résultats des observations exécutées sur une échelle de marées à Bakou depuis 1830 jusqu'à nos jours, l'A. réunit dans un tableau tous les résultats obtenus en ce qui concerne la hauteur du niveau de la Mer Caspienne et, après avoir rappelé que le niveau contenant *Cardium edule* ne surpasse nulle part sur les côtes de cette mer le niveau actuel de plus de 5 mm., conclut que le niveau de la Mer Caspienne ne s'était jamais elevé au cours des temps historiques de plus de 4 mm. au-dessus de son plus bas niveau dans le XIX–XXème siècles, observé en 1925.

**Bergsten Folke** - Höjdbestämningar vid Sveriges kuster medelst hydrografisk nivellering [*De livello ad litora Suetia determinato per livellationes hydrographicas*]. (Engl. rés.). Tabl., Medd. Stat. Met.- Hydrogr. Anst., VI, 4, 1-10. Stockholm (1935). **a - 1455**

Precision levelling accomplished in the years 1886-1905. Comparison between the heights of hydrographical levelling obtained on the basis of the mean water stages of calm months and those of precision levelling, resulting slope of the sea-level as well as land- elevation, errors concerned with this and the necessity of a new precision levelling.

**Chapman S.** - The Lunar Atmospheric Tide at Honolulu, 1905-1924 [*De aestu atmosphaerico lunari in* Honolulu *a 1905 ad 1924*]. 1 fig., tables. Quart. Journ. R. Meteor. Soc., LXI, 259, 189-194. London (1935). **a - 1456**

This paper continues a series dealing with the lunar atmospheric tide, in which determinations have been given for thirteen stations. This tide is determined from twenty years' hourly barometric values at Honolulu. The amplitude of the tide is in fair accordance with that found at other stations in about the same latitude. The harmonic coefficients for the first four components of the solar diurnal variation are also given.

**Corkan R. H.** - An Annual Perturbation in the Range of Tide [*De annua perturbatione in aestuum regimine*]. 2 figs., 9 tables. Proc. R. Soc., A, CXLIV, 537-559. London (1934). **a - 1457**

The paper establishes the existence of an annual perturbation in the range of tide. Direct analysis of hourly heights for an annual perturbation in the principal constituent of semidiurnal tide showed the perturbation to be consistent from year to year, and to exist generally in British waters and throughout the world at large. Analysis of high and low waters further confirmed the results. The

paper concludes with a short discussion on possible causes of an annual perturbation in the range of tide. The method by which the residual tide was obtained is described in appendices, which also contain tables for the direct analysis of hourly heights for an annual perturbation in the range of tide.

**Courtier O.** - Données numériques concernant les marées des côtes de France [*De aestibus in maribus gallicis*]. 71 pp. Imprim. Nationale. Paris (1934). **a - 1458**

**Demel Kazimierz** - Wahania poziomu morza przy Helu w uzaleznieniu of przbiegu wiatrow [*De livelli marini oscillationibus in* Hel (*in litoribus Polonis Maris Baltici*) *pro ventorum directione*]. (En polon., rés. franç.). 2 ill., 5 tab. Kosmos, LIX, 3, 251-262. Lwów (1934). **a - 1459**

Résultats des observations du niveau de la mer sur la côte polonaise marquées en décimètres d'après l'échelle locale du port de Hel, réunis dans des tableaux. Les observations ont été faites au cours de deux années avec référence spéciale à l'action des vents sur les variations du niveau de la Baltique. Discussion des causes qui déterminent l'action des vents.

**Dubov V. P.** - Die Seiches der Ostsee und deren Zusammenhang mit den Leningrader Ueberschwemmungen [*Sessae maris Baltici earumque correlationes cum inundationibus Leningradensibus*]. (In Russ. u. Deutsch.). 6 Abb., 1 Tab. C. R. Acad. Sc. URSS, I, 1, 37-46. Léningrad (1935). **a - 1460**

In der vorliegenden Arbeit betrachtet Vf. die Ostsee mit ihren Meerbusen als ein geschlossenes Becken, welches nur durch schmale und seichte Meerengen mit der Nordsee in Verbindung steht, und studiert ihre eigenen Schwingungen oder Seiches mit besonderer Berücksichtigung der Möglichkeit ihres Zusammenhanges mit den Ueberschwemmungen in Leningrad. Die Ostsee-Seiches wurden vom Vf. nach der bereits zur Untersuchung der Seiches der japanischen Buchten und Seen, bzw. des Baikalsees, erfolgreich angewandten Methode der Modelle, untersucht, und die Ergebnisse mit den aus der Untersuchung der Mareogramme erhaltenen Resultaten, verglichen.

**Griesel R.** - Die Beziehung zwischen Gezeiten, Strömungen und Salzgehalt in der Trave [*Correlationes inter aestus, currentias, salsedinem ad* Trave *pertinentes*]. Mitt. Naturhist. Mus., 2 Reihe, 37. Lübeck (1934). **a - 1461**

**Hachey H. B.** - Tidal Mixing in an Estuary [*Aestuum mixtio in aestuario*]. 3 figs., 2 tables. Journ. Biol. Board Canada, I, 3, 171-178. Toronto (1935). **a - 1462**

Large scale mixing in the region of the tidal reversing falls of the Saint John river water with salt bay of Fundy water gives light mixed water traceable during spring freshets as far as Grand Manan. When moving out this water may cause renewal of the bay of Fundy, at a rate of over 4,000,000 cu. ft./sec. (over 97,000,000 litres/sec.). The mechanism involved and the effect of mixing of the adjacent waters are dealt with in this paper.

**Haedicke J.** - Die irdischen Ursachen der Gezeiten und ihre Bedeutung für die Kontinent-Verschiebungs-Theorie. Ein Beitrag zur Energetik des Aethers [*De aestuum causis terrestribus earumque momento pro terrarum continentium declinatione. Contributio in aetheris energeticam studendam*]. 147 S. I. Hillmann. Leipzig (1934). **a - 1463**

**Henry Jean** - Le golfe du Morbihan au point de vue océanographique [*Sinus* Morbihan *ex oceanographia*]. 3 cartes. Bull. Soc. Océanogr. France, 81, 1409-1413. Paris (1935). **a - 1464**

Dans le présent article l'A. comble une lacune qui s'est vérifiée dans une petite étude récente publiée par lui sous le titre « Le golfe de Morbihan, Méditerranée bretonne », (nº spécial, revue « Morbihan », Vannes), dans laquelle il n'a pu, faute de place, consacrer que quelques lignes aux questions intéressant particulièrement l'océanographie de ce golfe. Il formule ici quelques considérations sur la structure de ce golfe, le régime des marées auquel il est soumis, l'origine et les transformations de son rivage, et enfin la biologie de ses eaux.

**Legrand Jean** - Sur l'utilisation des observations du niveau moyen des mers en vue de la recherche des cycles climatériques [*De utilitate percipienda ex observationibus livelli medii marium pro investigationibus in cyclos climatericos*]. 1 graph. C. R. Acad. Sc., CC, 7, 573-575. Paris (1935). **a - 1466**

Résultats d'une comparaison faite par l'A. entre ses tracés comparatifs des précipitations basés sur les références des postes pluviométriques de la zone tempérée echelonnés entre les longitudes de Dakar et de Marseille et les courbes, élaborées par MM. Ch. Lallemand et Prévot, des oscillations du niveau moyen de la mer sur le littoral français depuis 1851. Il semble résulter de cette comparaison une large généralisation de la notion d'une cause commune aux précipitations d'origine Atlantique, la mer se comportant comme un vaste pluviomètre sur le littoral français.

**Marguet F.** - Marées stationnaires du large et marées progressives littorales [*De fixis aestibus longe a litoribus deque aestibus progredientibus apud litora*]. 3 croquis. Ann. d. Géogr., 15 janv., 37. Paris (1935). **a - 1469**

L'A. explique d'une manière élémentaire les mouvements de marée de la masse liquide répandue sur la surface du globe. Il fait une synthèse expliquant la conception du phénomène essentiel qui donne lieu aux marées constatées sur les rivages, d'après les hypothèses de l'hydrographe américain Harris, se référant aux bassins océaniques à résonance et concernant les marées stationnaires au large et leur transmission aux eaux côtières qui les bordent, donnant lieu à des marées progressives littorales. L'A. illustre le cas particulier de certaines mers fermées et de certains estuaires de rivières, où les phénomènes se compliquent d'« ondes supérieures ou composées ».

**Marmer H. A.** - On the Determination of Mean High Water [*De media determinanda quoad maris accessum*]. 5 figs. Amer. Journ. Sc., XXVI, 153, 332-343. New Haven, Conn. (1933). **a - 1470**

After having emphasized the importance in the study of coastal stability of the position of the so-called « high water line », as criterion, the A. shows that the basic problem in such a study is how to determine mean values of the various high water data so that they may be used as geophysical data, and gives in the present paper a consideration of the datum of main high water, illustrating the fluctuations of high water, the definition of mean high water, the determination of mean high water, and the changes in the datum of mean high water. The data taken into consideration concern high waters at Boston, Fort Hamilton and Seattle.

Correlationum calculus applicatur ad livellum maris accessus et recessus circa flumen*]. 18 Anl., 15 Tab., Aus d. Arch. Dtsch. Seewarte, LIII, 5, 5-68. Hamburg (1935). **a - 1478**

Die Tätigkeit des Vf. bei dem preussischen Wasserbauamt Harburg-Wilhelmsburg und bei der hamburgschen Behörde für Strom- und Hafenbau gaben ihm die Veranlassung sich mit dem an noch ungelösten Fragen reichen Gebiete der Gezeiten und der Einflüsse auf die Gezeiten im Tidegebiet der Elbe zu befassen. Hierbei stellte sich die Beeinflussung der Hamburger Wasserstände durch die Wirkung des Windes als eine Erscheinung von besonderer Wichtigkeit für den Hafenbau und die Schiffahrt eines Tideflusses heraus.

**Schureman Paul** - Tides and Currents in Hudson River [*De aestibus et currentiis fluminis* Hudson]. Maps, diagrs. U. S. Coast & Geod. Surv. Spec. Publ., 180, v + 106 pp. Washington D. C. (1934). **a - 1479**

Collection of observational data on the tides and currents in the tidal portion of the Hudson River, which extends for a distance of 132 nautical miles from the Battery, New York City, to the dam at Troy. A series of tables is given containing, in addition to the usual tidal data, the heights of extreme high and low water for each month for a number of years at various places along the river, as well as a series of diagrams summarizing the results of the tidal and current data. The improvements undertaken in order to facilitate navigation; and the changes in the tides and currents provoked by those improvements are also dealt with.

**Coast & Geodetic Survey** - Tidal Current Charts. San Francisco Bay [*Tabulae currentiarum aestuum. Baja S.cti Francisci*]. 14 charts, 2 tables. U. S. Dpt. Comm., Ser. 484. U. S. Govmt. Print. Off. Washington D. C. (1934). **a - 1485**

These current charts show the direction and velocity of the tidal current for each hour of the current at San Francisco Bay entrance (Golden Gate). They present a comprehensive view of the tidal current movement for the bay as a whole and also supply a means of readily determining the direction and velocity of the current at various localities throughout the bay. In an introductory Note the use of charts is indicated and illustrated on hand of a practical example.

**Ghidrografitcheskoj Oupravlenije** - Tables des heures et de niveaux des hautes et des basses marées pour 1934 (Mai-Décembre) [*Horarum tabulae et livellorum aestuum, A. 1934 a mense Majo ad mensem Decembrem*]. (En russe). 102 pp., Ed. Ghidrogr. Oupr. Leningrad (1934). **a - 1486**

Les heures et les niveaux des hautes et basses marées depuis mai jusqu'à décembre indiqués pour 12 points, parmi lesquels nous citons l'embouchure du fleuve Mezenj, le delta de la rivière Kambaljnitza, celui du fleuve Pétchora (Ile Zelenyj), Advent Bay (Spitsbergen), et l'embouchure du fleuve Indiga.

Tableaux des résultats des enregistrements des maréographes suédois pendant 1931. L'index du système de précision est donné au commencement des tableaux pour chaque station.

**U. S. Department of Commerce. Coast & Geodetic Survey** - Tide Tables Atlantic Ocean, 1935 [*Aestuum tabulae. Oceanus Atlanticus, A. 1935*]. 7 tables. U. S. Govmt. Print Off., Ser. 565, 4-281. Washington D. C. (1934). **a - 1488**

1: Predicted tides. 2: Tidal differences and constants. 3: Height of tide at any time. 4: Local civil time on sunrise and sunset. 5: Reduction of local civil time to standard time. 6: Moonrise and moonset. 7: Astronomical data. Each table is preceeded by an explanation.

**U. S. Department of Commerce. Coast & Geodetic Survey** - Tide Tables Pacific Ocean and Indian Ocean [*Aestuum tabulae. Oceanus Pacificus Oceanusque Indianus*]. 7 tables. U. S. Govmt. Print. Off., Ser. nº 567, 4-263. Washington, D. C. (1934). **a - 1489**

The present volume contains full daily prediction for 47 reference stations and differences and constants for about 1,700 stations on the Pacific and Indian Oceans and tributary waters. It contains also a table for obtaining the height of the tide at any time, a table of local civil time of sunrise and sunset for every fifth day of the year for different latitudes, a table for the reduction of local civil time to standard time, a table of moonrise and moonset for 6 places, and a table of the Greenwich civil time of the moon's phases, apogee, perigee, greatest north and south and zero declination, and the time of the solar equinoxes and solstices.

**Lg.** - Veränderte Gezeitenbewegung nach Abschluss der Zuidersee [*De aestibus eorumque motuum variatione post* Zuiderzee *clausum*]. Naturwiss., XXII, 33, 563-564. Berlin (1934). **a - 1490**

Kurzer Bericht über die durch den Abschluss der Zuiderzee eingetretenen Höhen- und Strömungs-Veränderungen und die dagegen gebauten Schutzeinrichtungen. (S. weiter Ztschr. V. D. I., LXXVII, 27).

**An.** - Mittlere Wasserstände an den 9 Pegeln des Preussischen Geodätischen Instituts im Jahre 1934 [*De livellis mediis aquae ex novem hydrometris ad Institutum Geodeticum Borussicum pertinentibus, A. 1934*]. 2 Tab., Ann. d. Hydrogr., LXIII, 6, 249-250. Berlin (1935). **a - 1491**

Mittlerer Wasserstand, höchster und niedrigster Wasserstand an den Pegeln in Bremerhaven, Travemünde, Marienleuchte, Wismar, Warnemünde, Arkona, Swinemünde, Stolpmünde und Pillau.

**An.** - Tidal Stations. Stations marégraphiques [*Stationes mareographicae*]. (In Engl. & French). Int. Hydr. Bull., VI, 19. Monaco (1934). **a - 1492**

Extract from the « Bull. Arct. Inst. », nº 5, 1934. Leningrad. List of the stations on which tide-gauge observations have been taken by members of the Arctic Institute of the U. S. S. R. since the 15th March, 1934.

**An.** - The Variation of Distance Between Europe and America [*De distantiae variatione inter Europam et Americam*]. Science- Suppl., LXXXI, 2097, 8. New York. (1935). **a - 1493**

Brief account of the discovery by Professor Harlan T. Stetson and Dr. A. L. Loomis of tides in the solid earth which alter the distance between the North American and European continents by as much as 63 feet. These tides in the earth are believed to be caused by the moon through its gravitational pull much in the same manner as it causes ocean tides.

**An.** - Vocabulary Concerning Tides [*Vocabularium de aestibus*]. Spec. Publ. Int. Hydr. Bur., 28ª. Monaco, Princ. (1934). **a - 1494**

## Undarum motus.

**Findeisen W.** - Ueber Beobachtungen auffälliger Wellenbildung auf dünner Wasserschicht auf dem Neuwerker Watt [*De undis notandis quae in subtili quodam strato aquoso efformantur in alto fundo regionis* Neuwerker]. 1 Taf. Ann. d. Hydrogr., LXIII, 5, 186-189. Berlin (1935). **a - 1495**

Einige Anregungen zur Erklärung einer merkwürdigen Erscheinung, welche auf dem Neuwerker Watt gelegentlich zur Ebbezeit beobachtet werden kann, und zwar, dass beim starkem Wind (etwa 12 m/sec) dort vielhundertmeter weite Oberflächen von locker gelagertem Sand entstehen, über welche aus benachbarten, übervollen Wasserläufen (Prielen) stammendes Wasser in dünner, jedoch sehr ausgedehnter Schicht vom Winde hinübergetrieben wird. Die Erklärung dieser Erscheinung ist nach hydrodynamischen und nach aerodynamischen Gesichtspunkten gegeben worden.

**Kossinna Erwin** - Ueber Grösse und Bewegung von Meereswellen in der Flachsee [*De undarum motibus et dimensionibus in mari haud alto*]. 1 Tab., 1 Taf. a. T. Ann. d. Hydrogr., LXIII, 4, 133-139. Berlin (1935). **a - 1496**

Nachdem Vf. beobachtet hat, dass man sehr wenige zuverlässige Angaben über die in Flachseegebieten vorkommenden Wellendimensionen in der ozeanographischen Literatur findet, berichtet er in vorliegender Arbeit über die von ihm ausgeführten Wellenbeobachtungen von der Westmole von Warnemünde aus und versucht im zweiten Teile seines Aufsatzes die folgenden Fragen zu beantworten: Welche sind die maximalen Dimensionen der Meereswellen in der Nord- und Ostsee ? - Welche Bewegungen führen die Wasserteilchen in den verschiedenen Tiefen aus und wie ändern sich die Wellenformen bei abnehmender Tiefe ?

**Krux W.** - Zur Frage der durch einen Druckpunkt auf flachem Wasser erzeugten zweidimensionalen Wellen [*De undis bidimensionalibus a quadam pressione per aquam placidam excitatis*]. Schiffbau, 17. Berlin (1934). **a - 1497**

**Pabst W.** - Ueber ein Gerät zur Messung und Aufzeichnung des Seeganges [*De apparatu qui motus marium metitur et inscribit*]. Ztschr. f. Flugtechn. & Motorluftschiffahrt, XXIV, 21/22, 616-619. Berlin (1933). **a - 1498**

**Thorade H.** - Interne Wellen neuer Art [*De undis internis novi generis*]. 2 Fig. Ann. d. Hydrogr., LXIII, 4, 174-175. Berlin (1935). **a - 1499**

Besprechung einer Untersuchung von J. E. Fjeldstad (« Interne Wellen », Geofys. Publ., X, 6. Norsk. Vidensk. Akad. Oslo, 1933), in welcher sich Fjeldstad die Aufgabe stellt, das Verhalten des Wassers bei beliebiger Aenderung der Dichte in der Tiefe zu untersuchen, und zu dem Ergebnisse gelangt, dass z. B. auch bei durchaus stetiger Aenderung der Dichte (also ohne sprunghafte Uebergänge) recht kräftige interne Wellen auftreten können. Thorade behauptet, dass die Anwendung der Fjelstadschen Theorie einen Ausblick auf eine Reihe neuer Erscheinungen eröffnet.

**Whitemarsh R. P.** - Great Sea Waves [*De undis in altum*] U. S. Nav. Inst. Proc. XL, 378, 1097-1103. Annapolis (1934). **a - 1500**

On the study of sea conditions. Observation of a great sea wave by personnel of the U. S. S. Ramapo. Other obervations and results.

**An.** - Recording Ocean Waves [*Inscriptio in chartis undarum oceanicarum*]. Science, LXXXI, 2089, Suppl. 9-10. New York (1935). **a - 1501**

Brief description of a recording current meter, which will keep a complete record of intensity and direction of ocean currents, and by which there might be a possibility to forecast destructive waves, devised by Dr. George F. McEven from the Scripps Institution of Oceanography. The device operates on the principle of a pendulum and is designed to compile data on current movements for use in studying causes of the huge waves which have rocked the coast of Southern California.

## Hydrodynamica theorica.

**Arredi Filippo** - Sul trasporto solido nelle correnti liquide [*Transvectio rerum solidarum in currentiis liquidis*]. Ann. Lavori Pubblici. LXXIII, 2, 148-150. Roma (1935). **a - 1502**

Sulle esperienze fatte dai Proff. Mayer-Peter, Favre & Einstein presso il Laboratorio Idraulico dell'E. T. H. di Zurigo in due canali appositamente costruiti. V. Schweiz. Bauzeitung CIII, 13 Zürich (1934).

**Bonvicini Dante** - Sul regime delle foci lagunari [*De oribus lacunarum eorumque regimine*]. 1 fig., Ingegnere, VIII, 17, 864-866. Roma (1934). **a - 1503**

Ripreso un recente studio del prof. U. Todaro sul moto provocato dalla marea nel canale emissario di una laguna, si perviene in un'ipotesi particolarmente semplice a stabilire una semplicissima relazione approssimata fra le dimensioni della laguna e del canale, e le ampiezze dell'oscillazione di livello in laguna ed in mare.

**Camichel Charles & Teissié-Solier Max** - Influence d'une perturbation sur le sillage en régime de Poiseuille d'un corps immergé [*De perturbatione in rima quae sit in regimine quod a* Poiseuille *nomen capit, in corpore quodam immerso*]. 2 fig. C. R. Acad. Sc., CC, 9, 704-707. Paris (1935). **a - 1504**

L'objet de la présente Note qui fait suite de l'étude, faite par les AA. des tourbillons alternés de Bénard-Karman (C. R., CLXXXV, p. 1556, 1927), est d'indiquer un fait qui, à la connaissance des A A., est nouveau, - l'influence d'une perturbation sur le sillage en régime de Poiseuille d'un corps immergé et la démonstration de l'existence d'un phénomène périodique qui est la continuation en deçà du critérium du phénomène des tourbillons alternés, résultat qui confirme et étend ceux obtenus précédemment.

**Davison B.** - On the Independent from the Viscosity Forms of the Two-dimensional Unsteady Motion of a Viscous incompressible Fuid [*Formae a viscositate liberae motus irregularis bidimensionalis cuiusdam fluidi viscosi incompressibilis*]. (In Russ., Engl. Summ.). Zap. Idrol. Inst. (Mém. Inst. Hydr.), XIII, 79-84. Leningrad (1934). **a - 1505**

(—) In the same volume XIII, 159–164 there is another paper on the same argument.

A. considers the two-dimensional unsteady motion of a viscous incompressible fluid in the case when the outer forces possess a potential, and shows that there are only four cases when the velocities are independent from the value of the coefficient of viscosity. All the unchangeable regions where a motion of the above-mentioned character may take place are also determined.

**Dubreil-Jacotin M.-Louise** - Sur les théorèmes d'existence relatifs aux ondes permanentes périodiques à deux dimensions dans les liquides

hétérogènes [*De exsistentiae theorematis relate ad undas fixas periodicas bidimensionales in liquidis heterogeneis*]. C. R. Acad. Sc., CC, 3, 210-212. Paris (1935). **a - 1506**

Compte rendu d'une étude rigoureuse des ondes permanentes périodiques dans les liquides hétérogènes incompressibles, dans lesquels la diffusion est négligée. L'A. démontre que, la longueur d'onde étant donnée, il y a une infinité de mouvements d'onde possibles tous à l'exception d'un seul ayant des plans nodaux.

**Ferrari Carlo** - Sulla teoria della turbolenza [*De turbulentia*]. Atti R. Acc. Naz. Linc. - Rend. Cl. Sc. Fis. Mat. e Nat., serie 6, XX, 3-4, 100-104. Roma (1934). **a - 1507**

L'A. ricorda la teoria della turbolenza sviluppata da G. D. Mattioli, ed indica come, variando le ipotesi poste dal Mattioli ma applicando lo stesso metodo da questi indicato, si possono ritrovare i risultati delle teorie di Prandtl e di Karmàn.

**Gebelein Hans** - Turbulenz: Physikalische Statistik und Hydrodynamik [*De turbulentia. Statistica physica et hydrodynamica*]. viii-177, S. J. Springer. Berlin (1935). **a - 1508**

L'A., ayant construit au laboratoire d'hydraulique fluviale de Metz un canal en terre à section trapézoidale, a répété l'expérience célèbre de J. S. Russel sur l'onde solitaire. Constatation des résultats.

**Hidaka K.** - Oscillations of Water in a Fan-Shaped Basin [*De aquae oscillationibus in sinu instar flabelli*]. Geophys. Magaz. 8, 195-197. Tokyo. (1934). **a - 1512**

The oscillations of water in a basin bounded by the arcs of two concentric circles and two diameters, and whose plan resembles a fan, are considered. Where the depth is a function of the radius the tidal motion is solved completely and some special cases are taken where the expressions for the oscillations can be simplified.

**Hidaka K.** - Oscillations of Water in Spindle-Shaped and Elliptic Basins and Associated Problems [*De aquae oscillationibus in bacinis fusiformibus atque ellipticis. Considerantur etiam problemata ad rem pertinentia*]. Geophys. Magaz., 8, 199-202. Tokyo (1934). **a - 1513**

A list of corrections to the original paper.

**Hidaka K.** - The Oscillations of Water in Canals of Asymmetric Plan (Problems of Water Oscillations in Various Types of Basins and Canals - Part VIII) [*De aquae oscillationibus in canalibus plano praeditis asymmetrico (De aquae oscillationibus in variis bacinis et canalibus. Pars VIII*$^{a}$)]. (Jap. Summ.). Mem. Imp. Mar. Obs., V, 4, 267-326. Kobe, Japan (1935). **a - 1514**

In this paper author treats the free oscillation of water in canals of uniform depth, in shelving canals, and in canals with sloping bed. From the results of the discussion on the oscillations of water in canals of asymmetric plan, the following conclusion is drawn: « Most of those basins, found in nature, are asymmetric rather than symmetric. The distribution of depth is, on the contrary, nearly symmetric in general. But sometimes they have nearly flat bed or sloping bed. For these reasons the canals treated in this paper will find more chances to be applied to the explanation of the phenomena of seiches, tides, and secondary ondulations of tides, observed in the lakes, seas, bays, and oceans ». In an appendix the author gives approximate solutions for the oscillations of water in spindle-shaped, elliptic, and allied canals.

**Hidaka K.** - Seiches in a Channel (Problems of Water Oscillations in Various Types of Basins and Canal – Part IX) [*Aestus secundarii in canali. (De aquae oscillationibus in variis bacinis et canalibus. Pars I*$^{a}$)]. (Jap. Summ.). 10 figs., 7 tables. Mem. Imp. Mar. Obs., V, 4, 327-358. Kobe. Japan (1935). **a - 1515**

1. Introduction and summary of the results. 2. Differential equation of tidal oscillations and conditions in terms of elliptic coordinates in two dimensions. 3. Solutions in terms of Mathieu and associated Mathieu functions. 4. On numerical computation. 5. Numerical results. 6. Channel bounded by a straight line and a branch of hyperbola. 7. **Kaufmann W.** - Angewandte Hydromechanik. Zweiter Band [*De hydromechanica applicata. Vol. II*$^{um}$]. 210 Textabb. vii-293 S., J. Springer. Berlin (1934). **a - 1516**

In diesem zweiten Bande finden wir eine nähere Behandlung technisch wichtiger Strömungsprobleme: Ausfluss und Ueberfall, Strömung in geschlossenen Leitungen, Strömung in offenenen Gerinnen, Wellenbewegung, Grundwasserbewegung, hydrodynamische Theorie der Schmiermittelreibung, Elemente der Tragflügel-, Propeller- und Kreiselradströmung, Schiffswiderstand, die Belastung von Bauwerken durch Windkräfte (diese Kapitel bearb. von O. Flachsbart).

**Koenuma Ewanichi** - Effect of a Steady Wind on the Surface Level of a Canal [*De vento quodam constanti eiusque effectu in livellum cuiusdam canalis*]. (In Engl., Jap. Summ.). 1 fig. Mem. Imp. Mar. Obs. V, 4, 359-371. Kobe, Japan (1935). **a - 1517**

Translated from Japanese Umi-to-Sora, XIII, 4, correcting the mistakes. In this paper author discusses the effect of a steady wind on the surface level of an infinitely long canal whose coasts are parallel to each other, considering the inclination of the surface and the tangential stress due to the wind to be the function of the distance from the coast. He also extends his researches to the case of a sea with a straight coast, putting one of the coasts of the canal to be at infinity.

**Kravtchenko Julien** - Théorèmes de validité dans le problème des sillages [*Validitatis theoremata quoad rimarum problemata*]. C. R. Acad., Sc., CC, 3, 208-210. Paris (1935). **a - 1518**

Les théorèmes que l'A. fait connaître constituent des extensions de quelques résultats de M. H. Villat (cas de l'obstacle symétrique) et de M. J. Leray (cas du fluide indéfini); ils valent dans le cas d'un courant fluide enfermé dans un canal (ou limité par une paroi fixe) qui heurte un obstacle dont l'angle de la tangente positive avec la direction du courant est supposé compris entre zéro et $\pi$. Pour simplifier ses énoncés l'A. se limite d'abord au cas des parois fixes planes, mais chaque théorème peut être étendu à certaines classes de parois courbes.

**Kubo T.** - (Rev. by). Dynamic of Tides on the North Siberian Shelf (Results from the « Maud » Expedition. By H. U. Sverdrup. Geofys. Publ. IV, 1927) [*Aestuum dynamica in platea sibirica sept.* (*Resultatus ex navigatione navis* « Maud »)]. (In Jap.). Journ. Oceanogr., VII, 1, 403-418. Kobe (1934). **a - 1519**

**Liceni Franco** - Sul fenomeno della turbolenza [*De turbulentia*]. (La nuova teoria di G. D. Mattioli alla luce delle misure di Nikuradse). 2 fig. En. Elettr., 7, 530-535. Milano (1934). **a - 1520**

Lo scopo che si propone l'A. è il confronto tra le previsioni teoriche di Mattioli e le misure di Nikuradse. Al n. 1 dà un'esposizione riassuntiva dei fondamenti concettuali della teoria di Mattioli ed al n. 2 il riassunto dell'applicazione fattane dallo stesso autore alla teoria del flusso nei tubi; segue al n. 3 la dimostrazione dell'esatta corrispondenza di tale teoria con le misure di Nikuradse. Al n. 4 è esposta l'influenza della parete attraverso alla viscosità dello strato limite, ed infine nel n. 5 è presentata una formula che esprime la legge di resistenza nei tubi, formula che offre un grado di approssimazione notevolmente maggiore di quelle empiriche prima adottate. Conclude che la teoria dinamica della turbolenza di Mattioli, è da ritenersi definitivamente confermata dall'esperienza sia nei riguardi della determinazione dei profili della velocità, che in quelli della legge di resistenza.

**Nomitsu Takaharu** - Coast Effect upon the Ocean Current and the Surface Slope. II. Changing State [*De litoribus eorumque effectibus in currentiam oceanicam. Agitur etiam de superficie declivi. II*$^{um}$. *Status variabilis*]. Mem. Coll. Sc., A., XVII, 249-280. Kyoto (1934). **a - 1521**

In this second report on the coast effect, the writer has investigated the development of the surface slope ($\gamma$) and of the current ($w$) as it is influenced by land. At the coast itself as the primary cause begins to act, the slope instantly springs up to a finite value $\gamma$ (°) and then approaches gradually to the steady value $\gamma$ given in Author's first report on the problem. The current influenced by the coast may be considered to consist of the primary current $w_F$ and the secondary slope current $w_\gamma$. The writer emphasizes that both slope and the secondary current have the form which is the same for every kind of primary cause, but different only in their final values.

**Srettenskij L.** - On the Motion of a Glider on Deep Water [*De motibus cuiusdam apparatus qui per aquam profundam dilabitur*]. (In Engl., Russ., Summ.). 2 figs. Bull. Acad. Sc. URSS. Cl. Sc. Mathém. & Natur., 6, 816-835. Léningrad (1933). **a - 1522**

New method for the study of the motion of a glider on deep water, different from those elaborated by S. A. Tchaplighine, based on the theory of analytical functions. The A. intends here to give an approximate solution of the problem, which may be true for the case of a parallel-plane stream.

**Stakhovitch C. I.** - Mouvement d'un liquide visqueux incompressible dans les tuyaux et canaux [*De motibus liquidi viscosi incompressibilis per tubos et canales*]. (En russe, rés. franç.). Zap. Gos. Idrol. Inst. (Mém. Inst. Hydrol.), XIII, 3-26. Leningrad (1934). **a - 1523**

Dans le I Chap. l'A. rappelle les équations et les lois générales du mouvement d'un liquide visqueux incompressible. Le II Chap. contient l'exposé de la théorie du mouvement permanent rectiligne dans les tuyaux et canaux ayant une section constante. Les équations du mouvement dans ce cas se réduisent aux équations de Poisson. L'A. s'occupe ensuite de cas spéciaux du mouvement rectiligne non permanent en appliquant la méthode d'Euler-Fourier.

**Varsar S.** - Sur le problème de la détermination des périodes latentes (Selon la méthode de A. Schuster) [*De periodis latentibus eorumque determinatione methodo ab* A. Schuster *reperta*]. (En russe, rés. franc.). 9 graph. nombr. tabl. d. et h. t. Zap. Idrol. Inst. (Mém. Inst. Hydrol.), XIII, 39-77. Leningrad (1934). **a - 1524**

L'A. prend en considération la méthode proposée par A. Schuster pour la recherche et la détermination des périodes comprises dans des rangées des données observées. La II$^{\text{ème}}$ partie du présent ouvrage est consacrée à l'examen des exemples d'application de la méthode considérée à des séries de nombres de nature différente. Dans un appendice l'A. publie quelques tables et schémas servant à la détermination des amplitudes et des phases à l'aide de l'analyse harmonique.

Resultat einer statistischen Untersuchung der Bewölkung über dem Nordatlantik, für welche als Material drei Jahrgänge (1931 bis 1933) der im « Täglichen Wetterbericht »

der Deutschen Seewarte enthaltenen Schiffsbeobachtungen herangezogen wurden. Zweck der Untersuchung war festzustellen, ob über dem freien Atlantik ein jährlicher und täglicher Gang in der Häufigkeit des Auftretens von Cumulus- und Cumulusnimbuswolken zu erkennen ist. Es wurde für die Beobachtungen das Areal, welches im Süden von 47. und im Norden vom 50. Breitenkreis begrenzt wird, und welches im Westen durch den 26. und im Osten durch den 21. Meridian seinen Abschluss findet, ausgewählt.

**Bennet M. G.** - Further Conclusions Concerning Visibility by Day and Night [*Conclusiones ulteriores quoad visum noctu diuque*]. 3 figs., 1 table. Quart. Journ. R. Meteorol. Soc., LXI, 259, 179-188. London (1935). **a - 1528**

Account of experiments carried out at Kew and Fernborough to test the theories of visibility put forward by Koschmieder and the author, and to determine the relation between visibility by day and night. The experiments have enabled a table to be drawn up showing approximately the distances that lights of various candle-powers can be seen on the average at night, in meteorological conditions corresponding to different daytime visibilities.

**Benson J. S.** - The Oxford University Expedition to Spitsbergen, 1933. Appendice III: Meteorology [*De expeditione ad* Spitsbergen *per Universitatem Oxoniam peracta A. 1933. Appendice III*ª: *Meteorologia*]. 4 tables, Geogr. Journ., LXXXIV, 2, 122-126. London (1934). **a - 1529**

Since the meteorological observations have been taken in Spitsbergen for a number of years, the results obtained by the University of Oxford Expedition have only a value in so far as they show the conditions experienced by the various parties. In the present report a summary is given of the observations during the months of July, August, and September, 1933 on the monthly means and extremes of temperature (Table I), on wind directions (Table II), on wind forces (Table III), and on weather conditions (Table IV).

**Bjerknes J.** - Investigations of selected European Cyclones by means of Serial Ascents [*Investigationes in selectos cyclones europaeos per ascensiones ex ordine peractae*]. 8 figs., tabl., Geofys. Publ., XI, 4, 1-18. Oslo (1935). **a - 1530**

The plan of the investigations carried on at Uccle in order to explore aerologically a fairly deep depression travelling across Southern England to the North Sea (December 30-31 1930) was the same as that of the previous of ascents described in Geofys. Publ. IX, 9. I. The synoptic situation. 2. The field of temperature in vertical cross section. The field of pressure in vertical cross section.

**Bjerknes J.** - La circulation atmosphérique dans les latitudes sous-tropicales [*De circulatione atmosphaerica in latitudinibus sub-tropicalibus*]. Scientia, LVII, CCLXXIV-2 Sér. III, 114-123. Bologna (1935). **a - 1531**

Cet article représente une tentative de déduire, à l'aide du raisonnement qualitatif et théorique, le système de vents à trois dimensions tel qu'il doit être établi entre 45° de latitude N et 45° de latitude S. En premier lieu, le système de vents doit satisfaire à la nécessité du « courant de chaleur » se dirigeant des régions tropicales où existe un surplus de chaleur aux régions extra-tropicales où la chaleur est en défaut, de façon à assurer une distribution stationnaire de chaleur (abstraction faite des oscillations saisonnières). En deuxième lieu, le système de vents doit transformer une quantité suffisante d'énergie calorique en énergie cinétique afin de compenser la partie d'énergie cinétique par friction. Cette condition ne peut être remplie que si les particules qui suivent un mouvement ascensionnel à l'intérieur de la ceinture tropicale chaude suivent un mouvement de descente en dehors de cette ceinture. En troisième lieu, la circulation atmosphérique doit être dynamiquement possible. Sur notre globe en rotation, cette condition a pour effet une structure cellulaire du système de vents, chaque cellule correspondant à un anti-cyclone sous-tropical asymétrique. Les particules d'air circulent dans les orbites anti-cycloniques, légèrement relevées dans leurs parties ouest et déprimées dans leur parties est. C'est ainsi que le cycle de transformation thermodynamique de chaque particule aboutit à la transformation d'énergie calorique en énergie cinétique. (Auteur).

**Bossolasco M.** - Salinità, nuclei di condensazione, e precipitazioni [*De salsedine, nucleis per condensationem deque praecipitationibus*]. Boll. Com. Geodesia e Geofisica del Cons. Naz. Ric., IV, 1-2, 54-59. Milano (1934). **a - 1532**

L'A., sulla base di alcune sue determinazioni della salinità dell'aria compiute a Mogadiscio durante il Monsone di S. W. che sembrano bene accordarsi con la legge di distribuzione trovata da H. Köhler mediante numerose misure fatte in Scandinavia, discute i rapporti fra salinità e nuclei di condensazione giustificando lo scarso numero di questi ultimi alla superficie dei mari e degli oceani e l'aumento considerevole degli stessi nuclei nelle regioni continentali. Infine, con riguardo alle condizioni delle coste della Somalia, esamina le relazioni che intercedono fra i nuclei di condensazione e la formazione della nebbia e delle precipitazioni.

**Brennan J. F.** - Relation of May-June Weather Conditions in Jamaica to the Caribbean Tropical Disturbances of the Following Season [*Correlatio inter meteorologicas condiciones in Jamaica, mensibus Majo et Junio et perturbationes tropicales Maris Caraibici tempore sequenti*]. 1 fig., 3 tables. Monthly Weath. Rev., LXIII, 1, 13-14. Washington D. C. (1935). **a - 1533**

The tables contain statements concerned with (1) the amount of rainfall, mean daily miles of wind and mean barometric pressure during the combined months of May, June, and July 1903 to 1934, (2) 5 years of instances during the period from 1903 to 1934 when the months of May, June and July, indicate abnormal conditions of rainfall, surface wind and barometric pressure, favorable to hurricane activity during the months of August and September, in the Caribbean region, and (3) id. favorable to the absence of hurricane activity, during the months of August and September, in the Caribbean region.

**Brooks C. E. P.** - The Pleistocene Climate of Bermuda [*De climate pleistocenico in insulis* Bermuda]. Geogr. Rev., XXV, 2, 340-342. New York (1935). **a - 1534**

Account of a paper by Kirk Bryan and R. C. Cady, in which starting in Bermuda with data inferred from fossil dunes, they reconstruct the atmospheric circulation of the whole North Atlantic during the Ice Age (S.: Amer. Journ. Sc., Ser. 5, vol. XXVI, 241-264, 1934), and of other work by R. W. Sayles, G. C. Simpson (S.: Proc. Amer. Acad. Arts & Sc., LXVI, 11 381-467, 1931, and « Quart. Journ. R. Meteor. Soc.», LX, 425-478, 1934). The real importance of Bermuda in the study of past climates is shown.

Introduction. Air mass properties: sources, characteristic properties. Interaction of the air masses: zones of interaction (frontogenesis), frontal movements. The weather of the Pacific coast of the United States. Literature cited. Maps and diagrams. Explanation of symbols used on maps.

**Byers Horace R.** - The Use of Free-Air Soundings in General Forecasting [*De utendis scandaliis aëre libero ad obtinendas provisiones temporis generales*]. 1 fig., Monthly Weath. Rev., LXII, 10, 376-378. Washington D. C. (1934). **a - 1540**

The author proves the usefulness of free-air soundings in general forecasting practice and shows that the following four factors should be studied in connection with the soundings, i. e.: the identification of air masses, the changes that are taking place in the air masses as shown by the comparison with previous data on the same masses, the present state of stability or instability of the air, and the changes in lapse rate which may be expected, especially if the air is lifted along a front or over a large mountain area.

**Carpenter Archer B.** - Record November Fog Preceding Phenomenal Winter of 1933-1934 in the Pacific Northwest [*De abnormi nebula, mense Novembri, quae antecessit hiemem notandam A. 1933-34 in Oceano Pacifico nord-occidentali*]. 2 figs., 2 tables, Monthly Weath. Rev., LXII, 11, 404-407. Washington D. C. (1934). **a - 1541**

Some results of observations, which show that there is a strong possibility that records covering a long period may show a correlation between severe winters in central Alaska, November fog and December floods in the Northwest, and severe cold in the Northeastern States.

**Carruthers J. N.** - Projet d'anémomètre totalisateur pour l'océanographie [*De anemometro pro oceanographia*]. 1 fig., Rev. Hydrogr., XII, 1, 34-40. Monaco, Princ. (1935). **a - 1542**

Instrument établi spécialement pour intégrer les vents par quarts du compas, tant pour leur direction que pour leur vitesse.

**Carter H. G.** - Climatic Trend in the Pacific Northwest [*De climate in regione nord-occidentali Oceani Pacifici*]. 4 figs., 2 tables. Monthly Weath. Rev., LXIII, 1, 19-23. Washington D. C. (1935). **a - 1543**

The purpose of the present note is to determine whether climate has undergone any progressive change in one definite direction within the memory of the present generation, in the Pacific Northwest. Author considers as representative of the coast climate of the Pacific Northwest, the Weather Bureau records at Portland, Oreg., and Seattle, Wash., and the records at Boise, Idaho; Spokane, Wash.; and Walla Walla, Wash., as representative of the climate of the interior stations. Indicating the weather of the past, the data presented are, however, not to be interpreted as indicating an indefinite continuation of temperatures above normal and precipitation below normal.

**Castens Gerhard** - Die Temperatur-Wetterhaftigkeit und ihr jährlicher Gang [*De coeli conditionum dependentia a temperatura eiusque ratione annua*]. 5 Tabl., Ann. d. Hydrogr., LXIII, 1, 47-51. Berlin (1935). **a - 1544**

In der vorliegenden Studie ist die Temperatur- Wetterhaftigkeit von Hamburg für alle Monate berechnet worden. Der zugrunde gelegte Zeitraum umfasst die Jahre 1881 bis 1930 (Tabelle 1). Die Wetterhaftigkeit ist auch mit der « Zeit » verbunden worden (Tabelle 2). Die Verwertung der Beobachtungen dient in der Hauptsache den klimatologischen Ansprüchen der Praktiker.

**Chapel L. T.** - The Significance of Air Movements Across the Equator in Relation to Development and Early Movement of Tropical Cyclones [*De aëris motibus per aequatorem pro cyclonum tropicalium initio et progressione*)]. 5 tables. Monthly Weath. Rev., LXII, 12, 433-438. Washington D. C. (1934). **a - 1545**

Author considers the question of relationship between extensive air movements across the Equator and the development and early movement of tropical cyclones from the standpoint of local observations on the Isthmus of Panama. He calls attention to several points concerning tropical cyclones and the general air movements of the tropics. He intends briefly to consider available data covering periods of southerly winds at Panama with particular attention to the question of the existence or nonexistence of the two theoretical forms of action of the air flows across the Equator, and, if such forms of action exist, of their importance in relation to the formation and early movement of tropical cyclones. The southerly winds at Panama and their association with tropical cyclones are discussed.

**Chapman S.** - A Mechanical-Optical Method of Reduction of Pairs of Auroral Plates [*Methodus optico-mechanica ad reducendas pares laminas photographicas quae auroram borealem repraesentant*]. Terr. Magn., XXXIX, 4, 299-303. Baltimore (1934). **a - 1546**

A new method is suggested for the reduction of the great number of pairs of auroral plates that have accumulated during the Polar Year, and to be continued in future. The method described seems in principle to be the simplest possible because it is a direct reconstruction, on a reduced scale, of the original situation of cameras and aurora at the time of the simultaneous photographic exposures.

**Christensen A. H.** - Analysis of a Warm « Cold Front » [*Analysis cuiusdam casus notandi qui dicitur* Cold front]. Monthly Weath. Rev., LXIII, 1, 9. Washington D. C. (1935). **a - 1547**

Account of a case observed by the writer on October 26th, 1933, of a cold front, with an unusual action which at first appears entirely opposite to the manner in which a normal front should and does act. Author claims that while the conditions described are unusual, they are not so rare as to be considered entirely abnormal and that fronts of the kind described occur often enough in the middle west for conclusions drawn from an analysis of this kind to be of value in actual forecast work.

**Corlin A.** - Catalogue of Aurorae Borealis Observed in Northern Sweden During the Time August 1932-March 1933 [*Aurorae boreales observatae in Suetia Sept. a mense Augusto 1932 ad mensem Martium 1933. Elenchus*]. Vetensk. Akad. Handl., Ser. 3, XIII, 6; Medd. Lund. Obs., Ser., 2, 67, 41 pp. Stockholm (1934). **a - 1548**

Observations of auroras made during the International Polar Year 1932-1933 at the Geophysical Observatory of Abisko, supplemented by those taken at Riksgränsen and Kiruna. The data are given in tables of 10 columns, viz. month, day, hour, type (according to scheme proposed by Störmer for Polar-Year work), azimuth, altitude, intensity (on scale of 0 to 4), place, remarks and simultaneously recorded ionization due to cosmic radiation. In all data 1134 auroras are given.

**De Pasquale O.** - Sulla determinazione degli spessori delle nebbie e delle nubi [*De nebularum et nubium crassitudine. Determinatio*]. Atti R. Acc. Peloritana, XXXVI, 143-152. Messina (1934). **a - 1549**

È descritto un modello di metereografo atto a potere determinare agevolmente lo spessore delle nebbie e delle nubi, mediante ascensioni nella libera atmosfera. È applicato per tanto ad un noto metereografo italiano (barotropico) uno speciale dispositivo termografico, che consente la disposizione esterna di una sferetta annerita, collegata con un tubo di Bourdon. La fuoruscita dello strumento da uno strato di nebbia o nubi è messa in evidenza da uno scarto notevole che si nota nel diagramma relativo a tale dispositivo, in confronto con quello dell'ordinario termografo del metereografo stesso.

The paper is divided in the five following sections: 1. Temperature changes in a given air mass between 1 and 5 kilometres; 2. The rain areas of depression; 3. The tropopause; 4. The rotary aspects of depressions and anticyclones; 5. Troposphere and stratosphere.

**Dunn G. E.** - Tropical Storms of 1934 [*Tempestates tropicales A. 1934*]. 2 tables. Monthly Weath. Rev., LXII, 12, 457. Washington D. C. (1934). **a - 1555**

Account of eleven tropical disturbances reported in 1934 in the Atlantic, Caribbean Sea, and the Gulf of Mexico. Tables containing data on the monthly frequencies of West Indian hurricanes and other tropical storms of the North Atlantic Ocean in 1934, and the synopsis of tropical storms of 1934.

**Dzerdzevskij B.** - Organisation du Service Météorologique dans l'Arctique [*Ratio quae pertinet ad servitium Meteorologicum in Arctide*]. (En russe). Bull. Arct. Inst., 10, 368-370. Leningrad (1934). **a - 1556**

Résumé du développement du Service Météorologique dans l'Arctique Soviétique avec référence spéciale à l'élaboration de cartes météorologiques synoptiques de cette région de l'URSS et l'organisation du service radiologique pour la transmission du bulletin météorologique.

**Dzerdzevskij B.** - Service météorologique des expéditions arctiques en 1934 [*Servitium meteorologicum ad expeditiones in regiones arcticas pertinens A. 1934*]. (En russe). Bull. Arct. Inst., 1/2, 16–18. Leningrad (1935). **a - 1557**

Distribution du travail entre les trois Offices Météorologiques navigants dans l'Arctique Soviétique établis sur les brise-glace « Yermak », « Malyghine » et « Lidtke », avec référence spéciale à l'élaboration des données synoptiques du temps et la transmission par T. S. F. des prédictions aux navires en navigation. Deux exemples de l'utilisation réussie des prognoses transmises; ultérieure élaboration du matériel recueilli.

**Egersdoerfer L.** - Versuch einer harmonischen Analyse von Wetterkarten auf zeichnerischem Wege [*De analysi harmonica chartarum meteorologicarum per systhema graphicum*]. 4 Tabellentaf., 4 Taf., Ann. d. Hydrogr., LXIII, 5, 204-210. Berlin (1935). **a - 1558**

*a*) Aus dreitägigen Isallobarenkarten werden mittels der harmonischen Analyse nach den Methoden der graphischen Elementaralgebra unter Benutzung einer Doppeltabelle die Amplitude und Phase der sechstägigen Luftdruckwelle entwickelt. Das Verfahren wird an einem Beispiel der Isobarenkarte der Nordhalbkugel (15. bis 20. XI. 1933) erläutert. *b*) Im letzen Abschnitt wird das Verfahren auf Ordinaten, deren Anzahl durch 4 teilbar ist, übertragen (Rungesches Verfahren) und für die Praxis meist gebrauchten Fälle m = 8, 12, 20, 24, 36 und 72 ausgearbeitet und durch Tafeln unterstützt.

**Fergusson S. P.** - An International Comparison of Standard Barometers [*De barometris standardisatis. Comparatio internationalis*]. 7 tables, Monthly Weath. Rev., LXII, 10, 364-366. Washington D. C. (1934). **a - 1559**

Comparison between the barometers at Blue Hill Observatory, and between the standards of the Weather Bureau, the Geographical Institute and the Canadian Meteorological Office, followed by the quotation of a paper by J. E. Seats and J. S. Clark, containing the description of the new British standard barometer, and of a letter of the Director of the U. S. Bureau of Standards, describing briefly the new standard instruments of the Bureau.

**Findeisen Walter** - Zur Theorie des Psychrometers [*De psychrometro*]. Meteorol. Ztschr., LI, 3, 89-100. Braunschweig (1934). **a - 1560**

Im Gegensatz zur bisherigen Betrachtungsweise des Psychrometervorganges wird in der vorliegenden Arbeit die Theorie des Psychrometers auf den Ergebnissen der Grenzschichttheorie aufgebaut. Es werden Beziehungen abgeleitet die zur Auswertung psychrometischer Messungen dienen

können, und der Anschluss an die üblichen Psychrometerformeln hergestellt. Die Theorie führt zur Klärung von Streitfragen und ergibt quantitative Uebereinstimmung mit den Erfahrungstatsachen empirischer Untersuchungen. (Sprungsche Formel).

**Frank H.** - Betrachtungen zum Prognoseproblem [*Considerationes de coeli condicionibus providendis*]. Ann. d. Hydrogr., LXIII, 4, 167-170. Berlin (1935). **a - 1561**

Vf. stellt über gewisse Probleme der Wettervorhersage einige Ueberlegungen an, welche den Problemen der Atomphysik ähnlich sind, erweitert sie ohne weiteres auf mancherlei Erscheinungsformen der Natur und betont eindringlich die Notwendigkeit alle Naturerscheinungen im Rahmen des eigenen Erscheinungsraums zu betrachten.

**Frank H. & Eichler K.** - Wetterkunde für den Wassersport. Windkarten (Anh.) [*De meteorologia quoad artem nauticam delectandi causa suscipiendam. Ventorum tabulae*]. Karten. 64 S., Klasing & Co., Berlin (1934). **a - 1562**

**Frongia G.** - I principali elementi del clima di Cagliari [*De praecipuis elementis climatis Caralitani*]. 9 fig., Rendic. Sem. Fac. di Scienze R. Univ. di Cagliari, IV, 2, 37-48, Cagliari (1934). **a - 1563**

In prosecuzione delle osservazioni meteorologiche eseguite dal dott. C. Zedda nel ventennio 1983-1912 nell'osservatorio Meteorologico annesso all'Istituto di Fisica della R. Università, l'A. esamina le osservazioni che abbracciano il periodo 1913-32, sia per confrontare i dati dei due ventenni, sia per ottenere una media generale per un periodo di 40 anni. I dati raccolti, riguardano la pressione atmosferica, la temperatura, la tensione di vapore, l'umidità relativa, la precipitazione acquea, la nebulosità.

**Gold E.** - Fronts and Occlusions [*De frontibus et occlusionibus*]. 29 figs., Quart. Journ. R. Meteor. Soc., LXI, 259, 107-157. London (1935). **a - 1564**

1. The approach: progress made in the development of the theory and practice of fronts. 2. The development; with especial regard to the work of V. Bjerknes and J. Bjerknes in Norway: the polar front, idealised cyclone, the « life cycle » of cyclones, the formation of secondary cold front. 3. Theory and examples: in this section, leaving the idea of cyclone and anticyclone author considers the fronts as independent unities; recognition of fronts or occlusions and air mass classification in order to elucidate the weather phenomena. 4. Fronto-lysis. Fronto-genesis. 5. Examples of fronto-genesis and fronto-lysis. 6. Isothermal layers. 7. Conclusion.

**Goldie A. H. R.** - Wind Records from the Bell Rock Lighthouse [*De ventorum inscriptionibus in chartis peractis in pharo* Bell Rock]. Pls., 22 pp., Air Ministr. Meteorol. Off. Geophys. Mem., 63. London (1935). **a - 1565**

**Gorczynski Ladislas** - Climat solaire de Nice et de la Côte d'Azur [*De climate solari in* Nice *atque praeter litora* Côte d'Azur]. Ill., tables. vii + 208 pp. Mém. IV Assoc. Natur. Nice & Alpes-Marit., Riv. Sc. Nice (1934). **a - 1566**

**Groissmayr F. B.** - Ausgleichsgebiete der Temperatur - Anomalien im Frühling und Herbst auf der Nordhemisphäre [*Zonae quae aequilibrant abnormes temperaturas, vere et autumno, in hemisphaerio nordico*]. 3 Tab., Ann. d. Hydrogr., LXIII, 3, 121-123. Berlin (1935). **a - 1567**

Schilderung der stark ausgeprägten Temperatur-Ausgleichbestrebungen in einer Anzahl von Gebieten in der Nordhemisphäre in den beiden Uebergangsjahreszeiten: Mittel: 1881-1924 und 1886-1924.

**Grundmann Walter** - Ueber Nullpunktsänderung der Thermometer in Abhängigkeit der Alterung von Glas und Temperaturindikator unter besonderer Berücksichtigung der in der Meteorologie vorkommenden Temperaturbereiche [*Agitur de puncto zero in thermometris eiusque variationibus quae a vitro obsoleto dependunt*]. 4 Tab., Ann. d. Hydrogr., LXII, 12, 488-493. Berlin (1934). **a - 1568**

Es werden diejenigen Fehler nach Quantität und Qualität gekennzeichnet, die bei den in Meteorologie und Klimatologie vorzugsweise verwandten Quecksilber-und Flüssigkeitsthermometern auftreten können, und zwar: 1. Bei den Quecksilberthermometern die Nullpunktsattraktion, infolge der altersbedingten Glaskontraktion; 2. Bei den Flüssigkeitsthermometern: *a*) die Nullpunktsattraktion, infolge der altersbedingten Glaskontraktion, *b*) die Nullpunktsdepression infolge Kontraktion, Kompressibilität und Ueberdestillieren der Anzeigeflüssigkeit. Die dadurch hervorgerufene Missweisung in der Temperatur kann u. U. bis zu 2° C betragen. (Vf.).

**Guthrie Leon J.** - Southeasterly Winds of the Southern San Joaquin Valley, Calif. [*De ventis sud-orientalibus in valle meridionali S.cti Joachini in California*]. Monthly Weath. Rev., LXII, 8, 294-295. Washington D. C. (1934). **a - 1569**

Some considerations as to the relationship between the disturbances of the atmosphere in the southern San Joaquin Valley and such on and off the coast of California.

**Haeger H.** - Wasserhose im Baham-Kanal [*De columna marina in canali* Bahama]. Seewart, IV, 2, 83-85. Hamburg (1935). **a - 1570**

Beschreibung einer Seehose, die während einer Reise von Puerto Tarafa (Nuevitas) in Cuba nach Santiago de Cuba durch den Bahama Kanal, am 30. September 1934 beobachtet worden ist.

**Hennessy J.** - Fog and Mist in the Western Half of the English Channel [*De caligine in regione occidentali Freti Britannici*]. 4 figs., Mar. Obs., XII, 119, 111-113. London (1935). **a - 1571**

Paper of descriptional and statistical character. Diagrams illustrating the reported data.

**Humphreys W. J.** - Weather Proverbs and Paradoxes [*Proverbia et paradoxa quoad coeli condiciones*]. 16 pls., xii + 126 pp. Will. & Wilkin Co., Baltimore, MD.; Baillière, Tindall & Cox. London (1934). **a - 1572**

**Hunter H. C.** - Weather of the Atlantic and Pacific Oceans. - North Atlantic Ocean [*Condiciones meteorologicae Oceani Atlantici et Oceani Pacifici. Atlanticus Sept. Mense Januario 1935*]. 2 tables, Monthly Weath. Rev., LXIII, 1, 32-33 & 34-35. Washington D. C. (1935). **a - 1573**

Averages, departures, and extremes of atmospheric pressure (sea level) at selected stations for the North Atlantic and its shores, in all the numbers of the year.

**Hurd Willis E.** - Weather of the Atlantic and Pacific Oceans. North Pacific Ocean [*Condiciones meteorologicae Oceani Atlantici et Oceani Pacifici. Pacificus Sept. Mense Augusto 1934.*]. 1 table. Monthly Weath. Rev., LXII. Washington D. C. (1934-1935). **a - 1574**

Atmospheric pressure, cyclones and gales, typhoons, fog in all the numbers of the year.

**Imbò G.** - Riassunto delle osservazioni meteorologiche e sismiche eseguite nel R. Osservatorio Geofisico di Catania durante l'anno 1932 [*Compendium observationum meteorologicarum et sysmicarum in R. Observatorio Geophysico Catanensi peractarum A. 1932*]. Acta Soc. Gioeniae Catanensis Nat. Scient., XX, 2, mem. XII, 5. Catania (1934). **a - 1575**

Pressione atmosferica. Temperatura. Tensione del vapore ed umidità relative. Nebulosità. Pioggia. Vento.

**Imbò G.** - Riassunto delle osservazioni meteorologiche e sismiche eseguite nel R. Osservatorio di Catania durante l'anno 1933 [*Compendium observationum meteorologicarum et sysmicarum in R. Observatorio Geophysico Catanensi peractarum A. 1933*]. 6 pp., Acta Soc. Gioeniae Catanensis Nat. Scient., XX, 2, mem. XIV. Catania (1934). **a - 1576**

Pressione atmosferica. Temperatura. Tensione del vapore ed umidità relative. Nebulosità. Pioggia. Vento.

**Juergens S.** - Norder im Golf von Tehuantepec [*Ventus nordicus in Sinu* Tehuantepec]. 1 Tab., Seewart, IV, 1, 19-21. Hamburg (1935). **a - 1577**

Beschreibung eines typischen Tehuantepecer und dessen Begleiterscheinungen, welche am 16. November 1933 in 15° 50° N-Br, 98° 29' W-Lg beobachtet worden sind, mit ergänzenden Bemerkungen von der Schriftleitung des « Seewarts ».

**Kalitine N. N.** - Sur les radiations solaires sur la Terre de François-Joseph. Données préliminaires [*De solis radiationibus in Terra Francisci Josephi. Dati priores*]. (En russe). 2 Tabl., Bull. Arct. Inst., 1/2, 21-23. Leningrad (1935). **a - 1578**

Bref résumé des résultats des observations faites à l'aide d'un héliographe installé dans l'Observatoire de la Baie Tikhaja en Août 1932.

**Kame de Feriet J.** - La turbulence du vent dans les couches inférieures de l'atmosphère [*De ventorum turbulentia in atmosphaerae stratibus inferioribus*]. 18 fig., tabl. Rev. Quest. Sc., LIV, 18-63. Paris-Louvain (1935). **a - 1579**

Exposé contenant une esquisse de l'état actuelle des recherches sur la structure du vent, avec référence spéciale au mouvement d'agitation complexe, à courte période, qui constitue ce que l'on nomme la turbulence du vent. L'ouvrage se divise nettement en deux parties, dont l'une contient des aperçus théoriques sur l'objet de l'étude, et la deuxième donne la description de recherches et résultats expérimentaux.

**Kimball Herbert H.** - Turbidity and Water Vapor Determinations from Solar Radiation Measurements At Blue Hill, and Relations to Air-Mass Types [*De atmosphaera turbida deque vapore aqueo. Determinationes ex mensuris irradiationis solaris in* Blue Hill. *Agitur etiam de correlationibus cum aëris massis*]. 3 tables, Monthly Weath. Rev., LXII, 9, 330-333. Washington D. C. (1934). **a - 1580**

Table of values of $\beta$ (atmospheric turbidity factor), and $\varpi$ (atmospheric vapor content), computed from measurements of the total ($I^{m}$) and screened ($I_y$, $I_r$) solar radiation intensity, obtained at the Blue Hill Meteorological Observatory of Harvard University. Some comments as to the interpretation of the data recorded with especial reference to the determination of the turbidity factor.

**Kunze G.** - Beiträge zur Klimatologie des Europäischen Nordmeeres (Skandik). Auf Grund der Beobachtungen der Insel– und Küstenstationen [*Contributiones in climatologiam Maris Nordici ex observationibus in stationibus insularibus et litoreis peractis*]. 15 Skizz., 77 S. (Diss. Univ. Breslau). Breslau (1933). **a - 1581**

Beschreibung des Klimas von Spitzbergen, der nordnorwegischen und ostgrönländischen Küste. Statistische Daten über die absoluten Temperaturextreme 1911-28 (°C) und die Zahl der Niederschlagstage 1911-1928. Der letzte Teil der Arbeit enthält eine Polemik gegen die Anschauung von Robitzsch in Bezug auf den Wärmerückfall im Dezember der Polargebiete in Verbindung mit den Eisverhältnissen.

**Landsberg H.** - Observations of Condensation-Nuclei in the Atmosphere [*De observatis nucleis per atmosphaerae condensationem*]. 7 figs., Monthly Weath. Rev., LXII, 12, 442-445. Washington D. C. (1934). **a - 1582**

1. The results of 1,051 observations of condensation-nuclei at four different localities are given. 2. Connections between the number of nuclei and convection and turbulence are shown; and correlations between nuclear counts, relative humidity, visibility and wind are mentioned. 3. The relationship between nuclei contents and air mass is discussed, and the former found to be a valuable help in air mass analysis. 4. The effects of nuclei on human health and their absorption of radioactive emanation are discussed. (Author).

**Lauscher Friedrich** - Vom Klima der Packeiszone. Referat über die Forschungsergebnisse der Norwegischen Nordpolarexpedition mit der « Maud », 1918 bis 1925, erstattet nach den Veröffentlichungen von H. U. Sverdrup [*De zona glaciata eiusque climate. Relatio redacta ex resultatibus investigationum per expeditionem norvegicam ad Polum peractarum in navi* « Maud » *ab A. 1918 ad A. 1925. Exitus deducti a publicationibus prof.* H. U. Sverdrup]. 4 Tab., Meteorol. Ztschr., LI, 11, 401-408. Braunschweig (1934). **a - 1583**

Kurze einleitende Bemerkungen über den Verlauf der Expedition. Veröffentlichungen. Aerologische Beobachtungen. Temperatur. Luftfeuchtigkeit. Niederschlag. Rauhreif. Nebel und Dunst. Wolken und Bewölkung. Die Zirkulation der Luft.

**Lejay P.** - Etude de la variation diurne des atmosphériques à Shanghai [*De variatione diurna atmosphaerae in* Shanghaï]. 1 table, C. R. Acad. Sc., CC, 9, 768-770. Paris (1935). **a - 1584**

Compte-rendu des résultats d'enrégistrements poursuivis d'une façon continue au cours de trois années 1932, 1933 et 1934, à l'Observatoire de Zi-ka-wei, par la méthode de M. Bureau avec un instrument qui compte les atmosphériques. L'A. représente sur des courbes les moyennes mensuelles du nombre des atmosphériques enregistrés à chaque heure du jour. Les courbes ont pour chaque année des formes semblables; cette remarquable fidélité est d'autant plus frappante que l'allure des courbes se modifie considérablement d'un mois au suivant.

**Lettau Heinz** - Turbulente Schwankungen von Wind und Temperatur in der bodennahen Luftschicht als Austauschproblem [*Ventorum atque temperaturae oscillationes turbidae in strato aërio prope terrenum consideratae ac problema permutationis*]. 2 Abb., 1 Tab. Ann. d. Hydrogr., LXII, 12, 469-473. Berlin (1934). **a - 1585**

Ergebnisse von Untersuchungen der turbulenten Schwankungen einiger meteorologischen Elemente, welche am Geophysikalischen Observatorium von Leipzig an Hand wiederholter Registrierungen von Windgeschwindigkeit, Temperatur und auch unmittelbar von dem vertikalen

Temperaturgradienten auf elektrischem Wege unternommen worden sind. Anordnung der Versuche. Wichtigkeit der Verarbeitung von Kenntnissen über Gesetzmässigkeiten bei Vorbedingung, Entstehen und Ausmass atmosphärischer Turbulenz, weil darin der Schlüssel zu meteorologischen Diagnosen und Prognosen bei den nautisch massgeblichsten Wetterelementen Sicht, Nebel und Bodenwind liegt.

**Lugeon J.** - L'ionosphère et la météorologie [*De ionosphaera deque meteorologia*]. Actes Soc. Helv. Sc., Nat., 220-242. Altdorf. **a - 1586**

**Lugeon J.** - Localisation à grande distance des foyers de parasites atmosphériques sans radiogoniomètre [*De parasitis atmosphaericis sine ullo radiogoniometro, maximo spatio, determinatis*]. 1 fig., C. R. Acad. Sc., CIC, 20, 1059-1061. Paris (1934). **a - 1587**

Courbe d'enregistrement des parasites issus d'un foyer lointain en fonction des mouvements du soleil. Détermination graphique de l'azimut avec deux enregistreurs distants de plusieurs centaines de kilomètres.

**Lüth F.** - Zur Frage der Messung der Lufttemperatur auf See [*Quaestio de mensuranda aëris temperatura ad mare*]. 4 Tab., 1 Fig. Ann. d. Hydrogr., LXII, 12, 473-475. Berlin (1934). **a - 1588**

Ausführungsart und Ergebnisse der vom Vf. unternommenen Thermometervergleichsmessungen mit zwei in Jalousiekästen aufgehängten Thermometern (Seeobshütten) und einem Assmannschen Aspirationspsychrometer. Die Messungen wurden auf dem Wege Antwerpen- Marokko-Hamburg vom 26. VI bis zum 3. VIII. 1934 an Bord des Dampfers « Porto » ausgeführt. Verschiedene auf die Messinstrumente zum Ausdruck gekommene Einflüsse.

**Markgraf H.** - Entwicklung des « Täglichen Wetterberichts » von 1876 bis 1934 [*Ephemeris meteorologica eiusque progressus ab A. 1876 ad A. 1934*]. Ann. d. Hydrogr., LXIII, 5, 214-216. Berlin (1935). **a - 1589**

Anlässlich der in Juni 1934 erfolgten Erweiterung der aerologischen Meldungen wird eine Uebersicht des von der Deutschen Seewarte herausgegebenen täglichen Wetterberichtes gegeben.

**Martin R. J.** - Climatological Tables. Description of Tables and Charts [*Tabulae climatologicae. Tabularum et chartarum descriptio*]. 10 charts, 2 tables, Monthly Weath. Rev., LXIII, 1, 37-43. Washington D. C. (1935). **a - 1590**

Comment of tables which give respectively data ordinarily needed for climatological studies for about 180 Weather Bureau stations making simultaneous observations and the means of pressure and temperature and other meteorological statements for about 37 stations of the Canadian Meteorological Service. Illustrative comment to the charts showing temperature departures, tracks of centers of anticyclones and cyclones, percentage of clear sky between sunrise and sunset, total precipitation, isobars and sea level, and isotherms at surface, prevailing winds, wind roses for selected stations, total snowfall and North Atlantic weather maps of particular days.

**McEwen F.** - Quarterly Forecasts of Sea and Air Temperatures [*Praesagia trimenstria aëris et maris temperaturae*]. 3 figs., 2 tables. Monthly Weath. Rev., LXII, 10, 361-364. Washington D. C. (1934). **a - 1591**

The author claims that the variation of average monthly temperature of both the sea and air may be regarded as the result of regular, well defined trends in causes, accompanied by accidental disturbances. In searching for the proper factors it is assumed that a composite index to them, of forecast value, is furnished by past temperatures. Proceeding empirically in this basis, the monthly temperatures are « smoothed » or adjusted in order to eliminate the irregularities which at first are regarded as accidental. Assuming this smoothed temperature to form a composite index of the various trends in causes, various methods of extrapolation can be applied to predict the future smoothed temperature. Such a procedure has been applied in California, where a very definite correlation was found.

**Meinardus W.** - Eine neue Niederschlagskarte der Erde [*Praecipitationum in Terram tabula nova*]. Karte, 2 Taf., Peterm. Mitt., LXXX, 1, 1-4. Gotha (1934). **a - 1592**

Diese Arbeit schliesst sich an die von Schott und Supan gemachten Niederschlagskarten des Indischen, Stillen und Atlantischen Ozeans, welche hier auch erörtert werden. Die Grundlagen der Niederschlagskarte. Die mittlere jährliche Niederschlagsmenge auf der Erde für Land und Meer. (S. auch Peterm. Mitt. 7/8, 225-226).

**Mellicchia A.** - L'organizzazione meteorologica europea [*Organisatio meteorologica europaea*]. Ric. Scient., a. V, 3-4, 71-84. Roma (1934). **a - 1593**

L'autore rende conto di una sua missione che gli ha consentito di studiare l'organizzazione dei servizi meteorologici dei principali paesi di Europa e con brevi note descrive singolarmente i vari istituti meteorologici.

**Mieghem van Jacques** - Thermodynamique des systèmes non-uniformes en vue des applications à la météorologie [*De systhematis non-uniformibus eorumque thermodynamica pro applicationibus ad meteorologiam*]. Geofys. Publ., X, 14, 1-18. Oslo (1935). **a - 1594**

La partie thermodynamique est basée sur le travail de M. le Prof. Th. De Donder, Leçons de Thermodynamique et de Chimie-Physique. Equations du transport de l'air atmosphérique et équation de continuité. Equation staecométrique de la météorologie. Variables d'état et fonctions d'état. Equations dynamiques de la météorologie. Bilan dynamique de l'énergie. Travail élastique effectué par l'unité de masse élémentaire sur le milieu ambiant. Relations entre les composantes du tenseur de la viscosité et la fonction dissipative de Lord Rayleigh. Bilan thermodynamique de l'énergie. Divers bilans energétiques. Calcul des quantités de chaleur fournies à l'unité de masse pendant l'unité de temps. Le seconde principe de la thermodynamique. Calcul des quantités de chaleur non compensée. Hypothèses fondamentales. Bilan énergétique de M. V. Bjerknes. Bilan énergétique de M. A. Refsdal. Transformations quasi-adiabatiques.

**Miller Eric R.** - Some Wind Velocity Correlations [*Nonnullae correlationes velocitatis venti*]. 3 tables, Monthly Weath. Rev., LXII, 11, 402-404. Washington D. C. (1934). **a - 1595**

Two studies of wind velocities in as many relationships employing the methods of correlation analysis, are reported in this paper. The first one deals with the conversion of monthly means indicated (4-cup anemometer) wind velocities to true velocities.

**Miloja Salvatore** - Tavole ciclonometriche per la determinazione in mare della distanza e del rilevamento del centro delle depressioni tropicali ed extratropicali tra le latitudini 5°-50° Nord o Sud [*Agitur de tabulis cyclonometricis quae determinant distantiam nec minus centrum depressionum tropicalium et extratropicalium inter latitudines 5° et 50° N. et S.*). R. Istit. Idrogr. Genova (1935). **a - 1596**

Tavole basate su formule empiriche.

**Mirrlees S. T. A.** - Meteorological Results of the British Arctic Air-Route Expedition 1930-31 [*Exitus meteorologici navigationis Britannicae ad

*cursum aërium arcticum studendum peracti A. 1930–1931*]. Maps, diagrs. 62 pp., H. M. Stat. Off. London (1934). **a - 1597**

Careful analysis of all the meteorological observations made in Greenland by the B. A. A. R. E. during the period August 1930 to July 1931, with special reference to visibility, the frequency and arising of gales, their probable origin, and optical phenomena.

**Mosby H.** - The Sea-Surface and the Air [*De maris aequore deque aëre*]. Scient. Res. Norw. Antarct. Exped. 1927-1928, 10. Oslo (1933). **a - 1598**

**Muratore G.** - L'atmosfera [*De atmosphaera*]. Riv. di Fis., Mat. e Sc., Nat. 7, 344-357. Napoli (1935). **a - 1599**

L'autore esamina in questo articolo i valori delle masse dell'aria, lo spessore dell'atmosfera, la divisione di questa in varî strati, la sua composizione alle varie altezze; quindi, dopo aver accennato ai varî mezzi di esplorazione dell'alta atmosfera, mostra come varia la densità e la temperatura dell'aria con l'altezza, e dà in ultimo brevi notizie sulla ozonisfera e sulla ionisfera.

**Nelson Frederich J.** - The Beaufort Wind Scale [*Modulus seu scala ventorum per* Beaufort]. U. S. Nav. Inst. Proc., LX, 381, 1546-1548. Annapolis (1934). **a - 1600**

Some criticism on the scale of Beaufort, which - according to the author - ought to be reviewed and corrected.

**Newnham E. V.** - Meteorology. [*Meteorologia*]. Sc. Progr., XXVIII, 112, 676-682. London (1934). **a - 1601**

Description of some new methods developed for studying the upper atmospheric eddies with a special reference to those over the Bay of Gibraltar. Some information on a new theory of Durst as to convectional disturbances in the form of cells travelling with the general wind. (See also Geophys. Mem., Nos 54 and 59, 1933).

**Nichols E. S.** - Time Limits of the Day As Affecting Records of Minimum Temperature [*De diei limitibus ac factoribus consideratis qui influunt in minimas inscribendas temperaturas*]. 4 tables. Monthly Weath. Rev., LXII, 9, 337-343. Washington D. C. (1934). **a - 1602**

Some considerations on the influence of the use of different times for the termination of the « day » which may considerably affect the record of minimum temperature, especially by producing numerous, and at times large variations in the minima recorder of the same date.

**Noto Hisashi** - Some Studies on Thunderstorms. Part I & II [*De tempestatibus. Pars Iª et IIª*]. 16 figs., 12 tables. Proc. Phys.-Math. Soc. XVI, 5, 177-199. Part I; Jap. Journ. Astr. & Geoph., XII, 1, 27-87, Part II. Nat. Res. Counc., Tokyo (1934). **a - 1603**

In the first part are reported the results of observations of lightnings and the minute changes appeared in the antenna-earth current. In the second the A. makes an attempt to apply the results of his investigations on the electrification of ultra-microscopic particles suspended in the atmosphere in order to find an explanation of the atmospheric potential gradient near the earth surface during rain and snowfalls.

**Nunnari R.** - Sul carattere evolutivo della pioggia a Messina [*De pluvia Messanae. Agitur de eius evolutione*]. Atti R. Acc. Peloritana, XXXVI, 153-166. Messina (1934). ( — ) Mem. R. Uff. Centr. Meteorol. e Geof., ser. 3, IV, mem. V. Roma (1934). **a - 1604**

Con i dati della quantità e frequenza della pioggia a Messina dal 1882 al 1931, applicando il metodo della perequazione, si ricerca la periodicità dei diversi andamenti di questo fattore; si stabilisce in seguito una relazione tra la quantità e frequenza annuale con il numero delle macchie solari e si ricavano i relativi indici di concordanza e di correlazione; si applica infine il metodo di previsione per estrapolazione e si calcolano i valori annuali e stagionale della quantità e frequenza della pioggia a Messina per l'anno 1934.

**Olch Isaiah** - Hurricane Security [*Securitas in tempestates paranda*]. U. S. Nav. Inst. Proc., LXI, 383, 28-30. Annapolis, Md. (1935). **a - 1605**

Some hints concerning adequate plans for material, communication and personnel security in the event of an hurricane. Collaboration between ships and shore activities. Suggestions for the « hurricane bill » which should be held prior to the hurricane season and upon receipt of any weather disturbance information.

**Petersen Helge** - Extrem hohe Temperaturen und Föhn in Grönland [*De maximis temperaturis deque vento* Föhn *nomine in Groenlandia*]. 3 Abb., 3 Tab., Meteorol. Ztschr., LI, 8, 289-296. Braunschweig (1934). **a - 1606**

Unter Beziehung auf einige sehr markante Beispiele von extrem hohen Temperaturen in Grönland sowie eine Föhnbeobachtung von de Quervain während seiner Durchquerung des Inlandeises in 1912 erörtert der Vf. hier die Möglichkeit diese Temperaturerhöhungen in einem gewaltigen Vorstoss von warmen atlantischen Luftmassen und in der dynamischen Erwärmung von dem Föhn zu suchen.

**Poisson Ch.** - Le front polaire et la formation des typhons [*Frons polaris ac typhones*]. C. R. Acad. Sc., CIC, 2, 159-160. Paris (1934). **a - 1607**

Etude des tempêtes suivies par l'auteur à Madagascar. L'auteur est conduit à envisager des fronts essentiellement temporaires et passagers. Ce 'front de mousson' existerait seulement au moment et dans la région où le courant derivé heurte la mousson près de la surface de la mer.

**Raftery T. J.** - Interpreting Barometric Pressure Changes [*Interpretatio variationum barometricarum quoad pressionem*]. 2 figs., 5 tables. U. S. Nav. Inst. Proc., LXI, 385, 358-360. Annapolis, Md. (1935). **a - 1608**

The different factors to be considered in an analysis of the causes of rate of pressure change: (1) the diurnal variation of the barometer, (2) the general barometric pressure distribution, and (3) the course and speed of the ship, if under way. Example showing how the various factors enter into an analysis of the pressure change, for the various conditions.

**Ramponi Francesco** - Contributo all'indagine intorno alla ciclicità degli afflussi meteorici [*Contributio in investigationes de cyclicitate affluctionum meteoricarum*]. Boll. Sind. Fasc. Ing. ed Arch. Tre Venezie, 1 fig., 8, 191-193. Trieste (1934). **a - 1609**

L'A. si propone di mettere in luce l'esistenza di ciclicità nei fenomeni naturali pluviometrici e di additare un possibile metodo di investigazione sull'argomento.

**Ray C. L.** - Relation of Tropical Cyclone Frequency to Summer Pressures and Ocean Surface-Water Temperatures [*Correlatio inter frequentiam cyclonum tropicalium, pressiones aestivas et oceani aquarum superficialium temperaturas*].

4 tables. Monthly Weath. Rev., LXIII, 1, 10-12. Washington D. C. (1935). **a - 1610**

Results of the working out of a correlation of summer and autumn tropical disturbances in the Caribbean Sea and Gulf of Mexico with spring–summer pressure deviations at San Juan, made at the beginning of the season 1934. In four tables data are gathered concerning (1) the correlation of tropical storm frequencies of the Caribbean and Gulf and spring–summer pressure at San Juan P. R. (1887-1934), (2) the mean frequency of tropical disturbances, of Caribbean and Gulf of Mexico, in relation to spring–summer pressure at San Juan P. R., (3) the annual frequency of tropical storms in the Caribbean and Gulf of Mexico, 1887-1934, and (4) the years of pressure excess of deficiency at San Juan P. R., during May, June, July, 1887-1934.

**Rein B.** - Le Service Météorologique [*Servitium meteorologicum*]. (En russe). 3 fig. Nachi Dostizh., 3, 170-172. Moskva (1934). **a - 1611**

Le rôle de l'Arctique dans la prévision du temps.

**Rodewald Martin** - Das norddeutsche Hochdruck-Gewitter vom 19. August 1932 [*Agitur de tempestate in Germania sept. die 19 mensis Augusti 1932 cuius origines ponendae sunt in pressionis atmosphaericae augmento*]. 1 Taf. Ann. d. Hydrogr., LXIII, 1, 23-29. Berlin (1935). **a - 1612**

1. Vorbemerkung: statistische Beziehung zwischen der Höhe des Luftdrucks und der Gewitterhäufigkeit an einem Ort; Seltenheit des in Frage kommenden Gewitters, das sich bei hohem Luftdruck ereignet hat. 2. Die Wetterlage am 19. August 1932. 3. Die Erscheinungsweise des Gewitters. 4. Der Aufbau des Gewitters nach den Wind- und Luftdruckvorgängen.

**Roncali A.** - Il tracciamento dei fronti nei bollettini meteorologici quotidiani europei [*De frontum delineatione in ephemeridibus meteorologicis europaeis*]. Aerotecn., 2 fig., 11, 1268-1273. Roma (1934). **a - 1613**

Sono state confrontate le posizioni attribuite ai fronti dai vari servizi meteorologici europei rivelandone le divergenze e discutendone le relative cause.

**Rückert J.** - Ausbau und Ausnutzung des Ozeanwetterberichtes [*Elaboratio et valor alicuius ephemeridis meteorologici oceanici*]. 1 Tab. Seewart, III, 6, 270-275. Hamburg (1934). **a - 1614**

An Hand praktischer Beispiele erläutert Vf. den Begriff « Meteorologische Navigation », mit besonderer Berücksichtigung der Darstellung der Wetterverhältnisse im Nordatlantik, und zwar im Raume zwischen 40 und 63° Breite.

**Sandström J. W.** - Ueber den Einfluss des Golfstromes auf den Luftdruck und die Luftbewegung in Europa im Winter [*De Gulf Stream eiusque influentia in aëris pressionem nec minus in aëris motus hieme perdurante in Europa*]. 2 Abb., 2 Taf. Meteorol. Ztschr., LI, 10, 361-369. Braunschweig (1934). **a - 1615**

Diese Untersuchung bildet teilweise die direkte Fortsetzung einer früheren Arbeit über die Beziehung der Lofotenwindrichtung zur Wintertemperatur in Europa (Meteorol. Ztschr. 11, 401, 1926). Berücksichtigung des Luftdruckunterschiedes zwischen Island und Azoren und der Windrichtung auf Lofoten. Vergleich unter diesen Faktoren und ihre gegenseitige Einwirkung. Die Hauptwindrichtungen auf den Lofoten und die daraus folgenden verschiedenen Wettertypen sind in 2 Tafeln mit 144 Abbildungen wiedergegeben.

**Scharonow W.** - Eine neue Methode zur Messung der Lufttrübung und der Sichtbarkeit [*Methodus nova ad visum opacitatemque atmosphaericam mensurandos*]. (In Russ. & Deutsch.). 1 Abb. C. R. Acad. Sc. U. R. S. S., III, 7, 500-505. Léningrad (1934). **a - 1616**

Prinzip, Ausführung, und Funktionieren eines vom Vf. erbauten Apparates, des « Lufttrübungsmessers », welcher zur Messung von Lufttrübung und Sichtbarkeit entfernter Objekte gebraucht wird. Befriedigende Ergebnisse der praktischen Anwendung des Apparats.

**Scherhag R.** - Der aerologische Ausbau des « Täglichen Wetterberichts » der Deutschen Seewarte [*Ephemeris meteorologica ad Observatorium Maritimum Germanicum pertinens. Agitur de eius progressione aerologica*]. 1 Tab. Ann. d. Hydrogr., LXIII, 5, 216-218. Berlin (1935). **a - 1617**

Bericht über die am 1. September 1934 erfolgte Umgestaltung des « Täglichen Wetterberichts » der Deutschen Seewarte zum Ziel einer wesentlichen Erweiterung des aerologischen Inhalts, mit der Hinzunahme von zwei Höhenkarten und einer Vermehrung auf acht Seiten.

**Schnittger W. & Linke H.** - Ballontheodolite zur Beobachtung auf festem Boden und auf Schiffen [*Theodolites pro sphaericis quibus utitur ad observationes peragendas in Terra et in navibus*]. Ztschr. f. Instr. kunde, LIV, 9, 311-317. Berlin (1934). **a - 1618**

Beschreibung von zwei neuen Theodoliten für normale Messungen auf festem Bodem und für Schiffsbeobachtungen. Bau, Transportmöglichkeiten, Gebrauchsweise und Anwendungen der beiden Theodoliten. Der Schiffsballon-Theodolit macht es möglich, auch auf See Beobachtungen über Windrichtungen und -geschwindigkeit mittels Pilotballonverfolgung durchzuführen.

**Semmelhack W.** - Klimatographische Witterungsschilderung. Nr. 36: Seeverkehrsweg: Südwesteuropäisches Gebiet des Atlantischen Ozeans (Westportugiesisches Meeresgebiet) [*Descriptio climatographica condicionum meteorologicarum. N° 36. Cursus maritimus. Regio sud-orientalis Oceani Atlantici. Sectio maritima Lusitaniae Occid.*]. 2 Karten. Ann. d. Hydrogr., LXIII, 5, 213-214. Berlin (1935). **a - 1619**

Aus der Sammlung des überseeischen meteorologischen Dienstes der Deutschen Seewarte. Verlauf der Witterung im März auf dem Seewege von Porto nach den Berlenga-Inseln. Beobachtungstag: der 6. März 1935.

**Semmelhack W.** - Klimatographische Witterungsschilderung. Nr. 39: Seeverkehrsweg: Westliches Mittelmeer [*Descriptiones meteorologicae climatographicae. N° 39. Cursus maritimus. Mare Mediterraneum occid.*]. 2 Kart. Ann. d. Hydrogr., LXIII, 6, 253-255. Berlin (1935). **a - 1620**

Aus der Sammlung des überseeischen meteorologischen Dienstes der Deutschen Seewarte. Verlauf der Witterung im März im südspanischen Meeresgebiet. Beobachtungstag: der 21. März 1935.

**Simpson G. C.** - Arctic Meteorology [*Meteorologia arctica*]. Nature, CXXXV, 3402, 52-54. London (1935). **a - 1621**

Comment of the work by H. U. Sverdrup, « The Norwegian North Polar Expedition with the « Maud », 1918-1925, scientific Results », vol. II, Meteorology (Geofys. Inst. Bergen, in co-operation with other institutions), which emphasizes the importance of the « Maud » sojourn in the Arctic, where she was engaged in the same enterprise of scientific research, and her scientific results were no less valuable than those obtained by the « Fram » during Nansen's drift across the north polar basin.

**Slocum Giles** - Regression Equations Analyzing the immediate Antecedents of Temperature Anomalies in Straits of Florida Surface Waters [*De aequationibus quae perpendunt abnormitates thermicas aquarum superficialium in fretis regionis Floridae quoad antecedentes earumdem abnormitatum*]. 1 fig., 2 tables. Monthly Weath. Rev., LXII, 11, 411-415. Washington D. C. (1934). **a - 1622**

Claiming that the causes of variations in the Straits of Florida water-surface temperatures are many and complex the A. only deals with complexes of several basic elements considered as single « causes ». Subject to this grouping, practically all of the variations in the surface temperatures of the Straits may be expressed in terms of simple, linear, algebraic functions of the combined influence of three numerical factors, which are: (1) the contemporary local air temperature, (2) the water temperature in the eastern Gulf of Mexico, (3) the contemporary percentage of possible sunshine at Key West.

**Slocum Giles** - Sea-Surface Temperature Summary for the Yucatan Channel, 1912-33 [*De temperaturis ad maris superficiem Canalis* Yucatan. *Compendium*]. 1 table. Monthly Weath. Rev., LXII, 11, 425. Washington D. C. (1934). **a - 1623**

Table of the monthly mean sea-surface temperatures; the area from which the observations were taken embraces five 1° squares.

**Smith H. T.** - The History and Development of Organized Marine Meteorology. I The First Organisation. II Middle Period. III Modern Development. [*De meteorologia nautica. Historia et progressus*]. 9 figs. Mar. Obs., XII, 117, 19-22; 118, 65-67; 119, 107-110. London (1935). **a - 1624**

**Stevens W. R.** - The Tropical Disturbance of August 26-31, 1934 [*De perturbatione tropicali a die 26 ad diem 31 mensis Augusti 1934*]. Monthly Weath. Rev., LXII, 9, 344. Washington D. C. (1934). **a - 1625**

Disturbed atmospheric conditions observed in connection with the storm of the morning of August 26, 1934 in the north-central Gulf of Mexico; movement of the center of the disturbance: observed wind-velocities and lowest pressure.

**Størmer Carl** - Measuring of Aurorae with very long Base Lines [*De auroris dimensis quae bases habeant perlongas*]. 16 fig., tabl., 2 pls, Geofys. Publ., XI, 3, 1-15. Oslo (1935). **a - 1626**

From the measurements undertaken in southern Norway during these last few years it is seen that, primarily, the use of very long base lines can give exact measurements even for aurora forms with badly defined outlines. For well defined aurora forms the error in the measurements with such long base lines can be less than one hundredth of the height.

**Tannehill Ivan Ray** - The Hurricane [*De tempestate*]. Maps, diagrs. U. S. Govmt. Print. Off., U. S. Dpt. Agric. Miscell. Publ. 195, 14 pp. Washington D. C. (1934). **a - 1627**

**Tóth Géza** - A levegötenger az oceanok felett. [*De atmosphaera oceanorum*]. (En hongrois). 4 ill. A Tenger, XXV, 1/4, 26-32. Budapest (1935). **a - 1628**

**Vegard L. & Tønsberg E.** - Continued Investigations on the Temperature of the Upper Atmosphere determined by means of Bands appearing in the Auroral Spectrum [*De investigationibus continuatis in temperaturam atmosphaerae superioris filorum peractis auxilio qui sunt in spectro aurorae*]. 5 figs., 5 tabl., Geofys. Publ., XI, 2, 1-14. Oslo (1935). **a - 1629**

Results of investigations undertaken from February 1933 to the end of March 1934 at the Auroral Observatory, Tromsö. The spectrograms. Results of the temperature measurements. Discussion of the results.

**Vestine E. H.** - Noctilucent Clouds [*Nubes quae noctu fulgent*]. Journ. R. Astr. Soc. Canada, XXVIII, 249-272; 303-317. Toronto (1934). **a - 1630**

**Volochine M. F.** - Bibliographie actinométrique. [*Bibliographia actinometrica*]. Nombr. fiches. Lithogr. Off. Nat. Météor. France, Paris (1934). **a - 1631**

M. F. Volochine qui étudie les questions d'actinométrie à Trappes pour le compte de l'Office National Météorologique de France a centralisé et préparé à la publication ces fiches de la bibliographie actinométrique, dont la rédaction a été commencée par suite d'une initiative prise par l'union géophysique et géodésique internationale, étant donné qu'un effort considérable se porte depuis quelques années vers les recherches actinométriques dont l'importance est fondamentale en physique atmosphérique.

**Wagner Fritz** - Ueber Temperaturen am und im Schiff. Beobachtungen auf dem Flugzeughilfsschiff D. « Westfalen » [*De temperaturis circa navem et in navi. Observationes navis* « D. Westfalen » *quae aëroplana fert*]. Ann. d. Hydrogr., LXIII, 1, 38-40. Berlin (1935). **a - 1632**

Nach einigen Vorbemerkungen über die Schwierigkeiten, die mit der Messung der wahren Lufttemperatur an Bord von Schiffen heim hohem Sonnenstand verbunden sind, berichtet Vf. über einige Messungen der Temperatur von Schiffsteilen mit einer einfachen, behilfsmässigen Methode an Bord des Flugzeughilfschiffes D. « Westfalen », sowie über die Beeinflussung der Temperatur von der das Schiff unmittelbar umgebenden Luft durch die Schiffstemperatur.

**Willet Hurd C.** - Routine Daily Preparation and Use of Atmospheric Cross Sections [*Comparatio cotidiana atque utilitas percipienda a sectionibus atmosphaericis transversis*]. 6 figs. Monthly Weath. Rev., LXIII, 1, 4-7. Washington D. C. (1935). **a - 1633**

Description of a method of presenting a unified picture of atmospheric conditions in the vertical, corresponding to the two dimensional analysis of the surface data, called « atmospheric cross-sections », employed to represent the separate aerological soundings individually on one of the standard forms of diagram, elaborated at the Massachusetts institute of Technology. The method allows to get a two-dimensional picture, along a verticale plane containing a maximum number of observations, of the air mass and frontal structure of the atmosphere, and of the horizontal movement. From the horizontal air movement, and the frontal slopes, it is also possible to draw conclusions about vertical velocities.

**Wirtz C.** - Sonnenstrahlung, atmosphärische Extinktion und Strahlungsfilter. Nach Beobachtungen 1932 und 1933 an der Nordseeküste von Schleswig-Holstein [*De radiatione solari, de extintione atmosphaerica deque filtro irradiationis. Ex observationibus A. 1932 et A. 1933 in litoribus*

Schleswig-Holstein *Maris Nordici*]. 18 Tab. Ann. d. Hydrogr., LXIII, 2, 66-83. Berlin (1935). **a - 1634**

Es wurden sowohl die Gesamtstrahlung der Sonne als auch die Teilstrahlung in verschiedenen Wellenlängenbereichen beobachtet. Hauptziel waren die Extinktionsvorgänge der irdischen Atmosphäre. Himmelsstrahlung in nächster Nachbarschaft der Sonne; ihr Beitrag zu der auf das Aktionometer wirkenden Strahlung. Darstellung der Ergebnisse mit Hilfe des Trübungsfaktors. Aufstellung einer thermischen Extinktionstafel. Untersuchungen und Bemerkungen über Farbgläser und Absorptionsgitter. Ausser der im vorliegenden Aufsatz behandelten Sonnenstrahlung wurden noch Beobachtungen über Kimmtiefe, Himmelsfarbe und Sichtweite angestellt.

**Wirtz C.** - Zur Helligkeit und Farbe des klaren Himmels an der Nordseeküste Schleswig-Holsteins [*De coeli fulgore alboque colore in litoribus* Schleswig-Holstein *Maris Nordici*]. 2 Tab. Ann. d. Hydrogr., LXIII, 4, 170-173. Berlin (1935). **a - 1635**

1. Gegenstand der Untersuchung und Instrumentelles. 2. Die Beobachtungen der Zenithelligkeit. 3. Ihre gesetzmässige Abhängigkeit von der Zenitdistanz der Sonne. 4. Die Himmelsbläue im Zenit. 5. Ein Weg zur objektiven Messung der Himmelsfarbe.

**Wittenbecher Johannes** - Die modernen Seewetterberichte [*De hodiernis ephemeridibus meteorologicis nauticis*]. 2 Taf. Seewart, III, 6, 267-270. Hamburg (1934). **a - 1636**

Bericht über die Umgestaltung und den neuen Ausbau des von der Deutschen Seewarte ausgeübten Wetterberatungsdienstes für die Schiffahrt.

**Wright H. L.** Visibility and Atmospheric Suspensoids at Kew Observatory [*Visus et suspensoides atmosphaerici in Observatorio ad* Kew *pertinente*]. 4 tables. Quart. Journ. R. Meteorol. Soc., LXI, 258, 71-80. London (1935). **a - 1637**

Results of a series of observations of the number of smoke particles and the number of condensation nuclei in the atmosphere and their association with the distance of vision and their relation to visibility, carried out at Kew Observatory. In the tables the results of observations are summarized according to visibility and concentration of nuclei, and to visibility and concentration of particles. The annual variation of both these factors is also dealt with. Discussion of the paper at the meeting of the R. Meteorological society.

**Wright H. L.** - Small Ions and Condensation Nuclei at Eskdalemuir [*De parvis jonis atque nucleis condensationis in* Eskdalemuir]. 1 fig., 1 table. Quart. Journ. R. Meteorol. Soc., LXI, 258, 93-95. London (1935). **a - 1638**

Brief account of a series of observations made at Eskdalemuir during the year 1932 with a view to examine the relation between n, the number of positive small ions per c. c., and N, the number of nuclei per c. c. Despite their crudity these observations indicate in no uncertain manner that visibility is a factor which ought to be taken into account in studies of the problem of atmospheric ionisation.

**Wundt W.** - Die Lage der Kalmen [*De malaciis earumque positione*]. 3 Abb. Meteorol. Ztschr., LI, 2, 49-53. Braunschweig (1934). **a - 1639**

Die Lage der Kalmen im Sinne von Gebieten mit periodisch aufsteigenden Luftströmen knüpft sich an Trog- und Firstlinien des Luftdruckes, welche die ganze orde umziehen und während des Jahres in meridionaler Richtung wandern. Bei der Gestaltung dieser Linien spielt ausser dem Gürtel stärkster Erwärmung, der durch die grössere Landmasse der Nordhalbkugel bedingt wird, eine astronomische Ursache mit. Diese liegt in dem Umstande, dass etwa 2 ½° nördlich des Aequators eine Linie kleinster Jahresschwankung der Wärmezufuhr existiert. Diese ist durch die zeitliche Lage des Perihels bestimmt und bezeichnet die Stelle, wo für den Nordwinter die kürzere and flachere Bestrahlung durch die grössere Nähe der Sonne ungefähr ausgeglichen wird.

**Zalomanov V.** - L'inversion de la température dans l'Antarctique [*De inversione temperaturae in Oceano Antarctico*]. (En russe). Meteorol. Vestn., 1/3, 63. Leningrad (1934). **a - 1640**

**Comissão de Cartografia** - Valores normais dos principais elementos meteorologicos dos observatorios e posto das colonias [*Valores normales quoad praecipua elementa meteorologica in observatoriis et stationibus coloniarum*]. Quadr. Anais Meteorol. Colon., 1932, XIX, 4-68. Coimbra (1934). **a - 1641**

Resumo mensal e anual das observações meteorológicas dos observatórios e postos das colónias portuguesas.

**Comissão de Cartografia** - Anais Meteorológicos das colónias relativos a 1932. Volume XIX [*Annales meteorologici Coloniarum A. 1932 Volumen XIX*]. Quadr. Ministério d. Colón., 3-379. Coimbra (1934). **a - 1642**

Mapas das observações meteorológicas dos observatórios e postos das colónias portuguesas, Cabo Verde, Guiné, S. Tomé e Principe, Angola, Moçambique, Companhia de Moçambique, Companhia de Zambézia, Estado da India, Macau, Timor, no ano del 1932.

**Deutsche Seewarte** - Zur Statistik der Stürme an der deutschen Küste [*De tempestatum statistica in litoribus Germanicis*]. Tab., 37 S., 1 Jahrg.: Beobachtungsjahr 1933. Hamburg (1934). **a - 1643**

Täglich höchste Windstärke und zugehörige Windrichtung an den deutschen Küstenstationen und auf deutschen Feuerschiffen. (S. Besprech. v. P. Heidke, «Ann. d. Hydrogr.», LXIII, 3, 125, 1935).

**Egypt Physical Department** - Meteorological Report for the Year 1931 [*Relatio meteorologica pro A. 1931*]. xiii + 191 pp., Min. Publ. Works, Phys. Dpt. Cairo (1934). **a - 1644**

Values of the magnetic elements at Helwan Observatory for 1931.

**Faculdade de ciências da Universidade de Lisboa** - Anais do Observatório Central Meteorologico « Infante D. Luiz ». II Parte [*Annales Observatorii Meteorologici Centralis* Infante D. Luiz. *Pars II*ª]. Mapas & quadr. Observ. Estaç. Meteorol., 1933, LXIV, 1, 3-137. Lisboa (1934). **a - 1645**

**Great Britain - Meteorological Office** - The Observer's Handbook [*Liber manualis ad usum Observatorum*]. Tables, graphs, photos. Met. Off., H. M. Stat. Off. London (1934). **a - 1646**

This book is the latest addition to a series, whose earlier volumes were called « Instructions for Meteorological Observers ». It is divided into three main sections: I. Instructions for making routine observations at the normal climatological stations, in addition to notes on the care and exposure of instruments. II. Authomatic registering of instruments that are not included ordinarily in the usual station equipment. III. Tables for the reduction of barometric data. An appendix contains cloud photographs.

**Great Britain - Meteorological Office** - Annual Report of the Director of the Meteorological Office Presented by the Meteorological Committee

to the Air Council for the Year Ended March 31, 1934 [*Relatio annua a Directore Officii Meteorologici redacta, quae a Comitato Meteorologico relata fuit ad Consilium pro Aëre anni qui exitum habuit die 31 mensis Martii 1931*]. 60 pp. H. M. Stat. Off. London (1934). **a - 1647**

Brief reports on Kew, Eskdalemuir, Aberdeen, Lerwick, and Valentia observatories and on the International Polar Year 1932-1933.

Delhi (1934). **a - 1694**

**Barlindhaug Einar** - Results of Registrations of the Atmospheric Electric Potential Gradient at the Auroral Observatory, Tromsø, During the Period March 1932-July 1933 [*De gradiente potentiale electrico atmosphaerico. Resultatus ex registrationibus peractis in observatorio auroris studendis in* Tromsø *a mense Martio 1932 ad Julium 1933*]. 7 figs., Geof. Publ., Norske Vidensk. Akad. X, 12, 3-12. Oslo (1935). **a - 1695**

The atmospheric electric potential gradient was recorded at the Auroral Observatory, Tromsö, during the period April 1932–July 1933. The reduction factor was determined by absolute measurements carried out on the lake « Prestvannet » in the neighbourhood of the observatory. The diurnal curve of the potential gradient for meteologically indisturbed days has been given. A detailed discussion of the influence of different types of meteorological disturbances on the potential gradient is included in the last part of the paper.

**Bartels J.** - Terrestrial-Magnetic Activity in the Years 1931 and 1932 [*De magnetica terrestri activitate A. 1931 et 1932*]. 1 fig., 4 tables. Terr. Magn. XXXIX, 1, 1-4. Baltimore, Md. (1934). **a - 1696**

Monthly means, u-measure and $u_I$-measure, 1931 and 1932. Annual means of u-measure, $u_I$-measure, relative sunspot-numbers R, and international magnetic character-figures C. Frequency (number of days in 3 years) of international magnetic character-figures C. Correlation-coefficients between quarterly means of terrestrial-magnetic activity $u_I$, relative sunspot-numbers R, and areas of solar limb-prominences P, 1910 to 1932.

**Bartels J.** - Twenty-Seven Days Recurrences in Terrestrial Magnetic and Solar Activity 1923-1933 [*De periodicis cursibus 27 dies quoad magneticam terrestrem activitatem et activitatem solis. 1923-1933*]. 1 diagr., 2 tables. Terr. Magn. XXXIX, 3, 201-202. Baltimore, Md. (1934). **a - 1697**

Author gives a new diagram showing side by side, in a somewhat improved and simplified manner, the recurrence phenomenon for the last sunspot cycle 1923 to 1933 in terrestrial-magnetic activity (C) and solar activity (relative sunspot-numbers R for the central zone). (See: first diagram published in « Terr. Magn. », XXXVII, 1-52 1932).

**Berkner L. V. & Wells H. W.** - Report on Ionosphere-Investigations at the Huancayo Magnetic Observatory (Peru) During 1933 [*De Ionosphaera. Account of further studies of the F-region, ordinarily composed of the F-layer at night which is divided into the $F_1$- and $F_2$- layers at small zenith-angles of the Sun, carried on at the Huancayo Magnetic Observatory of the Department of Terrestrial Magnetism of the Carnegie Institution, Washington, during the year 1933. The separation of the $F_1$- and $F_2$- layers appears to occur because of a decrease of virtual height of the $F_1$- layer and a marked rise of virtual height of the $F_2$- layer. To adequately represent this effect, iso-ionic charts showing the change of virtual height and ionization with time have been constructed.

Brief report of the work performed, one part of which may be made possible through the cooperation of the Naval Air Base at Sunnyvale.

**Burton E. T. & Boardman E. M.** - Audio-Frequency Atmospherics [*De perturbationibus quoad audiofrequentiam*]. Nat. Res. Counc. Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 155-158. Washington D. C. (1934). **a - 1707**

To complete the data of a paper presented a year ago (E. T. Burton & E. M. Boardman, « Audio-frequency Atmospherics », Proc. I. R. E., v. XXI, pp. 1476-1494, 1933) one feature of which was some sound-records of musical atmospherics, an account of some additional records and a brief review of the subject are given in this paper. The need for an extended study of these musical atmospherics is emphasized, and the authors claim that if a correlation exists between these sounds and other phenomena of terrestrial magnetism and electricity, a useful line of investigation may be open to the geophysicist.

Complete account of the development of the entire problem of cosmic radiation through the past two decades. Interpretation of the measurements of the cosmic radiation made by the author in Northern Sweden from 1929 to 1933. Discussion of the effects of meteorological conditions on the cosmic-ray intensity. Negative evidence of the relationship between cosmic-ray intensity and terrestrial magnetic disturbances. Results of measurements at different levels of the penetration of cosmic-rays. The depth-versus-intensity curve.

**Cowling T. G.** - The Magnetic Field of Sunspots [*Campus magneticus macularum solis*]. Monthly Not. R. Astr. Soc., XCIV, 1, 39-48. London (1933). **a - 1712**

Author presents the proof that Larmor's electromagnetic-hydrodynamic hypothesis of the Earth's permanent magnetic field is untenable. As a substitute for Larmor's sunspot-theory author suggests that the field of the spots may be due primarily to a warping of the general solar magnetic field by motion of the gas in the region of the spots, the concept of circular electric currents about the core of the spots being retained as in Larmor's theory.

**Currie B. W.** - Atmospheric-Electric Observations of the Potential Gradient at Chesterfield, Canada [*De observationibus electro-atmosphaericis quoad gradientem potentialem apud* Chesterfield *in regione Canadensi*]. 2 figs., 4 tables. Terr. Magn., XXXIX, 1, 23-31. Baltimore, Md. (1934). **a - 1713**

Location and site of station (lat. 63° 20′ north, long. 90° 42′ west). Instrumental details. Standardization tests. Data and results of the continuous records of the atmospheric potential gradient taken at the Canadian International Polar Year station at Chesterfield, from April to August 1933 inclusive.

( — ) Voir: Etude du champ électrique terrestre, de l'ionization atmosphérique et du courant vertical au Scoresby Sund pendant l'année polaire. C. R. Acad. Sc. CC, 26, 2209-2211. Paris (1935). **a - 1715**

Observations, en deux stations distinctes au moyen d'électromètres Benndorf, munis de prises, de potentiel à l'ionium. La conducibilité due au petits ions a été mesurée

quotidiennement, au moyen d'appareils de Gardien. Mesures ont été faites, au moyen d'un appareil d'Ebert, de la densité des petits ions. Le courant vertical a été étudié par deux méthodes ayant conduit au même résultat.

**De Benedetti S. & Viganò M.** - Influenza di una corrente circolare equatoriale sui raggi cosmici [*De influentia alicuius currentiae circularis aequatorialis in radios cosmicos*]. 5 fig., Ric. Scient., II, 11-12, 422-431. Roma (1934). **a - 1716**

In questo lavoro venne applicata una formula di Störmer per esaminare l'influenza sui raggi cosmici di una corrente circolare equatoriale che produce variazioni del campo magnetico terrestre. Assumendo che i valori delle grandezze che definiscono questa corrente siano tali da render conto della posizione delle aurore boreali e dell'entità delle perturbazioni magnetiche, si conclude che, almeno a grandi altezze, dovrebbe aversi un effetto sensibile; si nota infine che un anormale aumento di ionizzazione con l'altezza, misurato da Regener il 29 marzo 1933, può essere attribuito all'effetto studiato.

**Egedal J.** - On the Propagation of Magnetic Storms [*De tempestatibus magneticis earumque propagatione*]. 2 tables. Terr. Magn., XXXIX, 4, 321-322. Baltimore (1934). **a - 1722**

Examination of the propagation of three sudden commencements of magnetic storms whose times have been compiled by Prof. A. Tanakadate in a report presented to the Association of Terrestrial Magnetism and Electricity (S.: C. R. Ass. Lisbonne 1933, Bull. 9, 149-157, 1934). Author assumes that the storm was produced by electric particles coming from the Sun and that there may be real propagation of the storm in such a manner that the storm will travel gradually from one side to the other of the Earth. With the above assumption it is concluded from the data compiled by A. Tanakadate that: (1) it is not possible to draw from these data a definite conclusion as to the velocity of propagation of magnetic storms; (2) it is not probable that the time required for a magnetic storm to travel from one side of the Earth to the opposite exceeds one minute.

**Huxley L. G. H.** - Cosmic Rays and the Earth's Potential [*De radiis cosmicis deque Terrae potentiale*]. Nature, CXXXIV, 3389, 571-572. London (1934). **a - 1744**

In a recent communication (Nature CXXXIV, 416, Sept. 15, 1934) the A. has outlined a theory of the origin of cosmic rays in which the earth is regarded as a magnetised sphere carrying an electric charge, and the cosmic rays as charged particles which are drawn to it by electrostatic attraction. The author here gives some conclusions to which this theory leads.

**Ionescu Théodore & Mihul Constantin** - Propagation des ondes électriques dans le champ magnétique terrestre [*De propagatione undarum electricarum in campum magneticum terrestrem*]. C. R. Acad. Sc., CC, 15, 1301-1303. Paris (1935). **a - 1745**

En partant de la théorie de la propagation des ondes électriques dans la ionosphère (v. « C. R. », CXCIX, 1934, pp. 1301, 1389 et 1693) déduite de l'hypothèse d'après laquelle en tout point de l'atmosphère, l'intervalle de temps T entre deux chocs consécutifs d'un électron contre les molécules de gaz est le même pour tous les électrons, les AA. ont fait des observations sur l'influence du champ magnétique terrestre qui se manifeste par le dédoublement des échos ionosphériques; les résultats obtenus peuvent être expliqués, d'une façon complète, par l'effet Faraday, sans qu'on soit obligé de recourir à l'hypothèse d'après laquelle l'ionosphère serait composée de plusieurs couches ionisées.

**Kaehler K. & Scherhag R. Th.** - Luftelektrische Messungen in Westerland auf Sylt. Mit einem Anhang (von R. Th. Scherhag): Einige Messungen des luftelektrischen Potentialgefälles [*De mensuris electricitatis atmosphaericae in* Westerland *in insula* Sylt. *Supplementum a* R. Th. Scherhag *redactum de quibusdam mensuris quoad casum potentialis electrici atmosphaerici*]. 1 Tabellentaf., 1 Taf. a. T. Ann. d. Hydrogr., LXII, 7, 288-292. Berlin (1934). **a - 1746**

Messort und Messgerät. Ergebnisse der Messungen. Einfluss der Brandung auf das Leitvermögen der Luft. Aus den im Anhange mitgeteilten Messungen lässt sich der Schluss ziehen, dass besonders unmittelbar am Strande starke kurzperiodische Schwankungen des Potentialgefälles auftreten und dass diese bei Seewind stärker sind als bei Landwind und am Strande ausgeprägter auftreten als hinter den Dünen.

Mit Einverständnis beider Vf. Vf. wird auch eine Stellungsnahme zum Problem von Herrn Professor A. Defant–Berlin wiedergegeben.

**Kalitin N. N.** - On the Total Radiation in Spring and Summer on Franz-Joseph Land [*De totali radiatione vere et aestate in Terra Fr. Josephi.*]. (In Russ., Engl. Summ.). 1 diagr., 2 tabl. Bull. Arct. Inst., 11/12, 398-402, 432. Leningrad (1934). **a - 1747**

This paper contains an account of the results of observations on total radiation (diffused and sun-radiation) taken during the period, April-July, 1934 on Franz-Joseph Land and Calm Bay. The radiations have been recorded ininterruptedly the whole time by a Gorchinsky solarigraph. In a table the monthly amounts of total radiation on 1 cm² of horizontal surface of the earth are given, and in another, the diurnal course of the radiation for each month; there are also given the values obtained during the drift of the « Maud », in order to compare the data obtained in the same table.

**Kato Y.** - Seismic and Volcanic Activities and Changes in the Earth's Magnetic Field [*Activitates variationesque sysmicae et vulcanicae in campo magnetico terrestri*]. (2nd Paper). 36 figs., 26 tables. Jap. Journ. Astr., & Geoph., XII, 1, 1-26. Nat. Res. Counc. Tokyo (1934). **a - 1748**

In a previous paper (S. « Jap. J. Astr. & Geoph., X, 249-262, 1933) the author has established that there is an intimate relation between the tilting motion of the earth's crust and the secular variation of the vertical component or dip of the earth's magnetic field. In the present paper, on hand of the data of the systematic magnetic survey of Japan and working out the local magnetic disturbances that were accompanied by some recent great Japanese earthquakes or volcanic eruptions, he shows that a close connection exists between magnetic disturbances and earthquake or volcanic activity. and that it is probable that the magnetic disturbance appears shortly before the occurrence of an earthquake or volcanic eruption.

Account of an investigation carried out under the immediate direction, and in large part, by the author. After an introduction, setting forth the reason and purpose of the survey together with a brief statement of the scope and plans for the proposed work, a description of the instruments used, the method of selecting station-sites and testing for local disturbances and the distribution of stations, is given. The results for declination, inclination, horizontal intensity, and vertical intensity are shown graphically by charts giving the computed normal values and expressing the observed values as departures from the normal. In a supplementary paper a detailed description of stations and azimuths at each, is given. This survey forms a basis for future determination of secular variation and presents an opportunity for comparison of secular changes in disturbed and indisturbed areas in close proximity to each other.

C. R. Assemblée Lisbonne 1933, Un. Géod. Géoph. Int., Ass. Magn. Electr. Terr., Bull. 9, 76-82. Copenhague (1934). **a - 1758**

**Page L. & Adams N. I. Jr.** - Proposed Reformulation of Electromagnetic Equations and Revision of Units [*De aequationibus electromagneticis earumque expressionibus rursum conficiendis deque unitatibus recognoscendis*]. Journ. Frankl. Inst., 218, 517-531. Lancaster (1934). **a - 1759**

Authors present the most general symmetrical form in which the electromagnetic equations can be put. The Heaviside-Lorentz equations are the most attractive to theoretical physicists, but the Gaussian equations are recommended because the use of Maxwell's electrostatic and electromagnetic units is so general. Very few factors are required to transform an equation from Gaussian c. g. s. units to practical m. k. s. units or vice versa. The two systems of units are tabulated and compared. Numerical examples of calculations in practical m. k. s. units are given. Equations of circuit theory remain as at present in either Gaussian c. g. s. or practical m. k. s. units; and equations for induced e. m. f. in terms of rate of flux change remain as at present in practical m. k. s. units.

**Patterson J.** - Preliminary Report on Auroral, Magnetic, and Earth-Current Observations at Chesterfield, Northwest Territories, Canada [*Relatio prior de aurora boreali, currentiis terrestribus, observationibusque magneticis peractis in* Chesterfield *in regione Canadensi nord-occidentali*]. Nat. Res. Counc., Trans. Amer. Geoph. Union, 15th Ann. Meet., Part I, 166-167. Washington D. C. (1934). **a - 1760**

Certain general conclusions made from the results of the reduction and tabulation of the auroral, magnetic, and earth-current observations taken at Chesterfield (63°20′ north lat., 90°42′ west long.) during the Second International Polar Year, which show that earth-current records from Chesterfield are characterized by rapid and often large variations, and that these periods of rapid fluctuation occur simultaneously with magnetic disturbances, and sometimes with auroral disturbances.

**Peters William J.** - Present Status of the Investigation on Dynamic and Tilting Deviations in the Department of Terrestrial Magnetism, Carnegie Institution of Washington [*De investigationibus in deviationes dynamicas atque oscillatorias a Sectione peractis pro Magnetismo terrestri ad* Carnegie *institutum in* Washington *pertinente*]. 2 tables. Terr. Magn. XXXIX, 3, 203-207. Baltimore, Md. (1934). **a - 1763**

Results of a study of tilting deviations made by means of a swing designed and constructed entirely of brass and actuated by an electric motor installed so far away that the motor has no magnetic effect on the compasses to be used in the experiments. The record is obtained by a motion-picture camera located on the swing-frame. Subsequent experiments revealed masking effects upon the deviation and the difficulty of eliminating or controlling them.

**Petrucci G.** - L'Etna nel punto di vista magnetico [*De Aetna pro vi magnetica*]. Memoria presentata all'Ass. Mineraria Sarda, 1-9. Palermo (1934). **a - 1764**

Il sistema Etneo dà luogo ad una vasta ed intensa anomalia magnetica (ampiezza per la comp. verticale ∼ 6000 v): essa risulta costituita, per la comp. verticale, da una stretta regione di anomalia negativa periferica che circonda tutto il sistema e da una regione di anomalia positiva centrale. In questa memoria è fatto cenno sull'interpretazione di tale andamento ed in ultimo viene messa in vista la particolare ubicazione del sistema Etneo rispetto all'andamento delle anomalie magnetiche laterali e se ne deduce un'ipotesi sulla origine del vulcano e sulla causa della posizione topografica di esso.

**Rizzo G. B.** - Influenza dell'atmosfera terrestre sopra l'effetto di latitudine nella intensità della radiazione cosmica [*De influentia atmosphaerae terrestris in effectum latitudinis quoad intensitatem radiationis cosmicae*]. Atti R. Acc. Naz. Lincei Rend. Cl. Sc. Fis., Mat. e Nat., XX, 183-186. Roma (1934). **a - 1767**

La diminuzione osservata nella intensità della radiazione cosmica sopra le regioni equatoriali può essere dovuta, oltre che all'azione del campo magnetico terrestre sopra i corpuscoli della radiazione, anche al maggiore assorbimento della radiazione stessa per effetto del rigonfiamento equatoriale dell'atmosfera, il quale è accompagnato da una maggiore densità dell'aria nella stratosfera: osservazioni simultanee della intensità della radiazione, a nord e a sud dell'equatore, in punti nei quali è più rapida la variazione della intensità col variare della latitudine, integrate colla registrazione degli elementi meteorici e degli elementi magnetici, dovrebbero permettere di distinguere l'effetto del maggiore assorbimento atmosferico e l'effetto dovuto al campo magnetico terrestre.

A comparison of auroral observations and earth-current records from the College-Fairbanks Station during the International Polar Year shows considerable agreement between the aurorae and disturbances in the earth-current records. Coefficients of linear correlation from 0,71 to 0,76 were obtained from the records for 80 clear nights. The obtained results are at variance with comparisons of magnetic and auroral records which indicate a lack of relationship between the two phenomena.

**Rossi B.** - Sulla deflessione elettrica dei raggi cosmici [*De electrica deflexione radiorum cosmicorum*]. Ric. Scient., II, 11-12, 470-471. Roma (1934). **a - 1771**

E. Senz ha pubblicato recentemente i risultati di una esperienza sulla deflessione dei corpuscoli cosmici in un campo elettrico, eseguita col metodo delle coincidenze. Oggetto della presente nota è di porre in rilievo l'apparente contraddizione tra questi risultati sperimentali e le proprietà precedentemente note dei corpuscoli cosmici.

**Rossi B.** - Le attuali conoscenze sul fenomeno della radiazione cosmica [*Quae scimus de phaenomeno radiatonis cosmicae*]. Scientia, LVII, 2, 101–113. Bologna (1935). **a - 1772**

La radiazione cosmica si manifesta come una radiazione corpuscolare. I corpuscoli che compongono tale radiazione si suddividono in due gruppi: un gruppo « molle », che ha un potere di penetrazione di qualche centimetro di piombo, ed un gruppo « duro », che ha un potere di penetrazione di qualche metro di piombo. I corpuscoli del gruppo duro sono d'origine primaria, come è provato dal fatto che mai è stato possibile sorprenderne la nascita nella materia e dal fatto che essi risentono l'azione del campo magnetico terrestre. Questa azione si manifesta mediante l'effetto di latitudine e l'effetto azimutale; dal senso dell'effetto azimutale si è potuto dedurre che i corpuscoli cosmici sono, prevalentemente almeno, carichi di elettricità positiva. I corpuscoli del gruppo molle sono invece di origine secondaria e vengono generati nell'atmosfera in gruppi (« sciami ») da una radiazione di natura tuttora sconosciuta, che viene assorbita dalla materia assai più rapidamente dei corpuscoli del gruppo duro. Vi sono indizi in favore dell'ipotesi che essa costituisca, accanto ai corpuscoli del gruppo duro, una componente della radiazione cosmica primaria.

**Rossi B. & De Benedetti S.** - Confronto fra le « curve degli sciami » presso il livello del mare e a 2760 metri di altezza [*Agitur de phaenomeno quod italice dicitur* curve degli sciami. *Compa-*

*ratio inter easdem ad maris livellum atque etiam in altitudinem 2760 m.*]. Ric. Scient., II, 9-10, 379-380. Roma (1934). **a - 1773**

Ad integrazione delle ricerche sul comportamento dei raggi cosmici a diverse altezze, gli autori hanno misurata a Padova, col metodo delle coincidenze fra tre contatori a triangolo, la dipendenza del numero degli sciami emergenti da uno schermo di piombo, dallo spessore di questo.

## Gravitas.

**Ballarin S.** - Valutazione dell'effetto della configurazione ellissoidale della terra nella riduzione delle misure di gravità [*Effectus configurationis ellipsoidalis Terrae aestimatur quoad reductionem mensurarum gravitatis*]. Boll. Com. Geod. e Geof. Cons. Naz. Ric., IV, 1-2, 20-41. Milano (1934). **a - 1798**

Trascurando, rispetto all'unità, termini in valore assoluto non superiori alla quarta potenza dell'eccentricità numerica dell'ellissoide di Madrid, si deducono le correzioni da portare ai valori delle riduzioni delle misure di gravità calcolate per una sfera di raggio uguale a quello medio dell'ellissoide internazionale, quando si voglia tener conto della configurazione elissoidale della Terra.

**Cassinis G. & Dore P.** - Le tavole fondamentali per la riduzione delle misure di gravità [*Agitur de tabulis fundamentalibus pro reductione mensurarum gravitatis*]. Boll. Com. Geod. e Geof. Cons. Naz. Ric., IV, 1-2, 1-19. Milano (1934). **a - 1799**

Nella parte I, dopo aver dato conto dei criteri che hanno presieduto alla costruzione delle tavole e delle costanti numeriche assunte a fondamento di esse, si espongono i procedimenti di calcolo eseguiti per ottenere i valori tabulati nell'ipotesi di una Terra sferica, rinviando ad una memoria successiva di S. Ballarin per la valutazione delle correzioni necessarie quando si voglia tener conto della configurazione ellissoidica della Terra. Nella parte II è illustrata l'applicazione delle tavole ai calcoli effettivi di riduzione nelle diverse assunzioni: metodo di Bouguer con correzione topografica, metodo di Bouguer-Meinesz, metodo isostatico secondo Hayford, con densità di compensazione costante e variabile. Metodo isostatico secondo Heiskanen, etc.

**Cassinis G. & Dore P.** - Le tavole fondamentali per la riduzione delle misure di gravità. Parte II: Impiego delle tavole [*Agitur de tabulis fundamentalibus pro reductione mensurarum gravitatis. Pars IIª. Quomodo tabulis utitur*]. Boll. Com. Geod. e Geof. Cons. Naz. Ric., IV, 3-4, 97-106. Milano (1934). **a - 1800**

Metodo di Bouguer con correzione topografica. Riduzione isostatica col metodo di Pratt-Hayford. Riduzione isostatica col metodo di Airu-Heiskanen.

**Gulotta B.** - Considerazioni sul metodo differenziale in gravimetria [*De gravimetria. Considerationes de methodo differentiali*]. Boll. Com. Geod. Geof. Cons. Naz. Ric., 3 fig., IV, 3-4, 114-129. Milano (1934). **a - 1801**

L'Autore espone il metodo differenziale per le determinazioni di gravità relativa, nelle varie forme in cui esso è o può essere realizzato, mostrandone i vantaggi e gli inconvenienti. In particolare confronta le influenze che le variazioni di lunghezze dei pendoli hanno sui risultati delle osservazioni fatte col metodo classico e con quello differenziale. Mostra infine come quest'ultimo consenta l'impiego, *in aria libera*, di pendoli aventi una costante d'estinzione più elevata di quella dei comuni pendoli di bronzo, ma che, di fronte a questi, presentano altri vantaggi, come i pendoli di quarzo, quelli «a minimo» ecc.

**Numerov B. V.** - On the Problem of Determination of the Geoid on the Basis of Gravity Observations [*Problema perspicitur Geoidis determinandi ex gravitatis determinationibus*]. (In Russ. & Engl.). C. R. Acad. Sc. URSS, I, 1, 17-25. Léningrad (1935). **a - 1805**

Description of a new method of the determination of the geoid. Considering only the plains of the European and Asiatic regions of the URSS, it is possible to draw a potential surface over a wide area at a height not exceeding 500 m, and to calculate with confidence the reduction according to the method described. In developing the value of gravity into series by spherical functions, it is possible to determine the coefficients of development allowing to write the development of the radius-vector of the required potential surface, i. e. to construct the true figure of the Earth with the exception of a small amount of anomalous districts of mountainous regions. Stoke's formulas could be used for the same purpose.

**Perrier Georges** - Observations de l'intensité de la pesanteur aux Philippines, en Malaisie et aux Indes Néerlandaises [*Observationes perficiuntur quoad gravitatem in insulis Philippinis, in Malesia et Indiis Hollandicis*]. 1 tabl. C. R. Acad. Sc., CC, 8, 642-643. Paris (1935). **a - 1806**

Tableau donnant les valeurs de l'intensité de la pesanteur observée à l'appareil Holweck-Lejay aux stations suivantes: Luzon, Mindanao, Célèbes, sur les îles Ternate Amboyne, Randa, Timor et Florès, dans Bali et à d'autres stations (au nombre de 14) couvrant la moitié ouest de Java.

Appendix IIª. Relatio de sysmographo geophysico*]. Geogr. Journ., LXXXIV, 2, 121-122. London (1934). **a - 1812**

Report on the results of a series of tests made by the Oxford University Arctic Expedition to Spitsbergen on the geophysical seismograph forming the end of the third stage in the trial of this instrument, which has now been lent to the Cambridge Department of Geodesy for further research.

**Heck N. H.** - A New Map of the Earthquake Distribution [*Tabula quaedam nova terrae motuum distributionem repraesentans*]. 1 map. Geogr. Rev. XXV, 1, 125-130. New York (1935).

( — ) See Rev. in: Nature, CXXXV, 3409, 348. London (1935). **a - 1813**

Latest attempt at mapping earthquakes distribution based on more complete, recent, and accurate information; some indication as to the construction of the map, the earthquake belts, the associated geographical features, and human consequences of the earthquakes which have in the past taken an active part in molding the surface to produce our present-day geographical conditions and will continue the process in the future.

**Imamura Akitune & Yosiyama Ryôiti** - On the Growth of the Volcanic Islet Taketomi-zima [*De elatione insuleti vulcanici* Taketomi-zima]. 7 figs. Jap. Journ. Astr. & Geoph., XII, 1, 109-112. (1934). **a - 1814**

To complete the information contained in a short note published by the senior author in collaboration with Mr. Z. Kawase (« Jap. Journ. Astr. & Geoph. », XI, 113-114, 1934) and in a paper of Mr. Tanakadate (op. cit., XII, 89-108, 1934), the authors give a short description of a new volcanic islet, Taketomi-zima formed off the coast of Alaid Island (155°40'10'' E, 50°50'30'' N), as it actually was towards the end of June 1934.

**Imamura Akitune** - Crustal Deformations Associated with the Dewa Earthquakes of 1804 and 1894 as Revealed Through the Revisions of Precise Levels [*Agitur de corticis terrestris deformationibus quae colligantur cum terrae motibus in* Dewa *A. 1804 et A. 1894, ex livellationibus nuper perfectis*]. 3 figs. Proc. Imp. Acad., XI, 2, 51-54. Tokyo (1935). **a - 1815**

**Kato Yosio** - Seismic and Volcanic Activities and Changes in the Earth's Magnetic Field [*De vulcanica et sysmica activitate variationibusque campi magnetici terrestris*]. (6th Report in Jap.). 5 figs. Disin (Earthquake), V, 764-770. Tokyo (1933). **a - 1816**

The author discusses the magnetic disturbances caused by the great Sanriku earthquakes of 1896 and 1933. In both cases the magnetic disturbances accompanied by these earthquakes were very remarkable. According to mareograms of the district where the earthquakes occurred, the first motion of the tunami was downward in 1896, whereas it was upward in 1933. This would suggest that the mechanism of the two earthquakes were exactly opposite to each other. The magnetic disturbances always appeared shortly before the occurrence of the earthquakes. (From an abstract of the author).

**Kato Yosio** - Seismic and Volcanic Activities and Changes in the Earth's Magnetic Field [*De vulcanica et sysmica activitate variationibusque campi magnetici terrestris*]. (7th Report in Jap.). 6 figs. Disin (Earthquake), VI, 54-62. Tokyo (1934). **a - 1817**

From the end of August 1933, a great number of earthquakes were felt at Okunakayama, Iwate prefecture, Japan. The author observed the magnetic dip in this locality und found that where the magnetic dip had maximum value, there the area was most strongly shaken. It is suggested that changes in the physical state of the earth's crust may be ascertained, and the epicenter of earthquakes confirmed by observing the magnetic dip. (Author).

**Kato Yosio** - Seismic and Volcanic Activities and Changes in the Earth's Magnetic Field [*De vulcanica et sysmica activitate variationibusque campi magnetici terrestris*]. (9th and 10th Report in Jap.). Disin (Earthquake), VI, 89-101. Tokyo (1934). **a - 1818**

In the first part of the reports the author discusses the magnetic disturbance after the great eruption of Mt. Komagatake, Hokkaido, in 1930 and claims that changes in magnetic dip are closely correlated with changes in land-level, which seems to suggest that changes in pressure or temperature are causes commonly responsible for the disturbances mentioned. In the second part author discusses the magnetic disturbance caused by the great Mino-Owari earthquake of 1891. This disturbance may be illustrated with a model consisting of a simple magnet, placed at right angles to the main fault in the earth's crust with its north pole pointing to the south. (From an abstract of the author).

**Kato Yosio** - Seismic and Volcanic Activities and Changes in the Earth's Magnetic Field [*De vulcanica et sysmica activitate variationibusque campi magnetici terrestris*]. (8th Report in Jap.). 1 fig. Disin (Earthquake), VI, 247-251. Tokyo (1934). **a - 1819**

In this paper author discusses the local magnetic disturbance that occurred near the epicenter of the earthquake of Odiya and Kawaguti, Niigata prefecture, Japan, on October 4th, 1933. (Author).

**Kato Yosio** - Seismic and Volcanic Activities and Changes in the Earth's Magnetic Field [*De vulcanica et sysmica activitate variationibusque*

*campi magnetici terrestris*]. (11th Report in Jap.). 3 figs. Disin (Earthquake), VI, 529-534. Tokyo (1934). **a - 1820**

This is a further note on the magnetic disturbance associated with the great Sanriku earthquake of 1933. In July 1934, the author observed the magnetic dip again in the region concerned and discovered that during the following year it showed a tendency to recover from the abnormal state it had at the beginning of 1933. (Author).

**Kato Yosio** - Seismic and Volcanic Activities and Changes in the Earth's Magnetic Field [*De vulcanica et sysmica activitate variationibusque campi magnetici terrestris*]. (The Third Paper). 4 figs., 4 tables. Jap. Journ. Astr. & Geoph., XII, 2, 237-243. Tokyo (1935). **a - 1821**

In the present paper author discusses the local magnetic disturbances observed near the epicenter of two earthquakes, claiming that there is a close relation between seismic or volcanic activities and magnetic disturbances, which always appear shortly before the occurrence of an earthquake or volcanic eruption, while after one of the both, the magnetic field shows signs of recovering from the disturbance.

**Knight Richard H.** - Seismology and the Navy [*De sysmologia deque classe*]. 3 figs. U. S. Nav. Inst. Proc., XL, 378, 1110-1120. Annapolis (1934). **a - 1822**

The purpose of this article is to establish a measure of earthquake consciousness in the mind of the nautical reader without engendering an exaggerated idea of menace from this source.

**Nagaoka Hantaro & Shirai Soshiaki** - Connexion Between the Warping of the Geoid with Seismic and Volcanic Activities [*Agitur de connexione inter plicas quae in Geoide formentur et vulcanicas sysmicasque activitates*]. 4 figs. Proc. Imp. Acad., XI, 1, 19-22. Tokyo (1935). **a - 1823**

Some examples illustrating the results obtained by drawing curves of deviations N of geoid from the normal ellipsoid all over the vorld from Hirvonen's data, for equiparallels and longitudes, which seem to indicate that (1) great earthquakes occur in places where warping is negative and where the gradient is steep, and (2) regions where deviations are positive are generally volcanic and locally seismic.

**Roncali G.** - Sulla interpretazione dei sismogrammi [*De sysmogrammatis interpretandis*]. Mem. R. Uff. Centr. di Meteorol. Geof., ser. III, v. IV, mem. VII. Roma (1934). **a - 1824**

Viene esaminato matematicamente il metodo grafico di interpretazione dei sismogrammi consistente nel sostituire, ad ogni singolo punto del sismogramma, un punto avente per ordinata una combinazione lineare delle ordinate dei punti circostanti. Vengono determinate le espressioni analitiche dei coefficienti della combinazione in funzione dei risultati, sia come amplificazioni, sia come spostamenti di fase, che si desiderano ottenere, ricavando formule del tutto generali. Vengono anche precisati i limiti delle possibilità di tale metodo. Infine sono applicate ad alcuni casi pratici le formule generali trovate, ritenendo espressioni particolarmente semplici, e viene messa in rilievo la possibile applicazione del metodo allo scopo di ricostituire il vero movimento del suolo, liberandolo dalle varie deformazioni strumentali.

**Sapper Karl** - Seismische und semivulkanische Ereignisse in Südsumatra 1933 [*De eventis sysmicis et semi-vulcanicis in Sumatra merid. A. 1933*]. Peterm. Mitt., LXXX, 9, 260-261. Gotha (1934). **a - 1825**

Kurzer Bericht über das am 5. Juni 1933 in Südsumatra stattgefundene Erdbeben. Dies ist das erste Mal, wo nachgewiesen worden ist, dass Beben auch phreatische Ausbrüche wecken können.

**Tanakadate Hidezo** - Volcanic Activity in Japan During the Period Between June 1931 and June 1934 [*De vulcanis in Japonia a mense Junio 1931 ad Junium 1934*]. 1 fig., tables. Jap. Journ. Astr. & Geoph., XII, 1, 89-108. Nat. Res. Counc. Tokyo (1934). **a - 1826**

Brief descriptions of the activities of the Japanese volcanoes in the period between June 1931 and June 1934, under the following headings: Tisima Zone, Nasu Zone, Norikura Zone, Huzi Zone, Aso Zone, Kirisiam Zone. Concluding remarks on the volcanic activities divided into 4 types.

**Visser S. W.** - Microseisms and Depressions in Western Europe and on the Ocean [*De microsysmatis et depressionibus in Europa occ. et in Oceano*]. Proc. K. Akad., XXXVII, 10, 738-746. Amsterdam (1934). **a - 1827**

Author shows that there is a close relation between microseisms in Western Europe and the presence of cyclones over the ocean and that a relation also exists between the state of the sea and microseisms, though not so close. The microsiesms are largest in the direction of the cyclone track. This correspondence can afford a satisfactory basis for weather prediction.

**Wood H. O., Allen M. W. & Heck N. H.** - Destructive and Near-Destructive Earthquakes in California and Western Nevada, 1769-1933 [*De terrae motibus destructoribus vel quasi-destructoribus in California et Nevada Occid., 1769-1933*]. U. S. Dpt. Comm. Coast & Geod. Surv., Spec. Publ., 191, 1-24. Washington D. C. (1934). **a - 1828**

This list of destructive and near-destructive earthquakes of California and western Nevada is intended for the use of those who have to deal in a practical way with earthquake problems. The convenient arrangement and concise description make readily accessible the information needed by these persons, but this list must not be considered as a substitute for the forthcoming catalogue prepared under the auspices of the Seismological Society of America. The list consists of a compilation of available information of all degrees of completeness and authenticity.

**Yamaguti S.** - Relation Between Cyclones and Earthquakes [*Correlatio inter cyclones et terrae motus*]. Bull. Tokyo Univ. Earthq. Inst., 12, 742-753. Tokyo (1934). **a - 1829**

« Deep » earthquakes rarely occur very near cyclonic centres, but a remarkable maximum frequency appears to exist about 900 km. distant from the cyclonic centres. There are certain azimuths referred to the direction of propagation of the cyclonic disturbance that seem to be favoured by different kinds of earthquake. There is also a probable positive correlation between the pressure gradient and the depth of epicentre.

**An.** - The Hawke's Bay (N. Z.) Earthquake of February 3, 1931 (G. W. T.) [*De terraemotu in baja Hawke (Nova Zelanda) die 3 mensis Februarii 1931 (G. W. T.)*]. Sc. Progr., XXIX, 113, 140-143. London (1934). **a - 1830**

Short recapitulation of the earthquake and its effects published in a report of N. Z. Journ. of Science and Technol. XV, 1, 1933.

**Bruce J. R.** - Report of Naturalist-In-Charge for 1934 [*Relatio redacta a naturalista praeposito*]. Mar. Biol. Stat. Port Erin, 47, 11-13. Liverpool (1934). **b - 6**

Summary of research work performed in 1934 at the Marine Biological Station on the Isle of Man, bearing upon the conditions and relations of inter–tidal life on the beach of Port Erin. On the physical side the work has consisted chiefly in the analytical treatment of the large body of data already accumulated. Because of the importance to beach organisms of shock and disturbance, an « exposure » factor has been evolved which takes into account not only the number of wind-days experienced at a given station, but also the total wind force and resulting shock.

After a brief account of the history and development of the scientific biological investigations of the Pacific Ocean, author gives a list, completed by some information on the activity of the Marine Biological Stations on the Pacific in the following countries: USSR, Japan, Philippines Islands, Indo-China, China, Java, New Zealand, Australia, New Caledonia, Hawaii, United States of America, Canada.

**Skadovskij S. N.** - Travaux du Laboratoire de la Station d'Hydrobiologie et d'Hydrophysiologie de l'Institut de Recherche Scientifique en Zoologie en 1932 [*De operibus peractis in Laboratorio quod pertinet ad Stationem pro Hydrobiologia et Hydrophysiologia in Instituto pro Investigationibus Scientificis in Zoologiam. A. 1932*]. (En russe). Abstr. Works Zool. Inst. Univ., 2, 14–15. Moscow (1935). **b - 38**

Compte rendu abrégé des travaux conduits dans le Laboratoire et ayant trait à la physiologie des poissons, à l'influence du milieu extérieur sur les poissons, à l'effet des eaux des égouts et au problème de la stimulation de la maturation des produits sexuels chez les espèces commerciales de poissons.

**Smith W. C.** - Report of the Curator. 1934 [*Curatoris relatio*]. 1 table, 1 list. Mar. Biol. Stat. Port Erin, 47, 6–10. Liverpool (1934). **b - 39**

Brief account of the research carried out by students and research workers at the Station, the yield of the hatchery, the lobster culture, and the aquarium; list of students and research workers, 1933.

**Stacchini P.** - Il museo oceanografico e l'aquarium di Monaco [*Museum oceanographicum et Aquarium Arcis Monoeci*]. 26 fig., Vie d'Italia e del Mondo. 9, 1084-1100. Milano (1934). **b - 40**

**Stejneger Leonhard** - Department of Biology [*Sectio pro Biologia*]. 1 table. Rep. U. S. Nat. Mus., 1934, 26–39. Washington D. C. (1935). **b - 41**

Activity of the Department during 1934, with special regard to the material received, among which Fishes, marine Invertebrates, Mollusks, Corals, Helminths, Echinoderms occupy an important place; installation and preservation of collections, researches by members of the staff, distribution and exchange of specimen, number of specimens under department.

**Thamdrup H.** - Die marinbiologischen Untersuchungen des Skallinglaboratoriums in der Ho Bucht [*De investigationibus maritimis et biologicis Laboratorii* Skalling *in Baja* Ho]. Rapp. Pr.-Verb. Cons. Expl. Mer XVII, 3ème partie. Appendices (1934–1935), 57–59. Copenhague (1935). **b - 42**

Die Ho Bucht als nördlicher Teil des Wattenmeeres ist für diese marinbiologischen Studien sehr geeignet. Der Vf. teilt hier einen wohl ausgearbeiteten Plan für weitere Untersuchungen mit, wobei die Frage über die Nahrungszufuhr besonders beachtet wird. Zusammensetzung der Fauna; Vergleich mit anderen Gebieten des Wattenmeeres

**Trégouboff G.** - Michel Davidoff [*Necrologia*]. 1 Photo. Trav. Stat. Zool. Villefranche-sur-Mer 1933–1934, 3-12. Paris (1935). **b - 43**

Notice nécrologique sur M. Davidoff (avril 1852–décembre 1933). Vie, études, travaux.

**Vaouk Vale** - Das Biologisch-Ozeanographische Institut in Split [*Institutum pro Biologia et Oceanographia,* Split *constitutum*]. 1 Taf. Bull. Int. Acad. Jougosl. Sc. & Arts, Cl. Sc. Mathém. & Natur., XXVIII, 76-86. Zagreb (1934). **b - 44**

Auszug aus « Ljetopis », XLIII, 131–174; XLV, 128–145; XLVI, 129–138. Kurzer Bericht über die Gründung, Organisation und Tätigkeit des Biologisch-Ozeanographischen Instituts in Split.

**Velthof G.** - L'Institut Maritime d'Ostende - Het Zeewetenschappelijk Institut van Ostende [*Institutum Maritimum Ostendae*]. (En franç. & flam.). Rapp. Pêche Marit. 1932–1933, 25-29. Bruxelles (1934). **b - 45**

Activité de l'Institut pendant les années 1932–1933 qui comprend des séries d'investigations surtout des questions, présentant en océanographie comme en pêcherie, un intérêt d'actualité et parmi lesquelles sont décrites celles sur le « hareng guai », sur la biologie de l'esprot, sur les harengs de haute mer et sur la destruction du jeune poisson.

**Wohlenberg E.** - Die angewandte Meeresforschung an der Biologischen Anstalt c) Biologische Landgewinnungsarbeiten im Wattenmeer [*De oceanographia applicata in statione biologica. c) De operibus biologicis in* Wattenmeer, *ut dicitur in Mari Nordico*]. Der Biologe, III, 182–183. München (1934). **b - 46**

**Yessipov V. K.** - Biologische Arbeiten der letzten Jahre auf Novaja Semlja im Allgemeinen and speziell des Arktischen Instituts (Leningrad, USSR) [*De operibus biologicis proximos annos in* Novaja Zemlja *peractis. Agitur generatim et particulatim de operibus ab Instituto Arctico peractis* (*Leningradi URSS*)]. (In Deutsch., Russ. Rés.). 1 Karte. Arctica, II, 161-175. Leningrad (1934). **b - 47**

Kurze Uebersicht der seit 1921 auf der Novaja Semlja ausgeführten Forschungsarbeiten, mit besonderer Berücksichtigung der norwegischen Expedition von Holtedahl (1921), der russischen Expeditionen von R. L. Samojlowitsch (1921–1927), vom Hydrologischen Staatsinstitut unter der Führung von K. M. Derjugin (1923–1925), der Expeditionen des Ozeanographischen Instituts (1924–26), und deren des Arktischen Instituts (1929 u. 1930). Zum Schlusse werden eingehender die Ergebnisse der Expedition von 1931 des Arktischen Instituts besprochen; eine ausführliche Bibliographie der nach dem Ausbruche der Sovietrevolution herausgegebenen Arbeiten über die Flora und die Fauna von Novaja Semlja schliesst das Exposé.

**Zavattari E.** - Cesare Artom [*Necrologia*]. 1 fot., Arch. Zool. Ital., XXI, 1, I-XIII. Napoli (1935). **b - 48**

Nota commemorativo-biografica ed elenco delle pubblicazioni.

**E. F. P.** - Compte rendu des croisières effectuées en 1934 par le Laboratoire Maritime du Muséum [*Acta navigationum A. 1934 peractarum a Laboratorio maritimo ad Museum pertinente*]. Bull. Labor. Saint-Servan, XIII, 1-3. Rennes (1934). **b - 49**

Description de deux courtes croisières effectuées au cours de l'été 1934, à bord du voilier à moteur du Laboratoire, le « Saint-Maudez »; l'une sur le littoral des Côtes-du-Nord, et l'autre à Guernesey et dans les îles voisines. Programme, dragages exécutés, participants.

**F. W. W.** - Mrs. Eveline Spencer [*Necrologia*]. Canad. Fisherm., XXII, 2, 13-14. Gardenvale, Que. (1935). **b - 50**

Obituary.

**An.** - Polar Stations of USSR [*Stationes polo proximae ad URSS pertinentes*]. (In Russ. & Engl.). Bull. Arct. Ist., 8/9, 319-320 & 349-350. Leningrad (1934). **b - 51**

Brief account of the activity of the Polar Stations at Cape Uelen, in the Calm Bay (Franz–Joseph Land), and on biological work carried on at Dickson Island.

**An.** - Chiyomatsu Ishikawa [*Necrologia*]. I fig. Bull. Jap. Soc. Scient. Fish. III, 6, 2, Tokyo (1935). **b - 52**

Obituary on Dr. Chiyomatsu Ishikawa, Professor Emeritus at the Tokyo Imperial University, one of the most prominent figures in the history of sciences of the Japanese fisheries.

**An.** - Kintaro Okamura [*Necrologia*]. (In Engl. & Jap.). 1 photo, Bull. Jap. Soc. Scient. Fish. IV, 3. 2 pp. Tokyo (1935). **b - 53**

Obituary. Dr. Okamura, Professor Emeritus of the Imperial Fisheries Institute, was one of the founders of the present society and president-elect for April 1935 to March 1936. He has also been considered as the father of modern algology in Japan.

**An.** - Zoologische Station Neapel [*Statio zoologica Neapolitana*]. Naturwiss. XXIII, 12, 5. Berlin (1935). **b - 54**

Auskünfte betreffs eines Studienaufenthaltes. Neue Instrumente. Deutsche Forscher, die vom August 1933 bis Ende 1934 die Laboratorien der Station besucht haben.

**An.** - Hydrography in the British Admiralty [*De Hydrographia ad Britannicam classis Praefecturam pertinens*]. Science LXXXII, 2122, 186. New York (1935). **b - 55**

Short information on the construction of a magnetic survey ship for magnetic observations at sea, work of H. M. surveying ships during 1934, tidal stream survey and development of echo–sounding instruments.

**Biological Board of Canada** - Publications [*Publicationes*]. Biol. Board Canada, Ann. Rep. 1934, Append. V, 44-49. Ottawa (1935). **b - 56**

An « Annual Report », a scientific « Journal », occasional memoirs entitled « Canadian Antlantic Fauna », and « Progress Reports ». List of papers published during the year 1934 dealing with the work of the Biological Board: A. From the Atlantic Biological Station, B. From the Atlantic Fisheries Experimental Station, C. From the Pacific Biological Station, D. From the Pacific Fisheries Experimental Station.

**Biological Board of Canada** - Personnel 1934 [*Administrorum collegium*]. Biol. Board Canada, Ann. Rep. 1934, Append. VI, 50–52. Ottawa (1935). **b - 57**

List of the members of the Board, of the Editorial Board. Editorial staff; staff of the Stations operated by the Board.

**Comité Atlantique** - Séance du Comité Atlantique [*Consessus Comitatus Atlantici*]. Rapp. Pr.–Verb. Cons. Expl. Mer, Rapp. Atlant. 1933, XCIII, 32. Copenhague (1935). **b - 58**

Compte rendu, résolution de la séance du 7 juin 1934.

**Commission Internationale pour l'Exploration Scientifique de la Mer Mediterranée** - Séance du Bureau Central tenue à Paris le 15 novembre 1934 [*Consessus Officii Centralis Parisiis habitus die 15 mensis Novembris 1934*]. Rapp. Pr.–Verb. Cons. Expl. Scient. Méditerranée, IX (n. sér.) 15–28. Paris (1935). **b - 59**

Ordre du jour. Compte rendu des travaux effectués par les Gouvernements participants. Questions diverses. Situation financière.

**Conseil Permanent International pour l'Exploration de la Mer** - Séance du Comité du Plateau Continental Atlantique [*Consessus Comitatus pro Platea Continentali Atlantica*]. 1 Tabl. Rapp. Pr.–Verb. Cons. Expl. Mer, Rapp. Atlantique 1933, XVII, 6, 7. Copenhague (1935). **b - 60**

Compte rendu des travaux concernant la biologie et l'hydrologie. Rapport sur les croisières effectuées. Elections.

**Conseil Permanent International pour l'Exploration de la Mer** - Vingt–huitième réunion Copenhague Mai-Juin 1935 [*XXVIII*$^{us}$ *Consessus Hauniae. A mense Majo ad Junium 1935*]. Tabl. Rapp. Pr.–Verb. Cons. Expl. Mer, XVIV, 1$^{\text{ère}}$ partie. (Mai 1935), 1–55. Copenhague (1935). **b - 61**

Bureau, tableau des membres, etc. Ordre du jour de la réunion. Procès–Verbaux. Budget du Conseil et des publications à paraître pendant 1935–36. Liste des Comités. Recommandations du Comité Consultatif, Programmes et rapports des Comités des Secteurs et des autres Comités.

**Conseil Permanent International pour l'Exploration de la Mer** - Report of Administration 1934–1935 [*Relatio ad administrationem pertinens 1934-1935*]. Rapp. Pr.–Verb. Cons. Expl. Mer XCIV; 2$^{\text{ème}}$ partie. Rapp. administr. (1934-1935), 1–7. Copenhague (1935). **b - 62**

I General: Composition of the International Council for the Exploration of the Sea. Composition of the Bureau. Committees. Audit of Accounts. Income and Expenditure account for the year ending March 31st 1935. Statement of Pension Fund accounts 1934–35. Balance sheet 31st March, 1935. Meetings. II. Work of the Office in Copenhagen: Publications. Hydrographical Dpt. Statistical Dpt. Rules concerning publications.

**Enciclopedia Italiana di Scienze, Lettere ed Arti** - Fond. da G. Treccani [*Encyclopedia Italica Scientiarum, Litterarum et Artium. Johannes* Treccani *fund.*]. XXV–XXVI–XXVII–XXVIII. Roma (1935). **b - 63**

Voci: Oceani, oceanografia, pesca, piscicultura, plancton, porto, ecc.

**Imperial Marine Observatory** - Report of the Oceanographical Observations off the Uotuki-rin in 1934 [*Relatio observationum oceanographicarum apud* Uotuki-rin, *A. 1934*]. 3 figs., 4 tabl. 13 Pl. Journ. Oceanogr., VIII, 2, 201-212. Kobe (1935). **b - 64**

Metereological and Surface observations. Percentage of the Size of the Bottom Samples - Results of the quantitative studies of the Zooplankton and Phytoplankton in the Izu–Wan.

**Marine Biological Association of the United Kingdom** - Report of the Council for 1934. List of Annuel Subscriptions and Donations Paid During the year, 1st April, 1934, to 31st March,

1935. Balance Sheet and Income and Expenditure Account [*Consilii relatio pro A. 1934. Index subscriptionum annuariarum et donationum a mense Aprili 1934 ad Martium 1935*]. Journ. Mar. Biol. Assoc., XX, 463-491. Plymouth (1935). **b - 65**

The Council and Officers. The Plymouth Laboratory. The Aquarium. The Ship and Motor-boat. The Staff. Occupation of tables. The scientific work of the Plymouth Laboratory Staff (Physics and chemistry of the environment; Plankton; breeding experiments with *Gammarus*; fish and fisheries). Library. Published Memoirs. Finance.

**Museum National d' Histoire Naturelle** - Travaux faits dans les Laboratoires du Muséum National d'Histoire Naturelle pendant les années 1933-1934 [*De operibus peractis in Laboratorio Musei Nationalis Historiae naturalis a 1933 ad 1934*]. Bull. Mus. Nat. Hist. Natur., VII, 1, 7-50. Paris (1935). **b - 66**

Les travaux exécutés concernent entre autres: Poissons, Vers, Crustacés et Mollusques; les pêches et les productions coloniales d'origine animale; le Laboratoire Maritime à Saint-Servan; etc.

**Scottish Marine Biological Association** - Annual Report 1933-1934 [*Relatio annua 1933-1934*]. 25 pp. Glasgow (1934). **b - 67**

Office-Bearers 1934-35. Director's report. Research on plankton, molluscan ecology, growth rings in Invertebrates, deep mud-samples from Keppel Pier, tidal flow and littoral zonation, new records for the Clyde Sea-area. Publications, workers and educational work at the Station. Equipment and staff. Membership and subscribing bodies. Acknowledgments. Finance.

**Scottish Marine Biological Association** - Annual Report 1934-35 [*Relatio annua 1934-35*]. 24 pp. Glasgow (1935). **b - 68**

Office-bearers, 1935-36. Report of the Executive to the Council for the year to 31st March, 1935, Research: plankton, copepods in Loch Striven, size and weight of organisms eaten by fish. Shore ecology. Experiments on timber preservation in the sea; the growth of acanthias. *Anthosoma crassum* (Abildgaard), *Calocaris macandreae*. Publication - Workers at the Station - Educational work - Museum and Aquarium - Buildings, machinery, and equipment.

**Società Adriatica di scienze naturali di Trieste** - Approvazione del nuovo statuto [*Comprobatio novi statuti Societatis Hadriaticae Tergestinae naturalium Scientiarum*]. (R. D. 16 ottobre 1934-XII, n. 2379). Gazz. Uff. Regno d'Italia, 66, 1115. Roma (1935). **b - 69**

**Société Scientifique D'Arcachon. Université de Bordeaux** - Station Biologique. Compte Rendu Administratif. Année 1934 [*Statio biologica. Acta ad Administrationem pertinentia. A. 1934*]. 38 pp. Bordeaux (1935). **b - 70**

Extrait des Statuts et du Règlement. Liste des membres, Compte Rendu administratif. C. R. des travaux de la Station pendant l'année 1934. C. R. financier.

# METHODICE.

## Apparatus oceanographici et scientifici - Subsidia technica - Microscopia - Microphotographia.

**Aikawa Hiroaki** - On the Reliability of Plankton-net [*De securitate retium ad plancton piscandum*]. (In Jap., Engl. Rés.). 11 figs. 12 tabl. Bull. Jap. Soc. Scient. Fish., III, 6, 331-345. Tokyo (1935). **b - 71**

The A. recommends to employ the plankton-net for quantitative purposes and gives some suggestions as to its use.

**Allen W. E.** - The Problem of Methods in marine Plankton Investigation [*Quaestio de methodis pro investigationibus in plancton marinum*]. Int. Rev. ges. Hydrobiol. u. Hydrogr. XXI, 1934, 40-65. Akad. Verlagsg. Leipzig (1935). **b - 72**

A:s main conclusions of the problem are: necessity of more continuity of observations in representative localities, more care in organizing field work, possibility of comparison of methods applied by different workers.

**Bolin Rolf L.** - A Method of Preparing Skeletons of small Vertebrates [*Methodus ad scheletra parvorum vertebratorum paranda*]. Science LXXXII, 2132, 446. New York (1935). **b - 73**

Instead of cleaning the bones mechanically from flesh remains the A. had the flesh eaten off by the marine isopod *Cirolana harfordi*.

**Bull Herbert O.** - Studies on Conditioned Responses in Fishes. Part IV. A Note on a Sound-Insulated Building erected for the Purpose of these Experiments [*De reactionibus excitatis experimentali ratione in piscibus. Nota de apparatu quoad acusticam soluto ad has experientias ducendas*]. 2 figs. Armstrong College Dove Marine Labor, Rep. for the Year ending July 31st 1934. Third ser N. 2, 59. Cullercoats, Northumb. (1934). **b - 74**

On the necessity of eliminating noise. Description of the building.

**Franke A.** - Sammeln, Präparieren und Aufbewahren von Mikrofossilien [*Quo modo microfossilia colliguntur, parantur et servantur*]. 6 Abb. Senckenbergiana XVII, 3/4, 124-137. Frankfurt a. M. (1935). **b - 75**

Für die hier beschriebenen Methoden sind keine Laboratoriumseinrichtungen nötig.

**Gandolfi-Hornyold A.** - Méthodes pour tuer rapidement l'anguille [*Methodus ad Anguillas celeriter occidendas*]. Bull. Soc. Centr. Aquicult. et Pêche, XLI, 118-124. Paris (1934). **b - 76**

**Harvey H. W.** - Note concerning a Measuring Plankton-Net [*Nota de quodam rete ad plancton mensurandum*]. 4 fig. Journ. Cons. Expl. Mer X, 2, 179-184. Copenhague (1935). **b - 77**

Development of the apparatus and its application. Some experiences obtained for the determination of the phytoplankton content.

**Hecht Franz E.** - Foraminiferen unterm Photo-Objektiv [*De Foraminiferis et machina photographica*]. 8, Abb. Natur u. Volk, LXV, 7, 295–303. Frankfurt a. M. (1935). **b - 78**

Anweisungen und verschiedene Apparate für das Photographieren von Foraminiferen.

**Hecht Franz** - Einfache Geräte zum Photographieren von Mikrofossilien, insbesondere Foraminiferen [*De simplicibus apparatibus, microfossilia, quae praecipue ad Foraminifera pertineant, photographandi causa*]. 11 Abb. Senckenbergiana XVI, 2/3, 65-77. Frankfurt a. M. (1934). **b - 79**

Anweisungen bei der Verwendung des aus Mikroskop oder Binokular und Aufsatz-Kamera zusammengestellten Aufnahmegerätes. Beispiele von Aufnahmen.

**Hilger Adam** - The Hilger Vitameter A. [*De Avitametro* Hilger]. Publ. N. 151/5; 38 King's Rd., Camden Rd., London N. W. 1 (1934). **b - 80**

Booklet containing a description of the latest all-metal model for determining the Vitamin A content of cod and other fish-liver oils and concentrates. It is based on spectrophotometric method of test. A modified form has been designed for the estimation of Vitamin C.

**Nielsen Steemann E.** - Eine Methode zur exakten quantitativen Bestimmung von Zooplankton. Mit allgemeinen Bemerkungen über quantitative Planktonarbeiten [*Methodus determinationis quantitativae zooplanctonicae perficiendae. Observationes quoad opera quantitativa de plancton*]. 5 Abb., 5 Tab. Journ. Cons. Expl. Mer X, 3, 302-314. Copenhague (1935). **b - 81**

Beschreibung eines vom Vf. konstruierten Wasserschöpfers, der im Frühling 1935 auf einer Expedition nach Island mit dem M/S « Thor » durchgeprüft wurde. Die damit verbundene Methode ist für kleinere Zooplanktonten von der Grösse von Copepodennauplien bis zu der von erwachsenen Copepoden berechnet.

**Perruche Lucien** - Une nouvelle méthode de nettoyage des Diatomés [*Nova methodus ad Diatomeas detergendas*]. 1 pl. Bull. Soc. Franç. Microsc., IV, 1, 22-24. Paris (1935). **b - 82**

La méthode est basée sur la destruction des substances organiques par un mélange d'acides nitrique et perchlorique, avec ou sans acide sulfurique. Indications bibliographiques relatives à cette méthode.

**Raitt D. S.** - On the Use of Alizarin as a Stain for the Skeletal Structures of Fishes [*De utenda Alizarina ac colorante pro piscium structuris scheletricis*]. Journ. Cons. Expl. Mer X, 1, 75-80. Copenhague (1935). **b - 83**

The A. enumerates the workers, which have used the alizarin as a stain and reaches to the conclusion that the technique recommended is that of Tåning, i. e.: the staining of small fish after preservation in neutral formalin, in a weak alcoholic solution of alizarin, to which solution a trace of dilute acetic acid has been added.

**Russell E. S.** - Some Devices for the Manipulation of Marine Plankton Collections on Board Ship [*Nonnullae rationes ad elaborandas collectiones planctonicas in navibus*]. 3 fig. Journ. Cons. Expl. Mer X, 2, 173-178. Copenhague (1935). **b - 84**

Experiences gained during an oceanographical investigation off the west coast of Canada in 1934. Descriptions of an apparatus by which any number of equal sections of a vertical column of water may be sampled simultaneously for net plankton, and of a compact, automatic apparatus enabling the volume of phytoplankton samples to be reduced by filtration through paper.

**Scheffen W.** - Ein Universaltisch zum Auslesen von Foraminiferen in transparente Zellen [*Apparatus qui studium praebet Foraminiferorum in cellulis translucidis*]. 6 figs,, Senckenbergiana XVI, 4/6, 303-308. Frankfurt a. M. (1934). **b - 85**

Beschreibung von und Anweisungen für den Gebrauch dieses Apparates, dessen Hauptvorteil darin liegt, dass das Auslesen der Foraminiferen, ihr Einlegen in die Zelle, ihre Fixierung und endliche Untersuchung in einem Arbeitsvorgang zusammengefasst und jeder gefahrbringende Transport einzelner Exemplare vermieden werden können.

**Schmalhausen I. I.** - Zur Frage ueber Methodik der vergleichenden Analyse des Wachstums der Fische [*Quaestio de methodo pro analysi comparata accretionis piscium*]. (In Russ.). Zool. Zhurn., XIV, 4, 802-804. Moskva (1935). **b - 86**

Réponse et critique d'un article de V. V. Vasnetzov « Tentative d'une analyse comparée de la croissance linéaire des Cyprinidés » (V.: Zool. Zhur., XIII, 1934). L'A. défend sa méthode de détermination de la vitesse spécifique de la croissance des poissons et affirme qu'on peut obtenir des résultats tres précis.

**Smith Walton F. G.** - An Apparatus for Rearing Marine Organisms in the Laboratory [*Apparatus ad organismorum marinorum in laboratorio culturam idoneus* ]. 1 fig. Nature, CXXXVI, 3435, 345-346. London (1935). **b - 87**

This apparatus allows a continuous flow of fresh sea-water which facilitates the normal growth and development of the larvae thus giving the research worker a greater possibility of studying the different transition stages from larvae to adult.

**Vornatscher Josef** - Die Contaxmethode in der Hydrobiologie [*Methodus photographica* Contax *in hydrobiologia*]. 4 Abb. Photogr. u. Forsch., Hrsg. Zeiss. A. G., 3, 67-72. Dresden (1935). **b - 88**

Beschreibung einer neuen Kleinbildkamera Contax mit einem guten selbstverständlich gekuppelten Entfernungsmesser, die sich für möglichst viele Anwendungsgebiete eignet. Beispiele ihrer Anwendung.

**Walford I. A. & Winsor C. P.** - The Sampling Reliability of Plankton Nets [*De securitate in speciminibus planctonicis, retium auxilio colligendis*]. Woods Hole Oceanogr. Inst., App. Rep. 1934, 37. Woods Hole, Mass. (1935). **b - 89**

The present investigation has been undertaken in order to determine the minumum of variability in the sampling fluctuations for the plankton population. Being established that published data clearly do not fit to the theory of the relative simple laws of variability, it was felt necessary to collect data « ad hoc » under conditions ad carefully controlled as possible, and it seems, so far as can been judged by superficial examination, that the samples so obtained are satisfactory.

**An.** - Méthodes de coloration du Plankton en masse [*De coloratione planctonica, magna copia*]. Bull. Soc. franç. Microsc. IV, 4, 153-155. Paris (1935). **b - 90**

Fixation, moyens pour obtenir en extension les animaux très contractiles du plankton, exposition d'une coloration à la quinone qui donne de bons résultats.

# ANATOMIA ET PHYSIOLOGIA.

## Cytologia et histologia.

**Barigozzi C.** - Diploidismo e tetraploidismo in *Artemia Salina* di Margherita di Savoia [*Quaestio de diploidismo et tetraploidismo in «Artemia salina» ad* Margherita di Savoia *pertinente*]. Boll. Soc. Ital. Biol. Sper., IX, 3, 195-198. Napoli (1934). **b - 91**

Studio di genetica dal quale appare che le *Artemie* di Margherita di Savoia, sembrano in una condizione ideale per fornire una definitiva dimostrazione del legame genetico dei diversi biotipi di questo interessante Fillopodo. Il tipo diploide di *A. s.* è meno abbondante del tipo tetraploide.

**Barigozzi C.** - Diploidismo, tetraploidismo e octoploidismo nell'*Artemia salina* partenogenetica di Margherita di Savoia [*De diploidismo, tetradiploidismo et octoploidismo in «Artemia salina» partenogenetica ad* Margherita di Savoia *pertinente*]. 3 fig., 1 tav., Boll. Soc. Ital. Biol. Sper., IX, 906-908. Napoli (1934). **b - 92**

Secondo l'A. il biotipo di *A. s.* studiato da Artom è octoploide poichè avrebbe un numero di tetradi quadruplo del biotipo diploide. I biotipi partenogenetici di *A. s.* sarebbero quindi tre.

**Broussy J.** - Contribution à l'étude histologique du tégument de *Sipunculus nudus L.*, Géphyrien inerme [*Contributio in histologiam tegumenti speciei «Sipunculus nudus», Gephyreo inermi*]. C. R. Ass. Anat., XXIX, 531-536. Paris & Nancy (1934). **b - 93**

Description des cellules épidermiques du Siponcle qui ont une notable activité sécrétoire et des filaments, semblables à des formations ciliaires, auxquels on peut attribuer le rôle de canaliser les substances tégumentaires sécretées. Présence des vacuoles parmi ces cellules.

**Dehorne Armand** - Observations cytologiques sur une nouvelle espèce d'*Haplosporidium* parasite du coelome de *Nereis diversicolor* O. F. Müller [*Observationes cytologicae cuiusdam novae speciei ex Haplosporidiis parasiticae in coelomate speciei «Nereis diversicolor»*]. 15 fig., C. R. Acad. Sc., CC, 7, 589-592. Paris (1935). **b - 94**

Résultats d'observations faites sur des coupes pratiquées sur différents fragments d'une femelle de *N. diversicolor*, longue de 10 cm., infestée d'une espèce de *Haplosporidium*, protiste parasite d'invertébrés. Présence des plasmodies aux mêmes stades de la multiplication plasmodiale. Structure du noyau dans l'état de repos et ses modifications dans les différentes phases de la division mitotique. Nucléole et chondriome à origine paranucléaire. (L. S.).

**Dehorne Armand** - Caractères anatomiques et cytologiques des néphridies thoraciques de *Sabellaria* [*Caracteres anatomici et cytologici in S.*]. 1 fig., C. R. Acad. Sc., CC, 21, 1783-1785. Paris (1935). **b - 95**

L'A., à l'aide de coupes sériées, montre que l'interprétation donnée par Meyer en 1887 d'une analogie entre l'appareil renal des *Sabellaria* et l'organe rénal des Serpulides n'est pas exacte.

**Doyle Wm. L.** - Distribution of Mitochondria in the Foraminiferan, *Iridia diaphana* [*Mitochondria. Quaestio de distributione in Foraminifero «Iridia diaphana»*]. Science, LXXXI, 2103, 387. New York (1935). **b - 96**

The mitochondria flow out into the pseudopodia and in so doing meet and pass other mitochondria which are returning again to mingle with the other cytoplasmic constituents of the central mass. Their presence in the pseudopodia gives them ample opportunity for the interchange of substances with the surrounding medium.

**Bull Herbert O.** - Studies on Conditioned Responses in Fishes. Part V. On the Controlling Influence of Normal Behaviour Traits upon Capacity to Form Experimental Conditioned Motor Responses Under Certain Conditions [*De reactionibus excitatis experimentali ratione in piscibus. Comparatio inter normales et possibiles experimentales reactiones motorias, particularibus conditionibus*]. 2 tabl., Journ. Mar. Biol. Assoc., XX-2, 365-370. Plymouth (1935). **b - 111**

Normal behaviour traits control the ability of Fishes to form conditioned motor responses. This is shown by a series of experiments upon various species of fish in which it is found that Pleuronectids are incapable of forming such responses for at least 200 associated presentations whilst other Fishes have done so in less than 40. The bearing of the results on current theories of animal learning is briefly discussed.

**Cochran Doris M.** - The Skeletal Musculature of the Blue Crab, *Callinectes sapidus* Rathbun [*De musculis scheletri in « C. sapidus »*]. 30 figs., Smiths. Miscell. Collections (Publ. 3282), XCII, 9, 1-76. Washington, D. C. (1935). **b - 112**

**Magnan A. & C.** - Contribution à l'étude de la propulsion des Poissons [*Contributio in studendam piscium propulsionem*]. C. R. Acad. Sc., CCI, 26, 1429-1430. Paris (1935). **b - 121**

Mesure de la vitesse de l'eau qu'un poisson projette de l'avant vers l'arrière avec sa nageoire caudale. Méthode employée. Détermination du volume du liquide projeté. Calcul sur la vitesse initiale de l'animal (L. S.).

**Meierhans J.** - Le canal pneumatique et la vessie natatoire des Poissons physostomes [*Canalis pneumaticus et vesica natatoria piscium physostomatum*]. C. R. Acad. Sc., CC, 7, 582-584. Paris (1935). **b - 122**

Résultats des recherches entreprises dans le but de vérifier les affirmations de Rabaud et Verrier, selon lesquelles le canal pneumatique ne servirait à rien et ne jouerait aucun rôle dans l'évacuation du trop-plein de la vessie natatoire. L'Auteur démontre que lors d'une décompression, la vessie natatoire des poissons physostomes se vide par son canal pneumatique. La ligature de ce dernier supprime intégralement cette émission de gaz, ainsi que les conséquences qui en résultent pour la densité de l'animal.

**Meierhans J.** - Comportement de Poissons physostomes ayant subi l'extirpation de la vessie natatoire [*Ratio piscium physostomatum, vesica natatoria carentium, exstirpationis causa*]. 1 tabl., C. R. Acad. Sc., CC, 10, 859-862. Paris (1935). **b - 123**

L'Auteur conclut de ces expériences que les Poissons sans vessie ne dégagent aucune bulle de gaz par la bouche tant que la compression ne dépasse pas 40 cM. Hg. et que leur comportement est absolument différent de celui des Poissons normaux.

**Neu Wolfgang** - Die Schwimmbewegungen schnellschwimmender Hochseetiere [*De motibus natatoriis animalium marinorum quae celerrime natant*]. Naturwiss., XXII, 41, 699-700. Berlin (1934). **b - 124**

**Pax F.** - Die Untersuchung von Korallenskeletten im infraroten Licht [*Investigationes in structuram scheletricam coralliorum, lucis infrarubrae auxilio*]. Zool. Anz., CVI, 15-17. Leipzig (1934). **b - 129**

**Petit G. & Budker P.** - Sur la différenciation de dents cutanées, liée à la présence de cryptes sensorielles, chez quelques sélaciens [*De cutaneo-*

*rum dentium differentiatione quae colligatur cum cryptis sensorialibus praesentibus in Selacis quibusdam*]. C. R. Acad. Sc., CCI, 17, 737-740. Paris (1935). **b - 130**

Résultats de l'examen d'une série de foetus d'onze espèces de Sélaciens voisins du terme, et de peaux d'individus adultes, qui ont révélé la présence de spicules ou dents cutanées différentes de ceux qui constituent le revêtement du corps de ces animaux. Ces dents cutanées se présentent toujours par couples et se manifestent exclusivement au niveau de dépressions épithéliales dont le fond est occupé par un organe sensoriel. L'Auteur indique les différenciations morphologiques de ces dents en relation avec la présence de l'organe sensoriel sous-jacent, et qui ont, pour chaque espèce, leur marque propre.

**Petrovskaja O. A.** - Etude anatomique comparative de la ceinture scapulaire des poissons en relation avec le rapport génétique des groupes particuliers de poissons [*Studium anatomicum comparatum cinguli scapularis piscium pro correlatione genetica turmarum praecipuarum piscium*]. (En russe). Abstr. Works Inst. Zool., 1, 109-110. Moscow (1935). **b - 131**

Résultats des recherches qui ont permis de confirmer le rapport génétique de quelques groupes de poissons sur la base de l'étude de la structure du squelette définitif de leur ceinture scapulaire. Ces résultats ont conduit à la division des *Osteichtyes* dans le groupe des *Holosteoidea* qui réunit les *Ganoidea*, les *Holostea* et les *Teleostea* et le groupe *Chondrosteoidea*.

**Rabaud E. & Verrier M. L.** - Vessie natatoire et variations du volume des Poissons [*De vesica natatoria variationibusque quoad volumen in piscibus*]. C. R. Acad. Sc., CIC, 18, 888-890. Paris (1934). **b - 132**

Selon les Auteurs les variations du volume et de la densité des espèces examinées ne dependent pas de la vessie natatoire étant donné qu'elles se produisent aussi bien chez les poissons à vessie natatoire ou cystectomisés (*Julis Giofredi* Risso, *Conger vulgaris* L.) que chez ceux normalement sans vessie natatoire (*Scorpaena scrofa* L. et *Scyllium canicula* L) (L. S.).

**Rabaud E. & Verrier M. L.** - Vessie natatoire, densité et plan d'équilibre des Poissons [*Vesica natatoria, densitas et aequilibrium in piscibus*]. C. R. Acad. Sc., CIC, 1247-1249. Paris (1934). **b - 133**

La vessie natatoire n'aurait pas le rôle préponderant à lui accordé, c'est-à-dire de rendre égal, à la suite de variations de volume, la densité des Poissons à celle de l'eau de mer. Comparaison de la densité d'espèces de Poissons marins à vessie natatoire et d'espèces depourvues de vessie; action de la cystectomie (L. S.).

**Rabaud E. & Verrier M. L.** - Recherches sur la vessie natatoire (II°) [*Investigationes in vesicam natatoriam*]. 7 fig., Bull. biol. Fr. et Belg., LXIX, 87-136. Paris (1935). **b - 134**

Nouvelles vues sur la fonction de la vessie natatoire. Le gaz ne serait pas la sécrétion de la glande gazeuse, et il ne pourrait pénétrer dans la vessie par le conduit pneumatique. En outre il n'y a aucune concordance entre le canal pneumatique, le réseau vasculaire de la vessie, la présence et le développement morphologique de la glande gazeuse. Les variations du volume, de la vessie natatoire ne sont pas en rapport à la montée ou à la descente de l'animal, étant vu qu'il se produirait le phénomène invers de l'opinion classique: quand le Poisson monte, tous ses organes perdent du gaz.

**Rabaud E. & Verrier M. L.** - Vessie natatoire et canal pneumatique [*De vesica natatoria canalique pneumatico*]. C. R. Acad. Sc., CC, 9, 778-780. Paris (1935). **b - 135**

Réponse à une Note de J. Meierhans (v.: C. R. Acad. Sc., CC. 7, 582) dans laquelle ce dernier conteste les résultats des expériences des Auteurs: que le canal pneumatique joue un rôle pratiquement négligeable par rapport à celui de la vessie natatoire des Poissons. Les Auteurs communiquent encore quelques résultats expérimentaux qu'ils ont obtenus, comme preuve à l'appui de leur affirmation cidessus.

**Rabaud E. & Verrier M. L.** - L'ablation de la vessie natatoire des Poissons physostomes [*De ablatione vesicae natatoriae piscium physostomatum*]. C. R. Acad. Sc., CC, 13, 1142-1144. Paris (1935). **b - 136**

En présence des affirmations de F. Meierhans (voir C. R., CC, p. 859, 1935), que tout le gaz émis par un physostome vient exclusivement de la vessie, les Auteurs ont refait quelques essais sur l'ablation de la vessie natatoire de *Carassius auratus* et *Leuciscus rutilus*. Ces expériences ont permis de constater que les Poissons, dont la vessie est excisée, reprennent en quelques heures leur allure normale, et que le gaz qu'ils émettent a une origine extra-vésicale.

**Rabaud E. & Verrier M. L.** - Projection d'organes abdominaux et vessie natatoire [*Agitur de proiectione organorum abdominalium deque vesica natatoria*]. C. R. Soc. Biol., CXX, 1173-1174. Paris (1935). **b - 137**

*Trigla lineata* et *Trigla pini* ont été soumis à la décompression. Leur vessie natatoire est libre dans la cavité de l'abdomen et elle ne forme pas une projection dans la bouche (L. S.).

**Rakov V. A.** - Sur la question de l'ossification du crâne cartilagineux des *Acipenseridae* [*Quaestio de ossificatione cranii cartilaginei*]. (En russe). 1 tabl., Abstr. Works Inst. Zool., 1, 104-105. Moscow (1935). **b - 138**

L'Auteur démontre l'existence de formations osseuses dans le crâne cartilagineux des *Acipenseridae* adultes, et plus précisément des formations suivantes: *a) orbitosphenoideum; b) alisphenoideum; c) prooticum; d) episthoticum, e) occipitale laterale* et des éléments de quelques vertèbres antérieures. Les espèces étudiées sont: *A. güldenstädtii, A. stellatus* et *Pseudoscaphirhynchus kaufmanni*.

**Whitehouse R. H.** - Structure of the Caudal Fin of the Cod [*De structura pinnae caudalis in « Gadus »*]. 1 fig., Nature, 135, 3402, 70. London (1935). **b - 144**

The A. presents a sketch of the skeleton of the caudal extremity of the cod showing clearly that (on the contrary to what text books assert) it is heterocercal, as in the majority of Teleosts. He also points out that, in *Gadus minutus* at least, and doubtless in every other Gadid, a heterocercal stage is very obvious in specimens one inch long.

**Wiersma C. A. G. & Harreveld (van) A.** - On the Nerve-muscle System of the Hermit Crab I. The Contraction of the Abductor and the Adductor of the Claw [*De systemate nervoso musculari in « Eupagurus bernhardus ». I.$^{um}$ Contractio musculi abductoris atque adductoris chelae*]. 5 fig., Arch. Néerl. Physiol. Homme et Animaux, XIX, 3, 426-444. La Haye (1934). **b - 145**

The rapid contraction of the abductor as well as of the adductor of the claw of *Eupagurus* show a steplike increasing in height of contraction, when with indirect stimulation the duration or the strength of the current is continuously increased. The pseudo-chronaxies of these contraction steps in this crustacean stand in relations that may probably be expressed in simple numbers.

**Wiersma C. A. &. G. Harreveld (van) A.** - Inhibition of the Contraction of the Abductor of the Claw of *Eupagurus Bernhardus* [*De inhibitione contractionum musculi abductoris chelarum in « E. bernhardus »*]. Arch. Néerl. Physiol. Homme et Animaux, XIX, 458-468. La Haye (1934). **b - 146**

On the possibility of obtaining after a considerable latency an extension of the abductor muscle previously excited to contraction by means of short galvanic rectangular waves working on another nerve.

## Apparatus nervorum.

**Abramowitz A. A.** - The double Innervation of Caudal Melanophores in *Fundulus* [*De duplici innervatione quoad melanophoros caudales in « Fundulus »*]. 6 figs., Proc. Nat. Acad. Sc., XXII, 4, 233-238. Washington D. C. (1935). **b - 147**

Preliminary notice of experiments with diagrammatic figures of the reactions of the melanophores of a single fish from the time of denervation until almost complete regeneration of nerves to the caudal band. Support for the idea of two sets of nerves, discrete and opposite in action.

**Babkin B. P., Friedman M. H. F. & Mackay-Sawyer M. E.** - Vagal and Sympathetic Innervation of the Stomach in the Skate [*Vagi et sympatici innervatio in stomacho Rajae*]. 8 figs., Journ. Biol. Bd Canada, I, 4, 239-250. Toronto (1935). **b - 148**

The course and distribution of the vagus nerve and the anterior splanchnic nerve to the gastro-intestinal tract in *Raja diaphanes* and *R. stabuliforis* are described. Both these nerves produce movements of the stomach in the skate. Contractions produced by the stimulation of various branches of the vagus and splanchnic nerve. Effect of atropine and adrenaline.

**Beccari N.** - Intorno all'esistenza di uno strato sinaptico nelle connessioni di alcuni neuroni dei pesci [*De exsistentia stratus alicuius synaptici in connexionibus aliquorum neuronum piscium*]. Monit. Zool. Ital., XLV, 8, 230. Firenze (1934). **b - 149**

Nella connessione vestibolo-tegmentale come in quella vestibolo-mauthneriana, si può, mediante un perfezionato procedimento di tecnica citologica, colorire positivamente uno strato sinaptico che già negativamente era stato rivelato dall'impiego appropriato dei metodi basati sulla riduzione dei sali di argento. Uno strato simile esiste ed è stato dall'A. già in precedenza dimostrato nelle connessioni axo-dendritiche ed axo-assiali delle fibre del Mauthner.

**Boeke J.** - The autonomic (enteric) nervous System of *Amphioxus lanceolatus* [*De autonomo systemate nervorum in « A. lanceolatus. »*]. 16 fig., Quart. Journ. microsc. Sc., LXXVII, 623-658. London (1935). **b - 150**

Description of the nervous plexus with several ganglionary cellules in relation to the smooth muscles of the intestinal surface. Explanations as to these cellules and their importance.

**Bowen R. E.** - Movement of sensory Hairs in the Ear [*De pilis sensoriis in aure. Quaestio de motibus*]. Proc. Nat. Acad. Sc. U. S. A., XXI, 4, 233-234. Washington (1935). **b - 151**

Analysis of the movements of *Petromyzon marinus*, *Holocentrus ascensionis*, *Haemulon sciurus* and *Ameiurus nebulosus*.

**Chabanaud P.** - Le vomer, le complexe ethmoïdien et le trajet périphérique des nerfs olfactifs des Téléostéens soléiformes [*De vomere, complexu ethmoideo et peripherico trajectu nervorum olfactoriorum in Teleosteis*]. 7 fig., C. R. Acad. Sc., CCI, 5, 351-353. Paris (1935). **b - 152**

Le vomer et le complexe ethmoïdien ont été étudiés dans chacune des trois familles qui composent le sous-ordre des Téléostéens soléiformes: *Achiridae*, *Soleidae* et *Cynoglossidae*. Situation du nerf olfactif nadiral.

**Chauchard A., B., & P.** - Recherches sur la subordination nerveuse [*Investigationes in nervorum subordinationem*]. C. R. Soc. Biol., CXV, 1204-1206. Paris (1934). **b - 153**

De l'ensemble des observations sur *Carcinus maenas* et *Portunus corrugatus*, il ressort que le phénomène de la subordination nerveuse se traduit par une diminution de la chronaxie du neurone périphérique et par des variations de cette valeur sous l'influence de l'activité physiologique normale de leurs centres nerveux.

**Cornwall I. E.** - On the Nervous System of four British Columbian Barnacles (one new Species) [*De systemate nervorum in quattuor speciebus generis « Lepas » Columbiae Britannicae. (Species quaedam nova)*]. 5 figs., Journ. Biol. Bd Canada. I, 6, 469-475. Toronto (1935). **b - 154**

In *Lepas* six pairs of ganglia are distinct and separate; in *Balanus* two masses of fused ganglia occur while in *Mitella* an intermediate condition exists. *Balanus* (*Balanus*) *altissimus* n. sp. differs from *B. nubilis* in the interconnections of the nerves, and in details of labrum, maxilla and sixth cirrus. (A: s Abstr.).

**Edinger T. (Einl. von E. Stromer)** - Ueber Gehirne tertiärer Sirenia Aegyptens und Mitteleuropas sowie der rezenten Seekühe (Ergebnisse der Forschungsreisen Prof. E. Stromers in den Wüsten Aegyptens. V. Tertiäre Wirbeltiere) [*De cerebris in Sirenia tertiaria ex Aegypto et Europa centrali, cerebrisque in Sirenia tempore hodierno (Resultatus ex explorationibus Prof.* E. Stromer *per deserticas terras Aegyptianas. Vertebrata tertiaria*]. 3 Taf., 11 Abb., Abh. Bayer. Akad. Wiss. Math.–Nat. Abb. 1933, XX, 1–36. München (1933). **b - 155**

Äussere Struktur und endokraniale Abgüsse rezenter und fossiler *Halicore*, *Manatus*, *Rhytina*, *Halitherium*, *Protosiren* und *Eosiren*. Vergleich unter den verschiedenen Abgüssen, Uebereinstimmungen und Abweichungen der Gehirne verschiedener Arten.

**Evans H. M.** - The Brain of *Gadus*, with special Reference to the Medulla oblongata and its Variations according to the feeding Habits of different Gadidae I [*Cerebrum in « Gadus ». Agitur particulatim de medulla oblongata eiusque variationibus ex edendi consuetudinibus in differentibus Gadidis*]. Proc. R. Soc., CXVII, 367-399. London (1935). **b - 156**

Description of the medulla oblongata of the *Gadidae* and comparison with that of *Cyprinidae*. The variations are in conformity with the feeding habits modified by the type of dentition.

**Florentin P.** - Histo–physiologie comparée de l'hypophyse. L'excrétion de la colloïde hypophysaire chez les Téléostéens [*Histo–physiologia comparata hypophysis. Excretio substantiae colloidis hypophysariae in Teleosteis*]. Ann. Physiol. et Physicochimie biol., X, 963. Paris (1934). **b - 157**

Comparaison avec celle des Mammifères.

**Haines R. W.** - Epiphysial Growth in the branchial Skeleton of Fishes [*De formationibus quoad epiphysim in scheletro branchiarum piscium*]. 7 figs., Quart. Journ. Microsc. Sc., LXXVII, 1, 77-97. London (1934). **b - 158**

This epiphysial growth of which an analysis is given here is similar to that found among the Tetrapodes and is also the most primitive form of epiphysis found in bony Vertebrates.

**Irving Laurence, Solandt D. Y. & Solandt O. M.** - Afferent Impulses in the Nerves from the Branchial Vessels of the Dogfish [*De impulsibus afferentibus in nervis vasum branchialium Squali*]. Woods Hole Oceanogr. Instit., Rep. 1934, 21. Woods Hole, Mass. (1935). **b - 159**

Summary of a study of the afferent impulses in the branchial nerves of the dogfish, which has been examined by means of electrical recording; the results obtained show that the receptors in the branchial vessels of the dogfish correspond with the pressure receptors in the homologous carotid sinus of Mammals.

**Kagoshima S. & Yoshimura K.** - Ueber den Lichtsinn und Farbensinn des Fisches. II. Der Rheotropismus als Prüfungsmethode [*Sensus lucis et coloris in piscibus. De rheotropismo ac methodo inspiciendi*]. (In Jap.). 2 Abb., Nihon Gankwa Gk. Z., XXXVIII, 661-674. (1934). **b - 160**

Bericht über die von den Vf. Vf. in Bezug auf die Hell-und Dunkeladaptation der Fische ausgeführten Untersuchungen, welche aber keinen positiven Nachweis über den Farbensinn des Fisches aufgewiesen haben.

**Lugli G.** - Nervo VIII dei selaci. Via di accesso inferiore per le ricerche di fisiologia [*De nervo VIII° in Selacis. Accessus inferior pro investigationibus physiologicis*]. 3 fig., Arch. Sc. biol., XXI, 175-182. Napoli (1935). **b - 161**

In diverse specie di telaci il tronco dell'8° nervo può essere esposto in tutto il suo decorso togliendo la piastra di cartilagine che forma il tetto della bocca e il pavimento della cavità craniale. Nessun danno viene fatto ad alcuna importante struttura e non si lede alcun organo importante.

**Pantin C. F. A.** - The Nerve Net of the *Actinozoa*. IV. Facilitation and the « Staircase » [*De rete nervorum in «Actinozoa». IV. Facilitas neuromuscularis et contractio scalariformis*]. Journ. Exper. Biol., XII, 389-396. Cambridge (1935). **b - 162**

Analysis of the step-like contraction of the sphincter of *Calliactis* and the bell of Medusa, its causes. Discussion on the relation of different types of contraction.

**Parker G. H.** - An oil-soluble Neurohumour in the Catfish *Ameiurus* [*De neuroliquido solubili in oleo in « Ameiurus »*]. Journ. Exper. Biol., XII, 239-245. Cambridge (1935). **b - 163**

**Paulian Renaud** - Contribution à l'étude de la croissance relative du système nerveux central [*Contributio in studendam accretionem relativam systematis centralis nervorum*]. 3 tabl., 1 graph., Trav. Stat. Biol. Roscoff, 12, 33-49. Paris (1934). **b - 164**

Afin de voir si les Céphalopodes constituent une exception parmi les Poïkilothermes ou si, au contraire, la variabilité du coefficient de dysharmonie se retrouve dans d'autres groupes, l'A. a entrepris cette étude sur 25 espèces de Poissons et 5 espèces de Crustacés du genre *Portunus*. Historique. La croissance individuelle. La variation interspécifique. Tableaux indiquant: nombre d'individus, longueur du corps et de l'encéphale et diamètre de l'œil pour chaque espèce.

**Scharrer B.** - Ueber das Hanströmsche Organ X bei Opisthobranchiern [*De organo X* τοῦ Hanström *in Opistobranchiatis*]. 9 Abb., Pubbl. Staz. Zool. Napoli, XV, 1, 132-142. Napoli (1935). **b - 165**

Die von Hanström zum erstenmal bei *Squilla mantis* (1931) beschriebene und als Organ X bezeichnete inkretorische Gehirndrüse wird auch hier von der Vf. bei *Aplysia limacina* und *Pleurobranchaea meckeli* in der Form von

sekretorisch tätigen Nervenzellen nachgewiesen und beschrieben. Eine vollständige Erklärung dieses Sekretionsprozesses ist aber vorläufig nicht möglich.

**Scharrer E.** - Ueber die Zwischenhirndrüse von *Cristiceps argentatus* G. [*De glandula medii cerebri in « C. argentatus »*]. 5 Abb., Pubbl. Staz. Zool. Napoli, XV, 1, 123-131. Napoli (1935). **b - 166**

Der Sekretionsablauf in der Zwischenhirndrüse von *Cristiceps argentatus* G. wird in seinen einzelnen Phasen beschrieben. Bei *Cristiceps* kommt es zu einer Umwandlung der Nervenzellen des Nucleus praeopticus zu drüsenähnlichen Gebilden. Diese Umwandlung ist als ein physiologischer, nicht als ein pathologischer Vorgang zu betrachten. (Vf.).

**Stefanelli A.** - I centri tegmentali dell'encefalo dei Petromizonti [*De centris tegmentalibus encephali in Petromizontis*]. 6 fig., 2 tav., Arch. zool. Ital., XX, 117-202. Napoli (1934). **b - 167**

Dall'osservazione di numerosi cervelli delle tre specie dei petromizonti d'Italia (*Petromyzon fluviatilis, P. planeri, P. marinus*) l'A. ha potuto stabilire quale sia il nucleo e l'origine del nervo del sesto paio e come i centri tegmentali siano quelli formati da specifici elementi reticolati posti sull'asse centrale, nella zona motrice.

**Stefanelli A.** - Il nucleo dell'abducente nel *Petromyzon marinus* [*De abducentis nucleo in specie « P. marinus »*]. 5 fig., Arch. Ital. Anat. Embriol., XXXIV, 1, 122-134. Firenze (1935). **b - 168**

Ricerche anatomo-istologiche.

**Towarnicki R.** - Ueber die Blutgefässe des Gehirns von *Myxine glutinosa* L. [*De systemate vascolari cerebri in « M. glutinosa »*]. 1 Taf., Bull. Int. Acad. Polon. Sc. & Lettres. Cl. Sc. Mathém. & Nat., 6/7, B II, 261-272. Cracovie (1935). **b - 169**

Die ein-und ausführenden Blutgefässe der Gehirnhüllen. Die eigentlichen Blutgefässe des Gehirns, Vergleichende Anatomie der Gehirnfässe. Die Gefässvarietäten des Gehirns.

**Wilson R. B.** - The Anatomy of the Brain of the Whale [*De anatomia cerebri in « Balaenoptera sulfurea »*]. 35 figs., Journ. Comp. Neurol., LVIII, 2, 419-480. Philadelphia (1935). **b - 170**

General morphology of the entire brain with a special regard to the medulla oblongata and midbrain. Comparison with other *Cetacea*, and with *Carnivora* and *Ungulata*.

## *Organa sensuum.*

**Anelli D.** - Note morfologiche sulla struttura dell'occhiale in alcuni rettili e pesci [*Notae morphologicae de structura quoad ocularem aliquorum rectilium et piscium*]. 3 fig., Boll. Ocul., XIV, 7, 925-933. Firenze (1935). **b - 171**

L'A., esaminando gli occhiali di alcuni rettili e di alcuni pesci, rileva la differenza istologica esistente fra essi e fra i vari strati che li costituiscono, nonchè dimostra la presenza, al posto dello « spazio congiuntivale » di un tessuto lasso costituito da sottili fibrille.

**Bull O. Herbert** - Studies on Conditioned Responses in Fishes. Part III. Wave-length Discrimination in *Blennius pholis* L. [*Experientiae de reactionibus piscium. Pars III: Distinctio longitudinum undarum lucis in «B. pholis »*]. 3 tabl., Journ. Mar. Biol. Assoc., XX, 2, 347-364. Plymouth (1935). **b - 172**

From the experiments described here it is concluded that conditioned motor responses are readily formed in *Blennius pholis* L. by combining the presentation of a visual stimulus with an electric shock. Some remarkable results of the wave-length discriminations are reported here. The method is however only applicable to sedentary fishes.

**Capraro V.** - Ricerche sul cristallino dei Petromizonti [*Investigationes de crystallino in Petromyzontis*]. 8 fig., Arch. Ital. Anat. Embriol., XXXII, 4, 491-503. Firenze (1934). **b - 173**

Confronto della struttura del cristallino nelle due forme: *Petromyzon fluviatilis* e *P. marinus*, con quella dei vertebrati superiori. Vengono confermate le conclusioni di Rabl sul carattere specifico del Cristallino nelle diverse specie.

**Grave Caswell & Gordon Riley.** – Development of the Sense Organs of the Larva of *Botryllus Schlosseri* [*De progressibus quoad organa sensuum in larva speciei «B. Schlosseri »*]. 4 Tabl., Journ. Morphol., LVII, 1, 185-202. Philadelphia (1935). **b - 174**

The results of the investigation carried out by the AA. indicate that the statoliths of the different ascidian larvae are homologous: the direction eyes probably are not, but have evolved independently from a light-sensitive area in the primitive larva of a common ancestral ascidian. The larvae of *Molgula* and *Ammaroucium* possess no structure comparable to the sensory papillae of *Botryllus*.

**Griffin L. E.** - Some Details of the Structure of the Auditory Apparatus of *Squalus acanthias*, *S. Suckleyi* and *Mustelus canis* [*Particularitates quoad structuram apparatus ad audiendum*]. 9 figs., Copeia, 1, 29-32. New York (1934). **b - 175**

A comparative study.

**Hanström B.** - Neue Untersuchungen über Sinnesorgane und Nervensystem der Crustaceen. III [*Investigationes novae de organis sensuum ac systemate nervorum in Crustaceis*]. 31 Abb., Zool. Jahrb. Anat., LVIII, 101-144. Jena (1934). **b - 176**

Beobachtungen besonderer Bildungen im Auge bei *Amalopenoeus, Amphion, Acanthecephyra* und *Processa canaliculata*.

**Jackson L. H.** - Sense-Organs in *Malacobdella* [*Organa sensuum*]. 1 fig., Nature, CXXXV, 3419, 792. London (1935). **b - 177**

Some observations on a pair of minute structures on the head of *M. grassa* Müll. (parasitic upon *Pholas*) anterior to the ganglia which send a small nerve in their direction. They have the appearance of small pits on the dorsal surface, suggestive of sense-organs. Some considerations are given on the dimensions of this species.

**Koller G. & Studnitz v. G.** - Ueber den Licht-und Schattenreflex von *Mya arenaria* [*Lucis repercussiones et umbrae in « M. arenaria »*]. Ztschr. vgl. Physiol., XX, 388-404. Berlin (1934). **b - 178**

Bericht über Versuche von Erhöhung und Verminderung der Lichtstärke sowie die Wirkung verschieden gefärbten Lichtes auf die Reflexbewegungen von *Mya arenaria*.

**Pagano M.** - Sulla questione dell'olfatto nei Cetacei [*Quaestio de olfactu in Cetaceis*]. Atti del XXIX Congr. Soc. Ital. Laringol. Otol. Rinol., 67. Roma (1934). **b - 179**

Ricerche con varî metodi di colorazione ed esami a luce polarizzata praticate sull'organo periferico dell'olfatto del *Delphinus delphinus*, pur non escludendo la presenza di una porzione olfattoria in questi animali, fanno ammettere che la sede del senso olfattivo non sia da cercare a livello della mucosa delle cavità nasali, ma altrove.

**Rubio y Sama M.** - Sobre la estructura del órgano cordiforme de *Actinia equina* [*De structura organi cordiformis in « A. equina »*]. 4 fig., Rev. Españ. Biol., IV, 2/3, 61-68. Madrid (1935). **b - 180**

Estudio de la región glandular, de la región de las zooxantelas, de la región ciliata y de la región vacuolar. En los enteroides de *Actinia equina* se pueden distinguir la mismas regiones que las descritas por Duerden en *Phymantus* y suponerlas el distinto origen ectodérmico y endodérmico de la región ciliada y de las restantes.

**Sanz Echevenía J.** - Otolitos de los Peces Gadiformes de España [*De otolitis piscium Gadiformium ex Hispania*]. 3 lám., Bol. Soc. Españ. Hist. Natur., XXXV, 5, 245-274. Madrid (1935). **b - 181**

Nomenclatura. Forma de los otolitos. Zonas de crescimiento. Otolitos anormales. Fam. *Gadidae*, *Ranicipitidae*, *Merlucciidae*, *Macruridae*.

**Verrier M. L.** - La réfraction de l'œil des Poissons [*De refractione oculi piscium*]. Bull. Soc. Zool. France, LIX, 535-538. Paris (1935). **b - 182**

Au bout de nombreuses expériences tentées sur plusieurs Téleostéens et Sélaciens, l'A. a pu mettre en évidence une astigmatisme hypermétropique, compris entre 3 et 10 dioptries, à une exception près.

**Wald G.** - The Visual Purple System in Fish [*De purpura in videndi piscium systemate*]. Woods Hole Oceanogr. Instit., App. Rep. 1934, 36-37. Woods Hole, Mass. (1935). **b - 183**

Account of the results of an examination of the eye tissues of the common sea robin, *Prionotus carolinus*, which allow to establish that the visual purple of this fish is essentially similar to that in frogs and cattle, and is based upon changes in the identical carotenoids.

**Wetzel A.** - Chordotonalorgane bei Krebstieren (*Caprella dentata*) [*Organa chordotonalia in Crustaceis*]. 2 Abb., Zool. Anz., CV, 125-132. Leipzig (1934). **b - 184**

Der Vf. findet zum erstenmal den Chordotonalorgan bei den Krebstieren und zwar in jeder Antenne von *Caprella dentata*, *C. aequilibria* und *Proto ventricosa*.

**Wohlfahrt H. A.** - Das Ohrlabyrint des Schlammspringers (*Periophthalmus Schlosseri* Pall.). Ein Beitrag zur Kenntnis der Anatomie des Gobiidenlabyrinthes [*De labyrinto auriculari in « P. Schlosseri ». Contributio in cognoscendam anatomiam labyrinti in Gobiidis*]. 9 Abb., Ztschr. Anat. u. Entwickl.-gesch., CII, 2/3, 298-306. Berlin & München (1933). **b - 185**

Eingehende Beschreibung mit Abbildungen, Vergleich mit den Labyrinthen anderer *Gobiidae*. Der Mangel an verschiedenen Teilen, wie z. B. der canalis utriculosaccularis wird hier näher besprochen.

## Apparatus circulationis atque sanguis.

**Arvanitaki A. & Cardot M.** - L'onde lente et l'onde brève de l'électrocardiogramme auriculaire de la Torpille [*De unda lenta deque unda brevi in electrocardiogrammate auricolari Torpedinis*]. C. R. Soc. Biol., CXV, 47. Paris (1934). **b - 186**

Il est possible de séparer les deux variations de l'onde d'une électrocardiogramme faite sur l'oreillette d'une Torpille.

**Bateman J. B.** - Osmotic and Ionic Regulation in the Shore Crab, *Carcinus maenas*, with Notes on the Blood Concentrations of *Gammarus locusta* and *Ligia oceanica* [*Regulatio osmotica et jonica in specie « C. maenas ». Agitur etiam de sanguinis concentratione in speciebus « G. locusta » et « L. oceanica »*]. Journ. Exper. Biol., X, 355–371. Cambridge (1933). **b - 187**

**Benazzi M.** - Sull'automatismo del cuore dei Tunicati [*De cordis automatismo in Tunicatis*]. Pubbl. Staz. Zool. Napoli, XV, 1, 106–119. Napoli (1935). **b - 188**

Il cuore di *Ciòna* isolato e posto in acqua di mare conserva l'attività automatica per parecchie ore; si osserva però il fenomeno della inversione circolatoria. In una soluzione pura isotonica di NaCl il cuore di *C.* manifesta all'inizio un evidente effetto cronotropo positivo; in seguito il ritmo rallenta. Il KCl è invece tossicissimo. (A.).

**Biborski J.** - Les vaisseaux segmentaires et les vaisseaux des nageoires impaires de la Plie (*Pleuronectes platessa*) [*De systemate vasculari segmentali deque systemate vasculari pinnarum imparium*]. Acad. Pol. Sc. et Lettr., C. R. mens. Cl. Sc. Math. et Natur., 8, 6. Cracovie (1935). **b - 189**

Description du système des vaisseaux sanguins, comparaison avec celui des poissons bisymétriques. L'influence de la structure anatomique sur le trajet des artères et des veines.

**Boucher-Firly S.** - Sur la teneur en protéines du sérum d'Anguille et de Congre et ses variations au cours des changements de salinité [*De tenore quoad proteinas seri Anguillae et Congri eiusque variationibus ex salsedinis mutationibus*]. C. R. Soc. Biol., CXV, 952. Paris (1934). **b - 190**

Une augmentation de la salinité du milieu extérieur entraîne chez l'Anguille une diminution de la teneur en protéines du sérum. Ce phénomène ne se vérifie pas chez le congre, qui est stenohalin.

**Brinley F. J.** - The Effect of Caffeine upon the Cardiac Rythm of adult Fish Hearts [*De caffeina eiusque effectu in rythmum cardiacum piscium*]. 5 fig., Physiol. Zool., VII, 400–407. Chicago (1934). **b - 191**

On account of its effect on the vagus the solution of caffeine slackens the cardiac rythm or even produces a certain irritability in the cardiac muscle which may be easily shown by experiments when the heart is subtracted from the influence of the vagus.

**Echigo K.** - Die Agglutination – und Hämolysenwirkung des Aalblutes gegen die autogenen und homogenen Blutzellen [*De agglutinanti atque*

*haemolitico effectu sanguinis anguillae in cellulas sanguineas autogenas et homogenas*]. (In Jap.). 27 Tab., Juzenkwai Z., XXXVIII, 1974–2001, & 2350–2364. (?) (1933). **b - 192**

**Echigo K.** - Serologische Untersuchungen des Aalblutes [*Studia serologica sanguinis Anguillae*]. (In Jap.). 21 Tab., Juzenkwai Z., XXXVIII, 2620–2644 (?) (1933). **b - 193**

**Florkin M. & Blum H. F.** - Sur la teneur en protéins du sang et du liquide coelomique, des Invertébrés [*De tenore proteinarum in sanguine vertebratorum deque liquore coelomico*]. Arch. Int. Physiol., XXXVIII, 4, 353–367. Liège (1934). **b - 194**

La teneur en protéins du sang a été examinée chez 7 Lamellibranches marins, 1 Crustacé cirripède, 3 Crustacés decapodes et un Annélide polychète; la teneur en protéins du liquide coelomique chez *Sipunculus nudus*, *Phascolion strombi*, *Arenicola marina* et *Aphrodite aculeata*. Les résultats montrent qu'il y a une certaine relation entre la complexité du système circulatoire et la différence de la pression des capillaires centraux et que le liquide coelomique des Invertébrés constitue une cathégorie des liquides organiques tout à fait différents du sang le plus dilué par ses propriétés biochimiques, surtout par leur manque en protéins.

**Fontaine M. & Raffy A.** - Influence de la suroxygénation du milieu extérieur sur la réserve alcaline du sang des Poissons [*De influentia suroxygenationis medii ambientis exterioris in reservam alcalinam sanguinis piscium*]. C. R. Soc. Biol., CXV, 798. Paris (1934). **b - 195**

La suroxygénation de l'eau cause une élévation considérable de la réserve alcaline du sang chez les Poissons marins.

**Franklin Yeager J. & Tauber Oscar E.** - On the Hemolymph Cell Counts of Some Marine Invertebrates [*De numero cellularum hemolymphaticarum in Invertebratis quibusdam marinis*]. 1 Table, Biol. Bull., LXIX, 1, 66–70. Lancaster, Pa. (1935). **b - 196**

The total hemolymph cell counts of the 26 species of marine Invertebrates studied exhibit, like the total hemolymph counts of Insects, considerable interspecies and intraspecies variation. 1) The standard deviations given in table I indicate the latter. 2) The counts of adult *Limulus polyphemus* tend to exceed those of young *Limulus*. 3) The mitotic indices of the species studied were found to be less than one mitotically dividing cell in 2.000 hemolymph cells.

**Grafflin Allan L.** - Chloride and Total Osmotic Pressure in the Blood of Marine Teleosts [*De chloruro ac pressione osmotica totali in sanguine Teleosteorum marinorum*]. 6 Tabl., Biol. Bull., LXIX, 2, 245–258. Lancaster, Pa. (1935). **b - 197**

Studies upon pollack, cod, sculpin, flounder, mackerel, and conger indicate an appreciable physiological range of variation in both chloride and delta, with no detectable correlation between the two in any given species. It has further been demonstrated that both plasma chloride and delta are as a rule considerably elevated in Fishes caught on a long line or by net, and in Fishes bled only after a delay and rough handling. It is emphasized that this represents a serious source of error in studies upon normal osmotic pressure relationships and upon the relative tonicity of the body fluids in marine Teleosts.

**Ibañez G. O.** - Nota sobre la determinación de las proteinas del suero sanguineo y variaciones de la razón serina/globulina en el de algunos peces, por cambios de salinidad [*Nota de determinatione proteinarum seri sanguinei deque variatione correlationis* sierina/globulina *in quibusdam piscibus ex variationibus salsedinis*]. 2 tabl., Inst. Españ. Oceanogr., Notas y Resum., II, 92, 1–11. Madrid (1935). **b - 198**

Introducción – Separación de las proteinas del suero – Obtención del suero de lampreas y anguilas – Separacion de la serina e de la globulina – Mineralización del nitrógeno de las proteinas y su determinación por nesslerizzacion directa – Reactivo Nessler – Reactivo Nessler + alcali – Solución tipo de sulfato amónico – Cálculos.

**Ibanez G. O. & Fontaine M.** - Recherches sur les protéines du serum sanguin de quelques poissons migrateurs [*Investigationes in seri sanguinei proteinas aliquorum piscium migrantium*]. 2 tabl., Bull. Inst. Océanogr., 679, 1–5. Monaco (1935). **b - 199**

Étude sur la question, si la diminution de la teneur en protéines constatée chez les anguilles après leur passage d'eau douce en eau de mer entraîne aussi avec elle une diminution de la sérine et la globuline.

**Jullien A.** - La distension des cavités cardiaques appliquée à la détermination de leur structure chez l'huître [*Agitur de cavitatibus cardiacis quoad distensionem applicatam ad earumdem structuram determinandam in ostreis*]. C. R. Soc. Biol., CXIX, 605-607. Paris (1935). **b - 200**

La méthode générale d'examen consiste à pratiquer une distension ou dilatation de l'organe isolé, puis à le photographier à un grossissement suffisant. Les photographies d'organes ainsi montés sont très belles et mettent leur architecture sous les yeux d'une façon saisissante.

**Keys A. & Hill R. M.** - The Osmotic Pressure of the Colloids in Fish Sera [*De pressione osmotica substantiarum colloidalium in piscium seris*]. Journ. Exper. Biol., XI, 28–34. Cambridge (1934). **b - 201**

**Kharjkov I. I.** - L'albumine noire du sang des animaux marins (*Delphinapterus leucas*) [*De albumina nigra sanguinis animalium marinorum*]. 6 tabl., Rybn. Choz. Daljn. Vostoka, XIII, 1, 105–108. Khabarovsk (1935). **b - 202**

L'A. considère la possibilité d'utiliser l'albumine noire extraite du sang de *D. leucas* Pall., décrit le procès de son extraction et les propriétés du produit obtenu.

**Kobayashi S.** - The spectral Properties of Haemoglobin in the Molluscs, *Arca inflata* (Reeve) and *Arca subcrenata* (Lischke) [*De peculiaritatibus spectralibus quoad haemoglobinam in quibusdam molluscis*]. 2 figs., 3 tabl., Sc. Rep. Tôhoku Imp. Univ., 4 th. Ser., Biol., X, 2, 257-267. Sendai (1935). **b - 203**

Presence of haemoglobin shown in other types. Method of determination, spectro-photometric analysis. Comparison with other spp.

**Ohuye T.** - On the Coelomic Corpuscles in the Body Fluid of Some Invertebrates. I. –Reactions of the Leucocytes of a Holothurid, *Caudina chilensis* (J. Müller) to Vital Dyes [*De corpusculis coelomicis in plasmate aliquorum Invertebratorum. I. Leucocitorum reactiones in colorantes vitales in quodam Holoturide*]. 5 figs., Sc. Rep. Tôhoku

Imp. Univ., IVth Ser., Biol., IX, 1, 47-52. (Contr. Mar. Biol. Stat., 113, Asamushi Aomori–ken.) Sendai, Jap. (1934). **b - 204**

Results of an examination of the reaction of coelomic corpuscles of *C. chilensis* to trypan blue and carmine: the number of fusiform cells in the perivisceral fluid was increased.

**Racchiusa S.** - Sul potere emolitico del siero di sangue dei Teleostei [*De potentia haemolitica quoad serum sanguinis Teleosteorum*]. Num. tab., Mem. R. Comit. Talassogr. Ital., N. CCXVII, 3–36. Venezia (1934). **b - 205**

Esperienze sulle emolisine contenute nel siero di *Anguilla vulgaris, Cerna gigas, Pagellus mormirus, Uranoscopus scaber, Orcynus tynnus*, e *Xiphias gladius*, e determinazione del loro potere emolitico per i globuli rossi del sangue di bue. Risultati negativi hanno dato ricerche condotte su *Saurus, Mugil, Serranus, Maena, Dentex, Trachinus, Scorpaena* e *Sargus*.

## Apparatus respirationis.

**Bertolini F.** - Nuove ricerche sulla funzione respiratoria dei polmoni acquatici delle Oloturie [*Investigationes novae in functionem respiratoriam pulmonum aquaticorum in Holothuriis*]. 2 fig., Arch. Zool. Ital., XX, 579-590. Napoli (1934). **b - 216**

I polmoni acquatici delle Oloturie assorbono attivamente l'ossigeno sciolto nell'acqua e lo passano nel liquido celomatico dove ha una concentrazione superiore a quella che ha nell'ambiente esterno; questa attività è quasi certamente legata alla presenza di catalasi che si ritrovano negli estratti dei polmoni. Questi risultati confermano la teoria di Bohr che considera gli epiteli respiratori come epiteli ghiandolari e costituiscono la prima dimostrazione di funzione ghiandolare negli organi respiratori di animali acquatici.

**Bertolini F.** - Ricerche sugli organi respiratori delle Oloturie [*Investigationes in organa respirationis in Holothuriis*]. Atti R. Ist. Ven. Sc. Lett. Arti, XCIV, parte 2, 1, 9-11. Venezia (1934–35). **b - 217**

L'A. dimostra l'esistenza di una funzione respiratoria dei polmoni acquatici delle Oloturie, iniettando nel liquido celomatico di una *Holoturia tubulosa* D. Ch., resa asfittica, pochi cc. di una soluzione del leucoderivato del blu di

metilene, il quale si ossida nelle pareti dei polmoni acquatici prima che in ogni altro organo: le pareti dei polmoni acquatici si comporterebbero come una ghiandola, immagazzinando l'ossigeno nel liquido celomatico. La ricerca dei fermenti nelle pareti del polmone acquatico è risultata positiva per la catalasi.

**Florkin M.** - La fonction respiratoire du milieu intérieur dans la série animale [*De functione respiratoria quoad medium internum in serie animali*]. Ann. Physiol. Physicochimie Biol., X, 599–684. Paris (1934). **b - 218**

Étude comparée sur le cycle de respiration chez *Loligo pealei, Sipunculus nudus, Urechis caupo, Raia ocellata, Chelydra serpentina,* etc. Les moyens employés pour les échanges gazeux de la fonction respiratoire bienque très différents, aboutissent aux mêmes resultats. Rôle du « milieu intérieur » et son pouvoir d'absorption et de transport de $CO_2$ et d'oxygène.

**Fox H. M. & Johnson M. L.** - The Control of Respiratory Movements in *Crustacea* by Oxygen and Carbon Dioxide [*De inspectione, per oxygenum et $CO_2$, motuum respirationis in Crustaceis*]. Journ. Exper. Biol., XI, 1-10. Cambridge (1934). **b - 219**

**Gerard R. W. & Rubinstein B. B.** - A Note on the Respiration of *Arbacia* Eggs [*Nota de respiratione ovorum speciei* « *Arbacia* »]. Journ. Gen. Physiol., XVII, 3, 375-381. New York & Baltimore (1934). **b - 220**

Results of experiments undertaken with fertilized and unfertilized eggs of *Arbacia punctulata* compared with those obtained by Whitaker. Errors in determinations and their causes.

**Gudger E. W.** - Maxillary Breathing Valves in the Sharks *Chlamydoselachus* and *Cetorhinus* with notes on Breathing Valves in Thirteen Marine Teleosts [*De valvulis maxillaribus respirationis in* « *Chlamydoselachus* » *et* « *Cetorhinus* » *cum notis de valvulis respirationis in Teleosteis tredecim marinis*]. Journ. Morphol., LVII, 1, 91-104. Boston (1935). **b - 221**

Breathing valves are briefly described in thirteen marine Teleosts and in Sharks and Rays.

The function of breathing valves in Fishes is to prevent regurgitation of water during expiration as the fish swims along with partly open mouth. It is also correlated with feeding where the food is impaled on the teeth and held for swallowing, or where the fish feeds on pelagic organisms collected by swimming along with open mouth.

**Kryzanovsky S. G.** - Die Atmungsorgane der Fischlarven (*Teleostomi*) [*De organis respirationis larvarum in Teleostomis*]. 15 Abb., Zool. Jahrb. Anat., LVIII, 21-60. Jena (1934).

(—) Trav. Lab. Morphol. Evol. I, Lief. 2 (In Russ., dtsch. Rés.). Léningrad (1933). **b - 222**

Beschreibung der als Atmungsorgane dienenden Organe, ihre Entwicklung und Funktion bei den Larven von *Acipenser, Lepidosteus* und mehreren Süsswasserarten.

**Kryzanovsky S. G.** - Die Pseudobranchie-Morphologie und ihre biologische Bedeutung [*De morphologia in pseudobranchiis et eorum biologico momento*]. 15 Abb., 3 Taf., Zool. Jahrb. Anat., LVIII, 171-238. Jena (1934). **b - 223**

Ursprung und Entwicklung der Pseudobranchien bei den Lepidosteiden und den Teleosteern im Vergleich mit anderen Gruppen; verschiedene Typen von Blutgefässsystem der Pseudobranchien; Erörterung verschiedener Hypothesen über die funktionelle Bedeutung der Pseudobranchien.

**Laurie Alec H.** - Physiology of Whales [*De physiologia Balaenarum*]. Nature, CXXXV, 3420, 823. London (1935). **b - 224**

The A., who has just returned from a whaling expedition, describes personal observations indicating that whales do not fill their lungs with water when diving (to prevent caisson sickness due to liberation of dissolved nitrogen). His previous experiments with whale blood have shown that it has the property of using up dissolved nitrogen. (Nature's abstract on page 834).

**Marshall S. M., Nicholls A. G. & Orr. A. P.** - On the Biology of *Calanus finmarchicus*. Part VI. Oxygen Consumption in Relation to Environmental Conditions [*De biologia speciei* « *Calanus finmarchicus* ». *De consummatione oxygenii pro condicionibus ambientis*]. 7 figs., 11 tabl., Journ. Mar. Biol. Assoc., XX, 1, 1-27. Plymouth (1935). **b - 225**

Experiments have been made to determine the oxygen utilisation by male, female and stage V of *Calanus* under different environmental conditions, viz., temperature, hydrogen-ion concentration, oxygen content of the water, salinity, light. The bearing of these results on the distribution of *Calanus* is discussed. From the amount of oxygen used in respiration, calculations of the food required are made and these are compared with the results given by Pütter for *Calanus* and other Copepods.

**Nomura Shichiroku** - Studies on the Physiology of Ciliary Movement. II. Intracellular Oxidation. Reduction Potential limiting the ciliary Movement [*De physiologia motuum ciliarum. Potestas oxidationis et reductionis intracellularis ut limitatio motus ciliaris*]. Protoplasma, XX, 1, 85-89. Berlin (1933). **b - 226**

The ciliary movement of the gill tissue of *Pecten* derives its energy from glycolysis and when the intracellular redoxpotential falls down glycolysis would be suppressed and ciliary movement would come to rest.

**Raffy A.** - Physiologie des Amphibies. L'intensité respiratoire de quelques Crabes de différents niveaux en milieu aérien et aquatique [*Amphibiorum physiologia. Intensitas respiratoria in quibusdam Cancris, aëre et aqua*]. 2 tabl., Bull. Inst. Océanogr., 662, 1-4. Monaco (1935). **b - 227**

Les Crabes étudiés par l'A. (*Grapsus marmoratus, Carcinus moenas, Cancer pagurus, Portunus puber* et *P. depurator*) ne sont pas des amphibies parfaits. La vie aquatique semble leur être favorable au point de vue respiratoire, mais la vie aérienne, impossible pour les espèces nageuses, n'est que temporaire même chez les *Grapsus*. La présence d'eau dans la chambre branchiale est sans doute nécessaire au bon fonctionnement de leurs organes respiratoires qui n'ont pas encore acquis la spécialisation morphologique des espèces réellement terrestres.

**Wells N. A.** - The Influence of Temperature upon the Respiratory Metabolism of the Pacific Killifish, *Fundulus parvipinnis* [*De influentia temperaturae in metabolismum respiratorium*]. Physiol. Zool., VIII, 196-227. Chicago (1935). **b - 228**

**Wislocki G. B.** - The Lungs of the Manatee (*Trichechus latirostris*) Compared with those of Other Aquatic Mammals [*De pulmonibus speciei* « *Trichecus latirostris* » *comparatis cum pulmo-*

*nibus animalium aquaticorum*]. 2 pl., 1 table, Biol. Bull., LXVIII, 3, 385-396. Lancaster, Pa. (1935). **b - 229**

The present report concerns the finer structure of the manatee and brings out the close similarity in lung structure between the two families of *Sirenia*. It also demonstrates the marked dissimilarities between the Sirenian lungs and those of the Porpoises belonging to the order of Whales. Although there are certain distinctive features common to the lungs of the aquatic Mammals, the pronounced differences found to exist indicate that various avenues of specialization have been followed in adapting to aquatic modes of life.

**Zenkovitch B. A.** - La respiration et les mouvements qui l'accompagnent chez les grands Cétacés [*De respiratione, motibusque qui cum eadem colligantur in magnis Cetaceis*]. (En russe). Rybn. Choz. Daljn. Vostoka, XIII, 1, 67-82. Khabarovsk (1935). **b - 230**

L'A. communique quelques données sur la nature de la « fontaine » d'eau que les baleines éjectent au cours de leur respiration, sur les mouvements inhérents à la respiration et à l'expiration, sur le plongeon qui suit la respiration, sur la trace huileuse que les baleines laissent sur la surface de l'eau à l'endroit où elles ont plongé, ainsi que sur l'habitude des baleines de se reposer sur la surface de l'eau. Pour conclure l'A. établit une comparaison entre tous les mouvements décrits caractéristiques pour chacune des différentes espèces de baleines.

## *Effectus salinitatis.*

**Barnes T. Cunliffe** - Salt Requirements and Orientation of *Ligia* in Bermuda. III [*Salis necessitas atque orientatio in « Ligia » in* Bermuda]. 5 tabl., 2 figs., Biol. Bull. LXIX, 2, 259-268. Lancaster, Pa. (1935). **b - 231**

Observations undertaken to study where the release of the young takes place; their orientation in the sea; reactions to different salt solutions; experiments on the average and maximum longevity of adult and young specimens.

**Hansborough L. A.** - Histological Changes produced by Fresh Water upon Isolated and grouped *Procerodes*, a Marine Turbellarian [*Mutationes histologicae, aquae dulcis causa, in exemplaribus speciei « P. wheatlandi » liberis seu cumulatis*]. 17 figs., Protoplasma XX, 4, 516-529. Berlin (1934). **b - 232**

When placed in tap-water specimens of *Procerodes wheatlandi* form clusters probably in order to expose a lesser amount of surface and thus protect themselves against hypotonicity.

**Hevesy (von) G. & Hofer E.** - Der Austausch des Wassers im Fischkörper [*Aquae permutatio in piscis corpore*]. Hoppe-Seyler's Ztschr. Physiol. Chem., CCXXV, 1, 28-34. Strassburg (1934) **b - 233**

Durch die hier beschriebenen Versuche ist bestätigt worden, dass der Austausch mit dem umgebebenden Wassermedium sehr schnell vor sich geht. Beitragende Faktoren.

**Löwenstein O.** - The Respiratory Rate of *Gammarus chevreuxi* in Relation to Differences in Salinity [*De velocitate respirationis in « Gammarus chevreuxi » pro differentibus salinitatibus*]. Journ. Exper. Biol., XII, 217-221. Cambridge (1935). **b - 234**

The study concerns the brackish water amphipod *Gammarus chevreuxi* in 25 p. c. sea water and sea water.

**Sayles L. P.** - The Effects of Salinity Changes on Body Weight and Survival of *Nereis virens* [*Effectus variationum salinitatis pro corporis pondere et surviventia speciei « Nereis virens »*]. 7 graph., Biol. Bull., LXIX, 2, 233-244. Lancaster, Pa (1935). **b - 235**

Experiments undertaken to study: Changes in body weight of Worms following transfer directly to various dilutions. Effect of return to sea water after a period in dilutions. Effect of return to dilutions after a period in sea water. Effect of gradual dilution of external medium. Effect of transfer to fresh water from various dilutions of sea water. Discussion.

**Schreiber B.** - Esperimenti e considerazioni sul significato funzionale dell'apparato di Weber degli Ostariofisi [*Experientiae et considerationes quoad significationem functionalem apparatus* Weber *nomine in Ostariophysis*]. Boll. Zool., VI, $^1/_3$, 67-70. Napoli (1935). **b - 236**

L'A. ammette che l'apparato di Weber funzioni da smorzatore verso le variazioni della pressione idrostatica, con un meccanismo a tipo protettivo rispetto alla perilinfa per improvvise e forti variazioni di quella. Così la regolazione idrostatica della pressione idrostatica negli Ostariofisi avverrebbe per mezzo di due distinti meccanismi: 1° primario, a funzione direttamente protettiva (smorzatore), e 2° secondario, fisiologico, di adattamento alla pressione esterna.

## Apparatus digestionis atque alimentatio.

**Bayliss L. E.** - Digestion in the Plaice (*Pleuronectes platessa*) [*De digestione in specie « Pleuronectes platessa »*]. 6 figs., 7 tabl., Journ. Mar. Biol. Assoc., XX, 1, 73-91. Plymouth (1935). **b - 237**

Study of the digestion of proteins and fats from: the stomach, intestine, bile and liver. The hydrogenion concentration of the contents of the alimentary canal. The relative potency of the extracts from various organs.

**Battle H. I.** - Digestion and Digestive Enzymes in the Herring (*Clupea harengus* L.) [*De digestione atque enzymatis digestivis in « Clupea harengus »*]. 6 figs., 7 tabl., Journ. Biol. Bd Canada, I, 3, 145-157. Toronto (1935). **b - 238**

Crustacean food is partially broken down and digested in the caecum of the stomach of the herring. It becomes more finely divided in the pyloric sac and consists of an oily chyme, intermingled with chitin, mucus and bacterial clumps in the pyloric caeca and intestine. Influence of temperature on the digestive power of pepsin from the stomach and trypsin from the pyloric caeca. Enzymes secreted from the stomach, pyloric caeca, and intestinal mucosa; the bile has some amylolytic properties.

**Bertolini F.** - Sulla funzione escretoria dell'intestino delle Oloturie [*De functione excretoria intestini Holothuriarum*]. Boll. Soc. Ital. Biol. Sper., 10, 1268-1269. Napoli (1934). **b - 239**

Iniettando nel celoma di *Holothuria tubulosa* Gml. e *Synapta inhaerens* Dub. colori colloidali elettronegativi a forte dispersione (trypanblau e fenolsolfonftaleina), e colori con particelle di media dimensione (blu di Prussia e inchiostro di china), l'A. dimostra che l'intestino degli Oloturoidi ha funzione escretoria.

**Bertolini F.** - Ricerche sui Selaci mangiatori di plancton [*Inquisitiones de Selacis planctophagis*]. 2 fig., Boll. Soc. Ital. Biol. Sper., 10, 1269-1271. Napoli (1934). **b - 240**

L'A. studia il meccanismo della nutrizione nell'*Aodon edentulus*, che si nutre di minutissimi planctonti, in prevalenza Eufasiacei e dà una descrizione anatomica e funzionale dell'apparato digerente di questo animale.

**Bond R. M.** - Digestive Enzymes of Copepods [*De enzymatis digestivis in Copepodis*]. Woods Hole Oceanogr. Instit., App., Rep. 1934, 20. Woods Hole, Mass. (1935). **b - 241**

Summary of investigation on the digestive enzymes of *Calanus finmarchicus*, the results of which appeared in the «Biol. Bull.», LXVII, 461–465, 1934.

**Clarke G. L. & Gellis S. S.** - The Nutrition of Copepods in Relation to the Food–cycle of the Sea [*De alimento Copepodorum pro cyclo cibi in mari*]. 4 tabl., Biol. Bull., LXVIII. 2, 231-246. Lancaster, Pa. (1935). **b - 242**

In view of the importance of Copepods in the economy of the sea and the inconclusive and contradictory nature of previous observations on their food, feeding experiments were undertaken using *Centropages, Labidocera, Acartia,* and particularly *Calanus*. These experiments indicate that *Bacteria* and other constituents of the nannoplankton may be an important food for Copepods in the sea. Diatoms and other larger organisms may possibly serve as a source of nourishment indirectly through the *Bacteria* etc., which feed upon them and their excretions.

**Dennell R.** - Feeding Mechanism in *Diastylis* [*De mechanismo alimentari in «Diastylis Bradyi»*]. Trans. R. Soc. Edinburgh LVIII, 1, 125-142. Edinburgh (1934). **b - 243**

The examination of the mouth parts of *D. Bradyi* both on the living animal and on careful preparations shows the features of a typical filtratory malacostracan. A peculiar median process projecting into the filter chamber which is of great importance in the working of the feeding mechanism has been noticed for the first time in the *Cumacea*.

**Ghazzawi F. M.** - The Pharynx and intestinal Tract of the Egyptian Mullets, *Mugil cephalus* and *Mugil capito*. Part II. On the Morphology and Histology of the Alimentary Canal in *Mugil capito* (Tobar) [*De pharynge deque tractu intestinali in Mugilidis. De morphologia et histologia canalis alimentaris in «Mugil capito»*]. 15 fig., Fish. Res. Direct., Notes & Mem., 6, 1-31. Cairo (1935). **b - 244**

Introductory remarks on the food of the mullet. General anatomy. The Oesophagus. The transition region. The Oesogaster. The cardiac region of the stomach. The intermediate region between the cardiac region and pylorus. The pylorus. The intestines. The pyloric appendages. The fat- storing tissue.

**Gray R. W.** - Diet of Seals [*Quaestio de dieta phocarum*]. Nature, CXXXV, 3412, 473. London (1935). **b - 245**

Criticizing Mr. Steven's report the A. sustains that the examination of a great number of stomachs of Seals might lead to the discovery of more remains other than those of fish, that is, those of Crustaceans and shellfish. He concludes that until the matter is more fully investigated, the destruction of grey Seals on the plea that they destroy large quantities of food–fish does not seem to be justified.

**Grunshields F.** - Diet of Seals [*De alimento phocarum*]. Nature, CXXXV, 3417, 657. London (1935). **b - 246**

In contrary to the opinion of Mr. R. W. Gray (See: Nature, CXXXV, 3412, 473) the A. has found that the stomachs and intestines of four Seals caught in the River Tay and examined by him contained the remains of fish.

**Lowndes A. G.** - The Swimming and Feeding of certain Calanoid Copepods [*De natatione et alimento in Copepodis quibusdam Calanoidibus*]. Proc. Zool. Soc. London, Part 3, 687-735. London (1935). **b - 247**

Examination of the movements of the appendages of 7 marine spp. by means of the polygraph process and ultra-rapid photography. The feeding has proved to be more specialised than was believed.

**MacIntosh F. C.** - The Secretion of Urea by the Elasmobranch Stomach [*De ureae secretione ex stomacho in Elasmobranchiatis*]. 2 graph., figs., Journ. Biol. Bd Canada, I, 6, 497-501. Toronto (1935). **b - 248**

The finding of Babkin, Chaisson and Friedman that destruction of the spinal cord in the skate leads to a continuous secretion of gastric juice is confirmed. During the course of this secretion the chloride content of the gastric juice rises or remains unchanged, while the urea content gradually falls from a value of over 1 per cent to 0,1 per cent or less. There is no corresponding change in the urea or chloride content of the blood. (A:s abstr.).

**Maxia C.** - Nuove ricerche sul pancreas intraepatico [*Investigationes novae in pancreas intrahepaticum*]. Monit. Zool. Ital. (Atti Soc. Ital. Anat., VI Conv. in Roma, dicembre 1934), XLV, suppl., 318-321. Firenze (1935). **b - 249**

Esame dei fegati di 44 specie di pesci appartenenti alle famiglie degli Squali, Ganoidi, Lofobranchi, Apodi, Gadidi, Pleuronettidi, Clupeidi, Salmonidi, Gasterosteidi, Mugilidi, Labridi, Pomacentridi, Sparidi, Mullidi, Catafratti, Scombridi, Gobidi, Blennidi e Trachinidi.

**Newell G. E. & Roper H. D. G.** - A Note on the Feeding Habits of *Chimaera monstrosa* [*De consuetudinibus alimentaribus in «Chimaera monstrosa»*]. 2 figs., Journ. Mar. Biol. Assoc., XX, 1, 99-102. Plymouth (1935). **b - 250**

Account of the gut contents of several specimens of *Chimaera monstrosa*.

**Retovsky L. O.** - The Feeding of the Youngs of the Char of Novaja Zemlja (*Salvelinus alpinus* L.) [*De alimentatione quoad juvenes speciei «Salvelinus alpinus» ad* Novaja Zemlja *pertinentis*]. 3 tabl., Trans. Arct. Inst., XVII, 91-105 (Scient. Res. Biol. Exp. Novaja Zemlja 1931-1934, n. 2). Leningrad (1935). **b - 251**

A study of the stomach–content of the young of the char of Novaja Zemlja collected from the River Krestovaja on the northern Island of Novaja Zemlja. The dissected 32 specimens, on which the work is based, vary in length between 28.9 and 78.8 mm.

**Roux P.** - Ingestion et assimilation directes de carbonate de chaux par certains Mollusques Gastropodes [*De ingestione et assimilatione directis carbonati calcici in molluscis quibusdam Gastropodis*]. 3 fig., Bull. Soc. Scient. Bretagne, XI, 101-107. Rennes (1934). **b - 252**

**Ueda Saburo & Okada Yoshikazu** - On the Food of the Salmonoid Fish, Ayu (*Plecoglossus altivelis* Temminck & Schlegel), I, II, III [*De cibo piscis Salmonoidis « Plecoglossus altivelis »*]. (In Jap., Engl. Rés.). 2 tabl., 1 pl., 3 figs., Bull. Jap. Soc. Scient. Fish. II, 5, 241-245; III, 5, 275-280; IV, 4, 233-238. Tokyo (1935). **b - 256**

Report on investigations undertaken to examine what food this very precious edible species prefers and whether it changes or not according to ages, locality or season. The adult Ayu generally feed on vegetables, especially bluegreen Algae, as has already been shown, only in peculiar conditions they feed on animal organisms indicated here.

**Svedovidov A.** - On the Correlation Between the Character of Food and the Number of Pyloric Caeca in Fishes [*De correlatione inter alimentationem et numerum appendicium pyloricarum in piscibus*]. (In Russ. & Engl.). 3 tabl., C. R. Acad. Sc. U. R. S. S., III, 1, 67-72. Léningrad (1934). **b - 257**

The species on which this study is based in Fishes belong to 5 families, i.e. *Clupeidae, Thymallidae, Pleuronectidae, Gadidae,* and *Percidae*. It is shown that the bigger the organisms on which the given species feeds are, the higher is the number of pyloric caeca. Some conclusions concerned with the physiological function of pyloric caeca in the digestion of Fishes. (L. S.).

**Valiani S.** - Contributo allo studio dell'alimentazione dei pesci. *Scorpaena porcus* Lin. e *Scorpaena scrofa* Lin. [*Contributio in piscium alimentationem studendam*]. 2 fig., Boll. Pesca, Piscicolt. Idrobiol., XI, 3, 413-423. Roma (1935). **b - 258**

Morfologia e biologia delle Scorpene. Elenco completo delle singole specie ritrovate nel contenuto gastrico, della *Scorpaena porcus* e *S. scrofa*, a seconda delle stagioni, risultante costituito prevalentemente da Decapodi, *Palaemonetes varians* Fab., *Crangon spinosus* Leach, e *Nephrops norvegicus* Leach.

**Vladykov V. D. & Homans R. E. S.** - Do Haddock feed during the Spawning Period? [*Num « Gadus aeglefinus » inter reproductionem edit ?*]. Progr. Rep. Atlant. Biol. Stat., 15, 9-11. St. Andrew's, N. B. (1935). **b - 259**

**Yamamura Yarokurô** - Chemical Study of Food-organism for Fish. I. Inorganic Constituents and Protein Digestibility. II. Distribution of Alluminium. III. The Nephelometric Analysis of Zinc and its Distribution [*Studium chemicum organismorum pro alimentatione piscium. I. Constituentes inorganici et proteinarum digestibilitas. II. Alluminii distributio. III. Analysis nephelometrica zinci eiusdemque distributio*]. (In Jap., Engl. Rés.). 1 fig., 6 tabl., Bull. Jap. Soc. Scient. Fish., III, 5, 249-254; 6, 357-358; IV, 1, 6-8. Tokyo (1935). **b - 260**

The food-organisms examined are principally *Crustacea, Mollusca, Vermes* with special reference to their inorganic constituents (namely calcium, magnesium, phosphorous, iron, copper, sulphur, iodine contents, chitin, alluminium). Description of methods used. Results expressed in tables.

**Yonge C. M.** - On Some Aspects of Digestion in Ciliary Feeding Animals [*De peculiaritatibus quoad digestionem animalium quae ciliarum auxilio cibum capiunt*]. 1 table, Journ. Mar. Biol. Assoc., XX, 2, 341-346. Plymouth (1935). **b - 261**

The rôle of mucus in feeding. The nature of the feeding processes. Function of the mid-gut. Formation of faeces.

**Wailes G. H.** - Food of *Clupea pallasii* in Southern British Columbia Waters [*Alimentum speciei « Clupea pallasii » in aquis Columbiae Britannicae merid.*]. 1 fig., 1 tabl., Journ. Biol. Bd Canada, I, 6, 477-486. Toronto (1935). **b - 262**

The food of the Pacific herring consists during the larval stage principally of ova of various kinds with circular diatoms. No food was found in fish less than 9 mm. in length. Adults confine themselves to a crustacean diet (except herring ova occasionally). Copepoda are on the whole the most important food of *Clupea pallasii*. (From A:s abstr.).

## Apparatus uro-genitalis.

**Cardoso D. M.** - Relation entre l'hypophyse et les organes sexuels chez les Poissons [*Correlatio inter hypophysim et organa sexus in piscibus*]. C. R. Soc. Biol., XCV, 1347. Paris (1934). **b - 263**

L'extrait d'hypophyse de plusieurs Poissons injecté à de jeunes Poissons, détermine un développement au delà de la normalité des glandes génitales.

**Chambers L. A.** - Studies on the Organs of Reproduction in the Nudibranchiate Mollusks, with special Reference to *Embletonia fuscata* Gould [*De organis pro reproductione in Molluscis nudibranchiatis, speciatim in « Embletonia fuscata »*]. 3 pls., 5 figs., Bull. Amer. Mus. Natur. Hist., LXVI, 4, 599-641. New York (1934). **b - 264**

Taxonomic status and general morphology of *Embletonia fuscata*: topography of histology and anatomy of the reproductive organs. Summary of structural relationships and natural history of reproduction in *Embletonia* and other Nudibranchs. Reproduction and migration. A fundamental similarity is ascertained among the complex reproductive systems of the *Nudibranchiata* classified in four types.

**Diamare V.** - Cordoni cellulari pronefrici e corpuscoli di Stannius dei Teleostei [*Chordae cellulares pronephricae corpusculaque* Stannius *no-*

*mine in Teleosteis*]. 1 tav., Atti R. Acc. Sc. Fis. Mat., serie 2, XX, 6, 1-7. Napoli (1935). **b - 265**

L'A. dimostra nuovamente l'insussistenza dell'opinione secondo la quale i cordoni cellulari pronefrici dei Teleostei sarebbero gli equivalenti della sostanza corticale delle capsule surrenali riferendo su ulteriori proprie indagini; essi costituiscono invece un corpo epiteliale speciale, connesso con la funzione midollare. I corpuscoli di Stannius, viceversa, sono gli equivalenti corticali, come l'A. stesso dimostrò sin dal 1895.

**Grafflin A. L.** - Renal Function in Marine Teleosts. I. Urine Flow and Urinary Chloride [*De renum functione in Teleosteis marinis. De urinae et chloruri uretici emissione*]. 2 figs., Biol. Bull., LXIX, 3, 391-402. Lancaster, Pa. (1935). **b - 266**

Results of observations upon urine flow and urinary chloride concentration in the following marine teleosts: *Myxocephalus octodecimspinosus*, *Pseudopleuronectes americanus*, *Gadus morrhua*, *Lophius piscatorius*, *Pleuronectes platessa*, *Orthagoriscus mola*, *Scorpaena scrofa*, *Trigla corax*, and *Zeus faber*.

**Hickling C. F.** - Seasonal Changes in the Ovary of the Immature Hake, *Merluccius merluccius* [*Mutationes in ovario speciei « Merluccius merluccius » pro anni temporibus*]. 5 figs,, 4 tabl., Journ. Mar. Biol. Assoc., XX, 2, 443-461. Plymouth (1935). **b - 267**

There appears to be a seasonal change in the rate at which young eggs are formed from resting oocytes, as indicated 1) by the change in the relative abundance of nuclei in synapsis, and 2) by the change in the average diameter of the eggs in the egg-stock in the ovary. These processes show considerable correspondence in their season of incidence with the ovarian cycle. A physiological rhythm has now been detected in both somatic tissues and gonad in the immature hake, which foreshadows the physiological rhythm associated with the spawning cycle in the mature hake. The implication of this on the question of the formation of "growth-rings" in the skeletal structures, is briefly discussed.

**Kostitzine J.** - Sur le système reproducteur femelle de la Pourpre (*Purpura lapillus* L.) [*De systemate feminino pro reproductione in « Purpura lapillus »*]. 2 fig., C. R. Acad. Sc., CC, 7, 585-587. Paris (1935). **b - 268**

Description détaillée de l'appareil reproducteur femelle de la pourpre, prosobranche monotocarde marin, qui n'a pas jusqu'à présent été l'objet d'études approfondies.

**Labbé A.** - Une fonction nouvelle de l'organe d'accouplement des Silicodermés [*Agitur de nova quadam functione quae est tribuenda organo sexuali in Silicodermatis*]. C. R. Acad. Sc., CC, 20, 1684-1685. Paris (1935). **b - 269**

L'A. communique les résultats de son étude sur des coupes sériées d'*Oncidiella* qui démontrent que l'organe d'accouplement en dehors de ses fonctions multiples connues (v. Labbé: C. R., CXCVIII, p. 1941, 1934), fonctionne comme un urèthre, et le pénis est à la fois le terminus de l'urèthre et du canal déférent, comme chez les Mammifères. Cette circonstance explique la présence de cristaux d'acide urique qui ont été trouvés en abondance dans la cavité du pénis de l'*Oncidiella*.

**MacGinitie G. E.** - Normal Functioning and Experimental Behavior of the Egg and Sperm Collectors of the Echiuroid, *Urechis caupo* [*Functio normalis, atque ratio experimentalis quoad collectorem ovorum et spermatum in « Urechis caupo »*]. Journ. Exp. Zool., 70, 3, Philadelphia (1935). **b - 270**

Description and illustration of the eggs and the sperms of *U. caupo*, and of the collecting organs. Their function in blood plasma and in sea water after removal from the body.

**Maschkowzeff A.** - Der Genitalapparat der *Acipenseridae* [*Apparatus genitalis in Acipenseridis*]. 18 fig., Zool. Jahrb. Anat., LVIII, 397-414. Jena (1934). **b - 271**

Die Entwicklung der Eileiter im Vergleich mit der der Selachier, der Dipneusten und der Tetrapoden. Beschreibung des Genitalapparates von drei Arten mit besonderer Berücksichtigung der Verbindung der Testikel und Urniere.

**Ranzi S.** - Sulle funzioni dei leucociti nell'utero dei Selaci [*De leucocitis quoad eorum functionem in utero Selaciorum*]. 3 fig., Arch. Zool. Ital., XX, 569-577. Napoli (1934). **b - 272**

In *Torpedo*, *Scymnus*, *Centrophorus* e *Acanthias*, i leucociti passano dai capillari nel liquido uterino traversando l'epitelio, ed in questo cammino elaborano ed immagazzinano nel loro citoplasma dei lipidi. All'inizio della gravidanza, nelle cellule epiteliali dell'utero di *Myliobatis* e *Trygon*, entrano dei leucociti che vengono distrutti.

**Rotschild M.** - Note on the excretory System of *Cercaria ephemera* Lebour, 1907 (nec Nitzsch) [*De systemate excretorio in « Cercaria ephemera »*]. 7 figs., Parasitol., XXVII, 2, 171-174. London (1935). **b - 273**

Only two preceding descriptions published (1919 and 1931). Development of the system also shown by figures for every stage. The system a typical "Stenostoma" type of excretory system as anticipated by Sewell. Comparison with the Mesostoma type.

## Glandulae et Hormones.

**Friedman M. H. F.** - The Function of the Claspers and Clasper-glands in the Skate [*De organis pro copulatione et glandulis adiuvantibus quoad eorum functionem in Rajidis*]. 2 figs., Journ. Biol. Bd Canada, I, 4, 261-268. Toronto (1935). **b - 274**

The clasper is erected by powerful adductor muscles as well as by vascular dilatation and is used as an organ of intromission. The gland secretes simultaneously from all its papillae a fluid which washes sperm down the clasper-tube into the funale's cloaca. A centre for clasper erection exists in the cord between spinal nerves 48 to 50. In a spinal male tapping on the anal region causes a reflex erection of the claspers. Adrenaline apparently lowers the stimulus threshold for clasper erection.

**Getzel D.** - I microbi della glandola midamentale accessoria in *Sepia officinalis* [*De microbis glandulae nidamentalis additiciae in « Sepia officinalis »*]. Arch. Zool. Ital., XX, 33-43. Napoli, (1934). **b - 275**

L'A. ha studiato le specie microbiche, osservate da Pierantoni, viventi in simbiosi fisiologica nella glandola nidamentale accessoria di *Sepia officinalis* e ne ha descritto le caratteristiche morfologiche e specialmente quelle cromogene alle quali si devono i vivaci colori che si osservano in tali ghiandole. Le specie sono cinque: *Micrococcus nidamentalis albus*, *Coccobacterium nidamentale rubrum*, *Diplobacterium nidamentale pallidum*, *Staphilococcus nidamentalis croceus*, *S. n. malus*.

**Lang D. & Yonge C. M.** - The Function of the Tegumental Glands in the Statocyst of *Homarus vulgaris* [*De functione glandularum tegumentalium in statocystis speciei « Homarus vulgaris »*]. 4 figs., Journ. Mar. Biol. Assoc., XX, 2, 333-339. Plymouth (1935). **b - 276**

The general structure of the statocyst and the combined sensory setae in *H. vulgaris* have been described. The statoliths consist of sand grains attached to the setae by a hyaline secretion. Numerous tegumental glands occur in the sub-epithelial tissues. Their ducts have characteristic funnel-shaped endings, opening into the cavity of the statocyst. The conclusion is reached that the hyaline secretion is formed by these tegumental glands and that this constitutes an important accessory function of these glands.

**Pierantoni U.** - Nuove osservazioni sulla ghiandola nidamentale accessoria dei Cefalopodi [*Observationes novae glandulae nidamentalis additiciae in Cephalopodis*]. Arch. Zool. Ital., XX, 427-442. Napoli (1934). **b - 277**

Sulla base di nuove osservazioni l'A. conferma l'origine ereditaria dei batteri della ghiandola nidamentale, la cui funzione è in rapporto alle radiazioni prodotte dai batteri. Tali radiazioni influiscono sull'attività dei processi di sviluppo embrionale.

**Pierantoni U.** - Ancora sulla funzione della glandola accessoria dei Cefalopodi [*Denuo de functione glandulae additiciae in Cephalopodis*]. Boll. Zool., VI, 1/3, 143-145. Napoli (1935). **b - 278**

L'A. ha studiato l'azione fotogena dei Batteri isolati dalla glandola accessoria di *Sepiola*, i quali impressionano in modo più o meno sensibile lastre fotografiche sensibilissime. Tali Batteri potrebbero essere degli attivatori dello sviluppo e della funzione della sorgente luminosa batterica dell'organo fotogeno, e, somministrati alle uova, potrebbero essere altresì attivatori dello sviluppo dell'embrione.

**Sjögren S.** - Die Blutdrüse und ihre Ausbildung bei den Decapoden [*De glandula sanguinea eiusque formatione in Decapodis*]. 10 Abb., Zool. Jahrb. Anat., LVIII, 144-170. Jena (1934). **b - 279**

Es wird der Zusammenhang zwischen der Blutdrüse und den optischen Nervenfasern aufgewiesen. Beschreibung der Blutdrüse bei *Natantia*; ihre Lage bei verschiedenen Decapoden, innerer Bau und Tätigkeit.

## Color et influentia pigmentorum.

**Abramowitz A. A.** - Color Changes in Cancroid Crabs of Bermuda [*Coloris mutationes in specie « Portunus » ad* Bermuda *pertinente*]. Proc. Nat. Acad. Sc. U. S. A., XXI, 12, 677-681. Washington D. C. (1935). **b - 280**

The pigments of Portunid crabs. Effects of variously colored backgrounds and of blinding.

**Beauvallet M. & Veil C.** - Chromatophores de Poisson (*Carassius vulgaris*) et chromatophores de Crustacés (*Palaemon squilla*) [*De chromatophoris piscium et Crustaceorum*]. C. R. Soc. Biol., CXVII, 688-690. Paris (1934). **b - 281**

Différence structurale et différence physiologique.

**Behre E. H.** - Color Recognition and Color Changes in certain Species of Fishes [*Coloris agnitio et mutationes in quibusdam piscium speciebus*]. Copeia, 2, 49-58. New York (1933). **b - 282**

**Burkhardt, Norman G., Heilbron Morris I., Jackson H. & Parry E. G.** - Pigmented Marine Animal Oils. I. Pigments from the Angler Fish (*Lophius piscatorius*), the Prawn (*Nephrops norvegicus*) and the Whale [*Olea animalia marina pigmentata. Pigmenta in « Lophius », « Nephrops » et in Balaenis*]. Biochem. Journ., XXVIII, 5, 1698-1701. London & Cambridge (1934). **b - 283**

Presence of pigments proved in the oils.

**Euler v. H. & Adler E.** - Ueber Flavin und einen blaufluorescierenden Stoff in der Netzhaut des Fischauges [*De flavina deque substantia coerulea fluorescenti in reticolo epitheliali oculorum piscium*]. Hoppe-Seyler's. Ztschr. Physiol. Chem., CCXXVIII, 1-12. Strassburg (1934). **b - 284**

In der Netzhaut des Fischauges hat Vf. eine Art von Pigment, Flavin, gefunden, der auch bei einigen Squaliden zusammen mit einem blaufluorescierenden Stoff vorgefunden worden ist.

**Euler v. H., Hellström H. & Klussman nE.** - Ueber den Carotingehalt einiger Invertebraten [*De tenore carotinoidum aliquorum Invertebratorum*]. Hoppe-Seyler's Ztschr. Physiol. Chem., CCXXVIII, 77-89. Strassburg (1934). **b - 285**

Studien über den Carotingehalt bei *Calanus finmarchicus* und andere nicht determinierte Carotinsubstanzen bei verschiedenen Invertebraten.

**Heilbron I. M., Jackson H. & Jones R. N.** - The Lipochromes of Sea Anemones. I. Carotenoid Pigments of *Actinia equina*, *Anemonia sulcata*, *Actinoloba dianthus* and *Tealia felina* [*Lipochromata Actiniarum. Pigmenta carotinoidea*]. Biochem. Journ., XXIX, 1384-1388. London & Cambridge (1935). **b - 286**

**Heilbron I. M., Lythgoe & Phipers R. F.** - A New Type of Plant Lipochrome [*Typus novus in plantarum lipochromatis*]. Nature, CXXXVI, 3451, 989. London (1935). **b - 287**

Short note on a new pigment, myxoxanthin, discovered in the unsaponifiable fraction of *Rivularia nitida* (*Cyanophyceæ*).

**Kleinholz L. H.** - The Melanophore-Dispersing Principle in the Hypophysis of *Fundulus heteroclitus* [*Principium ad melanophoros distribuendos in hypophysi speciei « Fundulus »*]. 2 pls., 2 tables, Biol. Bull., LXIX, 3, 379-390. Lancaster, Pa (1935). **b - 288**

Account of experiments from which it appears that the hypophysis of *F. heteroclitus* contains an hormon which is capable of dispersing the melanin granules in the pigment cells of the catfish, frog, and lizard. The innervated melanophores of *Fundulus* are unresponsive to the pigmentary hormon of their own pituitary; this lack of response appears to be due to some nervous control, because denervated melanophores respond to pituitary injections by a typical dispersion of their pigment.

**Koller G.** - Ueber die Farbwechsel von Coregonenlarven [*De coloris mutatione in larvis Coregonum*]. Biol. Zentralbl., LIV, 419-436. Leipzig (1934). **b - 289**

Form und Tätigkeit der Melanophoren und Xantophoren bei *Coregonus lavaretus balticus* und *C. holsatus*. Wirkung verschiedener Unterlagen (schwarz oder weiss), der Art und Stärke des Lichtes auf die Coregonenlarven.

**Parker G. H.** - Neurohumors in Elasmobranchs and Color Changes in Flat-Fishes [*Neurohumores in Elasmobranchiatis variationesque coloris in Pleuronectidis*]. Woods Hole Oceanogr. Instit., App., Rep. 1934, 25. Woods Hole, Mass (1935). **b - 290**

Brief account of the completion of a work on the oil-soluble neurohumors in the dogfish and the continuation of a investigation on the color-changes in the sand-dab.

**Rodio G.** - Sui pigmenti delle Feoficee [*De pigmentis in Phaeophyceis*]. Atti Soc. Ital. Progr. Sc. (XXIII Riun., Napoli, 1934), III 140-141 1, Roma. (1935). **b - 291**

Si espongono i risultati di alcune esperienze comparative su alcuni tipi di alghe del Golfo di Napoli, eseguite allo scopo di indagare se il pigmento specifico delle Feoficee abbia importanza nel processo fotosintetico.

**Sand A.** - The comparative Physiology of Colour Response in Reptiles and Fishes [*De physiologia comparata reactionum quoad colores Reptilium et Piscium*]. Biol. Rev., X, 3, 361-382. Cambridge (1935). **b - 292**

Reaction of melanophores to light studied in Reptiles and Fishes from which a theory on coordination of pigmentary response can be derived. The lipophores are controlled by endocrine agencies, which may also influence the melanophores.

**Sørensen N. A.** - Die Farbstoffe des Tranes von *Orthagoriscus mola*. Lipochrome in den Fetten mariner Tiere. III [*De substantiis colorantibus crassi in «Ortagoriscus». De lipochromo in crassis substantiis animalium marinorum*]. 2 Abb., Kgl. Norsk. Vidensk. Selsk. Forh., VI, 40, 154-157. Trondheim (1934). **b - 293**

Die Farbstoffe des gelbgefärbten Tranes von *Orthagoriscus mola* bestehen (nach den 3 untersuchten Proben) im wesentlichen aus einer Carotinmischung, vorwiegend *a*-Carotin. Ausserdem wurden in zwei der Proben kleine Mengen eines Farbstoffes gefunden, der wahrscheinlich den Farbstoffen der früher untersuchten Trane aus *Regalecus glesne* und *Cyclopterus lumpus* nahe steht, und der wahrscheinlich dem Crustaceenfarbstoff Astacin verwandt ist. (Der Vf.).

**Sørensen N. A.** - Die Leberpigmente des Seeteufels (*Lophius piscatorius*). Lipochrome mariner Tiere IV [*De hepatis pigmentis speciei «Lophius piscatorius». Lipochromata animalium marinorum*]. Kgl. Norsk. Vidensk. Selsk. Skr., 1934, I, 1-14. Trondheim (1935). **b - 294**

Frühere Untersuchungen. Neue Hypothese für die Farbentwicklung in der Leber; bestätigende Versuche. Zusammensetzung der Farbstoffe.

**Sumner F. B. & Fox D. L.** - Studies of Carotenoid Pigments in Fishes. II. Investigations of the Effects of colored Backgrounds and of ingested Carotenoids on the Xantophyll Content of *Girella nigricans* [*De pigmentis carotinoideis in piscibus. II. Investigationes in effectus quos fundi colorati et ingesti carotinoides ferunt in xantophyllam speciei «Girella nigricans»*]. Journ. Exper. Zool., LXXXI, 101-123. Philadelphia (1935). **b - 295**

**Tutiya Yasuhiko** - On Colour Substance in the Skin of the Fish, *Beryx splendens* Lowe (Preliminary Report) [*De substantiis coloratis in pelle piscis «Beryx splendens»*]. (In Jap., Engl Rés). 4 figs., 1 table., Bull. Jap. Soc. Scient. Fish., III, 5, 242-246. Tokyo (1935). **b - 296**

The A. has studied the chemical properties of the colouring matter of *B. splendens* although he has not been able to obtain in crystal state.

**Uchida T.** - A Brood-caring Actinian subject to a wide Range of Colour Variations [*Agitur de Actinia quae prolem fert, sub maximis coloris variationibus*]. 12 figs., 1 pl., Journ. Fac. Sc. Hokkaido Imper. Univ., 6, III, 17-31. Sapporo (1934). **b - 297**

This Actinian living along the coasts of the Pacific from the island of Houshu to the Kuriles is without doubt identical with *Epiactis prolifera* from the Californian coasts. The wide range of colour variations does not depend on local conditions but on the hereditary constitution.

**Veil C.** - Sur le mécanisme du changement de couleur chez les poissons [*Ratio mutationis coloris in piscibus*]. C. R. Acad. Sc., CCI, 20, 914-916. Paris (1935). **b - 298**

Bref résumé de précédentes expériences. L'A. sur *Cyprinus carpio* et *Carassius vulgaris* a prouvé l'antagonisme entre le rôle de l'hypophyse et celui des yeux. L'action de l'injection du sang de poissons dont les yeux ont été énuclées a été expérimentée.

**An.** - Color Changes in Fish NOW Understood [*De coloris in piscium variationibus nunc perfecte interpretatis*]. Fish & Oyst.Rep., XVI, 4, 3 & 5. Tampa, Fla. (1935). **b - 299**

Summary of a scientific report on «Studies of the Mechanism of Color Changes in Fishes» delivered by Prof. Francis B. Sumner, of the University of California Scripps Institution of Oceanography, and in which he emphasizes that flounders and other kinds of bottom-dwelling fish possess the faculty for changing their body color or color pattern in response to a changing environment to make themselves conspicuous. The author determines what part eye-sight plays in this chameleon-like process.

## Regeneratio, autotomia et muta.

**Birnie J. H.** - Regeneration of the Tail-fins of *Fundulus* Embryos [*Pinnae caudalis regeneratio in embryonibus speciei «Fundulus»*]. 7 fig., Biol. Bull., LXVI, 316-325. Lancaster, Pa. (1934). **b - 300**

Splitting of the tail-fin anlage does not result in reduplication of the tails. Removal of the entire tail-fin anlage results in no regeneration up to and including the sixty-fifth day after operation. If part of the basal plate is removed with the rays distal to it, new rays will appear in seventeen days and the plate will regenerate in fifty days. (A:s summ.).

**Daves B.** - A study of the Normal and Regenerative Growth in the Pistol-crab, *Alpheus dentipes* (Guer.) with special Reference to the Phe-

nomenon of Chela Reversal [*Studium accretionis normalis et regenerativae in «Alpheus». Agitur particulatim de rebus ad chelarum inversionem pertinentibus*]. 13 fig., Arch. f. Entw. Mech. d. Org., CXXXI, 543-574. Berlin (1934). **b - 301**

Asymmetrical growth of chela. Growth coefficient in the different stages of development, normally and in regeneration. Influence of the autotomy of the big chela on the development of the small one.

**Drach P.** - Aperçu sur les modifications subies par le squelette, avant la mue, chez les Crustacés décapodes [*De modificationibus scheletri ante mutationem in Crustaceis decapodis*]. C. R. Acad. Sc., CCI, 2, 157-159. Paris (1935). **b - 302**

Expériences entreprises avec *Cancer pagurus* et *Carcinus mœnas* montrent que, si la matière organique enlevée à la carapace et mise en réserve lors de la mue constitue un apport important pour l'édification du nouveau squelette, il n'en est pas de même pour les sels calcaires résorbés; ils ne représentent que 5 pour 100 des sels de la future carapace; le poids de celle-ci, une fois achevée, est, en effet, de l'ordre du double de la précédente; les 25 pour 100 de ces éléments minéraux proviendront par conséquent, d'un apport extérieur.

**Drilhon A.** - Le phoshore et la mue des Crustacés [*De phosphoro atque Crustaceorum mutatione*]. C. R. Acad. Sc., CXCVI, 10, 725-726. Paris (1933). **b - 303**

Constance de la teneur en phosphore total des animaux à n'importe quelle époque de leur développement. Quantité de phospore double, dans le sang des femelles par rapport aux mâles. Diminution très nette du phosphore minéral après la mue de l'animal au profit du phosphore organique. (L. S.).

**Drilhon A.** - Étude biochimique de la mue chez les Crustacés brachyoures (*Maja squinado*) [*Studium biochemicum mutationis in Crustaceis brachyuris*]. Ann. Physiol. Physicochim. Biol., XI, 301-326. Paris (1935). **b - 304**

Analyse du processus chimique de renforcement des tissues.

**Drilhon A.** - Le calcium et la mue des Crustacés Brachyoures [*De calcio atque mutatione in Crustaceis brachyuris*]. 2 fig., C. R. Acad. Sc., CC, 10, 858-859. Paris (1935). **b - 305**

Résultats d'observations sur *Maja squinado* aux diverses époques de son développement et, en particulier, à tous les stades qui précèdent ou suivent le phénomène de la mue. La quantité de calcium dissous dans l'hémolymphe oscille entre des limites assez étroites et présente à la période qui précède la mue, une augmentation triple de la quantité couramment transportée, qui va se résorber à mesure de la constitution de la carapace calcaire. (L. S.).

**Drilhon A.** - La réserve alcaline, le pH et la mue des Crustacés brachyoures [*De reserva alcalyna, pH et mutatione in Crustaceis brachyuris*]. 1 fig., C. R. Acad. Sc., CC, 13, 1150-1152. Paris (1935). **b - 306**

L'A. avait déjà montré dans une Note précédente (voir: C. R., CC., p. 258, 1935) que le calcium sanguin circulant subit, à l'époque de la mue, chez *Maja squinado*, une élévation brusque de son taux, suivie d'une décroissance régulière jusqu'à la constitution définitive de la nouvelle carapace. Dans la présente note l'A. communique les résultats des déterminations de la réserve alcaline, sur les mêmes liquides cavitaires, par la méthode de Haldane, et de l'évolution du pH de l'hémolymphe par la méthode colorimétrique de Cullen. Ces déterminations permettent d'entrevoir un des modes de formation de la précipitation calcaire qui aboutit à la rapide constitution de la carapace chez les Crustacés en mue.

**Edmondson C. H.** - Autonomy and Regeneration in Hawaiian Starfishes [*De autotomia et regeneratione in Asteroideis insularum* Hawaii]. 3 figs., Bernice P. Bishop Mus., Occas. Pap., XI, 8, 3-19. Honolulu, Hawaii (1935). **b - 307**

After a brief introduction containing a summary of the more recent research on the autotonomy or the spontaneous loss of parts, which is a widespread phenomenon among echinoderms, author communicates the results of his own observations on this process manifested in *Linckia multifora* (Lamarck), *L. diplax* (Müller and Troschel), *Coscinasterias acutispina* Stimpson, *Dactylosaster cylindricus pacificus* Fischer, and *Nepanthia*.

**Hämmerling J.** - Regenerationsversuche an kernhaltigen und kernlosen Zellteilen von *Acetabularia Wettsteinii* [*Regenerationis experientiae partium cellularum nucleatarum et anucleatarum in «Acetabularia»*]. Biol. Zentralbl., LIV, 650-665. Leipzig (1934). **b - 308**

Diese Versuche sind dieselben, die mit *Acetabularia mediterranea* während der letzten Jahre unternommen worden sind. Vergleich zwischen den beiden Arten. (S. Arch. Entw. Mech. CXXXI, 1–82, Berlin, 1934).

**Okada Yô K.** - Régénération de la tête chez le Polychète *Myxicola aesthetica* (Clap.) [*Regeneratio capitis in Polychaetis*]. 2 pl., 8 fig., Bull. Biol. France et Belgique, 68, 340-381. Paris (1934). **b - 309**

Recherches entreprises à Plymouth. Différentes espèces de régénération. Les segments divisés longitudinalement, pourvu qu'ils contiennent le nerf ventral, peuvent encore régénerer la tête.

**Sayles L. P.** - Regeneration in the Polychaete *Clymenella Torquata*. II. Effect of Level of Cut on Type of New Structures in posterior Regeneration [*Quaestio de regeneratione in Polychaetis. II. Amplitudinis sectionis effectus in typum novarum structurarum sequentis regenerationis*]. 15 figs., Physiol. Zoöl., VII, 1, 1-16. Chicago (1934). **b - 310**

The percentage of the pieces which survive after cutting depends somewhat on the level of the cut as is shown here more particularly.

## Varia.

**Bevelander G.** - A Comparative Study of the branchial Epithelium in Fishes, with special Reference to extrarenal Excretion [*Studium comparativum epithelii branchialis in piscibus; speciatim agitur de excretione extrarenali*]. 6 figs., 1 pl., Journ. Morphol., LVII, 2, 335-352. Philadelphia (1935). **b - 311**

Physiological rôle of osmotic regulation effected by the gills. The respiratory epithelium in most species of fishes is of the flat squamous type, in a few, a higher polyhedral or cubical type. Presence of mucous cells in every specimen of fishes examined but absence of «specialized secretory cells» in the gills. Possible phylogenetic difference between fishes.

**Clarke G. L.** - Penetration of Light into the Sea and Physiology of Copepods [*De lucis penetratione in mare deque physiologia Copepodorum*]. Woods Hole Oceanogr. Instit., App., Rep. 1934, 20. Woods Hole, Mass. (1935). **b - 312**

Account of measurements made of the penetration of the red, green, and violet components of daylight into diverse types of Atlantic water. Summary of further investi-

gation of the metabolism of Copepods. Account of observations made at the Bermuda Biological Station (*a*) on the diurnal migration of Copepods in St. Georges Harbor, and (*b*) on the culturing of Bermuda Copepods in laboratory.

**Crichton M. I.** - Scale-Absorption in Salmon and Sea Trout [*Squamarum absorptio in salmone tructaque marina*]. 1 fig., 12 figs. on 4 pls. o. t., Fish. Bd. Scotl. Salmon Fish., IV, 2-8. Edinburgh (1935). **b - 313**

The paper represents a first attempt to study the mechanism of the scale-absorption in salmon and sea trout during the spawning migration. It contains an account of the results of the study of the changes that take place round the margins of the scales, observed on portions of the fish skin with scales in position, which were sectioned. Author claims that scale absorption is due to some physiological change, connected with the above mentioned migration, and is a result of the activity of the cells massed round the margin of the scale.

**Fleischmann J.** - Footsteps in the Sea [*De vestigiis in mari*]. 286 pp. Putnam & Co. Ltd., New York & London (1935). **b - 314**

**Hammett F. S. & Padis N.** - Correlation between Developmental Status of *Obelia* Hydranths and Direction of Hydroplasmic Streaming within their Pedicels [*Quaestio de correlatione inter statum progressionis hydrantium speciei « Obelia » directionemque currentiae hydroplasmicae cum suis pediculis*]. 2 pl., Protoplasma, XXIII, 1, 81-85. Leipzig (1935). **b - 315**

Photographic illustration of the several stages in the life cycle of *Obelia* hydranths, together with a correlation of these, with the direction of hydroplasmic streaming within the pedicels is used to demonstrate the significance of the structural changes as expressions of developmental and metabolic activity. A positive correlation has been demonstrated from the experiments undertaken by the A..

**Häntzchel W.** - Sternspuren, erzeugt von einer Muschel: *Scrobicularia plana* (Da Costa) [*De vestigiis stelliformibus a specie « S. plana » formatis*]. 3 Abb., Senckenbergiana, XVI, 4/6, 325-330. Frankfurt a. M. (1934). **b - 316**

Von den Sternspuren der Nordsee-Watten ist eine Gruppe, die mehrfach im schlickig-feinsandigen Watt bei Wilhelmshaven und auf Old Oog. ö. Wangeroog beobachtet wurden, nicht auf nereidiforme Polychaeten zurückzuführen, sondern wird von der Pfeffermuschel *Scrobicularia plana* (Da Costa) erzeugt. Die Siphonen dieser Muschel. besonders der Einströmungs-Sipho, weiden oder « pipettieren » die nährstoffreiche Oberflächenschicht ab und furchen dabei die Sternstrahlen aus. Die Anlage der Sterne geschieht noch während der Wasserbedeckung. (Vf.).

Comparaison du procédé de croissance dans 4 espèces des *Portunus*. Identité de la croissance; les différences doivent être attribuées aux phénomènes morphogénétiques de la métamorphose.

**Vladykov V. D.** - The « Three–Eyed » Haddock Fake [« *Merluccius* » *trioculatus*]. 1 photo., Canad. Fisherm., XXII, 8, 12-14. Gardenvale, Que. (1935). **b - 331**

Account of an anatomical and histological examination of a « faked » three-eyed haddock. The eye of another fish has been cleverly inserted into the head of a live haddock and the fish returned to water. It was recaptured months later. The stunt operation is of interest for the scientists, on account of the extraordinary vitality of the fish which is able to withstand such an operation.

**Zobel C. E. & Wells N. A.** - Tolerance of *Fundulus parvipinnis* to certain bactericidal Substances [*Agitur de tolerantia speciei « Fundulus parvipinnis » in substantias bactericidas*]. Proc. Soc. Exp. Biol. and Med., XXXII, 704-706. New York (1935). **b - 332**

## PROCREATIO

### Maturitas sexualis – Cellulae sexuales – Physiologia fecundationis – Caracteres sexuales secundarii – Genetica.

**Andrews E. A.** - The Egg Capsules of Certain *Neritidae* [*Neritidae. Quaestio de capsulis ovorum in quibusdam exemplaribus*]. Journ. Morphol. LVII, 1, Philadelphia (1935). **b - 333**

The present paper gives description with measurements and sketches of egg capsules of: *Neritina reclivata*, *N. virginea*, *N. punctulata*, *Theodoxus meleagris*, *Nerita peloronta*, *N. alticola*, *N. tesselata*, and *Neritilia succinea*. The capsules are made as secretions of the lower oviduct to which mineral particles are added, and these mineral particles are supplied from the intestine and stored up in a special sac opening into the oviduct. Moreover in some *Neritidae* the mineral particles come from the liver as calcospherites, to be passed through the intestine.

**Berner L.** - La reproduction des Moules comestibles et leur répartition géographique [*Agitur de reproductione et partitione geographica in speciebus « Mytilus edulis » et « M. galloprovincialis »*]. Bull. Inst. Océanogr., 680, 1–7. Monaco (1935). **b - 334**

Le phénomène de la procréation n'a lieu qu'après un engraissement des moules, consécutif à un fort développement des organes sexuels; le naissain n'est libéré ultérieurement que lorsque deux facteurs interviennent dans le milieu ambiant: un changement brusque de température (en plus ou en moins) et une diminution passagère de salinité.

**Bliding C.** - Sexualität und Entwicklung bei einigen marinen Chlorophyceen [*De quibusdam Chlorophyceis marinis quoad earum sexum et progressum*]. 4 Abb., Sv. Bot. Tidskr., XXIX, 1, 57–64. Stockholm (1935). **b - 335**

Säurebildung, Atmungsquotient, und Verschiedenheiten bei den befruchteten und unbefruchteten Eiern von *Psammechinus miliaris*.

**Breder C. M.** - The Reproductive Habits of the Common Catfish, *Ameiurus nebulosus* (Le Sueur) with a Discussion of their Significance in Ontogeny and Phylogeny [*De consuetudinibus quoad reproductionem in « Ameiurus nebulosus » cum discussione de earum significatione pro Ontogenia et Phylogenia*]. Zoologica, XIX, 143-185. New York (1935). **b - 337**

**Burger J. W. & Stead Thornton C.** - A Correlation between the Food Eggs of *Fasciolaria tulipa* and the Apyrene Spermatozoa of Prosobranch Molluscs [*Correlationes inter ova nutritionis speciei « F. tulipa » et spermatozoa apyrena*

*in Molluscis Prosobranchiis*]. 6 figs., Biol. Bull. LXVIII, 2, 253 257. Lancaster, Pa. (1935). **b - 338**

Glaser (1905), in a study of the « egg cannibalism » in *Fasciolaria*, has suggested that the food eggs represent a condition comparable to that in oligopyrene sperm, such as Meves (1901) described for *Paludina*. The A. has found cytological evidence that permits an elaboration of Glaser's suggestions.

**Carter G. S.** - Iodine Compounds and Fertilisation. IX. Fertilisation in the Starfish, *Asterias rubens* L. [*De jodii componentibus deque fertilisatione in « A. rubens »*]. Journ. Exp. Biol., XII, 108-118. London (1935). **b - 339**

**Chase H. Y.** - The Effect of Temperature on the Rate of the Fertilization Reaction in Various Marine Ova [*Effectus temperaturae in gradum reactionis fecundantis in ovis variis animalium marinorum*]. 1 fig., 2 tabl., Biol., Bull., LXIX 3, 415-426. Lancaster, Pa. (1935). **b - 340**

This paper reports a study of the effect of temperature on the development of the fertilization membrane, which serves as an indicator of the fertilization reaction, in several kinds of eggs. Measurements on this effect fall in the following categories: (*A*) effect on gametes of exposure to various temperature, (*B*) effect of temperature on the time until contact of the sperm with the egg, and (*C*) effect of temperature on the rate of the development of the fertilization membrane. Eggs of the following species were used: *Dendraster excentricus*, *Strongylocentrotus purpuratus*, *Patiria* (*Asterina*) *miniata*, and *Urechis caupo*.

**Clement A. C.** - The Formation of Giant Polar Bodies in Centrifuged Eggs of *Ilyanassa* [*De permagnis corpusculis polaribus in ovis centrifugatis speciei « Ilyanassa »*]. 4 pls., Biol. Bull. LXIX, 3, 403-414. Lancaster, Pa. (1935). **b - 341**

In the present paper evidence is presented to show that giant polar bodies do form in centrifuged eggs of *Ilyanassa* and that occasionally they, instead of what would ordinarily be considered the egg, undergo development.

**Coe W. R.** - Alternation of Sex in Oyster [*De alternantia sexuali in Ostreis*]. Amer. Naturalist. LXVIII, 236-251. Boston (1934). **b - 342**

A. has undertaken studies on a larviparous hermaphrodite *Ostrea lurida* and a dioceious oviparous *O. lurida* in order to realize the factors that influence the change of sex. It has been possible to determine the number of regular hermaphrodites and alternative sexual phases as well as a relation between size and sex and the importance of the individual metabolism for the sex differenciation.

**Coe W. R.** - Sexual Phases in Prosobranch Mollusks of the Genus *Crepidula* [*Phases sexuales in Molluscis Prosobranchiis ad genus « Crepidula », pertinentibus*]. Science, LXXXII, 2110, 570-572. New York (1935). **b - 343**

Review of studies undertaken by Harvey N. Gould, J. H. Orton, E. G. Conklin on *Crepidula plana* and *C. fornicata*: the course of the different phases, formation of the primary bisexual gonad, the functional male phase, the transition stages and the sexual maturity of the female phase; some variabilities observed in the course.

**Costello D. P.** - The Surface Precipitation Reaction in marine Eggs [*De reactione quoad superficiem praecipitationis ovorum marinorum*]. 2 pls. Protoplasma, XVII, 239-257. Berlin (1933). **b - 344**

Different ways of reaction to surface precipitation are observed in the eggs of *Arbacia*, *Asterias*, *Echinarachnius*, *Cerebratulus*, *Nereis*, *Gonionemus*, *Phascolosoma*, *Amphitrite*, *Hydroides*, *Chaetopterus*, *Cumingia*, *Mytilus*, *Choetopleura* and *Podarke*. In all cases a membrane is formed.

**Dale H. M.** - The Egg-Case of a Cat Shark *Scyliorhinus Vincenti* (Zietz) [*Sacculus ovorum in « Scyliorhinus »*]. 1 pl. o. t., Rec. South. Austr. Mus., V, 3, 367-368. Adelaide (1935). **b - 345**

Description of the case, extrusion of the egg.

**D'Ancona U.** - Ricerche sul differenziamento sessuale delle Anguille della laguna veneta [*Investigationes in differentiationem sexualem Anguillarum in lacuna Veneta*]. Boll. Soc. Ital., Biol. Sper., X, 6, 480-483. Napoli (1935). **b - 346**

Fra le anguille della Laguna veneta il più precoce differenziamento sessuale può essere riconosciuto in anguille di circa cm. 15 o poco più e non si ritrovarono mai quelle forme intersessuali notate da Grassi, da Rodolico e dall'A. stesso, nelle anguille del versante tirreno. Questi ed altri fatti dimostrano una diversa evoluzione istologica delle gonadi di anguille di diversa provenienza e confermano l'ipotesi dell'azione ambientale sul differenziamento del sesso, mettendo pure in luce interessanti fatti circa il grado di maturazione sessuale che le anguille raggiungono in laguna.

**Day J. H.** - Heterogonic Growth in the Abdomen of *Carcinus maenas* [*Accretiones heterogonicae in abdomine speciei « C. maenas »*]. 3 figs., 2 tables. Dove Mar. Labor., Rep. Year End. July 31st., 1935, 49-59. Newcastle o. Tyne (1935). **b - 347**

From measurements taken of 560 specimens of *C. maenas* growth-ratios of all abdominal segments were determined at different ages. It is concluded that during the period of immaturity there are two gradients in the abdomen. The influence of the one with a proximal growth-centre declines while the influence of the other whose growth-centre is distally situated, increases. The latter seems to be correlated with phases of sexual development.

**De Buen F.** - Clupéidés et leur pêche [*De Clupeidis eorumque piscatura*]. 2 fig., Rapp. Pr.-Verb. Cons. Expl. Scient. Méditerr., IX, (n. sér.), 95-129. Paris (1935). **b - 348**

La sardine. Synonymie: noms scientifiques et communs en Atlantique et en Méditerranée. Les caractères sexuels: Ovaires et testicules. Caractères sexuels secondaires (comparaison entre les mâles et les femelles). Répartition des sexes. Le cycle sexuel: les caractères histologiques, phases successives de la maturation sexuelle, époque de ponte et variations. Conditions physico-chimiques pendant le cycle sexuel. Engraissement périodique de la sardine. Développement ontogénique. Bibl.

**Duboscq O. & Tuzet O.** - Sur l'acroissement des ovocytes de *Sycon raphanus* O. S.: La signification des « Dolly-cells » [*Accretio ovocitorum in « Sycon raphanus ». Interpretatio τοῦ Dolly-cells*]. 4 figs., Arch. Zool. Expér. Gén., LXXVII, 2, 71-78. Paris (1935). **b - 349**

On peut reconnaître dans l'ovocyte de Sycon trois stades dans le petit accroissement et aussi trois stades dans le grand accroissement, dont l'A. décrit la première phase, c'est-à-dire la migration de l'oeuf vers l'atrium pour se nourrir aux dépens des « dolly-cells ».

**Elster H. J.** - Experimentelle Beiträge zur Kenntnis der Physiologie der Befruchtung bei den Echinoïdeen [*Contributiones ad experimentum in cognoscendam physiologiam fecundationis in Echinoideis*]. 1 Abb., Arch. Entw. Mech. CXXXII, 1-87. Leipzig (1935). **b - 350.**

Bericht über die Ergebnisse der künstlichen Befruchtung, mit oder ohne Hybriden, bei *Paracentrotus*, *Sphaerechinus*, *Arbacia*, *Echinus*, *Echinocardium* im normalen-Meereswasser und im alkalinisierten oder mit Eisekretionen bemengten Meereswasser.

**Fage L.** - La ponte et les races locales de l'anchois de la Méditerranée (*Engraulis encrasicholus* L.) [*De ovorum depositione speciebusque localibus apuarum in mari Mediterraneo*]. Comm. Int. Expl. Scient. Méditerr., Rapp. Assemblée plén. Bucarest, 4 pp. Paris (1935). **b - 351**

A la suite de la relation par F. de Buen sur l'état de nos connaissances sur l'Anchois de la Méditerranée, dans le présent rapport, l'A. ne fait état que des faits susceptibles de donner encore lieu à des interprétations divergentes, à voire: la durée de l'époque de la ponte en rapport avec la distinction des races locales de l'Anchois.

**Gandolfi-Hornyold A.** - Observations sur la taille et le sexe de 400 petites anguilles argentées à Ponte–Tresa (Tessin) [*Observationes quoad corpus et sexum in 400 anguillulis argentatis apud* Ponte Tresa]. Actes Soc. Helv. Sc. Nat., 362-366. Genève (1934). **b - 352**

En faisant des comparaisons entre la taille et le poids selon les sexes, on constate que la femelle généralement est plus développée que le mâle. L'époque de migration à la mer peut avoir de notables différences. Identification de deux parasites.

**Gandolfi Hornyold A.** - Osservazioni sull'età, la crescita e il sesso delle anguille argentine delle valli di Comacchio [*Observationes quoad aetatem, accretionem et sexum in anguillis argentatis Vallium Comacinarum*]. When sea urchin eggs are exposed to roentgen rays in the presence of ovarian tissue, the effect of the radiation is more pronounced than when the eggs alone are irradiated.

**Just E. E.** - Effects of ultraviolet Rays on animal Eggs [*De radiis ultraviolaceis quoad eorum effectum in ova animalium*]. Atti I Congr. Int. Elettroradiobiologia (Venezia 1934), X, 650-652. Venezia (1935). **b - 358**

**Kändler R.** - Häufiges Vorkommen von Bastarden zwischen Scholle und Flunder in der Ostsee [*De frequentibus bigeneribus inter « Pleuronectes platessa »* et *« P. flesus » in mari Baltico*]. 1 Tab., Fischmarkt, III, 10, 256-259. Cuxhaven (1935). **b - 359**

Bericht über eingehende Untersuchungen über die sogenannte Halbschollen oder Blendlinge, d. h. Bastarde zwischen Scholle und Flunder. Vf. bespricht die Wirbelzahl dieser Bastarde und die Häufigkeit, die Bedingungen, welche der Kreuzbefruchtung zwischen Scholle und Flunder günstig sind und die Schädigungen, die dadurch namentlich dem Schollenbestande der Ostsee entwachsen. (Näheres von demselben Vf.: Cons. Expl. Mer, Rapp. & Proc. V. XCIV, 1935).

**Kändler R.** - Ueber das Vorkommen von Bastarden zwischen Scholle (*Pleuronectes platessa* L.) und Flunder (*Pleuronectes flesus* L.) in der Ostsee [*De frequentibus bigeneribus inter « P. platessa » et « P. flesus » in mari Baltico*]. (Dtsch. Text; Engl. Rés.). 11 Tab., 5 graph. Fig., Rapp. Pr.–Verb. Cons. Expl. Mer, XCIV, 3ème partie, App. (1934–1935), 9-24. Copenhague (1935). **b - 360**

Vergleich zwischen Schollen, Flundern und Bastarden in Bezug auf Wachstum, Wirbel- und Flossenstrahlenzahl, Korrelation, zwischen Zahl der Wirbel und der Analflossenstrahlen, sowie Länge der verschiedenen 0- und 1- Gruppen in der eigentlichen und westlichen Ostsee. Auf Grund dieser Untersuchungen wird ein Bastard *Pleuronectus pseudoflesus* Gottsche anerkannt.

**Le Calvez J.** - Les gamètes de quelques foraminifères [*De gametis aliquorum Foraminiferorum*]. 3 fig., C. R. Acad. Sc., CCI, 27, 1505-1507. Paris (1935). **b - 361**

Sur la base d'observations sûres sur la production de gamètes dans dix expèces de foraminifères, appartenant à 6 familles différentes, l'A. conclut à la constance relative de structure des éléments reproducteurs de ces organismes. Il affirme que la connaissance des gamètes dans la trentaine des familles, dont les gamètes sont encore inconnus, permettrait des conclusions plus générales, intéressant la systématique et la phylogénie des représentants de ce grand groupe.

**Levera F.** - Sulle femmine a pleopodi mascolinizzati nei Gamberi rossi [*De feminis cum pleopodis masculinisatis in « Aristeomorpha »*]. 1 tav., Boll. Mus. Labor. Zool. Anat. Comp. Genova, XIV, 77, 3-7. Genova (1934). **b - 362**

Nel gambero abissale *Aristeomorpha foliacea* si osserva una piccola percentuale di femmine con i pleopodi del 1° e del 2° paio più o meno completamente mascolinizzati. Siffatta anomalia si ritrova tanto negli esemplari del Mare Ligure, quanto in altri provenienti dalle acque tunisine e va probabilmente attribuita a un grado leggero d'intersessualità puramente somatica.

**Mathias P.** - Résistance au froid et à la chaleur de l'oeuf d'*Artemia salina* L. (Crustacé phyllopode) [*Quomodo ova speciei « Artemia salina »*

*resistunt frigidi et calidi*]. Soixante-septième Congr. Soc. Sav. XVIII, 157-161. (Trav. Stat. Biol. de Sète XXXVIII, M. 88. Sète, Herault 1934). Paris (1934). **b - 363**

Il resulte des expériences reportées ici que l'oeuf de *Artemia salina* qui est exposé à tous les rigueurs du climat peut supporter des températures de 83° + jusqu'aux 18° —, sous lesquelles, cependant, le développement des oeufs est retardé.

**Mc Kenzie R. A.** - Cod Spawning in the Bay of Fundy and about south-western Nova Scotia [*De generatione ovorum speciei « Gadus » in baja* Fundy *circaque novam Scotiam sudoccid*]. Progr. Rep. Atlant. Biol. Stat. 13, Dec. St. Andrews N. B. (1934). **b - 364**

**Moore H. B.** - A Case of Hermaphroditism and Viviparity in *Echinocardium cordatum* [*Casus hermaphroditismi et viviparitatis in « Echinocardium »*]. 4 figs., Journ. Mar. Biol. Assoc., XX, 1, 103-107. Plymouth (1935). **b - 365**

A specimen of *Echinocardium cordatum*, interesting for its hermaphroditism and viviparity was collected in the sandy beach of Port Erin Bay. Records of hermaphroditism in several species of *Echinoidea*.

**Motomura I.** - On the Mechanism of Fertilization and Development without Membrane Formation in the Sea Urchin Egg, with Notes on a new Method of Artificial Parthenogenesis [*De mechanismo fertilisationis et progressionis sine membranae formatione in ovis echini, cum notis de nova methodo parthenogenesis artificialis*]. 10 figs., Sc. Rep. Tôhoku Imp. Univ., IVth. Ser., Biol., IX, 1, 33-45. (Contr. Mar. Biol. Stat., 112, Asamushi, Aoomori-Ken.). Sendai (1934). **b - 366**

Author studies the effect of butyric acid, and isotonic, hypertonic and hypotonic urea solutions on the capacity to form the fertilisation - and the hyaline-membrane by the eggs of the sea urchins, *Strongylocentrotus nudus*, *S. pulcherrimus*, and *Pseudocentrotus depressus*.

**Nikolskij G. W.** - Eine Hybridenform des *Rutilus rutilus aralensis* Berg und *Chalcalburnus chalcoides aralensis* Berg. [*Formae hybridae inter « R. rutilis aralensis » et « C. chalcoides aralensis »*]. (En russ., dtsch. Rés.). 1 Fig., 1 Tab., Arch. Mus. Zool. Univ., I, 113-116. Moscou (1934). **b - 367**

Beschreibung einer Hybridenform zwischen *R. rutilis aralensis* Berg und *C. chalcoides aralensis* Berg; der Fisch ist in der Bucht der Aralsee bei der Eisenbahnstation « Araljskoje More » gefangen worden. Einige Betrachtungen über die zur Hybridation notwendigen Bedingungen.

**Okada Yô K.** - Stolonization in *Myrianida* [*De stolonisatione in Myrianidis*]. 6 figs., Journ. Mar. Biol. Assoc., XX, 1, 93-98. Plymouth (1935). **b - 368**

*Myrianida pinnigera*, in the Plymouth district at least, appears to stolonate in the warmer half of the year, while the process stops in the winter time.

**Parker G. H. & Porter B. H.** - A Nuptial Secondary Sex-Character in *Fundulus heteroclitus* [*De caractere sexuali secundario in « Fundulus »*]. 4 figs., Biol. Bull., LXVIII, 1, 4-6. Lancaster, Pa. (1935). **b - 369**

The male of *F. heteroclitus* possesses a secondary sex-character in the form of a melanophoric mark on its dorsal fin to be seen from April to November but not at other times of the year. It is composed of an unusually dense aggregation of melanophores whose melanin even when concentrated (light phase) forms a conspicuous dark mark. It does not occur in the female.

**Pearson J. C.** - Eggs of a Peneid Shrimp [*De ovis aliquarum specierum Penaeidarum*]. Science, LXXXII, 2121, 172. New York (1935). **b - 370**

Short note on eggs and different stages of embryos of *Penaeus setiferus* and P. *brasiliensis* taken along the South Atlantic and Gulf coasts which throw some light on the spawning and distribution of the young Shrimps.

**Pelseneer P.** - La durée de la vie et l'âge de la maturité sexuelle chez certains Mollusques [*Spatium vitae atque tempus maturitatis sexualis in quibusdam Molluscis*]. 1 fig., Ann. Soc. R. Zool. Belg., LXIV, 93-104. Bruxelles (1934). **b - 371**

Description de la longévité (généralement 30 années environ) chez les Mollusques: les mâles vivent moins que les femelles. Étude particulière de *Trochus umbilicalis*.

**Ranzi S.** - Risultati di ricerche su varie forme di gestazione [*Resultatus ex investigationibus in varias formas gestationis*]. Boll. Zool., VI, 1/3, 153-157. Napoli (1935). **b - 372**

Nei Selaci l'A. ha studiato i rapporti tra madre e feto per le specie ovipare, ovovivipare e vivipare, prendendo in considerazione: l'accrescimento degli embrioni delle diverse specie, la composizione del liquido uterino che serve di alimento all'embrione, l'istofisiologia delle pareti dell'utero nelle specie gestanti, la riduzione del fegato materno nel corso della gestazione e le vie attraverso le quali il liquido uterino viene assorbito dall'embrione. Risultato delle ricerche sulla istofisiologia della ghiandola del guscio, e sulle trasformazioni chimiche dei materiali che passano dal fegato materno all'embrione.

**Rass T. S.** - Le frai, les oeufs et les alevins des poissons commerciaux de la Mer de Barents [*De reproductionis tempore, ovis, et pisciculis specierum commercialium Maris* Barents]. (En russe). 3 fig., Karelo-Mourm. Kraj, 3/4, 57-60. Leningrad (1934). **b - 373**

**Rass T. S.** - Geographische Gesetzmässigkeiten im Bau der Fischeier und Larven [*Regularitates geographicae quoad structuram ovorum et larvarum piscium*]. Zoogeographica, III, 1, 90-95 Jena (1935). **b - 374**

Vf. unterscheidet für *Gadus*- Arten (einschl. *Boreogadus* und *Eleginus*), *Pleuronectidae*, *Blennius* und *Liparidae* drei Gruppen mit verschiedener Grösse und Pigmentierung der Eier je nach der nördlichen Verdrängung. Als allgemeine Regel scheint zu gelten: je nördlicher die geographischen Areale verwandter Arten gelegen sind, desto grösser sind deren Eier.

**Rhein A.** - Diploide Parthenogenese bei *Hydrobia jenkinsi* Smith (*Prosobranchia*) [*Quaestio de parthenogenesi diploidi in « Hydrobia jenkinsi »*]. Naturwiss., XXIII, 6, 100. Berlin (1935). **b - 375**

Kurze Mitteilung über die bei dem Zoologischen Institut zu Giessen ausgeführten Lebendbeobachtungen und Schnitte.

**Rollefsen G.** - The Eggs and the Larvae of the Halibut [*De ovis et larvis speciei « Hippoglossus vulgaris »*]. 4 fig., Kgl. Norsk. Vidensk. Selsk. Forh. 1934, VII, 7, 20-23. Trondheim (1935). **b - 376**

Description of an experiment with artificial fertilization undertaken at the biological Station of Trondheim in 1930. The different stages of development are expressed in figures magnified 10 times.

**Schreiber B.** - Tentativi di maturazione sperimentale dell'anguilla con ormoni ipofisari [*Tentamina maturationis experimentalis anguillae per hormones hypophysarios*]. 5 fig., Rend. R. Ist. Sc. Lett., serie 2, LXVIII, 11/15, 669-672. Milano (1935). **b - 377**

L'iniezione di Prolan a maschi di anguilla argentina, provvisti di testicolo immaturo allo stato di cordoni pieni di spermatogoni primari, determina: l'aumento dell'altezza dei lobi testicolari, la trasformazione dei cordoni pieni in tubuli e la completa evoluzione della linea germinale fino allo spermatozoo maturo.

**Senn E.** - Die Geschlechtsverhältnisse der Brachiopoden, im besonderen die Spermato- und Oogenese der Gattung *Lingula* [*De Brachiopodis quoad eorum condiciones sexuales, speciatim quoad spermatogenesim et oogenesim generis « Lingula »*]. 64 Abb., Acta Zool., XV, 1–152. Stockholm (1934).

(—) S. auch Actes Soc. Helvet. Sc. Natur., p. 357. Genève (1934). **b - 378**

Eingehende Beschreibung der Geschlechtsorgane von *Lingula*. Bemerkungen über andere Brachiopoden, von denen die meisten getrennte Geschlechter zu haben scheinen. Nur die *Argyrothecae* sind Hermaphroditen. Zum Schluss behandelt der Vf. die Verwandtschaftsverhältnisse zwischen Brachiopoden und anderen Trochozoen.

**Sexton E. W.** - Fertilization of Successive Broods of *Gammarus chevreuxi* [*De fertilisatione alterius prolis speciei « Gammarus chevreuxi »*]. Nature, CXXXVI, 3438, 477. London (1935). **b - 379**

Criticism on the idea of « post-fertilization » in *Gammarus* exposed by K. W. Yarnold in Nature, May 18, p. 832, 1935.

**Sexton E. W., Clark A. R. & Spooner G. M.** - First Appearance of Red-eye in the wild *Gammarus chevreuxi* Sexton [*De priore apparitione oculi rubri in specie inculta « G. chevreuxi »*]. Nature, CXXXVI, 3447, 836. London (1935). **b - 380**

Short note on the first definite proof of heterozygosity.

**Sivertsen E.** - Torskens gytning. Med soerlig henblikk på den årlige cyklus i generasjonsorganens tilstand [*De ovorum depositione speciei « Gadus morrhua ». Agitur particulatim de cyclo annuo quoad conditionem organorum ad procreationem*]. (Dtsch. Rés.) 4 Taf., 5 Tab., 5 Abb., Fiskerid. Skr., Ser. Havunders (Rep. on Norw. Fish. & Mar. Invest.), IV, 10, 1-29. Bergen (1935). **b - 381**

Das Ziel dieser Arbeit ist zu untersuchen, ob der Dorsch jedes Jahr laicht oder ob er ein- oder mehrjährige Ruheperioden zwischen jeder Laiche haben kann. Die verschiedenen Stadien im jährlichen Cyklus der Generationsorgane sind folgendermassen charakterisiert: Unreife Ovarien, Ovarien im Reifen, reife Ovarien, abgelaichte Ovarien.

**Tchakhotine S.** - La parthénogenèse artificielle de l'oeuf de la Pholade, par micropuncture ultraviolette [*De parthenogenesi artificiali in ovo in « Pholas », micropuncturis ultraviolaceis*]. C. R. Soc. Biol., CXIX, 27, 1394-1396. Paris (1935). **b - 382**

L'oeuf de *Pholas* (*Barnea*) *candida* est émis avant la maturation, ayant encore le noyau au stade de la vésicule germinative. Cet oeuf, réfractaire jusqu'à présent à tous les procédés de parthénogenèse artificielle, présent des mouvements de fluctuation de la masse cytoplasmique jusqu'à la formation de quatre blastomères de forme et grandeur différentes, par la micropuncture ultraviolette. (L. S.).

**Teissier G.** - Croissance des variants sexuels chez *Maia squinado* L. [*De accretione differentiationum sexualium in « Maia squinado »*]. 9 tabl., 11 graph., 5 fig., Trav. Stat. Biol. Roscoff, 13, 93-130. Paris (1935). **b - 383**

Matériel et technique. Croissance des appendices chez les mâles. Croissance des appendices et de l'abdomen chez les femelles. Croissance et mues. Les étapes de la croissance. Croissance et développement sexuel. Conclusions.

**Yarnold K. W.** - A. Further Reappearance of the Second Red–Eye Mutation in *Gammarus* [*Apparitio nova secundae mutationis oculorum rubrorum in « Gammarus »*]. Nature, Suppl. CXXXV, 3420, 832. London (1935). **b - 384**

Results of crossing between a new mutation producing red, instead of normal black, facets in the eyes of *Gammarus chevreuri* Sexton with other red–eyed mutations in order to determine their homology. The A. claims the possibility of postfertilization.

**Yarnold K. W.** - Persistence of Sperms to a Later Mating in *Gammarus* [*De spermatum persistentia in post–reproductionem speciei « Gammarus »*]. Nature, CXXXVI, 3445, 758-759. London (1935). **b - 385**

Reply to a criticism of E. W. Sexton (Nature CXXXVI 3438, p. 477). A. maintains the possibility of later mating.

**Yonge C. M.** - Origin and Nature of the Egg Case in the *Crustacea* [*De origine et natura membranae ovorum in Crustaceis*]. Nature, CXXXVI, 3428, 67-68. London (1935). **b - 386**

Following up previous work on the function of the tegumental glands in the Decapods, A. has found that the eggs are surrounded by two secreted membranes. Some further information on this subject. Identical conditions in other groups.

**An.** - Ueber die Laichverhältnisse beim Kabeljau [*De copulationis condicionibus speciei « Gadus morrhua »*]. Fischmarkt, III, 6, 161-162. Cuxhaven (1935). **b - 387**

Kurze Uebersicht der von russischer und norwegischer Seite neulich unternommenen Forschungen, welche in Bezug auf die Frage, ob der Kabeljau jedes Jahr laicht, zu abweichenden Resultaten gekommen sind.

# PROGRESSUS EMBRYONALIS ET ACCRETIO CORPORIS

## Embryologia - Accretio larvalis - Metamorphosis.

**Atoda K.** - The Larva of the Catfish: *Parasilurus asotus L.* [*Quaestio de larva speciei « P. asotus »*]. 5 figs., Sc. Rep. Tôhoku Imp. Univ., 4 Ser., Biol., X, 1, 29-32. (Contr. Mar. Biol. Stat., N. 121, Asamushi, Aomori–ken). Sendai, Jap. (1935). **b - 388**

Brief report and description of catfish larvae, collected in June, 1924 at Asamushi.

**Bertin L.** - Les types de Kaup dans la collection des Leptocéphales du Muséum [*Typus* Kaup *nomine in collectione Leptocephalorum ad Museum pertinente*]. 4 fig., Bull. Mus. Nat. Hist. Natur., VII, 2, 99-106. Paris (1935). **b - 389**

Les types de Kaup appartenant à la collection des Leptocéphales du Muséum se répartissent en trois groupes: 1) *Leptocephalus capensis* et *L. lineo-punctatus* qui, inconnaissables à tous points de vue, doivent être rayés de la nomenclature. 2) *L. acuticaudatus*, *L. dussumieri* et *L. marginatus* qui, décrits à nouveau dans le présent travail, pourront être identifiés à une date ultérieure. 3) *L. brevirostris*, *L. longirostris*, *L. stenops* et *L. taenia*, dont ont connait à l'heure actuelle les formes adultes, respectivement: *Anguilla anguilla*, *Nettastoma melanurum*, *Conger muraena mystax* et *Ophisoma balearicum*.

**Bertin L.** - Les larves de Poissons Apodes dans les œuvres imprimées et manuscrites de Risso [*Apoda. Quaestio de larvis apud* Risso *in eius operibus, typis editis typographicis et manuscriptis*]. 1 fig., Bull. Mus. Nat. Hist. Natur., VII, 2e sér., 3, 178-182. Paris (1935). **b - 390**

*Leptocephalus Spallanzani*, *L. selene* et *L. filamentosus*. Diagnose, figuration, provenance, identification.

**Blanco G. J.** - The Development of the Homocercal Caudal of the Blue Perch, *Taeniotoca lateralis* Agassiz [*Quaestio de progressione pinnae caudalis homocercalis in « T. lateralis »*]. 1 pl., Philipp. Journ. Sc., LVI, 1, 41-45. Manila (1935). **b - 391**

The significant changes of the embryonic caudal fin of a larva 3 mm long to the homocercal caudal fin of the adult 21 cm long are described in detail for the first time.

**Blegvad H.** - Letters to the Editor [*Epistulae ad Editorem*]. Journ. Cons. Expl. Mer., X, 1, 99. Copenhague (1935). **b - 392**

Some critical remarks to A. Bückmann's article (in Journ. Cons. IX, 3, 1934) concerning the transformation of the plaice larvae in the Baltic.

**Bull H. O.** - Aquarium Observations on the Rate of Growth and Enemies of the Common Star-Fish *Asterias rubens* L. [*Observationes in aquario peractae quoad accretionis velocitatem et animalia obnoxia speciei « A. rubens »*]. Armstrong College, Dove Marine Labor. Rep. for the year ending July 31 st, 1934, Third ser. No. 2, 60-65. Cullercoats, Northumb. (1934). **b - 393**

Three individuals of the common starfish have been reared to maturity in aquaria. The average radius of arm in June of the year following settling was 4.2 cm., at the time of first spawning 11.4 cm. Spawning was at 5 years of age in two individuals, 6 years in the other; it was simultaneous in all three. The Sunstars, *Solaster papposus*, and *S. endeca*, and the Northern stone crab *Lithodes maia* feed in captivity mainly in the common starfish.

**Carere Comes O.** - Ricerche sull'accrescimento degli embrioni di *Hippocampus brevirostris* [*Investigationes in embryonum accretionem speciei « H. brevirostris »*]. Boll. Soc. Ital. Biol. Sper., IX, 1256-1258. Napoli (1934). **b - 394**

Gli embrioni si sviluppano nelle tasche incubatrici, riccamente vascolarizzate, del maschio e assumono attraverso l'epitelio, l'acqua e le sostanze minerali. Relazione fra le sostanze organiche che gli embrioni ricevono e le sostanze ossidate per il metabolismo embrionale.

**Cipria G.** - Uova, stadi embrionali e post-embrionali di *Blennius palmicornis* Cuv. [*Ova, stadia embryonalia et post-embryonalia in specie « B. palmicornis »*]. 1 tav., Mem. R. Comit. Talassogr. Ital., N°. CCXVIII, 1-12. Venezia (1934). **b - 395**

Uova, sviluppo embrionale e post–embrionale di *Blennius palmicornis* Cuv. e principali caratteri di uno stadio giovanile di mm, 25.00.

**De Gaetani D.** - Uova, sviluppo embrionale e stadi post-embrionali negli Sparidi. III. *Pagellus acarne* C. V. [*Ova, progressio embryonalis et stadia post–embryonalia in Sparidis*]. 1 tav., Mem. R. Comit. Talassogr. Ital., N°. CCXX, 20 pp., Venezia (1935). **b - 396**

Descrizione delle uova e dello sviluppo embrionale del *Pagellus acarne* C. V.; vengono dati i più salienti caratteri di sviluppo di una serie di stadi post–embrionali che vanno da una lunghezza di mm. 2,40 a mm. 30. Pigmentazione e prospetti delle misure somatiche e loro rapporti.

**Duboscq O. & Tuzet O.** - Un nouveau stade du développement des Eponges calcaires [*Stadium novum quoad progressionem in Spongiis calcariis*]. 4 fig., C. R. Acad. Sc., CC, 21, 1788-1790. Paris (1935). **b - 397**

La formation de l'amphiblastule définitive est due à un processus encore inconnu dans l'embryologie des Métazoaires. Les flagelles restent attachés pendant tout le développement au même pôle cellulaire et les cellules flagellées viendront se placer sous les choanocytes, à la suite d'un démasquage. Ce stade de démasquage détermine une inversion des surfaces, qui est tout autre chose que l'inversion des feuillets donnant ainsi un autre aspect du développement des Eponges que l'on n'avait admis jusqu'ici. (L. S.).

**Felicianno A. T.** - Studies on the Early Development of *Arachnoides placenta* (Linnaeus) [*Studium primae progressionis speciei « A. placenta »*]. 1 fig., 2 pl., Univ. Philipp. Natur. & Appl. Sc. Bull., III, 4, 405-435. Manila (1934). **b - 398**

Breeding time and breeding habits of this species. Shape and cleavage of the eggs. Rate of development. The blastula. The echinopluteus.

**Frost W. E.** - The Occurrence and Development of *Euphausia krohnii* off the South-West Coast of Ireland [*Praesentia et progressus speciei « E. Krohnii », extra litora meridionalia Hiberniae*].

Proc. R. Irish Acad., XLII, sect. B, N° 3., 17-40. Dublin (1934). **b - 399**

The normal habitat of *E. krohnii*. Breeding season. Detailed description of a series of larvae: metanauplius, furcilia and cyrtopia. No egg has been seen by the A.

**Garrault H.** - Formation des baguettes d'élastoïdine chez les embryons des Salmonides [*De bacillis elastoidinoforis in embryonibus Salmonidarum*]. C. R. Acad. Sc., CC, 14, 1248-1250. Paris (1935). **b - 400**

Résultats d'une étude du développement des baguettes d'élastoïdine chez l'embryon des Salmonides, entreprise dans le but de préciser le mécanisme de la formation de ces baguettes. D'après leur mode de formation, on doit considérer ces baguettes comme résultant de la séparation ou de la précipitation orientées d'une substance intercellulaire particulièrement insoluble; elles se développent dans le milieu intercellulaire, indépendamment de l'action directe des cellules et conformément au schéma donné par Baitsell et par Nageotte pour le développement des structures collagènes proprement dites.

**Hörstadius S.** - Ueber die Determination im Verlaufe der Eiachse bei Seeigeln. [*Determinationes quoad decursum axis embryonalis in Echinis*]. 57 fig., Boll. Staz. Zool. Napoli, XIV, 2, 251-429. Napoli (1934 & 35). **b - 401**

Untersuchungen über die ersten Stadien der Teilung des Seeigelkeimes und seine folgende Differenzierung.

**Hukuda H.** - On the Development of *Spratelloides japonicus* (Houttuyn) [*De accretione speciei « S. japonicus »*]. (In Jap.; Engl. Rés.). 21 figs., 3 tabl., Bull. Jap. Soc. Scient. Fish., II, 5, 229-240. Tokyo (1934). **b - 402**

This species belongs to the *Clupeidae* and is distributed from the seas of Indo-Australian Archipelago to Central Japan. Eggs and larvae. Differenciation from other clupeoid Fishes of Japan.

**Inaba D.** - On some Holothurian Larvae and Young from New Guinea [*De larvis deque juvenibus Holoturiarum Novae Guineae*]. 1 fig., 1 table, Bull. Jap. Soc. Scient. Fish., II, 5, 213-216 Contr. Zool. Labor. Imp. Fish. Inst. N° 30. Tokyo (1934). **b - 403**

Description of two large *Auricularia* and two young *Holothuria* found in the neighbourhood of New Guinea. The specimens presenting many remarkable features are compared with respectively *A. antarctica*, *A. plicata*, *A. nudibranchiata Chiridota rotifera* and *Leptosynapta inhaerens*.

**Inoh Shunpei** - Ueber die Ei-und Keimentwicklung bei *Fucus evanescens* [*De ovi et embryonis progressione speciei « F. evanescens »*]. (Jap. Text). 1 Abb., 2 Taf., Rep. Stat. Alg. Res. Fac. Sc. Hokkaido Imp. Univ., 3, 51-60. Sapporo (1934). **b - 404**

Nach einer eingehenden Beschreibung der verschiedenen Stadien der Keimentwicklung bei *Fucus evanescens* auch unter Vergleich mit *Ascophyllum*, *Pelvetia* usw. betont der Vf., in Bezug auf die Kleinheit des Eies von *F. evanescens*, dass diese mit der Nichtverzweigung der Rhizoidzelle Zusammenhang hat.

**Iwanoff P. P.** - Die embryonale Entwicklung von *Limulus moluccanus* [*« Limulus moluccanus ». Quaestio de eius accretione embryonali*]. 3 Taf., 78 Abb., Zool. Jahrb. Abt. Anat. u. Ontog. Tiere LVI, 2, 163-348. Leipzig (1933). **b - 405**

Eingehende Analyse der embryonalen Entwicklung. Vergleich mit den Trilobiten, Schlussfolgerungen in Bezug auf den Ursprung der *Xiphosura*.

**Jecklin L.** - Beitrag zur Kenntnis der Laichgallerten und der Biologie der Embryonen decapoder Cephalopoden [*Contributio in cognoscendas massas gelifactas ovorum atque etiam biologiam embryonum in cephalopodis decapodis*]. 22 Abb., Rev. Suisse d. Zool., LXI, 593-673. Genève (1934). **b - 406**

Diese Arbeit enthält vier Teile. Der erste behandelt den Bau des Laiches bei *Loligo vulgaris*, *Alloteuthis subulata*, *Sepia officinalis* und *S. robusta*; der zweite bezieht sich auf den Gehalt des Eies an Wasser und Mineralsubstanzen, der dritte auf die der Entwicklung des Eies vorangehenden physisch-chemischen Prozesse und der vierte auf die Hoyleschen Drüsen. Bibl.

**Johnson M. W.** - The Developmental Stages of *Labidocera* [*Labidocera. Stadia progressionis*]. 16 fig., 5 pl., 2 tabl., Biol. Bull., LXVIII, 3, 397-421. Lancaster, Pa. (1935). **b - 407**

The developmental stages of *L. trispinosa* and *L. jollae* are described and figures given. Each species passes through the typical six nauplius and six copepodid stages. Tables are given to facilitate identification of the nauplius and copepodid stages. Comparison with the larvae of the genus *Epilabidocera*.

**Kinoschita T. & Hirano Y.** - On the Optimum Temperature of the Embryonic Development of *Mactra sachalinensis* [*De optimum quoad temperaturam pro embryonali progressione speciei « M. sachalinensis »*]. 2 tables, 1 fig., Venus, IV, 6, 368-372. Kyoto (1934). **b - 408**

**Lebour M. V.** - Stomatopod Larvae [*Stomatopoda. Quaestio de eorum larvis*]. 5 figs., Mém. Mus. R. Hist. Natur. Belgique; Résult. Scient. voyage aux Indes Orient. Néerl. de LL. AA. RR. le Prince et la Princesse Léopold de Belgique. III, 16, 9-17. Bruxelles (1934). **b - 409**

*Alima spinigera* (?) Bonadaile; *A. hyalina* Leach; *Gonodactylus chiagra* (Fabricius) ?

**Lebour M. V.** - The Life-history of *Dromia vulgaris* [*Historia biologica speciei « Dromia vulgaris »*]. Proc. Zool. Soc. London, Pt. 2. London (1934). **b - 410**

Description of the five stages found in the life-histories of *D. vulgaris*. Discussion as to the systematic position of the genus. According to the A. the *Dromiacea* should stand apart as a distinct group.

**Lebour M. V.** - The Larval Stages of *Balcis alba* and *B. devians* [*De stadiis larvalibus specierum « Balcis alba » et « B. devians »*]. Journ. Mar. Biol. Assoc., XX, 1, 65-69. Plymouth (1935). **b - 411**

**Lin S. Y.** - The Development of the Cuttlefish, *Sepiella japonica* Sasaki [*Cyclus evolutionis speciei « S. japonica »*]. (In Engl. & Jap.). 6 pls., 4 tables, Bull. Chekiang Prov. Fish. Exper. Stat., I, 5, 1-24. Tinghai, Chekiang (1935). **b - 412**

Results of a study, carried out for the first time, of the embryology of *S. japonica* Sasaki, with special regard to the development of the ova in living state. Due attention is also given to the time required for incubation.

**Loosli M.** - Ueber die Entwicklung und den Bau der indifferenten und männlichen Larven von *Bonellia viridis* Rol. [*De progressione et constitutione larvarum indifferentium et masculi-*

*narum speciei «B. viridis»*]. 30 Abb., Pubbl. Staz. Zool. Napoli, XV, 1, 16-59. Napoli (1935). **b - 413**

Nach Spengel (1879) entwickelt sich aus dem Ei der *Bonellia* zunächst eine indifferente Larve, die sich entweder frei lebend zum Weibchen, oder, vorübergehend am Rüssel eines Weibchens der eigenen Art parasitierend, zum Männchen entwickelt. Die vorliegende Arbeit beschäftigt sich mit der Organisation der indifferenten und der durch Rüsselparasitismus vermännlichten Larve. (Vf.).

**Mac Kay D. C. G. & Weymouth F. W.** - The Growth of the Pacific Edible Crab, *Cancer magister* Dana [*Accretio cancri edulis «C. magister» Oceani Pacifici*]. 6 figs., 3 tabl., Journ. Biol. Bd Canada, I, 3, 191-212. Toronto (1935). **b - 414**

Approximately 20.000 measurements were made of Crabs and cast exoskeletons, chiefly from Boundary Bay, southern British Columbia. The conclusions are based on three types of evidence, moulting (increase per moult, and interval between moults), tagging, and size frequencies. The legal size in British Columbia (6 ½ inches, or 16.5 cm.) is probably attained during the seventh or eighth year. The average duration of life is probably about eight years and the maximum age not more than ten years.

**Markowski St.** - Einfluss der Milieuveränderungen auf die Entwicklung der Eier von *Bothriocephalus scorpii* (Müller 1776) [*Variationum ambientalium influentia in progressionem ovorum speciei «B. Scorpii»*]. 2 Tab., Bull. Int. Acad. Polon. Sc. & Lettres, Cl. Sc. Mathém. & Nat., 3/5 B II, 49-58. Cracovie (1935). **b - 415**

Vf. versucht festzustellen, ob die Eier des Bandwurmes *B. scorpii*, welcher gleichfalls in den Meeren mit vollem Salzgehalt (35 ‰) und auch in der Ostsee auftritt, sich im Süsswasser entwickeln können, Niedrigst möglicher Salzgehalt für die Entwicklung dieses Wurmes; Einfluss von Temperatur und Licht.

**Matvejev B. S.** - Sur le principe du développement corrélatif des organes [*Principium progressionis correlativae organorum*]. (En russe). Abstr. Works Inst. Zool. Univ., 2, 30-36. Moscow (1935). **b - 416**

Le présent ouvrage traite de l'analyse morphologique des phénomènes des variations corrélatives des organes au cours de leur développement, avec référence spéciale à l'influence du développement de certains éléments du squelette sur celui des autres éléments pendant l'ontogénèse. Comme exemples sont pris, entre autre, les poissons osseux pendant le développement des vertèbres antérieures (*Esox*, *Salmo*). Résumé des opinions des différents savants qui se sont occupés de ce problème.

**Miyasaki I.** - On the Development of *Paphia philippinarum* (Adams et Reeve) [*Quaestio de accretione speciei «P. philippinarum»*]. (In Jap.). 1 pl., Suisan Gakkwai Hô, VI, 2, 71-75. (1934). **b - 417**

Results of observations on dimensions, segmentation after the fertilization of the egg of *P. philippinarum*. Time of development for obtaining the trochophore and the shelled larva stage; the colour of the latter. Illustration of the consecutive development stages.

**Miyazaki I.** - On the Development of Some Marine Bivalves with Special Reference to the Shelled Larvae [*De accretione aliquorum animalium marinorum bivalvium. Agitur particulatim de larvis, conchis praeditis*]. 3 pls., 2 tabl. Journ. Imp. Fish. Inst., XXXI, 1, 1-10. Tôkyô (1935). **b - 418**

Description of the development of the shelled larvae of *Mytilus crassitesta* Lischke, *Teredo japonica* Clessin, *Anomia lischkei* Dautzenberg et Fischer, *Parapholas quadrizonata* Spenger, and *Lima basilanica* Adams et Reeve.

**Moore H. B.** - The Growth Rate of *Balanus hameri* (Ascanius) [*De rythmo accretionis speciei «B. hameri»*]. 4 figs., 2 tabl., Journ. Mar. Biol. Assoc., XX, 1, 57-63. Plymouth (1935). **b - 419**

Sixty specimens of *B. hameri*, of five successive year groups, were obtained in December, 1933, and further 33 preserved specimens taken in the winter of 1925 were examined. The mean ages contained for successive year groups from the size distribution and from individuals settled on those of the preceding year, yielded results in good agreement with one another. First-year individuals do not spawn. All oder individuals have ripe genital products in the 1933 material, and early embryos in the 1925 material. (A.).

**Nakamura Syûya** - Larvae and Young of Fishes Found in the Vicinity of Kominato I. *Ocynectes maschalis* Jordan and Starks [*Larvae et pisciculi qui reperti sunt apud* Kominato]. 3 figs., Journ. Imp. Fish. Inst., XXX, 3, 219-225. Tokyo (1934). **b - 420**

The spawning of *O. maschalis* seems to last from December to April. On January 30, 1933 an egg-mass was found agglutinated on *Sargassum* growing near sea-shore and was transferred to an acquarium for further examination. The embryo, the swimming and crawling stages of this species are described and compared with those of other forms.

**Narisawa Fujio** - The Distribution and the Rate of Growth of two Kinds of Algae at Yosida *Asakusa* Laver-farm in Mikawa Bay, in Relation to the Inflow of River Water [*Quaestio de distributione et accretionis velocitate in Algarum duabus speciebus, quae vivunt in collectione plantarum aquaticarum in* Asakusa (Yosida) *apud bajam* Mikawa, *relate ad influentiam aquae fluviatilis*]. (In Jap.; Engl. Rés.). 1 fig., Bull. Jap. Soc. Scient. Fish., IV, 3, 174-175. Tokyo (1935). **b - 421**

Observations of surface salinity have shown that the growth of *Monostroma nitidum* Wittrock was most favourable where the direct influence of river water is slight and that *Porphyra tenera* Kjellm. preferred the part where the salinity was intermediate or where river and sea waters run side by side. Sandy bottom as well as chemical substances of the sea water seem also to have a certain importance.

**Nybelin Orvar** - Ueber Eier und Larven der Rotzunge (*Pleuronectes cynoglossus* L.) [*Ova et larvae in «P. cynoglossus»*]. 13 Tab., 2 Taf. a. T., Sv. Hydrogr.-Biol. Komm. Skr., Ny ser. Biol., I, 7, 1-20. Stockholm (1935). **b - 422**

Das hier untersuchte Material ist während der Fahrten des schwedischen Untersuchungsdampfers «Skagerak» 1922-1930 eingesammelt worden und die Resultate sind in Tabellen mit Angabe von Datum, Station, Tiefe, Temperatur, Salzgehalt, Fanggerät, Anzahl Eier und Larven und Grösse der Larven wiedergegeben. Die Kapitel behandeln: Bestimmung der Eier und Larven. Die Laichplätze der Rotzunge im Skagerak-Nordseegebiet nach dem Vorkommen ihrer Eier und Larven beurteilt.

**Nicholls A. G.** - The Larval Stages of *Longipedia coronata* Claus, *L. Scotti* G. O. Sars, and *L. minor* T. and A. Scott, with a Description of the Male of *L. Scotti* [*De stadiis larvalibus specierum «Longipedia coronata», «L. Scotti»* et *«L. minor» Adiungitur descriptio masculi speciei» «L. Scotti»*]. 1 figs., 4 tabl., Journ. Mar. Biol. Assoc., XX, 1, 29-45. Plymouth (1935). **b - 423**

The nauplius stages of three *Longipedia* species are described, and the segmentation and armature of the appendages of *L. coronata* are given in tabular form. The main features in the external structure of the copepodite stages are summarised in a table. Additional points of resemblance between the nauplii of *Longipedia* and the cirripèdes are presented. Notes are given on breeding and development under Laboratory conditions: there is no evidence of parthenogenesis. Feeding in the copepodite stage of *Longipedia* is described. A description is given of the hitherto unknown male of *L. Scotti*.

**Nouvel H.** - Le nématogène fondateur de *Dicyemennea eledones* Whit. et sa larve [*De nematogeno fundatore speciei « D. eledones » eiusque larva*]. 1 fig., C. R. Acad. Sc., CCI, 27, 1507- 1509. Paris (1935). **b - 424**

L'A. a pu obtenir au Musée Océanographique du Monaco un grand nombre de jeunes *Eledone aldrovandi* et dans leurs sacs rénaux, il a pu constater l'infestation par *Dicyemennea eledones*, qui ne se produit pas avant que l'hôte ait atteint le poids de 2g,5. Dans des individus de 2g,5 à 4g il a rencontré un certain nombre de nématogènes fondateurs à des stades divers, dont un, tout à fait larvaire. Il décrit les traits les plus remarquables de l'organisation de cette dernière phase.

**Okada Yô K.** - Les jeunes Physalies. Note supplémentaire sur le développement postembryonnaire de la Physalie [*Physalia juvenes. Nota additicia de progressione post-embryonali in Physaliis*]. 3 fig., Mem. Coll. Sc., Kyoto Imp. Univ., Ser. B., X, 5, Art. 19 (Contr. Seto Mar. Biol. Labor. N° 42). Kyoto (1935). **b - 425**

Quatre stades primaires du développement postembryonnaire de la physalie pacifique sont illustrés et par leur comparaison est mis en évidence l'ordre de stade d'un seul polype.

**Oppenheimer J. M.** - Experiments in early developing Stages of *Fundulus* [*Experientiae de primis progressionis stadiis in « Fundulus »*]. Proc. Nat. Acad. Sc. Washington, XX, 536-539. Washington (1934). **b - 426**

Results of experiments of implantation and grafting in the embryos of *Fundulus* in the first stages (from one to 128 cells).

**Orton J. H.** - Laws of Shell-growth in English Native Oysters [*De concharum accretione in « Ostrea edulis »*]. 1 fig., Nature, CXXXV, 3409, 340-341. London (1935). **b - 427**

A definite relation is found by the A. between the mean diameter, or the mean axis, of the English native oyster and the volume of the entire animal; this relation is similar to that between the diameter, or thickness, and volume of a segment of a sphere. The A. believes that the probable increase of the stock on an oyster-bed in a given time could be predicted, given sufficient observations. (Nature's abstract on page 346).

**Orton J. H.** - Biology of Growth and Breeding [*Accretionis et culturae biologia*]. Nature, CXXXV, 3413, 509. London (1935). **b - 428**

In the case of animals which can live under various temperature conditions (non-stenothermic) there may be temperatures which are favourable for growth and not for breeding. The A. finds that the oysters in the Fal Estuary show a larger spring growth than those in the River Blackwater; he ascribes this to the different temperatures. (Nature's abstract on page 511).

**Raja M.** - Ricerche sull'accrescimento postembrionale del *Loligo vulgaris* Lam. [*Investigationes in accretionem postembryonalem speciei « L. vulgaris »*]. Arch. Zool. Ital., XXI, 1, 447-474. Napoli (1935). **b - 429**

È stato esaminato l'accrescimento del *Loligo vulgaris* del golfo di Napoli e le variazioni ponderali del mantello, dei gangli cerebrali, dei gangli ventrali, dei gangli stellari, dell'occhio, del cristallino, dei corpi bianchi, dei cuori branchiali, delle branchie, del fegato, della borsa del nero, del becco e del guscio. I rapporti tra il peso dei singoli organi e il peso dell'intero organismo sono stati studiati servendosi dell'equazione di Huxley: $\gamma = bxK$.

**Ranzi S.** - Le basi fisio-morfologiche dello sviluppo embrionale dei Selaci [*Fundamenta physio-morphologica progressionis embryonalis in Selacis*]. Parti II, III. 54 fig., Pubbl. Staz. Zool. Napoli, XIII, 3, 331-437. Napoli (1934). **b - 430**

Ricerche sulla composizione del liquido uterino e sulla istofisiologia dell'utero e della placenta delle varie specie di Selaci, con esposizione dei metodi di ricerca relativi.

**Russell F. S.** - On the Occurrence of Postlarval Stages of the Bass, *Morone labrax* (L.) in the Plymouth Area [*De stadiis post-larvalibus speciei « Morone labrax » in regione* Plymouth]. Journ. Mar. Biol. Assoc., XX, 1, 71-72. Plymouth (1935). **b - 431**

The post-larval stages of the bass have been found for the first time in these waters.

**Russell F. S.** - The Seasonal Abundance and Distribution of the Pelagic Young of Teleostean Fishes Caught in the Ring-trawl in Offshore Waters in the Plymouth Area. Part II [*Copia pro anni tempore atque distributio juvenum pelagicorum Teleosteorum retis annularis trahentis auxilio captorum, in aquis longe a litoribus regionis* Plymouth]. 8 figs., 4 tabl., Journ. Mar. Biol. Assoc., XX, 2, 147-179. Plymouth (1935). **b - 432**

The seasonal composition of the catches of postlarval stages of teleostean fish is considered and it is shown that there is a gradual change over from the young of northern species of fish to those of more southern species as the summer advances. The relation between the spawning times of closely related species appears usually to be a function of their geographic distribution. The period of maximum abundance of post-larvae of spring-spawning fish occurs at different times in different years and this difference may be as much as a month. There seems to exist a correlation between the time in which the young fish are abundant and the temperature of the water.

**Sanzo L.** - Uova, sviluppo embrionale, stadi larvali, post-larvali e giovanili di *Sternoptychidae* e *Stomiatidae*. *Sternoptychidae*. III. *Maurolicus Pennanti* (Walb.) [*Ova, accretio embryonalis, stadia larvalia, post larvalia et juvenilia in « M. Pennanti »*]. II Monogr., 5 fig., 3 tav., 34 tab., 121-188, R. Comit. Talassogr. Ital., Ferrari. Venezia (1935). **b - 433**

L'A. dà la descrizione dei principali caratteri dell'adulto del *Maurolicus*: il numero dei raggi e delle vertebre, lo scheletro cefalico, la distribuzione degli organi luminosi, ecc. ed inoltre riferisce sullo sviluppo embrionale e post-embrionale di questo pesce considerando separatamente l'aspetto delle uova mature e fecondate, i caratteri principali della larva appena schiusa e fino al 20° giorno di coltura, e i diversi stadi di *Maurolicus* pescati nello Stretto di Messina. Sguardo riassuntivo dei caratteri più salienti durante lo sviluppo giovanile: forma, pigmentazione, fotofori, pinne.

**Schmidt G. A.** - Ein zweiter Entwicklungstypus von *Lineus gesserensis-ruber* O. F. Müll. (Nemertini) [*De altero quodam typo quoad progressionem in « L. gesserensis-ruber »*]. 36 Abb., Zool. Jahrb. Anat., LVIII, 607-660. Jena (1934). **b - 434**

Zwei verschiedene Typen von Laich, mit verschiedener Entwicklung, werden bei *Lineus* sowohl bei Roscoff wie an der Murman-Küste unterschieden und mit einander verglichen. Diese Larven sind von roten oder grünen Individuen entsprossen, d. h. zwei Varietäten von *Lineus gesserensis*.

**Shen C. J.** - An Investigation of the Post-Larval Development of the Shore-Crab *Carcinus maenas*, with special Reference to the external secondary sexual Characters [*Investigationes in*

*postlarvalem progressionem speciei « C. maenas ». Agitur particulatim de caracteribus sexualibus secundariis externis*]. Proc. Zool. Soc., Part I, 1-34. London (1935). **b - 435**

**Smith J. E.** - The early Development of the Nemertean *Cephalothrix rufifrons* [*De prima accretione in nemertino « C. rufifrons »*]. 3 figs., 2 pls., Quart. Journ. Microsc. Sc., LXXVII, 335-381. London (1935). **b - 436**

Detailed analysis of the process of development until the swimming larva, in which the different organs are already outlined. Deviations from this type of direct development.

**Smith W. C.** - Growth of the young Lobster [*Accretio juvenis speciei « Homarus vulgaris »*]. 2 fig., tabl., Proc. & Trans. Liverpool Biol. Soc., XLVIII, 51-60. Liverpool (1935). **b - 437**

The present paper is a continuation of the account of an experiment in lobster-rearing at Port Erin Marine Biological Station two years ago (Proc. & Trans. Liverpool Biol. Soc., XLVII) and is mainly concerned with the growth of the surviving Lobsters during the nineteen months following the first period after hatching.

**Sparta A.** - Uova e larve di *Gobiidae*. II. *Gobius jozo* L. [*Quaestio de ovis et larvis in Gobiidis*]. 1 tav., Mem. R. Comit. Talassogr. Ital., No. CCXVI, 1-10. Venezia (1934). **b - 438**

Si fanno conoscere le uova, e le larve appena schiuse e al 5° giorno di vita di *Gobius jozo* L.

**Sparta A.** - Contributo alla conoscenza dello sviluppo nei Percidi. Uova ovariche mature di *Epinephelus guaza L.* e stadi post-embrionali e larvali di *Epinephelus alexandrinus* Cuv. e Val. [*Contributio in accretionem cognoscendam in Percidis. Ova ovarica matura speciei « E. guaza » atque stadia post embryonalia et larvalia speciei « E. alexandrinus »*]. Mem. R. Comit. Talassogr. Ital., No. CCXXIV, 1-13. Venezia (1935). **b - 439**

Si descrivono le uova ovariche di *Epinephelus guaza L.*, e sette stadi post-embrionali di *Epinephelus alexandrinus* Cuv. e Val. Il lavoro è completato da osservazioni biologiche, sullo stato di maturità sessuale e sulla ecologia di queste specie. Sono riportati alcuni dati somatometrici.

**Spirito A.** - Studio sul comportamento delle perossidasi durante lo sviluppo embrionale [*Studium rationis agendi peroxidasium inter accretionem embryonalem*]. Boll. Soc. Ital. Biol. Sper., IX, 901-904. Napoli (1934). **b - 440**

Ricerche su uova di *Petromyzon*, *Salmo*, *Esox*, *Barbus* e di alcuni anfibi. Distribuzione delle perossidasi nell'uovo.

**Steuer A.** - Postembryonalentwicklung von *Rhincalanus gigas* Brady [*Accretio post-embryonalis in « Rhincalanus gigas »*]. 4 Abb., Sitz. ber. Akad. Wiss. Wien, CXLIV, 7/8, Abt. 1, 383-390. Wien (1935). **b - 441**

Beschreibung des dritten, vierten, fünften und sechsten Naupliusstadiums und des ersten, zweiten und dritten Copepoditstadiums. Tiefenausbreitung. Laichverhältnisse.

**Strodtmann S.** - Das Wachstum der Schollen in der Ostsee [*Accretio speciei « Solea vulgaris » in mari Baltico*]. 7 Tab., 1 Karte, Ber. Dtsch. Wiss. Komm. Meeresf., N. F., VII, 4, 363-380. Leipzig (1935). **b - 442**

Frühere Feststellungen in Bezug auf das Wachstum. Das jetzige Wachstum. Theoretische und praktische Schlussfolgerungen: Für das Wachstum geltende Regeln. Berücksichtigung der Aufwachsgemeinschaften. Verpflanzung von Schollen aus der östlichen Ostsee in die westliche. Schutzmassregeln.

**Svetovidov A.** - On the Growth of the Baikal Whitefishes and Graylings [*De accretione generum « Coregonus » et « Thymallidae » lacus* Bajkal]. (In Russ., & Engl.). 2 tabl. C. R. Acad. Sc. U. R. S. S. III, 8/9, 661-665. Leningrad (1934). **b - 443**

Data on the growth of graylings and whitefishes from the Baikal Sea; comparison of the growth rate of these Baikal species with such of the same species in Siberian rivers and with the growth rate of the Caspian herring. Causes of the rapid growth of Baikal Fishes.

**Terao Arata** - Cross between the Cod, *Gadus macrocephalus* Tilesius and the Salmon, *Oncorhynchus keta* (Walbaum) [*Permixtio inter « G. macrocephalus » et « O. keta »*]. (In Jap.). Jap. Journ. Genetics, IX, 3, 183. Tokyo ? (1934). **b - 444**

Successful crossing. The young of this hybrid resemble the young salmon but are more delicate.

**Tortonese E.** - Le variazioni somatiche degli Asteroidi in rapporto all'età [*De variationibus somaticis in Asteroideis pro aetate*]. 4 fig., Arch. Zool. Ital., XXI, 1-17. Napoli (1935). **b - 445**

L'A. richiama l'opportunità di distinguere il periodo post-larvale degli asteroidi in una fase giovanile ed una fase adulta, che ha inizio con l'entrata in funzione degli organi riproduttori. Le piccole stelle di mare possono differire dagli adulti per un numero di raggi maggiore o minore, per avere le braccia proporzionatamente più corte, per vari caratteri scheletrici, ecc. In qualche caso, i giovani sono così profondamente diversi che furono descritti come specie a sè. Lo studio delle variazioni che accompagnano l'accrescimento degli Asteroidi è interessante per la biologia e per la sistematica.

**Ubisch (v.) L.** - Entwicklungsphysiologie, Faktorenanalyse an Seeigelkeimen [*De physiologia accretionis deque analysi factorum qui influunt in embryones Echinoideorum*]. 9 Abb., Rev. Suisse Zool., XLI, 371-381. Genève (1934). **b - 446**

Bericht über Kreuzungs-und Implantations - versuche mit *Parechinus microtuberculatus* und *Echinocardium cordatum*. Es wird die grosse Bedeutung der Micromeren für die Skelettbildung der Larven bewiesen.

**Zenkovitch B. A.** - Sur les embryons des baleines [*De embryonibus Balaenarum*]. (En russe). 5 tabl., Rybn. Choz. Daljn. Vostoka, XIII, 1, 83-88. Khabarovsk (1935). **b - 447**

L'A. communique les résultats de ses mesures de 45 baleines femelles et de leurs embryons, réunis dans 5 tableaux, contenant les indications sur les dimensions de la mère et de l'embryon, l'âge de l'embryon (nombre des jours), la date et le lieu de l'observation et la date supposée de l'engendrement. Les observations se rapportent à des exemplaires de *Megaptera nodosa*, *Rhachianectus glaucus*, *Balaenoptera physalus*, *B. musculus*, *B. borealis* et *Hyperodon rostratus*.

**Zerling M. R.** - Action de la thyroxine et de quelques substances chimiquement voisines sur le développement des larves d'oursin [*De actione thyroxinae et aliquarum substantiarum in larvarum Echini accretionem*]. 4 fig., Bull. Inst. Océanogr., 678, 1-11. Monaco (Princ.) (1935). **b - 448**

Etude de l'action de la thyroxine sur le développement des larves des oursins, *Psammechinus miliaris* et *Paracentrotus lividus*, en essayant de préciser quelques unes des modalités de cette action et sa relation aux fonctions chimiques libres dans la molécule. L'A. conclut dans le sens que l'addition de thyroxine au milieu dans lequel se développent les larves, a une influence nette sur la croissance et la différenciation de celles-ci.

# BIOCHEMIA

## Chemia biologica et metabolismum vitale. - Actio substantiarum chemicarum in organismis.

**Aoki Katu** - Studies of the Mucous Substance of *Gloiopeltis*. I. [*Studium substantiae mucosae in « Gloiopeltis »*]. (In Jap.; Engl. Rés.). 5 tabl., Bull. Jap. Soc. Scient. Fish., III, 6, 359-361. Tokyo (1935). **b - 449**

In view of the utilization of the mucous substances of *Rhodophyceae*, especially agar–agar, carragheenschleim, and the mucous substance from *Gloiopeltis tenax* (Turn) J. Ag. in various industries, the A. has studied the viscosity of mucous substances of *G. furcata* P. and R. and of *G. tenax* (Turn) by measuring the time required for 50 cc. of materials to drop down from a Redwood's viscosimeter.

**Barry V. & Dillon T.** - On the Preparation and Properties of Alginic Acid and on the Extraction of Marine Algae with various Solvents. (Prel. Note) [*De comparatione et peculiaritatibus acidi alginici deque eiusdem extractione ab Algis marinis, variis solventibus.* (*Nota prior*)]. Scient. Proc. R. Dublin Soc., N. S. XXI, 165–166. Etudes sur l'adaptation des poissons sténohalins et euryhalins aux changements de salinité. Techniques utilisées au cours des recherches. Remarques biologiques, rapport gonosomatique et étude de l'anguille en eau douce et en eau de mer: modifications du milieu intérieur. Relations entre les éléments minéraux, azotés, les sucres et les corps gras de l'anguille, dans les deux milieux extérieurs.

Analogues recherches sur Congre et Murène. Mesure de leur pression osmotique et influence des variations de salinité. Les modifications qui résultent au cours du développement et des variations de salinité, causes qui peuvent modifier le milieu intérieur et interdépendance des éléments biochimiques du sang. Mécanisme de la mort des poissons d'eau douce transportés dans l'eau de mer. Bibl.

**Brand (v.) T.** - Methods for the Determination of Nitrogen and Carbon in Small Amounts of Plankton [*Methodus determinandi nitrogeni et carbonis in parvis quantitatibus planctonicis*]. 2 tabl., Biol. Bull., LXIX, 2, 221-232. Lancaster, Pa. (1935). **b - 456**

The method of Krogh and Keys for nitrogen determination is adapted for determinations on plankton. The range of nitrogen to be determined is O.5 – 5γ, the accuracy about 10 per cent. A method for the determination of small amount of carbon for the same purpose is described. Amounts of 10 to 100γC can be determined with an accuracy of about ± 3γC. (A.).

**Chaigne M.** - Recherches biochimiques sur le glycogène des Invertébrés [*Investigationes biochemicae in glycogenum Invertebratorum*]. Graph., tabl., Bull. Stat. Biol. Arcachon, XXXI, 1-79. Bordeaux (1934). **b - 457**

Compte rendu des résultats d'une longue série de recherches sur les variations du glycogène dans les organes des Invertébrés, faite en partant de l'idée directrice que le glycogène joue vraisemblablement chez les êtres un rôle plastique important encore mal connu. Après un aperçu historique rapide du sujet, une liste des animaux étudiés, et la technique adoptée (méthode de Pflüger légèrement modifiée), l'A. donne une étude comparative et générale concernant la répartition du glycogène dans les différents organes des Invertébrés étudiés, la surproduction et la mobilisation du glycogène à l'époque de la mue des Crustacés, la surcharge en glycogène des organes reproducteurs au moment de la ponte et le teneur en glycogène des œufs.

**Delaunay H.** - Le métabolisme de l'ammoniaque d'après les recherches relatives aux Invertébrés [*De metabolismo ammoniacae ex investigationibus in Invertebratis*]. Ann. Physiol. et Physicochem. Biol., X, 695-729. Paris (1934). **b - 458**

La comparaison entre l'excrétion des Invertébrés aquatiques et terrestres nous amène à conclure que les premiers excrètent ammoniaque et les autres acide urique et urée ce qui serait en rapport au métabolisme, à l'épuration des liquides du milieu intérieur et à la quantité de l'eau en circulation dans l'organisme.

**De Marco R.** - Sulla dose tossica mortale della morfina nei Teleostei marini [*Dosis mortifera morphinae in Teleosteis marinis*]. Mem. R. Comit. Talassogr. Ital., Nº CCXIII, 3-19. Venezia (1934). **b - 459**

Ricerche per stabilire l'azione generale e la dose tossica mortale della morfina iniettata a *Heliastes Cromis*, *Cerna gigas*, *Box boops*, *B. salpa*, *Julis julis*, *J. Giofredi* e *Mugil cephalus*. Piccole dosi di morfina determinano dapprima un aumento della attività respiratoria seguito poi da depressione e scarsa reazione agli stimoli. Determinazione delle dosi letali per le varie specie esaminate. Fenomeni di esoftalmia.

**De Marco R.** - Sulla dose tossica mortale della cocaina nei Teleostei marini [*Dosis mortifera cocainae in Teleosteis marinis*]. Mem. R. Comit. Talassogr. Ital., Nº CCXIX, 3-12. Venezia (1934). **b - 460**

Iniezioni endomuscolari di piccole dosi di cloridrato di cocaina in *Box boops*, *Mugil cephalus*, *Oblata melanura*, *Pagellus eritrinus*, *Scorpaena scrofa*, producono un aumento degli atti respiratori e dei movimenti di locomozione. Determinazione delle dosi tossiche mortali nelle varie specie.

**Denstedt O. F. & Brocklesby F. N.** - Fish Oils. V. The Effect of various Treatments on the Rate of Oxidation of Pilchard Oil [*Olea piscium. V. Effectus ex diversis tractationibus in velocitatem oxidationis olei speciei « Clupea pilchardus »*]. 6 figs., Journ. Biol. Bd Canada, I, 6, 487-496. Toronto (1935). **b - 461**

This paper is the second of a series concerning, the drying properties of Canadian Pilchard Oil. The subject of oxidation is discussed separately from the drying of the oil and the properties of films. These topics will be dealt with in the next paper of the group.

**Florkin M. & Bosson G.** - Sur l'azote sanguin et l'azote urinaire d'un Mollusque Lamellibranche (*Anodonta cygnea*) [*De azoto sanguineo atque urinario molusci cuiusdam Lamellibranchiati*]. 1 tab., C. R. Soc. Biol., CXX, 40, 1368-1369. Paris (1935). **b - 462**

Les concentrations de l'azote total, l'azote protéinique et de l'azote non protéinique de l'urine, chez les Anodontes étudiées, sont plus élevées que celles du plasma sanguin. La teneur en azote protéinique de l'urine est plus forte que sa teneur en azote non protéinique: l'urine de *Anodonta cygnea* représente un produit de concentration. (L. S.).

**Fowler L. H.** - Relative Effect of biologically conditioned and other extremely hypotonic Water on the Tissues of the Marine Turbellarian, *Procerodes wheatlandi* [*Agitur de aqua, condicionibus praedita specialibus biologicis, deque aqua maxime hypotonica quoad effectum relativum in texta speciei « Procerodes wheatlandi »*]. 11 figs., Physiol. Zool., VIII, 2, 228-245. London (1935). **b - 463**

A comparison of the state of preservation of the tissues of worms in hypotonic sea water with the tissues of worms in hypotonic biologically conditioned water of comparable electrical resistance shows that the worms from the latter were in a better state of histological preservation after comparable exposure. This study does not present a further explanation of the protective phenomena but lends support to the evidence and conclusions of Allee. (From A:s rés.).

**Galtsoff P. S.** - The Biochemistry of the Invertebrates of the Sea [*De biochemia in Invertebratis marinis*]. 2 figs., Ecol. Monogr., IV, 3, 481-490. Brooklyn (1934). **b - 464**

The A. discusses the concentration of Zn by Lamellibranchs and Gastropods; J, Fe, and Cu by Oysters, Clams, and Algae. On the basis of the chemical composition of the material used for the building of skeletons and shells, 4 principal groups are distinguished: carbonate group, phosphate group, sulphate series and silicate series. Their different forms and their evolution.

**Guttman R.** - Differential Oxygen Uptake of Regions of *Limulus* Optic Nerve as Related to Distance from the Sense Organ [*De absorptione differentiali oxygeni singularum sectionum nervi optici in specie « Limulus polyphemus » pro distantia ab organo sensorio*]. 1 graph., 1 table. Biol. Bull., LXIX, 3, 356-360. Lancaster, Pa. (1935). **b - 465**

Results of thirteen experiments on the differential rate of oxygen uptake of the optic nerve of *Limulus polyphemus*, investigated by means of a differential volumeter, showing in every case that the respiration of the distal end was lower than that of the proximal region, and that the average difference between maximal and minimal rates in a nerve was 36 per cent.

**Haas P.** - The Liberation of Methyl Sulphide by Seaweed [*De liberatione methylsulphuri ex « Fucus »*]. Biochem. Journ., XXIX, 1297-1299. London (1935). **b - 466**

**Kruta V.** - Sur l'action de l'adrenaline, de l'ergotamine et du pipéridino-methylbenzodioxane sur le cœur de la Seiche. (*Actio aliquarum substantiarum chemicarum in corde speciei « Saepia officinalis »*]. C. R. Soc. Biol., CXIX, 16, 106-107. Paris (1935). **b - 468**

**Labbé A.** - La fonction silicigène chez les Silicodermés [*De functione silicigena in Silicodermatis*]. C. R. Acad. Sc., CC, 22, 1880-1882. Paris (1935). **b - 469**

Il y a chez les Silicodermés un métabolisme de la silice, au sujet duquel on a des données morphologiques, mais dont on ignore le mécanisme chimique. Le métabolisme des Silicodermés paraît totalement différent de celui des Eponges.

**Langstroth G. O.** - Light Absorption–Age Relations in Juice Expressed from Fish Muscle [*Correlationes inter lucis absorptionem et aetatem quae observatae sunt in succo secreto a piscis musculo*]. Ann. Rep. Biol. Bd Canada, 1933, 57-58. Ottawa (1934). **b - 470**

Brief account of the work carried out with the object of ascertaining whether or not the reactions which go on in the fish muscle after death change the physical characteristics of the juice and of the correlation between the change in the absorption coefficient and the point to which the reactions had progressed. The preliminary work performed indicates that the change in absorption is the result of at least two series of reactions. The experiences have been made with juice expressed from cod stored under definite sets of conditions for four fish.

**Ledrut J.** - Sur les effets hypoglycémiants de l'injection intraduodénale d'acide chlorhydrique dilué chez *Raja clavata* [*De effectibus hypoglycemicis iniectionis intraduodenalis acidi chlorhy-*

*drici diluti in «Raja»*]. 4 tabl., Bull. Classe Sc., XX, 12, 5 série, 1183-1190. Bruxelles (1934–35). **b - 471**

Recherches faites par l'A. dont il résulte, que la sécrétion formée physiologiquement au niveau du duodénum sous l'influence du chyme acide entraîne une chute glycémique marquée, chez *Raja clavata*, même en l'absence de sécrétion insulienne.

**Lovern J. A.** - Fat Metabolism in Fishes. VI. The Fats of some Plankton *Crustacea* [*De crassi metabolismo in piscibus. VI. De crassis aliquorum Crustaceorum planctonicorum*]. Biochem. Journ., XXIX, 847-849. London (1935). **b - 472**

**Lovern J. A.** - Fat Metabolism in Fishes. VII. The Depot Fats of certain Fish fed on known Diets [*De metabolismo substantiarum crassarum in piscibus. VII. De crassis depositis aliquorum piscium, nota dieta nutricatorum*]. Biochem. Journ., XXIX, 1894-1897. London (1935). **b - 473**

**Philippot E.** - Note sur l'iode des huîtres superiodées [*Nota de jodio in Ostreis superjodatis*]. Tabl., Bull. Stat. Biol. Arcachon, XXXI, 101-106. Bordeaux (1934). **b - 474**

L'A. donne le résumé des résultats des recherches qui ont été faites en vue de fixer de fortes quantités d'iode dans le corps des huîtres vivantes superiodées et communique en même temps les résultats de ses propres expériences effectuées dans le même but.

**Roche J. & Dumazert C.** - Sur la glycémie de *Cancer pagurus*. Nature des substances réductrices et facteurs de variation de la glycémie [*Natura substantiarum reductricium et factorum variationis glycemicae in « Cancer pagurus »*]. C. R. Soc. Biol., CXX, 40, 1225-1227. Paris (1935). **b - 475**

L'hémolymphe de *Cancer pagurus* contient des substances réductrices dont une partie est fermentescible par la levure du bière et l'autre est précipitée par l'hydrate de cadmium. Le glucose est le principal sinon le seul hexose de l'hémolymphe. Il existe chez cet animal un mécanisme régulateur de la glycémie assez efficace, qui est très différent de celui des animaux supérieurs. (L. S.).

**Runnström J.** - Acid Formation in Frozen and Thawed *Arbacia punctulata* Eggs and its possible Bearing on the Problem of Activation [*De acidi formatione in ovis gelidis et egelidis speciei « A. punctulata », pro correlatione probabili cum activationis problemate*]. Biol. Bull., LXIX, 3, 345-350. Lancaster, Pa. (1935). **b - 476**

In a previous work it has been found that the activation process is accompanied by an acid formation which has been demonstrated by manometric methods. A comparative strong acid formation takes place also when the eggs are broken by distilled water. It seems possible that the acid formation in both cases has the same chemical basis. The present paper has to be regarded as a first approach to a closer study of the question, which has a bearing on the understanding of the activation process.

**Runnström J.** - Influence of Iodoacetate on Activation and Development of the Eggs of *Arbacia punctulata* [*De influentia acetati jodici in activationem et progressionem ovorum speciei « A. punctulata »*]. Biol. Bull., LXIX, 3, 351-355. Lancaster, Pa. (1935). **b - 477**

Brief report of experiments which prove that monoiodoacetate does not inhibit the fertilization process in the *A. punctulata* egg. Iodoacetate in the concentration (0.03 m) used in these experiments is harmful to the development of fertilized eggs. There is a remarkable difference in resistance between unfertilized and fertilized eggs. The morphological defects caused by a treatment of eggs by iodoacetate before fertilization are prevented by addition of pyruvate to the fertilized eggs.

**Sumner F. B. & Wells N. A.** - Some Relations Between Respiratory Metabolism in Fishes and Susceptibility to Certain Anesthetics and Lethal Agents [*Correlationes inter metabolismum repiratorium piscium eorumque suscipiendi possibilitatem pro anestheticis et letalibus substantiis*]. Biol. Bull., LXIX, 3, 368-378. Lancaster, Pa. (1935). **b - 478**

Results of experiments made upon two species of teleost fishes, *Fundulus parvipinnis*, and *Gillichthys mirabilis*; the anesthetics used were urethane, chloretone, and ether, the lethal agents, NaCN, KCN, asphyxiation and excessive temperature. From these results the inference seemed warranted that differences in the temperature history of the fishes concerned resulted in differences in metabolic rate, which manifested themselves both in the visible rate of respiration of these fishes and in their susceptibility to certain anesthetics and lethal agents.

**Ten Cate J.** - L'action de quelques substances pharmacologiques sur le ganglion stellaire des Céphalopodes [*Actio aliquarum substantiarum pharmacologicarum in ganglium stellare Cephalopodorum*]. Arch. Néerl. Physiol. Homme et Animaux, XVIII, 1-14. La Haye (1933). **b - 479**

Expériences sur *Octopus vulgaris* et *O. macropus*. L'A. a injecté adrénaline, acéthylcholine, pilocarpine, nicotine, strychnine, atropine, curare et phénol; leur action sur la variations des fonctions, non seulement des chromatophores mais aussi de la musculature du manteau. Il est pourtant naturel de supposer que dans le ganglion stellaire des Céphalopodes il y a des éléments nerveux.

**Waksman S. A., Carey C. L. & Allen M. C.** - *Bacteria* decomposing Alginic Acid [*Bacteria quae acidum alginicum dissolvunt*]. Journ. Bacteriol., XXVIII, 213-220. Baltimore (1934). **b - 480**

**Wells N. A.** - Change in Rate of Respiratory Metabolism in a Teleost Fish Induced by Acclimatization to High and Low Temperature [*De mutationibus quoad gradum metabolismi respiratorii cuiusdam piscis teleostei, per acclimatationem excitatis, alta et demissa temperatura*]. 1 graph., Biol. Bull., LXIX, 3, 361-367. Lancaster, Pa. (1935). **b - 481**

The results of two experiments are presented, showing the effect on the oxygen metabolism produced by acclimatizing fishes to high and low temperature. It is concluded from an analysis of these data that fishes acclimatized to a high temperature have a much lower rate of metabolism at a common intermediate temperature than fishes acclimatized to a low temperature. The fishes used in these experiments were *Gillichthys mirabilis*.

**Yamamura Yarokurô** - Chemical Study of Food–organisms for Fish. IV. Distribution of Arsenic [*Studium chemicum organismorum edulium piscium. II. Arsenici distributio*]. (In Jap.; Engl. Rés). 2 tabl., Bull. Jap. Soc. Scient. Fish., IV, 2, 85-87. Tokyo (1935). **b - 482**

In the present paper there are embodied arsenic contents of food–organisms for fish and the distribution of the element in water soluble part, ether soluble part and the residual tissues of pupae of silk worm. The estimation of arsenic was followed by I. Bang's titration method.

**An.** - The Manufacture of Carbohydrates by Plants [*De hydratis carbonii eorumque formatione in plantis*]. Science, Suppl., LXXXII, 2116, 6. New York (1935). **b - 483**

Short notice on experiments carried out by scientists from U. S. Department of Agriculture and the Bureau of Chemistry and Soils in Washington with the green Alga, *Chlorella*. The process is known as basic photosynthesis.

**Campbell J.** - Non-protein Nitrogenous Constituents of Fish Muscle [*Substantiae constituentes nitrogenicae non-proteinicae in piscis musculo*]. Ann. Rep. Biol. Bd Canada, 1933, 51-52. Ottawa (1934). **b - 488**

Results of a study of the non–protein nitrogenous constituents of cod, herring, salmon, and haddock muscle; relative amount of these constituents; striking difference in the content of imidazole groups. Many interesting points brought out through fractionation of large samples of cod and herring muscle extract by the silver–baryta method.

**Campbell J.** - The Non–protein Nitrogenous Constituents of Fish and Lobster Muscle [*Substantiae constituentes nitrogenicae non–proteinicae musculorum piscis et cancri*]. 3 tabl., Journ. Biol. Bd Canada, I, 3, 179-189. Toronto (1935). **b - 489**

A chemical investigation of the non–protein nitrogenous constituents of the muscle of cod, haddock, salmon, herring, skate and lobster has been made with more particular attention to cod, herring and lobster muscle in which the partition of nitrogen was investigated by fractionation procedures.

**Carteni A. & Morelli A.** - Ricerche sulla costituzione chimica dei muscoli di alcuni animali marini. Nota I. Le proteine del tessuto muscolare di *Mugil cephalus* [*Investigationes in constitutionem chemicam musculorum animalium marinorum. De proteinis texti muscularis in « M. cephalus »*]. Quad. Nutr., I, 3, 185-191. Napoli (1934). **b - 490**

Preparazione del materiale ed esposizione dei metodi di analisi. I risultati ottenuti sono espressi in gr. di azoto delle varie frazioni riferiti: 1° al peso del campione di materiale esaminato, 2° a 100 gr. di proteina; 3° a 100 gr. di azoto proteico. Ripartizione dell'azoto nelle proteine muscolari di animali marini, secondo vari Autori.

**Carteni A. & Morelli A.** - Ricerche sulla costituzione chimica dei muscoli di alcuni animali marini. Nota II. Le sostanze azotate estrattive del tessuto muscolare di *Mugil cephalus* [*Investigationes in constitutionem chemicam musculorum animalium marinorum. De substantiis azotatis extractivis texti muscularis speciei « M. cephalus »*]. Quad. Nutr., I, 5-6, 433-449. Napoli (1934–35). **b - 491**

Si riferiscono i valori delle sostanze azotate estrattive del tessuto muscolare di *Mugil cephalus*, assieme a quelli esistenti in letteratura su altre specie di animali marini, raccolti in tabelle analitiche.

**Carteni A. & Aloj G.** - Composizione chimica di animali marini del golfo di Napoli. II. Selaci, Molluschi, Crostacei [*De compositione chemica animalium marinorum sinus Neapolitani. Selaci, Mollusca et Crustacea*]. Quad. Nutr., II, 3, 219-235. Napoli (1935). **b - 492**

Vengono riferite le analisi chimiche di alcuni selaci molluschi e crostacei del golfo di Napoli, più comunemente usati nell'alimentazione dell'uomo. I valori ottenuti vengono confrontati con quelli ricavati da analoghe ricerche sui teleostei, pubblicati in una nota precedente, in relazione sia al loro valore nutritivo sia al loro valore economico.

**Cooper L. H. N.** - The Rate of Liberation of Phosphate in Sea Water by the Breakdown of Plankton Organisms [*Ratio liberationis phosphaticae in aqua marina a decompositis organismis planctonicis*]. 1 fig., 1 table, Journ. Mar. Biol. Assoc., XX, 2, 197-200. Plymouth (1935). **b - 493**

Samples of animal and plant plankton were added to the sea–water in glass vessels and the subsequent changes in the phosphate content of the water were followed. The breakdown of the zooplankton was very rapid and more phosphate was set free than had originally been added as plankton. The balance was produced from dissolved organic phosphorous compounds in the water. The breakdown of phytoplankton showed a short time lag and only a part of the phosphorous added was set free as phosphate.

**Cooper L. H. N.** - A Note on Manganese in Marine Plankton [*De manganese quoad Plancton marinum*]. 1 table, Journ. Mar. Biol. Assoc., XX, 2, 201-202. Plymouth (1935). **b - 494**

Table showing manganese content of plankton caught at Station L4. Date of the collection, description of plankton, manganese in catch γ/m of sea water filtered and ratio Mn/P (weight/weight) are given in this table. The concentration of manganese amounted to less than three parts per million million parts of water filtered, equivalent to one–thousandth or less of the phosphorus content.

**Coulson E. J.** - The Jodine Content of Oysters [*Quod jodii continetur in Ostreis*]. 1 fig., 4 tabl., U. S. Dpt. Comm. Bur. Fish. Invest. Rep., 18, ii, 1-10. Washington D. C. (1934). **b - 495**

The iodine content of fresh oysters, shucked and handled in the usual commercial manner has been determined. The variation of iodine content with season and locality has been studied, as well as the effect of washing on the composition of oysters. The value of oysters as a source of iodine has been established and some conclusions concerned with it, drawn.

**Coulson E. J.** - The Iodine Content of Some American Fishery Products [*Quod jodii continetur in fructibus piscatoriis americanis*]. 3 tabl., U. S. Dpt. Comm. Bur. Fish., Invest. I, Rep. 25, 1-7. Washington, D. C. (1935). **b - 496**

In this note the results of a reinvestigation of the iodine content of some of the important American fishery products are given. The work has been carried out because of the importance of sea food as a natural source of iodine and because of the advance made in the recent years in methods of iodine analysis. In two tables are given data concerning respectively fishery products and fish meals.

**Denissov I. A.** - Quelques données sur la composition chimique de l'espadon [*De compositione chemica speciei « Trichiurus japonicus »*]. (En russe). 3 tabl., Rybn. Choz. Daljn. Vost. (Econ. Pêche Extr.–Orient) 1/2, 97-100. Moskva-Khabarovsk (1934). **b - 497**

Quelques données sur la composition chimique de *T. japonicus* dont l'importance au point de vue alimentaire est nulle, mais dont la pêche est néanmoins intéressante étant donné que sa peau fournit la guanine qui sert à la fabrication de perles artificielles.

**Denissov I. A.** - Sur l'extraction de la guanine dans l'industrie de pêche de l'Extrême-Orient [*De guanina extraenda quoad industriam piscatoriam in regionibus ultimi Orientis*]. (En russe). 2 fig., 10 tabl., Rybn. Choz Daljn. Vost. (Econ. Pêche Extr.–Orient) 1/2, 135-150. Moskva-Khabarovsk (1934). **b - 498**

Après une introduction de caractère général, contenant un résumé du développement de l'industrie de la guanine qui fournit la pâte perlée, l'A. décrit les propriétés physiques et chimiques de cette substance et donne ensuite la caractéristique des matières premières existantes dans l'Extrême-Orient, que l'on peut utiliser pour la fabrication de la guanine; il décrit quelques uns des traitements industriels qui servent à son extraction, illustre ensuite les différentes méthodes pour la détermination du montant de la guanine dans la matière première travaillée et étudie la composition de la pâte perlée qui en est obtenue.

**Joyet-Lavergne Ph.** - Sur la recherche de la vitamine A dans les globules rouges du sang des Vertébrés [*De inquirenda vitamina A in globulis rubris sanguineis Vertebratorum*]. C. R. Acad. Sc., CCI, 24, 1219-1221. Paris (1935). **b - 530**

L'A. a abordé le problème de la recherche de la vitamine A dans les globules rouges du sang de la raie; dans ses conclusions il met en évidence la généralisation de la proposition qu'il a formulée, à voire que « la vitamine A est un constituant essentiel du chondriome ».

**Macpherson N. L. & Wilson A. M.** - Vitamin A in Liver Oils (Of Fish) [*De vitamina A in oleo speciei* « *Gadus morrhua* »]. 5 tabl., Rep. Newfoundl. Fish. Research. Labor., II, 3, 46-50. Newfoundland (1935). **b - 531**

Cod liver oil: the effect of age on potency and on values in international units. Other fish liver oils (salmon and halibut).

**Prozorovskaja L. L. & Chivrina A. N.** - - Contenu en Vitamines A et C des algues brunes [*De vitaminis A et C in algis nigris*]. 1 diagr., 2 tabl., Problema Vitam., Sborn. Rab. Vitam. Lab., 65-69. Leningrad (1934). **b - 532**

**Rygh O.** - Non-identity of Vitamin $D_2$ (Irradiated Ergosterol, Calciferol) and the Natural Vitamin D from Cod Liver Oil [*Quaestio de non-identitate vitaminae $D_2$ et vitaminae D naturalis in oleo speciei* « *Gadus morrhua* »]. Nature, CXXXVI 3436, 396-397. London (1935). **b - 533**

The data reported here of the results obtained at the Norwegian State Vitamin Institute are not sufficient to determine whether vitamin *D* from cod liver oil and from tunny liver oil are different. Only a difference from irradiated ergosterol has been proved.

**Schmidt-Nielsen S., Flood A. & Stene J.** - On the Size of the Liver of some Gristly Fishes and of some Bone–Fishes and their Content of Fat and Vitamin A [*De hepate aliquorum piscium cartilagineorum et teleosteorum quoad magnitudinem. Agitur etiam de substantiis crassis deque vitamina A*]. Tabl., Kgl. Norsk. Vidensk. Selsk. Forh. 1934, VII, 15, 47-50; 20, 70-73. Trondheim (1935). **b - 534**

Statistic tables of 14 species of Gristly Fishes and of 27 species of Bone–Fishes.

**Schmidt-Nielsen S., Flood A. & Stene J.** - Ueber Grösse und Vitamingehalt der Leber verschiedener Tiere [*De vitaminis quoad magnitudinem et continentiam in hepate aliquorum animalium*]. Tab., Kgl. Norsk. Vidensk. Selsk. Forh. 1934, VII, 23, 81-84. Trondheim (1935). **b - 535**

Unter den hier untersuchten Tieren sind auch *Balaenoptera musculus, B. borealis* und *Phocaena phocaena* zu bemerken.

**Schmidt-Nielsen S., Flood A., Stene J. & Sørensen N. A.** - Ueber den Vorrat des *Macrurus rupestris* an Vitamin A. [*De vitamina A in specie* « *Macrurus rupestris* »]. 2 Abb., Tab., Kgl. Norsk. Vidensk. Selsk. Forh. 1934, VII, 49, 174-177. Trondheim (1935). **b - 536**

Die Resultate der untersuchten 50 *Macrurus rupestris* sind in einer Tabelle zusammengestellt. Der Tintometerwert des Tranes ist auffallend hoch.

**Schmidt-Nielsen S. & S.** - A Note on the Vitamin D Content of Fish-meals [*De vitamina D in farinis ichthycis*]. Kgl. Norsk. Vidensk. Selsk. Forh. 1934, VII, 46, 164-166. Trondheim (1935). **b - 537**

Account of five experiments undertaken with meagre fish–meals. It has been confirmed that the codfish–meal, i. e. the bone–meal from cod, is rather poor in Vitamin *D.*

# OECOLOGIA

## Hydrobiologia - Adaptatio loco ambienti.

**Berg L. S.** - Ueber die amphiboreale (diskontinuierliche) Verbreitung der Meeresfauna in der nördlichen Hemisphäre [*De distributione amphiboreali faunae marinae in hemisphaerio septentrionali*]. Zoogeographica, II, 393-409. Jena (1933 & 1935). **b - 538**

Unter Beziehung auf seine frühere Arbeit über die bipolare Verbreitung der Organismen und die Eiszeit (1933) behandelt Vf. hier einen anderen Typus diskontinuierlicher Verbreitung der als amphiborealen bezeichneten Organismen, welche im Osten und Westen der nördlichen Halbkugel vorhanden sind, in der Mitte aber, in den hocharktischen Eismeeren fehlen. Verbreitung mehrerer amphiborealen Meerestiere und damit zusammenhängende Ursachen: die pliozäne Verbindung, die postglaziale Verbindung.

**Berg L. S.** - Rezente Klimaschwankungen und ihr Einfluss auf die geographische Verbreitung der Seefische [*De mutationibus climaticis proximis temporibus earumque influentia in distributionem geographicam piscium marinorum*]. Tab., Zoogeographica, III, 1, 1-15. Jena (1935). **b - 539**

Infolge einer während der letzten 50 Jahre stattgefundenen Zunahme der Luft-und Wassertemperatur ist eine merkbare Verschiebung gegen Norden der Lebenszonen verschiedener Fische und anderer Wassertiere beobachtet worden. Beispiele: *Scomber*, *Clupea*, *Gadus*, *Cardium*, *Eupagurus* u. a. Hydrologische und meteorologische Angaben.

**Breder C. M. Jr.** - Ecology of an oceanic Fresh-water Lake, Andros Island, Bahamas, with special Reference to its Fishes [*De oecologia lacus cuiusdam oceanici aqua prediti dulci in insula* Andras (*Bahamas*). *Agitur particulatim de eius piscibus*]. 10 figs., Zoologica, XVIII, 3, 57-88. New York (1934). **b - 540**

Andros Island is an uplifted coral reef formation without any connection with the mainland or other formations. Several marine Fishes that normally do not enter fresh water survive here probably on account of the large amounts of dissolved Ca in the fresh water lake.

**Brunelli G.** - La pauvreté de la vie dans la Mer Méditerranée, le stock biologique et l'étude des nitrates et des phosphates [*De vitae egestate in Mediterraneo, de* stock *biologico deque studio substantiarum nitratarum et phosphaticarum*]. 1 tabl., Comm. Int. Expl. Scient. Mediterr., Rapp. Assem. Plén. Bucarest, 6 pp. Paris (1935). **b - 541**

L'A. donne un résumé de nos connaissances et des hypothèses existantes pour expliquer la rareté des nitrates et des phosphates dans la Méditerranée et la pauvreté de la vie dans cette mer, en comparaison avec les autres mers du globe; il insiste sur la nécessité d'unifier les méthodes et les systèmes de recherche dans le but de pouvoir obtenir un résultat satisfaisant.

**Colman J. S.** - The Zonation of Intertidal Organisms [*De organismis interaestuosis quoad distributionem per zonas*]. Woods Hole Oceanogr. Instit. Rep. 1934, 20-21. Woods Hole, Mass (1935). **b - 542**

Brief account of a study made on Church Reef, near Plymouth, England, the object of which was to determine how far the intertidal community is a self-contained organism, and how far it is interwoven with the life of the sea around it.

**Dogiel V. & Petruschevsky G.** - Die Wirkung des Aufenthaltsorts auf die Parasitenfauna des Lachses während seiner verschiedenen Lebensperioden [*De habitat salmonis quoad eius effectum in faunam parasiticam, diversis cyclis vitalibus salmonis perdurantibus*]. Arch. Hydrobiol., XXVI, 4, 659-673. Stuttgart (1934). **b - 543**

Die auf jungen und geschlechtsreifen Lachsen aus dem Weissen Meer und den umgebenden Flüssen gemachten Beobachtungen zeigen, dass die Parasiten mariner Herkunft, besonders die Ectoparasiten, sich während des Aufenthaltes der geschlechtsreifen Lachse im Süsswasser vermindern, während Entoparasiten dagegen gar keine Veränderungzeigen. Die Vf. Vf. sind der Ansicht, dass *Eubothrium crassum* mariner Herkunft sei.

**Edmondson C. H.** - Reef and Shore Fauna of Hawaii [*De fauna in oris maritimis et in scopulis insularum* Hawaii]. 163 figs., Bernice P. Bishop Mus. Spec. Publ. 22, 1-295. Honolulu (1933). **b - 544**

Semipopular account of marine *Invertebrata, Protozoa, Porifera, Coelenterata, Platyhelminthes, Nemertini, Bryozoa, Brachiopoda, Echinodermata, Annelida, Mollusca*, marine *Arthropoda* and others found about the Hawaiian archipelago. Glossary, bibliography, index.

**Ekman S.** - Atlanten och Stilla Oceanen. En djurgeografisk studie [*De Atlantico atque Pacifico. Studium geographicum et faunisticum*]. Ymer 77-95. Stockholm (1934). **b - 545**

In der vorliegenden Arbeit wird nur die tropische Litoralfauna berücksichtigt. Der indowestpazifische Faunenreichtum. Ist der Atlantische Ozean ein Nebenmeer? Der tropische Westatlantik (Westindien usw.). Die ehemalige atlanto-pazifische Verbindung über Zentralamerika. Ist die westamerikanische Küste die Vermittlerin einer indopazifischen Fauna nach dem Atlantischen Ozean gewesen? Die ostpazifische Sperre. Die Tethys und ihre Fauna. Der tertiäre Klimawechsel. Schlussbemerkungen über die grossen tiergeographischen Ereignisse der mittleren Tertiärzeit.

**Ekman S.** - Tiergeographie des Meeres [*Maris geographia faunistica*]. 244 Abb., 542 S., Akad. Verlagsg. m. b. H. Leipzig (1935). **b - 547**

Vorwort und einleitende Bemerkungen: Systematik der Tiergeographie. Die tropische Litoralfauna: I. Einleitende Uebersicht. II. Die indo-westpazifische Fauna. III. Die Fauna des tropischen America. IV. Das tropische

Westafrika. Zusammenfassende Uebersicht über die tropische Litoralfauna. Die mediterran-atlantische und die sarmatische Fauna. Die atlantische boreale Fauna. Die nordpazifische gemässigte Fauna. Die arktische Fauna. Die Südhalbkugel südlich der Tropen: I. Terminologie. II. Die Faunen der kalten Meere. Meridiane Verbreitung und Bipolarität. Die benthale Tiefseefauna: Lebensbedingungen und allgemeine Zusammensetzung. Regionale Verbreitung und Herkunft der benthalen Tiefseefauna. Die obere pelagische Fauna: I Allgemeines, Kosmopoliten, Warmwasserplankton. II Kaltwasserplankton, neritische Fauna. Die untere pelagische oder bathypelagische Fauna.

**Fage L.** - L'Anchois de la Mer du Nord et l'assèchement du Zuiderzée [« *Engraulis encrasicholus* » *Maris Nordici atque exsiccatio in* Zuiderzee]. Bull. Inst. Océanogr., 668, 1-7. Monaco (1935). **b - 548**

Importance des bancs d'anchois pénétrant en migration de ponte dans le Zuiderzée, qui était non seulement le lieu de rendez-vous des adultes au moment de la ponte, mais une nursery dont les caractéristiques exceptionnelles pour la Mer du Nord étaient éminemment favorables à la croissance des larves. Repercussion des travaux d'assèchement entrepris dans cette région, sur le comportement de l'anchois: sans doute il est en ce moment désorienté et se heurte au barrage qui lui interdit ses frayères de choix; il en résulte une débandade des reproducteurs dont on suit les traces jusque dans la Baltique.

**Gorbunov G.** - Biological Indicators and Their Importance in the Study of the Arctic [*Indices biologici eorumque momentum pro Artide studenda*]. (In Russ,; Engl. Rés.). Arctica, II, 113-125. Leningrad (1934). **b - 549**

By the term « biological indicator » the A. designates definite organisms, – or complexes of organisms, – which characterize any hydrobiological element. However, this paper is concerned only with complexes of organisms, which are considered as hydrobiological (in particular marine) indicators of the hydrological regimen, and, in the case of individual organisms, with hydrological elements. In this latter case the A. proposes the terms: hydrobiological thermo-indicator, hydrobiological halino-indicator, etc. He discusses two distinctly different groups of indicators, namely: organisms of the plankton and those of the benthos, emphasizes their importance in the exploration of high-arctic districts and mentions also the conditions necessary for the single organisms to be used as biological indicators.

**Hagmeier A.** - Oekologische Untersuchungen der Biologischen Anstalt. *a*) Bodenfauna [*Investigationes biologicae a Statione biologica peractae. a*) *Fauna fundi marini*]. Biologe, III, 173-174. München (1934). **b - 550**

Description of the arcuate shoal in Barnegat Bay, N. Jersey, its marine fauna, fossils (*Foraminifera*) and geology of the bottom. Comparison between recent and fossil faunas shows a rapid destruction of some parts of the fauna after burial. Discussion on this phenomenon of destruction and the origin of the bottom muds of the delta.

**Manfredi P.** - Cause di spopolamento delle acque e rimedi [*Aquarum depopulatio. Causae et remedia*]. Boll. Pesca, Piscicolt. Idrobiol., XI, 4, 530-535. Roma (1935). **b - 562**

L'A. esamina i fattori più comuni d'inquinamento dell'acqua, dannosi alla vita dei pesci, distinguendo le sostanze nocive in solubili ed insolubili, ad azione rispettivamente meccanica e chimica. Poichè tali inquinamenti si verificano per lo più in vicinanza di centri abitati o di stabilimenti industriali, suggerisce alcuni accorgimenti da adottarsi, specialmente da parte degli industriali, per la bonifica delle acque di rifiuto.

**Moore H. B.** - On « Ledging » in Shells at Port Erin. The Relation of Shell Growth to Environment in *Patella vulgata* [*Agitur de prominentiis in conchis Molluscorum ad* Port Erin *pertinentium. Correlatio inter conchae accretionem et ambientem speciei « P. vulgata »*]. Proc. Malacol. Soc., XXI, Part 3, 213-222. London (1934). **b - 563**

**Moore H. B.** - A Comparison of the Biology of *Echinus esculentus* in Different Habitats. Part II [*De comparatione biologica inter diversa habitat speciei « E. esculentus »*]. 10 figs., 7 tabl., Journ. Mar. Biol. Assoc., XX, 1, 109-128. Plymouth (1935). **b - 564**

The inshore races of *Echinus esculentus* from the Isle of Man are thicker shelled and flatter, and on all grounds the urchins become taller with increasing age. There is a correlation between amount of growth in a given year, and the sea temperature. On the Breakwater the males and females grow at slightly different times of year. Concentric pigmented rings are demonstrated in the test, and are shown to be annual. They are used for estimating the growth rates on the different grounds. The duration of life is four to eight years (from A.).

**Moore H. B.** - The Biology of *Balanus balanoides*. IV. Relation to Environmental Factors [*De biologia speciei « Balanus balanoides ». Relationes de factoribus externis*]. 11 figs., 5 tabl., Journ. Mar. Biol. Assoc., XX, 2, 279-307. Plymouth (1935). **b - 565**

Relation of vertical distribution and of density of population to wave-exposure. Modifying influence of wave-exposure on the effect of level on growth rate, body weight, density of population, etc. Effect of level on maturation of the gonads, and the modifying influence of wave-exposure on this. Effect of temperature, salinity, oxygen, concentration, pH, and sediment. Effect of crowding. Settlement of larvae. Effect of current. Relation to other dominant organisms. Estimate of total barnacle population of the shore and its annual food output.

**Nicol Edith A. T.** - The Ecology of a Salt-marsh [*De Oecologia stagni cuiusdam salsi*]. 17 figs., 12 tabl., Journ. Mar. Biol. Assoc., XX, 2, 203-261. Plymouth (1935). **b - 566**

The salt-marsh under investigation is situated at Aberlady Bay on the south shore of the Firth of Forth, fifteen miles east of Edinburgh. The A. studied the fauna of the surface of the marsh, the fauna of the pools, the fauna of the estuary and the number of the animals in the marsh. Detailed observations were made on the conditions under which the animals in the pools are living: the salinity, the oxygen content, the alkali reserve, the hydrogen ion concentration, the temperature. The composition of the fauna and the relationship of the conditions to the life of the animals is discussed in connection with recent work on the physiology of some of the inhabitants of brackish water.

**Otto J. P. & Wielinga D. T.** - Hydrobiologische Notizen vom Brackwassergebiet der Provinz Friesland, speziell in der Nähe von Harlingen [*Notitiae hydrobiologicae quoad regionem aquae salmacidae in Provincia* Friesland, *precipue apud* Harlingen]. 2 Abb., Tijdschr. Nederl. Dierk. Vereen., III, 2/3, 49-74. Leyden (1933). **b - 567**

Misure idrografiche eseguite a Bagnole (Rovigno) nel 1929 e dati raccolti nell'Alto Adriatico durante il mese di marzo. Effetti delle temperature anormali sulle specie ittiche, costiere e di fondo.

**Stiasny G.** - Das Bipolaritätsproblem [*Agitur de problemate bipolari*]. Arch. Néerl. Zool., I, 1/2, 35-53. Leiden (1934). **b - 578**

Mit Bipolarität versteht Vf. hier Uebereinstimmung, nicht Identität, zwischen der arktischen und der antarktischen Fauna. Verschiedene Theorien in Bezug auf Relikten oder Migrationen sind hier erörtert um diese Uebereinstimmung zu beleuchten und Vergleiche gemacht zwischen den geographischen, geologischen, hydrographischen, klimatologischen, meteorologischen ökologischen und biologischen Verhältnissen der beiden Zonen.

**Wilson Branch C.** - A New and Important Copepod Habitat [*Novum quiddam habitat magnique momenti pro Copepodis*]. 8 figs., Smithson. Miscell. Collect., XCIV, 7, 1-13. Washington (1935). **b - 579**

The Copepods described here do not only live in the sand and mud while it is covered by the tide, but remain there after the tide has ebbed forming thus a fourth group fully as well defined as either of the three already accepted, (free-swimmers, commensals and parasites). Structure of the habitat: different sorts of sand; structure of these Copepodes in comparison with the other groups.

**Zenkewitsch L.** - Contribution à l'étude de la zoogéographie du Bassin polaire boréal et de ses rapports avec le passé géologique de cette région [*Contributio in zoogeographiam studendam bacini polaris borealis. Studium extenditur ad historiam geologicam eiusdem regionis*]. (En russe; Rès. all.). 3 tabl., Zool. Zhurn. Moskva, XII, 4, 17-34. Moskva (1933). **b - 580**

Considérations sur la biologie des Gadidés et des Salmonidés, dont quelques particularités se rapprochent de celles de la faune du bassin euxino-caspien. Par l'observation de plusieurs facteurs paléogéographiques, géologiques et océanographiques il resulte que l'alternation des régimes, cause première des spécialisations des faunes, est due à l'isolement du Bassin polaire Boréal.

**Zernov S. A.** - Hydrobiologie générale [*Hydrobiologia generalis*]. (En russe). 215 fig., diagr. & cartes, 1 pl. h. t., 503 pp., Edit. Biol. & Médic. de l'Etat. Moscou-Léningrad (1934). **b - 581**

Dans ce travail l'A. examine surtout les corrélations existantes entre les organismes aquatiques (surtout animaux et protistes) et le milieu environnant. L'ouvrage se compose des chapitres suivants: Origines, problèmes et méthodes des travaux hydrobiologiques. Traits fondamentaux de la distribution des organismes aquatiques et leurs rapports avec le milieu environnant. Quantité de l'eau dans le milieu environnant et à l'intérieur des organismes. Eau et fond de bassin comme sustentation des organismes aquatiques nageants et benthiques. Corrélation entre les organismes aquatiques et les sels et les substances organiques en solution dans l'eau. Corrélations entre les organismes aquatiques, les gaz dissous dans l'eau, la valeur du pH et la température de l'eau. Rapport entre les organismes aquatiques et la lumière. Corrélations alimentaires des organismes aquatiques entre eux et entre ces organismes et l'habitat. Etude générale du rendement des bassins aquatiques.

**An.** - History and Habits of Shellfish [*Historia et consuetudines Molluscorum et Crustaceorum*]. Fish. News 8. Aberdeen (1935). **b - 582**

**An.** - Fauna of Indian Salt Lakes [*De fauna in lacubus salsis Indianis*]. Nature, CXXXV, 3424, 1008. London (1935). **b - 583**

A certain tendency towards migration into brackish- and on into fresh - water has been observed in the salt lakes of Calcutta, especially with regard to *Pseudodiaptomus,* due to changes (silting) in the rivers and canals and following extension of the delta in the Bay of Bengal. (See also Rec. Ind. Mus., XXXVI, pt. I, 1934).

## Geographica distributio animalium.

**Adam W. & Leloup E.** - Sur la présence du Gastéropode *Crepidula fornicata* (Linné, 1758) sur la côte belge [*De «Crepidula fornicata» in litoribus Belgicis*]. Bull. Mus. R. Hist. Natur. Belgique, X, 45, 1-6. Bruxelles (1934). **b - 584**

Distribution de la Crépidule sur les côtes européennes: Angleterre, Pays-Bas, France, Belgique. Mode de distribution. Possibilité d'introduction dans une nouvelle région. L'acclimatation de la *Crepidula fornicata* à la côte belge ?

**Bàcesco Mihai** - *Metamysis Strauchi* (Czern.), Sars, *Katamysis Warpachowskyi* Sars et *Paramysis Helleri* (Sars), mysidacés nouveaux pour la faune de la Roumanie [*Mysidacea nova in fauna Rumena*]. 4 fig., Ann. Scient. Univ. Jassy, XXI, 468-485. Jassy (1935). **b - 585**

Après des considérations sur la morphologie et la systématique des espèces sus-mentionnées l'A. fait quelques observations au sujet de l'origine des Mysidacés d'eau douce de la Roumanie et tire la conclusion qu'on peut considérer le cours inférieur du Danube comme étant le domaine type d'une faune relicte, faune qu'il faut rapporter à l'époque de la Mer Sarmatique, sinon à une époque plus proche, celle des transgressions pliocéniques.

**Bell H. P. & Mac Farlane C.** - The Marine *Algae* of the maritime Provinces of Canada. I. List of Species with their Distribution and Prevalence. II. A Study of their Ecology [*De Algis marinis in provinciis maritimis Canadensibus. I. Elenchus specierum cum earum distributione atque praevalentia. II. Earum oecologiae studium*]. 10 maps., Canad. Journ. Res., IX, 3, 265-279; 280-293. Ottawa (1934). **b - 586**

In the list are included 30 *Chlorophyceae*, 41 *Phaeophyceae* and 49 *Rhodophyceae*. In addition to critical notes regarding certain forms, the striking differences in the marine flora from region to region are indicated by diagrams and distribution maps for a number of species. Three different geographical and ecological regions are distinguished.

**Birstein J. A.** - Materialien zur geographischen Verbreitung der Wassertiere der U. S. S. R. 4. Zur Frage über die Herkunft der marinen Crustazeen in den Flüssen des Ponto-Kaspischen Beckens [*Res collectae quoad propagationem geographicam animalium aquaticorum ad U. R. S. S. pertinentium. 4. Quaestio de origine Crustaceorum marinorum in fluminibus ponto-caspicis*]. (In Russ.; Dtsch. Rés.). 1 Karte, Zool. Zhurn., XIV, 4, 749-761. Moskva (1935). **b - 587**

Vf. schlägt zwei Hypothesen zur Erklärung der Herkunft der marinen Krebse in den Flüssen des Pontokaspischen Beckens vor. Er schliesst aus der Gegenüberstellung beider Hypothesen einige Folgerungen, welche ihn zwingen, die Hypothese der Relikten-Herkunft der marinen *Malacostraca* in diesen Flüssen abzulehnen und die aktive Wanderung derselben aus dem Meere in die Flüsse anzuerkennen. Er bespricht die geologische Geschichte des Ponto-Kaspischen Beckens, welcher ein ganz seltenes Beispiel einer Mischfauna aus marinen und Süsswasser-Elementen darstellt.

**Böhm A.** - Zur Verbreitung einiger Dinoflagellaten im Südatlantik [*Dinoflagellata. Quaestio de eorum distributione per Atlanticum merid.*]. 11 Abb., Bot. Arch., XXXV, 4, 397-407. Leipzig (1933). **b - 588**

Bericht von der Meteor- Expedition 1925-27 über 4 neue Arten: *Prorocentrum sigmoides*, *Amphisolenia elegans*, *Centrodinium pulchrum* und *C. eminens* und 18 für diese Gegend neu gefundenen Arten.

**Bourret R.** - Les Serpents marins de l'Indochine Française [*De serpentibus marinis in Indosinica regione Gallica*]. 20 fig., 10 pl., Inst. Océanogr. Indoch., Stat. Marit. Cauda, Note 25, 1-69. Hanoi (1934). **b - 589**

Caractères génériques et spécifiques des *Hydrophiidae*. Biologie des Serpents de mer. Description des espèces indochinoises appartenant à la famille des *Hydrophiidae*.

**Delpino I.** - La diffusione in Europa dell'*Eriocheir sinensis* M. Edw. [« *E. Sinensis* ». *Quaestio de eius diffusione per Europam*]. 3 fig., Rass. Faun., II, 1, 68-72. Roma (1935). **b - 590**

Breve rivista dei lavori riguardanti la strana migrazione di questo crostaceo, diffusissimo in Cina, e da qualche anno diffuso anche nel Mar Baltico e nel Mare del Nord.

**Fage L.** - Sur la localisation dans les eaux moyennes du Pacifique d'un Mysidacé pélagique peu connu, *Ceratolepis hamata* G. O. Sars [*De Mysidaceo pelagico haud noto « C. hamata », in mediis aquis Oceani Pacifici reperto*]. 1 fig., C. R. Acad. Sc., CC, 1774-1776. Paris (1935). **b - 591**

Le premier exemplaire a été trouvé par l'expédition Challenger 1873-1876 et décrit par Sars sous le nom de *Ceratolepis hamata* en 1885. Grâce aux autres 200 exemplaires récoltés au cours de la dernière croisière du Dana en 1928 l'A. a pu en compléter la description. Pour ses caractères ce Mysidacé doit être attribué au subordre des *Lophogastridea*.

**Gudger E. W.** - The geographical Distribution of the Whale-Shark [*Quaestio de distributione geographica speciei « Rhineodon typus »*] Proc. Zool. Soc. 1934, Part. 4, 863-893. London (1935). **b - 592**

**Gurjanova E.** - Zoogeographical Study of the Arctic Isopods [*Isopoda arctica. Studium zoogeographicum*]. (In Russ.; Engl. Rés.). 2 figs., Arctica, II, 127-152. Leningrad (1934). **b - 593**

After a general introduction dealing with the character of the Isopoda fauna of the Arctic seas, author gives a summarized account of this fauna in the single seas (Barents Sea, White Sea, Kara Sea, Sea Laptev (Nordenskjöld), Oriental Siberian and Tschukotskij Seas, Beaufort Sea, the southwestern part of the Arctic Sea, Norwegian Sea and Greenland Sea). She considers then especially the species of the Atlantic and the Pacific Oceans which penetrate in the eastern and the western parts of the Arctic, the factors which contribute to the propagation of these species and the barriers existing on their way of penetration into the Arctic.

**Gurjanova E.** - Zur Zoogeographie der *Crustacea Malacostraca* des Arktischen Gebietes [*Crustacea malacostraca regionis Arcticae quoad eorum zoogeographiam*]. 1 Abb., Zoogeographica, II, 555-571. Jena (1933 & '35). **b - 594**

Abgesehen von den gewöhnlichen arktisch- borealen Formen unterscheidet Vf. in der Arktis wenigstens 7 selbständige zoogeographische Gruppen arktischer Crustaceen; eine originelle autochthone hocharktische Fauna; zirkumpolare hocharktische Formen, die nicht in das subarktische Gebiet des Barents-Meeres und in die Dawis-Strasse eindringen; Formen rein pazifischer Herkunft. Formen des Polarbeckens; Formen subantarktischen Charakters; nordatlantische Arten von borealem Typus und eine Reliktfauna, von welcher die Aestuarien der grossen sibirischen Ströme besiedelt werden. Liste der für die Fauna des Karischen Meeres neuen Arten.

**Hanström Bertil** - De svenska fynden av kinesiska Ullhandskrabban [« *Eriocheir sinensis* » *in Suetia repertus*]. 1 map., 1 fig., Fauna o. Flora, 6, 273-277. Uppsala (1934). **b - 595**

Table showing the funds of *Eriocheir sinensis* in Sweden from February 1932. Some remarks as to its increasing distribution.

**Herre A. W. C. T.** - Labuan, Borneo, a New Locality for the Whale Shark [*De regione Labuan (in Borneo) ac nova localitate qua reperitur « Rhineodon »*]. Science, 81, 2097, 253-254. New York (1935). **b - 596**

A specimen of *Rhineodon typus* was seen at Labuan, a small island on the northwest coast of Borneo. This gives a new locality in plotting the distribution of whale Shark.

**Kulmatycki W. J.** - Beitrag zur Kenntnis der Verbreitung der Chinesischen Wollhandkrabbe in Mitteleuropa [*Observationes quoad scientiam et distributionem speciei «Eriocheir sinensis» per Europam Centralem*]. Zool. Anz., CVI, 164. Leipzig (1934). **b - 597**

Verzeichnis von etwa 30 Arbeiten.

**Santucci R.** - Ricerche sulla fauna del Mar Rosso. La biologia delle acque eritree. Risultati delle prime osservazioni (Dic. 1932-giugno 1933) [*Investigationes in faunam Maris Rubri. De biologia aquarum Erythraearum. Resultatus ex prioribus observationibus*]. 44 fot., 5 graf., Mem. R. Comit. Talassogr. Ital., N°. CCXIV, 1-119. Venezia (1934). **b - 610**

Notizie sull'organizzazione del laboratorio di biologia marina a Massaua, sui suoi impianti, apparecchi ed attrezzi. Località nelle quali sono state svolte le ricerche. Esame del materiale raccolto durante le crociere compiute lungo le coste eritree e tra le isole dell'arcipelago Dahlak.

**Santucci R.** - Le ricerche per lo studio della biologia della fauna delle acque eritree (Nota preliminare) [*Investigationes ad studendam biologiam faunae aquarum Erythraearum*]. Boll. Mus. Labor. Zool. e Anat. Comp. Genova, XIV, 75, 3-7 Genova (1934). **b - 611**

L'A. riassume brevemente i primi risultati ottenuti dalle ricerche faunistiche sui banchi madreporici dell'Eritrea; mette in evidenza in modo particolare le condizioni nelle quali si trovano attualmente detti banchi per quanto concerne le Ostriche da madreperla e da perle.

**Santucci R.** - La presenza nelle acque del Mar Rosso del *Rhineodon typus* A. Smith, squalo gigantesco [« *R. typus* », *squalus permagnus in aquis maris Rubri*]. 7 fig., Boll. Mus. Labor. Zool. e Anat. Comp. Genova XIV, 76, 3-14. Genova (1934). **b - 612**

L'A. segnala per la prima volta la cattura nelle acque del Mar Rosso del *Rhineodon typus*, squalo gigantesco dell'Oceano Indiano e Pacifico, dando la descrizione dei particolari ancora sconosciuti o poco noti.

**Santucci R.** - I risultati delle prime osservazioni sulla fauna delle acque territoriali eritree (Dicembre 1932-maggio 1933) [*Resultatus ex prioribus observationibus quoad faunam aquarum territorialium Erythraearum*]. Boll. Pesca, Piscicolt. Idrobiol., XI, 1, 94-113. Roma (1935). **b - 613**

Studio fisico-chimico-biologico dei banchi a *Meleagrina* e a *Trochus* nel mare Eritreo. Distribuzione delle Oloturie e studio dei fondi sui quali vivono. Ricerche sui Clupeidi e sugli Scombridi. Distribuzione degli Squali più comuni e osservazioni sulla loro alimentazione, sul periodo di maturità sessuale e sulle zone di pesca.

**Schmidt J. P.** - On the Zoogeographical Distribution of the Chief Marine Food-Fishes in the Western Part of the North Pacific [*Quaestio de distributione zoo-geographica praecipuorum piscium edulium marinorum per regiones occidentales Oceani Pacifici Sept.*]. (In Russ.). Bull. Pacif. Comm. Acad. Sc. U.S.S.R., 3, 33-37. Leningrad (1934). **b - 614**

Report sent to the Fifth Pacific Science Congress. Account of the study carried out by the Expedition organized by Soviet Scientific institutions to the Japan, Okhotsk and Bering Seas in 1932, on the zoogeographical distribution of the following marine food-fishes in the area under investigation: *Gadus callarias macrocephalus* Tilesius, *Theragra chalcogramma* (Pallas), *Hippoglossus stenolepsis* Schmidt, *Reinhardtius hippoglossoides* (Walb.), *Atherestes evermanni* Jordan et Starks, *Platessa quadrituberculata* (Pallas), *Pleuronectes stellatus* Pallas, *Limanda aspera* Pallas, as well as other species of *Pleuronectes* L.

**Schmidt P. & Taranec A.** - On the New Southern Elements in the Ichthyofauna of the Northern Part of the Sea of Japan [*Elementa nova meridionalia in fauna ichthyca regionis septentrionalis Maris Japonici*]. (In Russ. & Engl.). C. R. Acad. Sc. U. R. S. S., II, 9, 591-595. Leningrad (1934). **b - 615**

Complexity of the nature of the ichthyofauna of the Sea of Japan, containing an unexpectedly large proportion of southern elements. Results of an investigation carried out by the Pacific Scientific Institute of Fisheries and Oceanography at Vladivostok extending considerably to the North the boundaries of the geographical distribution of species known only from the southern part of the Sea of Japan. Attention is drawn to the distribution of *Sphyrna zygaena* L., *Cololabis saira* (Brevoort), *Trichiurus japonicus* Temm. & Schleg., *Daicocus Peterseni* (Nyström), *Ocynectes maschalis* Jordan & Starks, *O. modestus* Snyder, *Paralichthys olivaceus* Temm. & Schleg., *Kareius bicoloratus* (Basilevsky) and *Verasper moseri* Jord. & Gilbert.

**Setchell W. A.** - Geographic Elements of the Marine Flora of the North Pacific Ocean [*Elementa geographica florae marinae Oceani Pacifici Sept.*]. 12 figs., Amer. Naturalist., LXIX, 560-577. New York (1935). **b - 616**

This work deals principally with the marine Benthos, the Sea grasses and the Seaweeds: classification, different species, their origin and distribution; relations and vicarious pairs of species; hypothesis on Tethys and Oceanus.

**Stechow E.** - Vorkommen eines nordischen Hydroiden, *Corymorpha Sarsi* Steenstrup, im Schwarzen Meer. [« *C. Sarsi* » *in Ponto Euxino reperto*]. Zool. Anz., CVII, 197-198. Leipzig (1934). **b - 617**

**Takahashi K.** - Contribution to the Study of Japanese *Arenicola*. Part I. Notes on the Habits and Distribution of *Arenicola* in Japan [*Arenicola ad Japoniam pertinentia. Contributio in eadem studenda. Pars Ia. De habitat atque distributione per Japoniam*]. Sc. Rep. Tokyo Bunr. Daig., sect. B., I, 24, 271-279. Tokyo (1934). **b - 618**

Ecology and geographical distribution are studied for two species: *A. cristata* and *A. Claparedii*.

**E. L.** - Ullhandskrabban, *Eriocheir*, fångad vid Öland [« *Eriocheir* » *ad insulam* Oeland *pertinens*]. Fauna o. Flora, 1, 48. Uppsala (1934). **b - 619**

Short note about the *Eriocheir sinensis* having been found probably for the first time at the Swedish coast.

## Migrationes et marchatura.

**Bahr K.** - Die Neukuhrener Forellenmarkierungen in den Jahren 1930-1934 [*De marchaturis tructarum, A. 1930/34*]. 1 Abb., 1 Karte, 3 Tab., Ber. Dtsch. Wiss. Komm. f. Meeresf., N. F., VII, 4, 494-510. Leipzig (1935). **b - 620**

Markierung und Aussetzung, Zahl der Wiederfänge Wachstum der wiedergefangenen Forellen. Vergleich des Wachstums von Bach- und Meerforellen. Die Möglichkeit einer wirtschaftlichen Auswertung der bisherigen Markierungsergebnisse.

**Bertin L.** - Exposés de biologie zoologique, 2: Migrations et Métamorphoses de l'anguille d'Europe [*Biologia zoologica. Migrationes et metamorphosis anguillae europaeae*]. 18 fig., 57 pp. Actualités Scient. et Industr., No 264. Paris (1935). **b - 621**

**Blair A. A.** - Ages at Migration of Atlantic Salmon in Miramichi River [*Quaestio de aetate et migratione speciei « Salmo salar » in flumen Miramichi*]. 7 tabl. Journ. Biol. Bd. Canada, I, 3, 159-169. Toronto (1935). **b - 622**

In 1.557 fish examined, the groups, based upon years in the sea and spawning marks, were: grilse or 1 + 2 and 2 +, 3 and 3 + and 1 S. M. and 2 S. M. groups. The 2 and 2 + form 85,1 per cent of the total (grilse excluded), and 1 S. M. 12,8 per cent, and the 3 and 3 +, 2,1 per cent.

Of fish with one spawning mark, 68,3 per cent first spawned as grilse, 29.9 per cent after two sea winters, and 1,8 per cent after three sea winters. The S. M. groups had 11 per cent return to river in less than a year after first spawning, the remainders in little better than a year. Most of the fish with two spawning marks had the same length of absence on both occasions.

Only four smolt ages were found. (A.).

**Bowman A.** - Spawning Migrations of Plaice and Lemon Soles in Scottish Waters [*De migratione pro reproductione specierum « Pleuronectes platessa » et « P. microcephalus » in aquis Scotis*].

2 tabl., VIIe Congr. Int. Aquicult. & Pêche, Paris 1931, Communications, III, 62-72, Impr. du Loiret. Orléans (1935). **b - 623**

It is the purpose of the present communication to show how close the relation may be between the movements of the water masses and the spawning migrations of the two species studied.

**Bretthofer W.** - Wanderung der Fischschwärme und ihr Einfluss auf die Hochseefischerei [*De piscium banchis quoad eorum migrationem pro influentia in piscationem in altum*]. Dtsch. Fischwirtsch., II, 38, 722-723. Berlin (1935). **b - 624**

Nach einigen allgemeinen Betrachtungen über die unberechenbaren Umstände, denen die Hochseefischerei unterworfen ist, bespricht Vf. eingehender das oft vorkommende plötzliche Auftauchen und Verschwinden der Fische mit besonderer Berücksichtigung des plötzlichen Auftauchens ungeheurer Schollenmengen vor der Elbemündung in den Monaten April bis Juni der Jahre 1913 und 1914.

**Chiappi T.** - Persistenza di un ciclo nella montata delle cieche (anguilline) e variazioni nelle piogge estive. III Nota [*Agitur de adsiduo quodam cyclo quoad anguillularum ascensum pro variationibus pluviarum aestivarum*]. Boll. Pesca, Piscicolt. Idrobiol., X, 6, 745-751. Roma (1934). **b - 625**

L'A. studia le variazioni periodiche nella montata delle anguilline in rapporto agli anni dispari e pari, alle stagioni e ai fenomeni fisici terrestri ed astronomici.

**Chiappi T.** - Variazioni quantitative nella montata delle cieche [*Variationes quantitativae quoad anguillarum caecarum ascensum*]. Riv. Biol., XIX, 2, 303-310. Perugia (1935). **b - 626**

In precedenti pubblicazioni l'A. ha segnalato una variazione periodica quantitativa nella montata annuale delle anguilline provenienti dal mare. In otto annate consecutive (1922-1929) riconobbe un ciclo completo costituito da una curva decrescente per i primi 4 anni e successivamente crescente, sulla quale veniva a sovrapporsi una oscillazione biennale; nel presente lavoro viene confermato il ciclo in corso. L'A. esamina le varie cause che possono influire e, basandosi sopra dati pluviometrici raccolti in varie località, viene a segnalare anche per le pioggie primaverili-estive un analogo ciclo e conclude con l'attribuire a questa causa il maggiore o minore quantitativo di cieche d'anguilla che rimontano dal mare in autunno.

**Hansen P. M., Jensen A. J. & Tåning Å. V.** - Cod Marking Experiments in the Waters of Greenland 1924-1933 [*Experientiae quoad marchaturas in « Gadus » in aquis Groenlandicis 1924-1933*]. Medd. Komm. Danm. Fisk.- o. Havunders., Ser. Fisk., X, 1. København (1935). **b - 627**

**Johnson M. W.** - Seasonal Migrations of the Wood-Borer *Limnoria lignorum* (Rathke) at Friday Harbor, Washington [*Migrationes pro anni temporibus speciei « L. lignorum » in* Friday Harbor, Wash.]. 1 fig., 5 tables, Biol. Bull., LXIX, 3, 427-438. Lancaster, Pa. (1935). **b - 628**

*L. lignorum* is a widely distributed marine wood-boring crustacean which is frequently found in vast numbers in infected areas where environmental conditions, especially salinity, are favorable to its requirements. In the paper some conclusions are drawn on account of the effective time to apply protective paints, etc.

**Leim A. H.** - Cod and Haddock Tagging [« *Gadus morrhua* » *et* « *G. aeglefinus* ». *Quaestio de marchatura*]. Progr. Rep. Atlant. Biol. Stat., 15, 3. St. Andrews, N. B. (1935). **b - 629**

**Maljatskij S. M.** - Sur la question des migrations de quelques poissons de la Mer Noire (Communication préliminaire) [*Agitur de migrationibus aliquorum piscium ad Pontum Euxinum pertinentium* (*Communicatio prior*)]. (En russe, rés. franç. & géorg.). 6 graph., 1 carte h. t., Trav. Stat. Piscic. & Biol. Géorgie, I, 1, 211-236. Batoum-Tiflis (1934). **b - 630**

Sur la base de recherches sur les migrations dans la Mer Noire des poissons tels que: *Caspialosa pontica typica* (Eichw.), *C. pontica* var. *danubii* Antipa, *C. maeotica* (Grimm), *C. tanaica* (Grimm), *C. nordmanni* Antipa, *Engraulis encrasicholus maeoticus* Pusanow, *E.* var. *ponticus orientalis* Mayorowa, *E.* var. *ponticus occidentalis* Mayorowa, *Mugil* sp. sp., *Mullus barbatus* L., l'A. distingue deux types de migrations des poissons, dont les unes dépendent des changements qui surviennent dans le genre de vie des poissons, tandis que les autres sont pour la plupart en fonction de certains procès physiologiques qui se déroulent dans l'organisme du poisson. Il étudie les caractéristiques particulières de ces deux formes de migrations avec référence spéciale à leur relation avec le système des courants dans la Mer Noire.

**McMottley C.** - A Note on the Rôle of Vision in the Spawning Migration of Trout [*Agitur de momento quod visio suscipit inter migrationem pro reproductione speciei « S. kamloops »*]. Copeia 2, 98. New York (1934). **b - 631**

The fact that a blind *Salmo kamloops* has undertaken a normal spawning migration upstream must be due to sensory stimuli rather than visual ones.

**Mikhajlov G.** - Les migrations du printemps et les objectifs de la flotte des chalutiers [*De migrationibus verninis deque propositis classiculae piscatoriae retis auxilio reptantis*]. (En russe). Tabl., Za Rybn. Ind. Severa, 5, 34-36. Leningrad (1935). **b - 632**

**Miyosi Kiyohide** - Influences of the Quantity of Flow, the Temperature of Water etc., upon the Ascent of Fish-way by *Plecoglossus altivelis* (T. & S.) [*Influentia quantitatis currentiae, aquae temperaturae etc., in ascensionem piscium migrantium et in eorum cursum. Perpenditur species* « *P. altivelis* »]. (Jap. Text, Engl. Rés.). 5 tabl., Bull. Jap. Soc. Scient. Fish., IV, 1, 47-53. Tokyo (1935). **b - 633**

Fairly systematic influences of the quantity of flow, the temperature of water, etc. upon the ascent of fish-way by *Plecoglossus altivelis* are recognizable, when the probabilities of actual coincidences are compared with those of accidental ones.

**Nall G. H.** - Sea-Trout of the Montrose District. Part III. - The Migrations of Sea-Trout [*De tructa marina in districtu* Montrose. *Tructae marinae migrationes*]. 5 tables, 1 map., Fish. Bd Scotl., Salmon Fish., III, 4-24. Edinburgh (1935). **b - 634**

The present paper, which forms the continuation of two previous ones, describes the migrations of sea-trout ascertained (*a*) by earlier marking operations, (*b*) by marking in the Montrose district. It is established that, though in some districts the majority of sea-trout may confine their range of travel chiefly to the estuarial and shore waters near their native rivers, in others they travel long distances in the coastal waters, and not a few of them far out into the open sea.

**Netchaeff A.** - Marking of Spring Mackerels (*Scomber scomber* L.) in the Spring of 1933 [*De marchaturis verninis speciei « S. scomber ». Vere*

*1933*]. (In Bulg., Engl. Rés.). Trav. Stat. Ichthyol. à Sozopol-Bulgarie, II, 14-26. Burgas (1934). **b - 635**

**Strubberg A. C.** - Marking Experiments with Cod at the Faroes. II. Second Report. Experiments in 1923-1927 [*De marchaturis in « Pleuronectes » in insulis* Faroe. *II. Relatio secunda. Experientiae peractae 1923-1927*]. Medd. Komm. Danm. Fisk. o. Havunders., Ser. Fisk. IX, 7. København (1933). **b - 637**

**Sugano Susumu** - The Shoreward Migration of Japanese King Crabs at a Fishing Ground in Western Kamtchatka [*De migrationibus ad oram maritimam speciei japonicae « Limulus moluccanus » in aquis piscosis in* Kamtchatka *occid.*]. (In Jap., Engl. Rés.). 2 fig., Bull. Jap. Soc. Scient. Fish., IV, 2, 98-100. Tokyo (1935). **b - 638**

Examination of set-net catches of Japanese King Crabs in Voroskaya fishing ground from mid-June to late-August 1934. Conclusions as to the direction and time of migration according to the catches found in the nets.

**Templeman W.** - Lobster Tagging in the Gulf of St. Lawrence [*De cancrorum marchatura in Sinu* St. Lawrence]. 4 figs., 3 tabl., Journ. Biol. Bd. Canada, I, 4, 269-278. Toronto (1935). **b - 639**

An individual lobster may occasionally move several kilometres in one day, yet the resultant of all the movements of a group of Lobsters during the year is an average removal of only about 8 kilometres from their point of liberation. An occasional lobster, however, may have wandered 30 to 40 kilometres away during this time. The Lobsters scatter equally in both directions along shore. Females apparently wander further than males. The intensity of fishing is very high in the areas examined, probably about 40 per cent of the larger Lobsters being caught during a two months' fishing season.

**Uno Michio** - Horizontal Migraton of the Japanese King-crab, *Paralithodes camtschatica* (Tilesius), of the West Coast of Kamtchatka [*De migrationibus horizontalibus speciei japonicae « P. camtschatica », ad litus occid. regionis* Kamtchatka *pertinentis*]. 1 fig., 2 tabl., Bull. Jap. Soc. Scient. Fish., III, 5, 239-241. Tokyo (1935). **b - 640**

Horizontal migration of the Japanese king-crab was studied by digesting the record of tagging experiments performed by H. Marukawa (Journ. Imp. Fish. Exp. Stat. 4, 1933). The method of treatment adopted in the present paper is as follows: for the tagged Crabs liberated in the northern, central and southern parts of the sea off the coast of Kamtchatka, the regional percentage distribution of recaptures was calculated separately in each successive season, i. e., the season of liberation, the next season, and so on. The migration was inferred from the difference of the distribution in a season from that in the preceeding season.

**An.** - Migrations of Animals [*Animalium migrationes*]. Nature, CXXXVI, 3439, 500-501. London (1935). **b - 641**

Account of a discussion at the zoological section of the British Association at Norwich on September 10, 1935. Dr. Mackintosh described the migrations of Whales, and Dr. Russell those of Fishes.

**An.** - Cod Tagging Experiments [*Experientiae pro merluccii marchatura*]. 1 map., Rep. Newfoundl. Fish. Research. Laborat., II, 3, 37-39. Newfoundland (1935). **b - 642**

Results of tagging experiments on cod undertaken in 1934, from which some conclusions are drawn on account of the major migrations of cod in the Newfoundland waters, as well as of the inter-relationship of bank and inshore cod.

**Deutsche Seewarte** - Zur Einschleppung der Wollhandkrabbe [*Introductio in Europam speciei « Eriocheir sinensis »*]. Seewart, IV, 6, 266. Hamburg (1935). **b - 643**

Einige Beispiele, welche zeigen, wie die Wollhandkrabbe durch Fahrzeuge mitgeschleppt worden ist.

## Animalium societas — Biocenosis — Symbiosis.

**Allee W. C.** - Concerning the Organization of Marine Coastal Communities [*De biocenosi in litoribus marinis*]. Ecol. Monogr., IV, 3, 541-554. Brooklyn (1934). **b - 644**

The existence of a superorganismic unity is pointed out showing the tendency not alone between plants and animals to form biotic communities but also between the biota and the environment. Importance of recognizing the essential unity of this united relationship for oceanic studies.

**Antipa G.** - L'organisation générale de la vie collective des organismes et du mécanisme de la production dans la biosphère [*Agitur de organisatione generali vitae socialis organismorum atque etiam reproductionis mechanismi in biosphaera*]. Acad. Roumanie études et rech , 25, 5-84. Bucarest (1935). **b - 645**

Exposé des résultats d'une longue série de recherches sur les problèmes biologiques et particulièrement sur le mécanisme de la production dans les eaux du Danube inférieur et de la Mer Noire, qui, des conditions ainsi variables et compliqués présentées par cette mer, ont ammené à des considérations biologiques générales sur la production dans d'autres mers et Océans et enfin sur la Biosphère entière. L'A. a pu arriver aux lois générales, gouvernant le déploiement de la vie animale et vegetale dans les eaux, la formation des biocénoses qui ne sont pas « un phénomène sporadique et facultatif, mais un lois général pour tous les êtres », pourvu que la vie individuelle soit subordonnée à la vie collective et à la résultante de l'activité vitale de tous les composants. Rôle de la « Biocénotique » et de la « Biosociologie ». Les principes fondamentaux de l'organisation sociale et économique de la vie collective, en sa totalité, sont généraux et universels.

**Arcangeli A.** - Il genere *Jaera* Leach nel Mediterraneo e la convivenza occasionale di *Jaera hopeana* A. Costa con *Sphaeroma serratum* (Fabr.) Torino, XLIV, serie 3, 56, 273-292. Torino (1934). **b - 646**

Descrizione delle due specie *J. hopeana* ed *J. marina* e loro area di diffusione. Osservazioni e deduzioni sulla associazione di *Jaera hopeana* con *Sphaeroma serratum*, riscontrata a Cagliari. Bari, Tunisia, Marocco, Francia Mediterranea ed Atlantica.

**Cecchini C. & Parenzan P.** - Anfipodi del Golfo di Napoli [*Amphipoda Sinus Neapolitani*]. 35 fig., Pubbl. Staz. Zool. Napoli, XIV, 2, 1934-1935, 153-250. Napoli (1935). **b - 647**

Ordinamento sistematico, distribuzione delle specie e studio delle diverse biocenosi degli Anfipodi raccolti in oltre mille dragaggi compiuti sistematicamente per quattro anni nell'esplorazione del Golfo di Napoli, allo scopo di conoscere la formazione delle biocenosi bentoniche. Dal materiale esaminato risultano 16 specie nuove per il Golfo di Napoli.

**Fischer-Piette E.** - Sur l'équilibre des faunes: interactions des moules, des pourpres et des cirripèdes [*De fauna quoad eius aequilibrium. Correlationes inter* «*Mytilus edulis*», «*Purpura lapillus*» et «*Balanus balanoides*»]. C. R. Soc. Biogéogr., XCII, 47-48. Paris (1934). **b - 648**

**Fraser H.** - The Fauna of the Liverpool Bay Shrimping Grounds and the Morecambe Bay Prawning Grounds as revealed by the Use of a Beam-Trawl [*De fauna regionum ubi invenitur* «*Cancer crangon*» *in Baja* Liverpool, *et* «*Palaemon*» *in Baja* Morecambe, *ut visa est per retia tracta*]. Proc. & Trans. Liverpool Biol. Soc., XLVIII, 65-78. Liverpool (1935). **b - 649**

A comparative discussion on the faunas of the Morecambe Bay and the Mersey Estuary, analysis and synoptic table. Relationship between fauna and physical conditions.

**Hiro F.** - A Study of Cirripeds Associated with Corals Occurring in Tanabe Bay [*Cirripedia cum Corallis consociata in baja* Tanabe]. 12 figs., 2 tabls. Rec. Oceanogr. Works Japan, Nat. Rés. Counc., VII, 1, 45-72. (Contr. Seto Marine Biol. Labor. n. 43). Tokyo (1935). **b - 650**

Key to species and varieties of Cirripeds associated with Corals occurring in Tanabe Bay. Description of a single species of *Creusia* and 15 species of *Pyrgoma*. Remarks on distribution.

**Kidder G. W. & Summers F. M.** - Taxonomic and Cytological Studies on the Ciliates Associated with the Amphipod Family *Orchestiidae* from the Woods Hole District. I. The Stomatous Holotrichous Ectocommensals [*Ciliata cum Amphipodis familiae Orchestiidae consociata in regione* Woods Hole. *I. Holotricha ectocommensales*]. 2 figs., Biol. Bull., LXVIII, 1, 51-68. Lancaster, Pa. (1935). **b - 651**

Three species of the amphipod family *Orchestiidae* were investigated for ectocommensals. These forms are *Talorchestia longicornis* (Say), *Orchestia agilis* Smith, and *O. palustris* Smith. The material was collected in the vicinity of Woods Hole, Mass. The stomatous, holotrichous Ciliates that live as ectocommensals on the Amphipods studied belong to two genera: *Allosphaerium* gen. nov., of which there are five species, and *Chilodonella* Strand, of which there are three new species. All species of Ciliates are well adapted to their environment, being small and flat and possessing ventrally placed thigmotactic cilia.

The binary fission of one species (*Allosphaerium convexa* gen. nov. sp. nov.) is described.

**Leloup E.** - Contributions à l'étude de la faune belge. V. Les Hydropolypes épizoïques du ver polychète *Aphrodite aculeata* (Linné) [*Contributio in faunam belgicam studendam. De Hydropolypis epizoicis in specie* «*A. aculeata*»]. Bull. Mus. R. Hist. Natur. Belgique, X, 41, 1-6. Bruxelles (1934). **b - 652**

Parmi ces Hydropolypes l'A. reconnu la présence d'espèces qui vivent à la côte belge: *Hydrallmania falcata Laomedea (Obelia) longissima, L. (O.) spinulosa, Campanularia Johnstoni, Hydractinia (Podocoryna) carnea, Bougainvillia ramosa* forme *muscus* et *Perigonimus repens*.

**Maury A.** - La biologie des crustacés [*De biologia Crustaceorum*]. Bull. Soc. Amis Inst. Océanogr., XVII, 48, 7-8; 49, 6-8. Le Havre (1935). **b - 653**

Description de quelques associations entre les méduses et les crustacés, les actinies et les crustacés et illustration de quelques cas particuliers d'association du Bernard l'Hermite avec des actinies, et avec les annélides du groupe des *Néreis*. L'A. distingue pour conclure les deux genres d'associations entre deux espèces différentes, c. à d. les associations mutualistes et les associations unilatérales, en ce qui concerne les avantages que chaque espèce en tire.

**Okada Yo K.** - *Amblyosyllis nigrolineata*, une nouvelle variété de *A. speciosa* Izuka [«*A. nigrolineata*», *varietas nova ex* «*A. speciosa*»]. 2 figs., Annot. Zool. Jap., XIV, 3, 317-320. Tokyo (1934). **b - 654**

Description de la nouvelle variété que l'on trouve en abondance à Misaki, toujours en association avec une éponge déterminée. L'A. donne la diagnose et illustre les caractéristiques de cette nouvelle forme.

**Pearse A. S.** - Inhabitants of certain Sponges at Dry Tortugas [*De inquilinis in Spongiis quibusdam in* Dry Tortugas]. Carnegie Inst. Washington Publ., 435, 119-134. Washington (1934). **b - 655**

Over 17000 animals have been found living in a large loggerhead sponge, *Speciospongia vespara*. A new pontonid shrimp *Coralliocaris pearsei* is described.

**Smith H. G.** - On the Presence of Algae in certain *Ascidiacea* [*De Algis in quibusdam Ascidiaceis*]. 5 figs., Ann. and. Magaz. Natur. Hist., XV, 90, 615-626. London (1935). **b - 656**

Discussion on the association between Algae and *Diplosoma virens, D. voeltzkowi, D. viride* and *Trididemnum cyclops*; origin and benefit of the association.

**Spärck R.** - On the Importance of Quantitative Investigation of the Bottom Fauna in Marine Biology [*Agitur de momento pro Biologia marina quoad investigationem quantitativam in faunam profundam*]. 3 tabl., Journ. Cons. Expl. Mer, X, 1, 3-19. Copenhague (1935). **b - 657**

The quantitative investigations of the bottom fauna by means of Petersen's grab has made it possible to distinguish fairly easily between waters with an abundance of bottom animals, i. e. fish-food, and those with a poor bottom fauna. It is possible to describe a few widely distributed communities characterized by a few dominant animals and to give a general appearance to the fauna of the particular area. These communities are not biocoenoses. They may be arranged in groups according to their geographical distribution, and can be further divided into types according to the substratum.

**Vatova A.** - The Fishery Grounds Near Alexandria. II. A Bottom Sample Taken at Alexandria [*De fundis piscosis Alexandriae. Specimen ex fundo Alexandriae depromptum*]. 1 fig., 2 tables. Fish. Research. Direct., Notes & Mem., 9, 1-3. Cairo, Egypt (1935). **b - 658**

Account of the analysis of a sample taken from the bottom at 3 metres depth on September 2, 1933 in the Eastern Harbour, Alexandria, which is important in a way, as the first one taken in the Eastern Mediterranean. Comparison of the percentage share of different animal groups in the sample described and their biocoenosis and in the samples taken respectively at Venice and Algiers.

## Parasiti, Patologia et Terathologia.

**Aliberti G. T.** - Sull'equilibrio funzionale degli organi studiato attraverso il parassitismo. Ricerche in *Merluccius vulgaris* Flem [*Aequilibrium functionale organorum, parasitismi auxilio perpensum. Investigationes in speciem « Merluccius vulgaris »*]. 10 fig., 2 tav., Boll. Mus. Lab. Zool. e Anat. Comp. Genova, XV, 81, 3-23. Genova (1935). **b - 659**

Riassunta brevemente la situazione attuale dei problemi connessi col parassitismo da elminti, l'A. prende in considerazione l'influenza del parassita *Ascaris capsularia* sul suo ospite: *Merluccius vulgaris*. Condizioni del parenchima epatico e della mucosa gastrica in relazione alla entità dell'infezione mentre le zone non infestate rimangono pressochè inalterate nella loro funzione: la massa totale del fegato sarebbe superiore alla quantità di tessuto necessaria alle esigenze ordinarie dell'organismo.

**Ankel W. E.** - Die Pantoffelschnecke, ein Schädling der Auster [« *Crepidula fornicata* » *Ostreis parasitus noxius*]. 2 Abb., Natur u. Volk, LXV, 4, 173-176. Frankfurt a. M. (1935). **b - 660**

Lebensgeschichte dieses aus Nordamerika stammenden Schädlings, der sich jetzt auf Austernbänken der englischen Süd–und Ostküsten verbreitet.

**Bennati-Mouchet S.** - Castration parasitaire de l'*Eupagurus prideauxi* par le *Peltogaster curvatus* [*De castratione parasitaria speciei « E. prideauxi » per speciem « P. curvatus »*]. 7 fig., Trav. Stat. Biol. Roscoff, 12, 11-19. Paris (1934). **b - 661**

Le *Peltogaster* fixé sur l'*Eupagurus prideauxi* étudié a entraîné: 1. L'inhibition presque totale du testicule. 2. L'arrêt des phénomènes musculaires du canal déférent. 3. La formation de spermatophores plus ou moins vides et toujours déformés le plus souvent unis entre eux. 4. Des altérations histologiques de l'assise glandulaire interne du canal. Ces conclusions viennent confirmer et complèter celles énoncées au debut du travail. (A.).

**Blegvad H.** - An Epidemic Disease of the Eel-Grass [*Morbus epidemicus speciei « Zostera marina »*]. 1 map., Rep. Danish. Biol. Stat., 1934, XXXIX, 3-8. Copenhagen (1935). **b - 662**

After a brief introduction, in which author points out the importance of *Z. marina* L. to the animal life of the sea and as an industrial article, he communicates some extracts from the answers sent by fishery assistants in Danemark to an inquiry about the disease of oel-grass observed in 1932 in several countries, with special regard to the whole of the Danish coast.

**Borcéa L.** - Nouvelle note sur *Acanthobothrium ponticum* [*Nota nova de « A. ponticum »*]. Ann. Scient. Univ. Jassy, XX, 480-481. Jassy (1935). **b - 663**

Dans l'intestin de *Trygon pastinaca* de la Mer Noire, l'A. a recuelli un nouvel exemplaire d'*Acanthobothrium ponticum*.

**Borcea L. & L.** - Sur la présence du Cestode: *Diphyllobothrium stemmacephalum* Cobbold comme parasite chez le Marsouin *Phocaena phocaena* de la Mer Noire [« *Diphyllobothrium* » *parasitus in* « *Phocaena* » *Ponti Euxini*]. Ann. Scient. Univ. Jassy, XXI, 524-525. Jassy (1935). **b - 664**

L'A. a trouvé pour la première fois, chez un seul exemplaire de *Phocaena phocaena* l'espèce *D. stemmacephalum*.

**Boschma H.** - Rhizocéphales (Supplément) [*Rizocephala* (*Additio*)]. 4 fig., Mém. Mus. R. Hist. Natur. Belgique; Résult. Scient. Voyage, aux Indes Orient. Néerl. de LL. RR. la Prince e la Princesse Léopold de Belgique, III, 16, 1-8. Bruxelles (1934). **b - 665**

On a trouvé des échantillons de *Trapezia cymodoce* Herbat infectés par des Sacculinidés, qui appartiennent à une nouvelle espèce de *Sacculina*: *S. irrorata* nov. sp., se distinguant des autres espèces du genre principalement par les particularités de la cuticule extérieure du manteau.

**Branch W. C.** - New Parasitic Copepods [*Copepoda nova parasitica*]. 3 pls. Smithson. Miscell., XCI, 19, 1-9. Washington (1935). **b - 666**

This collection contains an exceptionally large number of males with new information on that sex. Emendments. Description of new forms: *Caligus lobatus* n. sp., *Nesippus Crypturus* Heller, new male, *Krøyeria dispar*, n. sp.

**Brown E. M.** - On *Oodinium ocellatum* Brown, a parasitic Dinoflagellate causing epidemic Disease in Marine Fish [*De « Oodinium ocellatum » Dinoflagellato parasitico morbos ferente piscibus marinis*]. 3 pls., 3 figs., Proc. Zool. Soc. London 1934, 3, 583-607. London (1934). **b - 667**

The different stages of development of *Oodinium ocellatum* Brown, its mode of nutrition, comparison with other spp. of the genus. A. draws the attention to the existence of a complex canal which ressembles the pulsatile apparatus of the free forms without, however, explaining its function. Effect of temperature on infestation and multiplication. List of 28 spp. of Fishes infected by this parasite.

**Butcher R. W.** - Wasting Disease of *Zostera marina* [*Morbus vastator speciei « Z. marina »*]. Nature, CXXXV, 3414, 545. London (1935). **b - 668**

The A. believes that the narrow-leaved variety of *Zostera*, which is more resistant to the wasting disease, is produced by a change in « nutritional balance », and that the disappearance of the wide-leaved variety is due to a variety of circumstances. (Nature's abstract on page 549).

**Bytinski-Salz H.** - Un Policlado (*Stylochus pilidium* Lang.) dannoso ai parchi ostricoli [« *S. pilidium* » *Ostreis obnoxius*]. 3 fig., 3 tav. f. t., Thalassia, II, 1, 1-24. Venezia (1935). **b - 669**

Dati sull'ostricoltura e sulle condizioni idrografiche del Canal di Leme. Cenni sulla biologia delle Planarie, e distribuzione geografica dello *Stylochus pilidium*. Danni prodotti dalle planarie ai parchi ostricoli, e mezzi di lotta contro lo *S. pilidium* che ne è il maggior nemico: allontanamento di tutte le ostriche infette; appoggio degli stecchi su corde nuove; lavaggio delle corde con ostriche. Con questi metodi, se la planaria non si può completamente distruggere, per mancanza di un nutrimento adatto non potrà aumentare la sua diffusione e si riuscirà ad impedire una infezione in massa da parte delle larve.

**Carini A.** - Sobre una hemogregarine de um peixe do mar do Brasil [*De haemogregarina piscis cuiusdam marini Brasiliensis*]. 2 fig., Arch. Biol., XVI, 172, 13. (1933). **b - 670**

*Haemogregarina mugili*, n. sp. *Mugil brasiliensis*.

**Caroli E.** - La fissazione dei Bopiridi addominali, parassiti di Caridei, sull'ospite definitivo [*De Bopiridis abdominalibus parasiticis in Carideis quoad eorum fixationem in hospite ultimo*]. Boll. Zool., V, 6, 233-238. Napoli (1934). **b - 671**

Le larve di *Phrixus*, parassiti dei Caridei *Hippolyte* e *Processa*, si stabiliscono dapprima nella cavità branchiale dell'ospite. La spiegazione di questo comportamento del *Phrixus* starebbe nel fatto che la larva è meglio protetta e può trasformarsi in migliori condizioni nella cavità branchiale, anzi che sotto l'addome dell'ospite.

**Chatton E. & Lwoff A.** - Sur un Cilié Thigmotriche nouveau: *Gargarius gargarius* n. gen., n. sp., de *Mytilus edulis* [*Ciliatum novum Thigmotrichum. « G. gargarius » n. gen., n. sp. in « M. edulis »*]. Bull. Soc. Zool. France, LIX, 375-376. Paris (1934). **b - 672**

**Chatton E. & Lwoff A.** - Protistologica No 1. Les Ciliés apostomes. Morphologie, cytologie, éthologie, évolution, systématique. Première partie: Aperçu historique et général. Etude monographique des genres et des espèces [*Protistologica N. 1. Ciliata apostomata. Morphologia, cytologia, ethologia, evolutio, systematica. Pars Iª. Compendium historicum generale. Studium monographicum generum et specierum*]. 227 fig., 21 pl., Arch. Zool. Exp. et Gén., LXXVII, 1, 1-453. Paris (1935). **b - 673**

1) Apostomes phorétiques sur les Crustacés (Copépodes), évoluant à la faveur d'un traumatisme, dans leurs humeurs fraîches, avec ou sans intervention d'un prédateur. 2) Apostomes phorétiques sur les Crustacés, évoluant dans leur fluide exuvial. 3) Apostomes phorétiques sur les Crustacés, mais passant chez ceux-ci par un stade parasite interne précédant l'évolution exuviale. 4) Apostomes phorétiques et parasites sur les phorontes d'Apostomes. 5) Apostomes phorétiques sur les Crustacés, puis parasites durables dans la cavité gastro-vasculaire des Actinies. 6) Apostomes à cycles incomplètement connus, présumés phorétiques actuels sur les Crustacés, parasites digestifs des Ophiures et des Cténophores. 7) Apostome à cycle incomplètement connu, présumé phorétique actuel ou ancestral sur les Crustacés, parasite rénal des Céphalopodes. Annexe: Ciliés incertae sedis, réputés ou présumés avoir des relations avec les Apostomes. Bibliographie.

**Cole H. A.** - On Some Larval Trematode Parasites of the Mussel (*Mytilus edulis*) and the Cockle (*Cardium edule*) [*Trematodes quidam parasiti larvales in « M. edulis » et « C. edule »*]. 5 figs., Parasitol., XXVII, 2, 276-280. London (1935). **b - 674**

Account of some new forms discovered by the A. in Mussels and Cockles chiefly from the estuary at Conway and some other beds on the North Wales coast. Orange sickness of Mussels (*Cercaria tenuans* (Sporocyst. Cercaria). A new Bucephalus (*B. mytili*) from the Mussel.

**Cottom C.** - Wasting Disease of *Zostera marina* [*Morbus destructor in « Zostera marina »*]. Nature, CXXXV, 3408, 306. London (1935). **b - 675**

The A. agrees with Dr. Kathleen Blackburn that the narrow-leaved form of the eel grass is not a hybrid but a different form of *Zostera marina*. From observations on the Atlantic coast from Maine to North Carolina, he concludes that the variation cannot be accounted for simply as due to the depth at which the plant grows, but that other factors such as the age of the plant, temperature, salinity, water currents and conditions of soil or rock bottom may affect the width of the leaves. (Nature's abstract on page 310).

**Dangeard P.** - Présence à Roscoff d'une Chytridiale parasite des Ectocarpées [*Species « Eurychasma Dicksonii » parasitica in Ectocarpis*, Roscoff *reperta*]. Ann. Protistol., IV. Paris (1934). **b - 676**

Il s'agit de l'*Eurychasma Dicksonii*, qui se développe dans les cellules de certains *Ectocarpus*, surtout du *Stictyosiphon Corbierei*.

**Day J. H.** - The Life History of *Sacculina* [*Accretionis cyclus in « Sacculina »*]. 11 fig., Quart. Journ. Microsc. Sc., LXXVII, 549-583. London (1935). **b - 677**

Conclusions as to the different stages of development, infestation, moule and regeneration based on the research undertaken during a whole year on *Portunus holsatus* in the estuary of the Mersey.

**Dehorne A.** - Observations cytologiques sur une nouvelle espèce d'*Haplosporidium* parasite du coelome de *Nereis diversicolor* O. F. Müller [*Observationes cytologicae novae cuiusdam speciei ex Haplosporidibus parasiticae in coelomate speciei « N. diversicolor »*]. C. R. Acad. Sc., CC, 7, 589-592. Paris (1935). **b - 678**

Tous les segments de l'animal contiennent des plasmodies aux mêmes stades de la multiplication, mais aucun aspect de la production des sporoblastes. Le noyeau est quiescent. Phénomènes initiaux et consécutifs de la prophase. Aspects des phénomènes de reconstitution nucléaire. Comportement du nucléole au cours de la mitose.

**Dollfus R. Ph.** - *Tynnascaris Legendrei* n. gen., n. sp. de l'estomac du germon, *Germo alalonga* (Gmel.) [*« T. Legendrei » in stomacho speciei « G. alalonga »*]. 8 fig., Bull. Soc. Zool. France, LVIII, 1, 7-13. Paris (1933). **b - 679**

**Dollfus R. Ph.** - Sur quelques parasites de poissons récoltés à Castiglione. [*De piscium parasitis*, Castiglione *collectis*]. 48 fig., Stat. Aquic. et pêche de Castiglione (1933), 2, 199-279. Alger (1935). **b - 680**

Description des spécimens récoltés appartenant aux Trématodes, Cestodes, Nématodes, Copépodes et Isopodes, et poissons infestés. Bibl.

**Gallien L.** - Sur la larve de *Dactylocotyle luscoe* V. Ben. Hesse. Trématode monogénétique marin [*De larva speciei « D. luscoe » Trematodis monogenetici marini*]. 3 fig., Bull. Soc. zool. France, LIX, 68-73. Paris (1934). **b - 681**

Description de *Dactylocotyle luscoe*, ectoparasite des branchies de *Gadus luscus* L. Comparaison avec les larves de *Gyrodactylus* et de *Polystomum*. Morphologie, biologie larvaire, cycle évolutif.

**Guiart J.** - Cestodes parasites [*Cestoda parasitica*]. 12 fig., 5 pl., Rés. Campagnes Scient. du Prince Albert I, Fasc. 91, 105 pp. Monaco (1935). **b - 682**

Étude des Cestodes parasites de Sélaciens et particulièrement des Tétrarhynques. Plusieurs espèces nouvelles trouvées ont permis de créer 3 familles et 7 genres nouveaux, gen. *Rhopalothylax; Clujia; Grillotia; Pseudobothrium: Atelemerus; Diesingella; Trigonocothyle*. Répartition géographique des parasites. Index systématique des hôtes avec leurs parasites.

**Guiart J.** - Le véritable *Floriceps saccatus* de Cuvier n'est pas la larve géante de tétrarhynque vivant dans le foie du Môle (*Mola mola*) [*« F. saccatus » verus non idem est ac larva gigas*

*tetrarhynchi in hepate viventis speciei « M. mola »*]. 7 fig., Bull. Inst. Océanogr., 666, 1-15. Monaco (1935). **b - 683**

Le *Floriceps saccatus* n'a rien à voir avec la larve géante du foie du môle. L'A. réserve le nom de *Floriceps saccatus* Cuvier 1817 à la petite larve craspédote de tétrarhynque contenue dans les kystes sous-péritonéaux du seul *Mola mola*.

Les genres *Floriceps* Cuvier 1817 et *Callotetrarhynchus* Pitner 1931 sont synonymes.

**Gurney R.** - The Development of certain Parasitic Copepoda of the Families *Caligidae* and *Clavellidae* [*De progressione aliquorum Copepodorum parasiticorum ex familiis « Caligidae » et « Clavellidae »*]. 43 fig., Proc. Zool. Soc. London, 2, 177-217. London (1934). **b - 684**

Different larval stages; comparison with those of the *Decapoda*.

**Heding S. G.** - *Entocolax trochodotae* n. sp. A New Endoparasitic Gastropod [*« E. trochodotae » n. sp., gasteropodus novus endoparasiticus*]. 2 tabl., Vidensk. Medd., XCVIII, 207-214. København (1934-35). **b - 685**

Diagnosis. Description: Female, male, larvae. Distribution. Discussion. This endoparasitic snail has been found in the body-cavity of the antarctic Chiridotid *Trochodota purpurea*.

**Heldt** - Sur le mal dont périssent les muges de l'Ischkeul et sur les remèdes possibles [*Morbus in Mugilidis ad regionem* Ischkeul *pertinentibus atque remedia*]. Communications VII^e^ Congr. Int. Aquicult. & Pêche Paris 1931, III, 32-35. Impr. du Loiret. Orléans (1935). **b - 686**

Le mal et la mortalité des muges semblent être dûs à l'absence de courant marin pendant le temps de la maturation sexuelle. Moyen d'y remédier.

**Hsü H. F.** - A new Nematode, *Anisakis alata*, from the Walrus [*« A. alata » Nematodes novus, e specie « Trichechus rosmarus »*]. 1 pl., Peking Nat. Hist. Bull., VIII, 1, 59-62. Peking (1933). **b - 687**

**Ishii N.** - Q. Studies on the Family *Didymozooidae* (Monticelli, 1888) [*Studium familiae « Didymozooidae »*]. 65 figs., Jap. Journ. Zool., Trans., VI, 2, 279-386. Tokyo (1935). **b - 688**

Didymozooid Trematodes are known to occur on the gill or in the mouth, the mucous membrane of the mouth cavity, esophagus, and intestine, or in the peritoneal cavity or skin of marine Fishes or between their muscles.

*Didymocystis katsuwonicola* (Okada) encysted in the epidermis of the gills of certain marine Fishes; nomenclature; description, life history. Classification of *Didymozooidae*: historical review; revision with keys to subfamilies, genera, subgenera and species; list of *Didymozooidae*, with hosts, habitats and localities. Description of the species found in Japan.

**Iwasa P.** - Two Species of Whale-Lice (*Amphipoda, Cyamidae*) Parasitic on the Right Whale [*Balaenae pediculorum species duae (Amphipoda, Cyamidae) in balaena parasiticae*]. 4 pls., Journ. Fac. Sc., Hokkaido, Imp. Univ., III, Ser. 6, 1, 33-39. Hokkaido (1934). **b - 689**

Description of *Cyamus ovalis* and *C. erraticus* found attached to the skin of a right-whale captured in the North Pacific off Hokkaido. Morphological differences.

**Johnston T. H.** - New Trematodes from South Australian Elasmobranchs [*Trematoda nova in Elasmobranchiis australiensibus meridionalibus*]. 3 figs., Austral. Journ. Exp. Biol. & Med. Sc., XII, 1, 25-32. Sidney (1934). **b - 690**

*Calicotyle australis* and *Probolitrema rotundatum* from *Trigonorrhina fasciata*; *P. clelandi* and *P. simile* from *Mustelus antarcticus*.

**Kirtisinghe P.** - Parasitic Copepods of Fish from Ceylon [*Copepoda parasitica piscium ad* Ceylon *pertinentium*]. 46 figs., Parasitol., XXVII, 3, 332-344. London (1935). **b - 691**

*Pennella diodontis* Oken (1816), *Lernaeolophus sultanus* Nordmann (1864), *Pseudocycnus appendiculatus* Heller (1865), *P. armatus* Bassett-Smith (1898), *Brachiella thynni* Cuvier (1830), *Thysanote appendiculata* Steenstrup and Lütken (1861). For every sp. are given: Host and record, description of males or females, dimensions, remarks on synonymies etc.

**Krull Wendell H.** - *Cercaria bessiae* Cort and Brooks, 1928, an injurious Parasite of Fish [*« C. bessiae » piscibus parasitus obnoxius*]. 2 figs., Copeia, 2, 69-73. New York (1934). **b - 692**

Experiments show that *Cercaria bessiae* may be a cause of deaths of many fish fry. The sunfish, *Apomotis cyanellus*, is reported as a new 2nd intermediate host for *Neascus ambloplitis*, the mature phase of *Cercaria bessiae*.

**Ladreyt F.** - Sur un Epithélioma de la muqueuse palatine chez une murène avec quelques observations sur l'évolution des basales, des membranes cellulaires et du stroma dans certains cancers. Absence de glande venimeuse palatine chez la murène [*De epithelioma mucosae palati in « Muraena helena » cum observationibus quoad evolutionem basalium, membranarum cellularium et stromatis in tumoribus quibusdam. Absentia glandulae palatinae veneni, in « M. helena »*]. 3 fig., Bull. Inst. Océanogr., 677, 1-16. Monaco (Princ.) (1935). **b - 693**

Description d'une tumeur développée dans le tiers moyen de la muqueuse palatine observée chez une murène et qui a produit des lésions tissulaires très étendues; ontogénèse de la tumeur. Quelques considérations sur la sécrétion du venin dans la région palatine de la murène dans lesquelles l'A. affirme que la fonction venimeuse est en quelque sorte diffuse et généralisée à toute la muqueuse palatine, et pas due à une glande spéciale come on l'avait prétendu.

**Lebour M. V.** - *Hemiurus communis* in *Acartia* [*« Hemiurus communis » in genere « Acartia »*]. Journ. Mar. Biol. Assoc., XX, 2, 371-372. Plymouth (1935). **b - 694**

Former records of Trematods found in Copepods. Some theories on the life-cycle of *Acartia clausi*. Some common Fish Trematodes.

**Leigh-Sharpe H.** - A List of British Invertebrates with their Characteristic Parasitic and Commensal *Copepoda* [*Index Invertebratorum ad Britanniam pertinentium cum eorum peculiaribus parasitis et commensalibus Copepodis*]. Journ. Mar. Biol. Assoc., XX, 1, 47-48. Plymouth (1935). **b - 695**

*Porifera, Echinodermata, Annulata, Crustacea, Mollusca, Urochordata.*

**Leigh-Sharpe H.** - *Epibrachiella impudica* (Nordmann) (*Copepoda*) - 8 figs., Parasitol., XXVII, 1, 101-106. London (1935). **b - 696**

Two adult females bearing males have been found on the gills of *Trigla cuculus* at Plymouth. Record. Description. Note on generic diagnosis. Note on specific variation.

**Leigh-Sharpe H.** - Some New and Rare *Lernaeidae* (*Copepoda*) *from Plymouth* [*Aliquae Lernaeidae novae seu rarae ex* Plymouth]. 2 figs., Parasitol., XXVII, 1, 107-110. London (1935). **b - 697**

The following *Lernaeidae* are described in the present paper: *Haemobaphoides ambiguus, Saucissona* n. gen., *S. sanciatonis* n. gen. n. sp., *Lernaeocera mulli* n. sp.

**Leigh-Sharpe H.** - *Anchistrotos laqueus* n. sp. a parasitic Copepod of *Serranus cabrilla* [« *A. laqueus* » *n. sp. copepodus parasiticus in* « *S. cabrilla* »]. 3 figs., Parasitol., XXVII, 2, 266-269. London (1935). **b - 698**

Habitat and material. Body. Appendages.

**Leigh-Sharpe H.** - Two Copepods (*Lernaeenicus*) parasitic on *Clupea* [*Copepoda duo* (*Lernaeenicus*) *parasitica in* « *Clupea* »]. 8 figs., Parasitol., XXVII, 2, 270-275. London (1935). **b - 699**

*Lernaeenicus spratta* (Sowerby) and *L. encrasicholi* (Turton 1807) parasitic on respectively *Clupea spratta* and *Clupea* spp. Habitats and material. Dimensions. Body. Appendages.

**Lipska I.** - Les colibacilles et les coliphages chez les animaux invertébrés marins [*De colibacillis atque coliphagis in animalibus marinis invertebratis*]. 2 tabl., Bull. Inst. Océanogr., 675, 1-8. Monaco (Princ.) (1934). **b - 700**

Résultats de 39 analyses du contenu intestinal des animaux marins qui ont été nourris de différente façon, et disséqués avec toutes les précautions nécessaires dans le but d'examiner l'influence de la nourriture chez les animaux invertébrés marins où on pouvait penser que l'eau de mer, comme milieu ambiant, pourrait être un facteur annulant les différences de leurs microflores bactériennes. Les colibacilles furent isolés huit fois.

**Manter H. W.** - Some Digenetic Trematodes from Deepwater Fish of Tortugas, Florida [*Trematodes quidam digenetici ex piscibus in aqua peralta viventibus apud* Tortugas *in* (Florida)]. 15 pl., tabls., Carnegie Inst. Washington Publ., 435, 261-345. Washington (1934). **b - 701**

Description of 49 spp. of Trematodes, most of them new ones, from 80 spp. of marine fish from 40 to 582 fathoms deep. Depth distributions of 22 spp. of Trematodes shown in tables.

**Manter H. W.** - The Structure and Taxonomic Position of *Megasolena estrix* Linton 1910 (Trematoda) [*De structura et positione taxonomica speciei* « *M. estrix* »]. 7 fig., Parasitol., XXVII, 3, 431-439. London (1935). **b - 702**

Description of *Megasolena* and *Hapladena*, parasites from *Kyphosus* and *Acanthurus*, which possess the characters of fundamental taxonomic value for a new subfamily, *Megasoleninae*.

**Markowski S.** - Ueber den Entwicklungszyklus von *Bothriocephalus scorpii* (Müller 1776) [*De accretionis cyclo speciei* « *B. scorpii* »]. 4 Tab., 5 Abb., 1 Taf. a. T., Bull. Int. Acad. Polon. Sc. & Lettr., Sér. B, Sc. Mat. & Nat., 1-2, B II, 1-17. Cracovie (1935). **b - 703**

En étudiant expérimentalement l'évolution de *Bothriocephalus scorpii*, parasite du *Rhombus maximus* L., provenant des eaux polonaises de la Baltique l'A. a trouvé deux stades larvaires: le procercoïde dans la cavité abdominale de l'*Eurytemora hirundo* Giesbrecht, ainsi que le plérocercoïde dans le tube digestif du *Gobius minutus* Pallas.

**Markowski S.** - Die parasitischen Würmer von *Gobius minutus* Pall. des polnischen Balticums [*De vermibus parasitis in* « *Gobius minutus* » *ad Mare Balticum Polonum pertinente*]. 1 Taf., 2 Tab., Bull. Int. Acad. Polon. Sc. & Lettres, Cl. Sc. Math. & Nat., 6/7, B II, 251-260. Cracovie (1935). **b - 704**

Ergebnisse einer Forschung über die Infizierung von *G. minutus* in den polnischen Küstengewässern, an Hand der Analyse und Untersuchung von dem Verdauungskanal und der Leibeshöhle, sowie der oberflächlichen Muskeln und der Kiemen, ausgeführt bei 520 Exemplaren von *G. minutus*. Diagnose der vom Vf. festgestellten Würmer (*Trematoda, Cestoidea, Nematoda* und *Acanthocephala*), von denen die Form, *Asymphylodora demeli* sp. n., als neu zu betrachten ist.

**Mathias P.** - Sur quelques Trématodes de Poissons marins de la région de Banyuls [*Trematoda in Piscibus marinis apud* Banyuls]. Arch. Zool. Exp. et Gén., LXXV, 33, 567-581. Paris (1934). **b - 705**

Six espèces de Trématodes sont decrites vivant chez les poissons suivants: *Serranus cabrilla* L., *Lophius piscatorius* L., *Blennius ocellaris* L., *Trigla aspera* Cuv. Val., *Conger vulgaris* Cuv., *Uranoscopus scaber* L., *Scorpaena porcus* L.

**Mathias P.** - Cycle évolutif d'un Trématode Holostomide (*Cyathocotyle Gravier* n. sp.) [*De cyclo accretionis speciei* « *Cyathocotyle Gravier* »]. C. R. Acad. Sc., CC, 21, 1786-1788. Paris (1935). **b - 706**

L'œuf pondu dans l'eau, donne un miracidium qui penètre dans une *Bithynia tentaculata* L. y formant des sporocytes et puis les cercaires. Les cercaires mûres sortent du Mollusque et infectent des Poissons tels que *Gobius* en y formant des kystes qui sont puis absorbés par un oiseau aquatique et évolués en adultes qui pondent ses œufs dans l'intestin de l'oiseau, laquel les fait sortir dans l'eau. Ainsi le cycle recommence. (L. S.).

**Montpellier J. & Dieuzeide R.** - Tumeurs Parasitaires des Labridés [*De tumoribus parasitariis in Labridis*]. 7 fig., Stat. Aquicult. et Pêche Castiglione (1933), 2, 85-91. Alger (1935). **b - 707**

Examen histologique des tumeurs, qui sont à peu près exclusivement constituées par la colonie parasitaire.

**Nouvel H.** - *Dicyema Schulzianum* (Ed. van Ben.). Description et étude cytologique [« *D. Schulzianum* ». *Descriptio et studium cytologicum*]. 9 fig., Bull. Inst. Océanogr., 664, 1-11. Monaco (1935). **b - 708**

*D. Schulzianum*, que l'A. n'a jamais rencontré chez aucun autre céphalopode, semble être le seul Dicyémide parasite de *Sepia elegans* dans lequel on le trouve de façon constante.

**Nouvel H. & L.** - Sur deux Crevettes parasitées par un *Nectonema*. Evolution des parasites. Influence sur l'hôte [*Agitur de cancris duobus qui sustinent parasitum quiddam* « *Nectonema* ». *Quaestio de evolutione parasitorum, eorumque influentia in hospitem*]. 2 fig., 1 tab., Bull. Soc. Zool. France, LIX, 516-521. Paris (1935). **b - 709**

Influence du parasite *Nectonema* dans le coelome de *Leander* ♀. Compression des organes internes, arrêt du développement des produits génitaux.

**Nybelin O.** - Untersuchungen über den bei Fischen krankheits-erregenden Spaltpilz *Vibrio anguillarum* [*Investigationes in speciem* « *V. anguil-*

*larum » piscibus morbiferam*]. (In Dtsch., Schwed. Rés.). 2 Tab., 2 graph., Fig., Medd. fr. Stat. unders. – & förs.– Anst. f. sötvattensfisk., 8, 1-62. Stockholm (1935). **b - 710**

Bakteriologische Untersuchung der gefundenen Vibrionen. Beziehungen von *Vibrio anguillarum* zum Wirt. Allgemeine Schlussfolgerungen: In welcher Ausdehnung ist die Agglutinations-methode als diagnostisches Hilfsmittel verwendbar? Ist mit einer erworbenen Immunität bei Fischen nach überstandener Infektion zu rechnen? Ist eine Schutzimpfung gegen Bakterieninfektionen bei Fischen denkbar oder möglich?

**Nybelin O.** - En mystisk ålsjukdom i våra sötvatten [*Morbus arcanus in aquis nostris dulcibus*]. Ny Svensk Fiskeritidskr., 18, 205-208. Göteborg (1934). **b - 711**

**Okada Y. K. & Miyashita Y.** - Sacculinization in *Eriocheir japonicus* de Haan, with Remarks on the Occurrence of Complete Sex-Reversal in Parasitized Male Crabs [*Quaestio de sacculinisatione in specie « E. japonicus » cum observationibus quoad phenomenum totius reversibilitatis sexualis in cancris masculis parasitis infestis*]. 2 pls., Mem. Coll. Sc., Imp. Univ., Ser. B, X, 3, 169-208. Kyoto (1935). **b - 712**

The Authors describe the transformations of the grapsoid crab *E. japonicus* when parasitized by a *Sacculina* (*S. gregarina* n. sp.); the males become then intersexual in varying degrees. The changes which occur in such cases are dealt with in the paper.

**Palombi A.** - Gli stadi larvali dei Trematodi del Golfo di Napoli. I. Contributo allo studio della morfologia, biologia e sistematica delle Cercarie marine [*Stadia larvalia ad Trematodes Sinus Neapolitani pertinentes. Contributio in morphologiam, biologiam et systematicam Cercariarum marinarum*]. Fig. 34. Pubbl. Staz. Zool. Napoli, XIV, 1, 51-94. Napoli (1934). **b - 713**

Lavoro illustrativo degli stadi larvali dei Trematodi viventi in alcuni Molluschi e Crostacei del Golfo di Napoli. Elenco completo delle cercarie e delle specie ospiti. Vennero identificate quattro nuove cercarie: *Metacercaria* (*Gymnophallus*) *megacoela*, *M.* (*Himasthala*) *ambigua*, *Cercaria ophicer* e *Metacercaria acherusiae*; le altre specie descritte, o sono nuove per l'ospite o per la località.

**Patten R.** - The Life History of *Merocystis Kathae* in the Whelk, *Buccinum undatum* [*Curriculum vitae speciei « M. Kathae » in specie « B. undatum »*]. 56 figs. on 5 pls., 10 textfigs., Parasitol., XXVII, 3, 399-430. London (1935). **b - 714**

Introductory remarks on preceding studies. Material and methods. Periodicity. Life history. Nuclear divisions in *Merocystis*. Summary and references.

**Pérez C.** - Notes sur les Epicarides et les Rhizocéphales des côtes de France. VIII. Infection simultanée des Pagures par un Athelges et un Rhizocéphale [*De Epicarideis et Rhizocephalis ad litora Gallica pertinentibus. Duo parasiti in Paguridis*]. Arch. Zool. Exp. et Gén., LXXV, 541-565. Paris (1934). **b - 715**

Sur l'*Eupagurus cuanensis* l'A. a trouvé presque toujours les deux parasites ensemble. Influence de l'action parasitaire d'*Athelges* sur le Rhizocéphale *Clorogaster*. Présence de deux espèces d'*Athelges*.

**Pérez C.** - Sur une *Eriphia spinifrons* sacculinée [*De « E. spinifrons » sacculinis infesta*]. 2 fig., Stat. Aquicult. et Pêche Castiglione, 51-58. Alger (1934). **b - 716**

Etude sur la spécificité du parasitisme des Sacculinés et leur influence sur l'hôte.

**Pérez C.** - Non-spécifité du parasitisme du *Nectonema Agile* Verril [« *N. agile* ». *Quaestio de parasitismo non- specifico*]. 2 fig., Bull. Soc. Zool. France, LIX, 522-528. Paris (1935). **b - 717**

La plupart des espèces des Crustacés Décapodes sont infestés par ce parasite, qui n'a pas de strictes exigences de spécificité pour ses hôtes, et qui d'ailleurs ne semble pas les gêner trop.

Vie et époques d'infection chez *Nectonema*.

**Pérez C.** - Sort des racines du *Peltogaster* après la chute du sac viscéral [*De radicibus in « Peltogaster » post casum sacculi visceralis*]. 1 fig., C. R. Acad. Sc., CCI, 4, 286-288. Paris (1935). **b - 718**

Les différentes phases du processus de flétrissement du sac viscéral dans *Peltogaster*, parasite des Pagures; Comparaison avec le cas extrême présenté par *Chlorogaster*.

**Pettersen H. E.** - Preliminary Report of the Disease of the Eelgrass [*Relatio prior de morbo speciei « Zostera marina »*]. 4 figs., Rep. Danish Biol. Stat., XL, 3-8. Copenhagen (1935). **b - 719**

Survey of the results obtained by the author during an investigation carried out in August, 1933, in order to throw light on the disease that has appeared in the eelgrass of the Danish waters during recent times, and report on such knowledge of the cause of disease as has been acquired by investigators in other countries.

**Raabe Henryk** - Un *Microsporidium* dans des *Lymphocystis* chez les Plies [*Agitur de Microsporidio in Lymphocystis in Pleuronectidis*]. 4 fig., Bull. Inst. Océanogr., 665, 1-11. Monaco (1935). **b - 720**

Les Plies, dans la Baltique, la Mer du Nord et sur les côtes de Mourman de l'Océan, sont souvent atteintes d'une maladie qui se manifeste par des tumeurs sphériques ou ovales sur la peau. Ces tumeurs sont remplies par des kystes. L'A. se borne dans le présent rapport à présenter les stades évolutifs et quelques particularités du parasite qui provoque la création de ces kystes, bien connus sous le nom de *Lymphocystis*.

**Raabe Zdzislaw** - *Rhynchophrya cristallina* g. n., sp. n., nouvelle forme d'Infusoire de la famille des *Sphaeonophryidae* Chatton et Lwoff [« *R. cristallina* » *g. n., sp. n., forma Infusorii nova ad familiam « Sphaenophryidae » pertinens*]. 5 fig., Bull. Inst. Océanogr., 676, 1-6. Monaco (1935). **b - 721**

Description détaillée et multiplication de cet Infusoire, trouvé sur les branchies des Moules *Mytilus edulis* L.

**Ramult M.** - Observations on the Embryonic and Larval Development in *Sacculina* (*Rhizocephala*) in Changed Osmotic Conditions of Medium [*Observationes de progressione larvali et post embryonali in « Sacculina » cum osmoticae condiciones medio ambiente modificantur*]. 25 figs., 1 table. Bull. Int. Acad. Polon. Sc. & Lettres, Cl. Sc. Mathém. & Nat., 3/5, B II, 87-109. Cracovie (1935). **b - 722**

Results of investigations on *Sacculina carcini*, a common parasite of the crab, *Carcinus maenas*, especially concerned with 1) the extrusion of the eggs of *Sacculina* into the mantle cavity and development in the normal sea

water, 2) their development in hypotonic and hypertonic sea-water, 3) the cleavage of *S.* eggs in sodium chloride solution, and 4) the metamorphosis of *S.* larvae in a changed osmotic medium. (L. S.).

**Rees F. G.** - *Cercaria patellae* Lebour, 1911, and its Effect on the digestive Gland and Gonads of *Patella vulgata* [« *C. patellae* » *eiusque effectus in glandulam digestionis atque etiam in gonades speciei* « *P. vulgata* »]. 4 pls., Proc. zool. Soc. London, 1, 45-53. London (1934). **b - 723**

Analysis of the process of destruction in the digestive gland and gonads of *Patella vulgata.* Its resistance.

**Renn C. E.** - Eel-Grass Situation is Explained [*Condiciones speciei* « *Zostera marina* » *explicantur*]. Fish. Gaz., LII, 3, 29. New York (1935). **b - 724**

Summary of a plan outlined by the author for combatting the parasite, which provokes the disappearance of the eel-grass along the Atlantic seaboard.

**Renn C. E.** - A Mycetozoan Parasite of *Zostera marina* [*Agitur de* « *Mycetozoa* » *parasito in specie* « *Z. marina* »]. Nature, CXXXV, 3414, 544-545. London (1935). **b - 725**

Evidence that a slime-mould (similar to *Labyrinthula*) is responsible for the wasting disease of the Eel-grass, *Zostera marina,* along the Mediterranean Atlantic coast, is adduced by the A. A Fungus, *Ophiobolus,* has also been suggested as the causative agent, but the A. finds that it is not always associated with the disease (Nature's abstract on page 549).

**Rioja E.** - Sobre un copépodo parásito de *Sabella pavonina* Sav., hallado en la ria de Pontevedra [*De copepodo quodam* « *Sabelliphilus Sarsi* », *parasito in specie* « *S. pavonina* » *in flumine* Pontevedra]. 16 figs, Bol. Soc. Españ. Hist. Natur., XXXV, 5, 239-244. Madrid (1935). **b - 726**

Breve descripción de la especie *S. Sarsi* var. *branchialis* (Della Valle), fijada sobre los radios branquiales que forman el penacho respiratorio del anélido, *Sabella pavonina.*

**Rotschild M.** - The Trematode Parasites of *Turritella communis* Lmk. from Plymouth and Naples [*Trematodes parasiti in specie* « *T. communis* » *a* Plymouth *atque Neapoli provenientes*]. 2 tabl., 22 figs., Parasitol., XXVII, 2, 152-170. London (1935). **b - 727**

Detailed descriptions, measurements in microns, reproduction and behaviour of the *Cercariae* with the *Rhodometopa* group, identification table of 7 spp of *Cercaria,* 5 of which are new.

**Schäperclaus W.** - Fischkrankheiten [*De morbis piscium*]. 16 Taf., 72 S., Wenzel Verlag. Braunschweig (1935). **b - 728**

**Schnakenbeck W.** - Parasiten der japanischen Wollhandkrabbe [*De parasitis in specie* « *Eriocheir japonicus* »]. Fischmarkt, III, 6, 162-163. Cuxhaven (1935). **b - 729**

An Hand einer Arbeit von Y. K. Okada and Y. Miyaschita « Sacculinization in *Eriocheir japonicus* de Haan, with Remarks on the Occurrence of complete sex-reversal in parasitized male-crabs » (Mem. Coll. Sc., Kyoto Imp. Univ., Ser. B, X, 3, 1935) bespricht Vf. die Möglichkeit die chinesische Wollhandkrabbe mit dem Parasiten der Japanischen Wollhandkrabbe biologisch zu bekämpfen.

**Schnakenbeck W.** - Fadenwürmer bei Seefischen [*Nematodes in piscibus marinis*]. Fischmarkt, 5, 132-134. Cuxhaven (1934). **b - 730**

Einige Betrachtungen über die Bedeutung des Vorkommens von Fadenwürmern im Darme und ausserhalb des Darmes der Seefische; vollkommene Unschädlichkeit derselben für den Menschen; die antiästhetische Seite des Vorkommens der Fadenwürmer in dem Leibe der Fische; Unsicherheit unserer Kenntnisse über das Vorkommen der Fadenwürmer in Fischen, Ursachen des Befalles der Fische mit denselben, Wirtwechsel usw., mit besonderer Berücksichtigung der Schmarotzern von dem Eishai (*Laemargus borealis*) und der spitzschnäuzigen Roche (*Raja oxyrhynchus*).

**Schuurmans Stekhoven F. H. Jr.** - Copepoda parasitica from the Belgian Coast [*Copepoda parasitica a litoribus Belgicis provenientia*]. 5 Pls., Bull. Mus. R. Hist. Nat. Belgique, XI, 7, 1-13. Bruxelles (1935). **b - 731**

Classification of a small collection of parasitic Copepoda collected in the North Sea: *Acanthochondria soleae* on *Pleuronectes flesus* and *Onos mustela,* new host; *Caligus rapax, C. diaphanus*; *Lepeophtheirus pectoralis*; *Lernaeocera branchialis,* L. *minuta, L. lusci* with all the different stages and their description, *L. brevicollis*; *Lernaeeniscus sprattae.*

**Skrjabin K. I. & Andreewa N. K.** - Un nouveau Nématode: *Crassicauda giliakiana* n. sp. trouvé dans les reins de *Delphinoptera leucos* [« *C. giliakiana* » *in renis reperta speciei* « *D. leucos* »]. 13 fig., Ann. Parasitol. Humaine et Comp., XII, 1, 15-28. Paris (1934). **b - 732**

**Smith H. G.** - On the Presence of Algae in certain *Ascidiacea* [*De Algis in Ascidiaceis*]. Ann. & Mag. Nat. Hist., 10th Ser., XV, 615-626. London (1935). **b - 733**

**Souché G.** - Sur de nouveaux cas de parasitisme chez les Gadidés [*Parasitismi casus novi in Gadidis*]. Bull. Soc. Centr. d'Aquicult. et de Pêche, XLII, 34-40. Paris (1935). **b - 734**

**Spärck R.** - On the Occurrence of *Crepidula fornicata* (L.) in the Limfjord [*De specie* « *C. fornicata* » *in* Limfiord]. Rep. Danish Biol. Stat., XL, 43-44. Copenhagen (1935). **b - 735**

Brief account of the frequency of *C. fornicata L.,* which is extremely hurtful to the oyster fishery, in European and, especially Danish waters i. e. in the Limfjord.

**Stephensen K.** - Some Endoparasitic Copepods found in Echinids [*Copepoda quaedam endoparasitica in Echinidis reperta*]. 3 fig. Vidensk. Medd., XCVIII, 223-228. København (1934-35). **b - 736**

Description of 3 species found by Dr. Mortensen, one of which is new, *Calvocheres oblongus* n. sp.

**Timon-David** - Sur les *Wedlia* parasites de l'estomac du thon (Trématodes, *Didymozoonidae*) [*De genere* « *Wedlia* » *parasito in stomacho speciei* « *Thynnus thynnus* »]. 5 fig., Bull. Inst. Océanogr., 670, 1-11. Monaco (1935). **b - 737**

L'A. a trouvé, enkystés dans la paroi de l'estomac de *Thynnus thynnus* L. un grand nombre de parasites appartenant au genre *Wedlia* Cobbold. L'A. donne l'historique de ce genre, la description de la forme méditerranéenne de *Wedlia* aff. *orientalis* Yamaguti et une description des kystes à *Wedlia.*

**Yamaguti Satyû** - Studies on the Helminth Fauna of Japan. Part 8. *Acanthocephala*, I [*Fauna helminthologica Japonica. Acanthocephala*]. 30 figs., Jap. Journ. Zool. Trans., VI, 6, 247-278. Tokyo (1935). **b - 738**

22 species are described and figured in this paper of which 1 new family, 3 new genera, and 11 new species. Some of the species studied have been found in marine Fishes.

**Watanabe M.** - Studies on *Paragonimus westermani* (I. Report). Especially on the Encysted Larvae in *Eriocheir japonicus*. [*Studia speciei « P. westermani ». Agitur particulatim de larvis incystatis in specie « E. japonicus »*]. (In Jap.). 24 figs., Okayama Ig. Z., XLVI, 7, 1514-1532. Okayama (1934). **b - 739**

Life history of the larvae of *P. westermani*, the cysts of which after being formed in the body of the crab, do not come out by themselves, passively awaiting to be taken in by the final host. After the death of the host, the cysts may live for 5 or 6 weeks, remaining in the body of the host, but die after 10-30 days, if left free in water.

**Wilson C. B.** - Studies of Parasitic Copepods [*De Copepodis parasitis*]. Woods Hole Oceanogr. Instit., App., Rep. 1934, 38. Woods Hole, Mass. (1935). **b - 740**

Account of a work upon two collections of parasitic Copepods, one made by the Johnson-Smithsonian Expedition to the Porto Rican Deep, and the other by Dr. H. W. Manter at the marine station of the Carnegie Institution in the Dry Tortugas.

**Woolcock V.** - Digenetic Trematodes from some Australian Fishes [*Trematodes digenetici in piscibus Australiensibus*]. 6 figs., 2 pls., Parasitol., XXVII, 3, 309-331. London (1935). **b - 741**

Systematic and morphological study of seven new forms of entozoic trematodes of Australian fishes: *Helicometra tenuifolia, H. bassensis, Dactylostomum gracile, Parahemiurus australis, Erilepturus tiegsi, Probolitrema antarcticus, P. philippi, Otodistomum pristiophori.*

**Zobell C. E. & Wells N. A.** - An Infectious Dermatitis of Certain Marine Fishes [*Infectio quaedam nova in epidermide aliquorum piscium marinorum*]. Journ. Infectious Diseases, LV, November-December, 299-305. Chicago (1934). **b - 742**

The pathology of a highly fatal ulcerous dermatitis of *Fundulus parvipinnis* and other marine Fishes is described. The disease is infectious, *A. ichthyodermis* being the etiologic agent. A study of the temperature requirements of the pathogen and its host has been made. The hyperthermic treatment offers a satisfactory means of controlling the disease in aquariums.

**An.** - Oyster Parasite Threatens Industry in Apalachicola Bay [*Parasiti impendunt in Ostrearum industriam in baja* Apalachicola]. Fish & Oyst. Rep., XVI, 3, 10-11. Tampa, Fla. (1935). **b - 743**

Brief summary of investigations carried out on the parasitic natural ennemy of the oyster known as the wafer or so called « leech », being a turbellarian flatworm (*Stylochus inimicus*) and which has become a serious menace to the continued natural production und private cultivation of the oyster in Apalachicola Bay. Results of a study of the distribution and propagation of the parasite, which show that the high salinity of the water in the region investigated is the principal factor responsible for the rapid growth and spread of the wafer parasite in this region.

**An.** - Oyster Pest Investigation [*Investigationes in Ostrearum morbos*]. Fish & Oyst. Rep., XVI, 5, 15. Tampa, Fla. (1935). **b - 744**

Some information on the oyster pest investigation carried on by the Bureau of Fisheries; the three major problems to be dealt with under plans prepared by the Bureau.

**An.** - Protozoan Parasite of Oyster Associated with Mortalities in Virginia and Louisiana [*Agitur de protozoo quodam parasito in ostrea pro mortalitate Ostrearum in* Virginia *et* Louisiana]. Fish & Oyst. Rep., XVI, 7, 10-11. Tampa, Fla. (1935). **b - 745**

Results of cythological studies on Oysters from the Mobjack Bay, Va., and Terrebone Parrish, La., during the winters of 1929-30 and 1932-33 showing an unusual mortality, due to retarded and abnormal shell growth and an unusually weak condition of the muscle with inability to maintain closure of the shell during transplantation and shipping operations. The studies show that those Oysters were heavily infested with a parasitic protozoan which tentatively has been identified as one of the *Haplosporida.*

**An.** - Progress Made in Oyster Pest Studies [*De progressibus in Ostrearum morbos studendos*]. Fish & Oyst. Rep., XVI, 10, 6-7. Tampa, Fla. (1935). **b - 746**

The Bureau of Fisheries has succeeded in devising traps and methods for ridding the oyster beds principally from starfish, oyster drill and oyster leech.

# PLANCTON ET BENTHOS

## Zooplancton et Phytoplancton - Distributio et valor.

**Bigelow H. B. & Sears M.** - Zoöplankton Studies [*De Zooplancton*]. Woods Hole Oceanogr. Instit., Rep. 1934, 19. Woods Hole, Mass.(1935). **b - 747**

Summary of (I) the studies of the zoöplankton of the waters of the continental shelf, Cape Cod to Chesapeake Bay; (II) the study of Siphonophores collected on the « Thor » Expedition, 1908 and 1910, to the Mediterranean, and (III) the study of Siphonophores collected on the cruise of the « Dana » around the world, 1928-1930.

**Bogorov V. G.** - La biomasse du plancton [*De biomassa planctonica*]. (En russe, rés. angl.). 8 fig., 1 pl. h. t., Bull. Vses. Naoutchno-Issl. Inst. Morsk. Rybn. Choz. i Okeanogr., 1, 1-18. Moskva (1934).

(—) Voir aussi, ibid., 2, 26-29. (1934) **b - 748**

**Bogorov V. G. & Preobragenskaja E. N.** - Caractéristique du plancton de la Mer de Barents. II. *Copepoda* [*Peculiaritates planctonicae Maris Barentsii. II. Copepoda*]. (En russe, rés. angl.). 8 fig., Bull. Vses. Naoutchno-Issl. Inst. Morsk. Rybn. Choz. i Okeanogr., 2, 1-25. Moskva (1934). **b - 749**

**Braarud Trygve** - The « Øst » Expedition to the Denmark Strait 1929. II. The Phytoplankton and its Conditions of Growth (including some Qualitative Data from the Arctic in 1930) [*Agitur de navigatione navis « Øst » in fretum Danicum, A. 1929. II. De phytoplancton eiusque condicionibus quoad accretionem. (Includuntur data qualitativa pro Arctico, A. 1930)*]. 38 figs., 29 tabl., Hvalråd. Skr. Scient. Res. Mar. Biol. Research, 10, 1-173. Oslo (1935). **b - 750**

A consideration of the factors of Phytoplankton production in the sea: direct and indirect factors of productivity. The observations and their interpretation: metods and material: observations in the Norvegian Sea between Iceland and Norway, surface observations from Cape North to Angmagsalik, June 1929 and sub-surface observations. A discussion of the conditions of plant production in the Arctic, Atlantic and Polar waters. Remarks on the distribution and taxonomy of the population. Diatoms (*Chaetoceros, Amphiprora, Nitzschia, Navicula, Thalassiosira*); Flagellates (*Ceratium, Dinophysis, Exuviaella, Gonyaulax, Peridinium, Phalacroma, Corbicula*); Ciliates (*Laboea, Salpingella*).

**Dakin W. J. & Colefox A.** - The Marine Plankton of the Coastal Waters of New South Wales [*De plancton marino aquarum litorearum in regione* South Wales]. Proc. Linn. Soc. N. S. Wales, 58, parts 3-4, 186-222. Sydney (1935). **b - 751**

Similitary between the planktons of Northern and Southern waters with regard to the seasonal cycle: Two periods of maxima production.

**Fisch C. J.** - Zoöplankton of the Gulf of Maine [*De zooplancton in Sinu* Maine]. Woods Hole Oceanogr. Instit., Rep. 1934, 21. Woods Hole, Mass. (1935). **b - 752**

Summary of the results of field investigations, especially concerned with (I) the zoöplankton population, the relative numerical importance of the ecological groups and a consideration of each group, and (II) the biology of zoöplankton (biology of *Oithona similis* and *Microsetella norvegica*).

**Graham H. W.** - The Distribution of the Plancton of the Pacific as related to some physical and chemical Conditions of the Water [*De planctonica per Pacificum distributione quoad quasdam condiciones physicas atque chemicas aquae*]. **Gran H. H.** - Plankton Committee 1934 [*Comitatus pro plancton studendo A. 1934*]. Rapp. Pr.-Verb. Cons. Expl. Mer., XCIV, 2ème partie, Rapp. administr. (1934-1935), 71-76. Copenhague (1935). **b - 754**

Belgium, Denmark, England, France, Germany, Holland, Irish Free State, Latvia, Norway, Poland, Portugal, Scotland, Spain, Sweden. Summary of Plankton investigations on 1934-cruises.

**Gran H. H. & Braarud Trygve** - A Quantitative Study of the Phytoplankton in the Bay of Fundy and the Gulf of Maine (including Observations on Hydrography, Chemistry and Turbidity) [*Studium quantitativum phytoplanctonicum in Baja* Fundy *et in Sinu* Maine. (*Includuntur observationes quoad hydrographiam, chemiam atque turbiditatem*)]. Num. tabl., Journ. Biol. Bd Canada, I, 5, 279-467. Toronto (1935). **b - 755**

This work is the results of the studies undertaken in 1931 in order to examine the effect that the projected Cooper dam might have on the general productivity of the Bay of Fundy, with special regard to phytoplancton production. Hydrographic characteristics of the region. Results of the chemical work. Light conditions. The phytoplankton. Remarks on the species, 11 new forms. The correlation of the phytoplankton with the physical and chemical conditions. General discussion of the conditions of production.

**Hada Yoshine** - On the Pelagic *Ciliata, Tintinnoinea*, from the East Indies with Considerations on the Character of the Plankton in the Seas [*De Ciliatis Tintinnoineis pelagicis ex Indiis orientalibus cum observationibus quoad planctonicas peculiaritates in maribus*]. (In Jap., Engl. Rés.). 3 figs, 2 tabl., Bull. Jap. Soc. Scient. Fish., IV, 4, 242-252. Tokyo (1935). **b - 756**

Description of 39 species of *Tintinnoinea*, two of which are new: *Poroecus rotundatus* and *Craterella retusa*. The distribution of plankton indicates the inflow of surface water from the Java Sea into the Indian Ocean.

**Hanzawa Shôshirô** - Diatom (*Ethmodiscus*) Ooze Obtained from the Southwestern North Pacific Ocean [*Diatomaea «Ethmodiscus» a zona proveniens meridionali occidentali Oceani Pacifici Septentrionalis*]. 2 pl., Rec. Oceanogr. Works Japan, VII, 1, 37-44. Tokyo (1935). **b - 757**

Detailed description of the samples of Diatom Ooze that are all similar in constituents and represent a distinct kind quite different from Diatom Ooze found in high latitudes. They are principally composed of fragments of extremely delicate frustules of *Ethmodiscus*, a diatom of unusually large size.

**Hardy A. C. & Gunther E. R.** - The Plankton of the South Georgia Whaling Grounds and Adjacents Waters 1926-27 [*De plancton in fundis marinis ad balaenam piscandam navigatis, in Georgia Merid. maribusque propinquis*]. 193 figs., & maps., Discovery Rep., XI, 1-456. Univ. Press. Cambridge (1935). **b - 758**

**Harvey H. W., Cooper L. H. N., Lebour M. V. & Russell F. S.** - Plankton Production and its Control [*De productione planctonica eiusque inspectione*]. 16 figs., 2 tabl., Journ. Mar. Biol. Assoc., XX, 2, 407-441. Plymouth (1935). **b - 759**

Phytoplankton and zooplankton organisms and their phosphorous contents based on samples from vertical hauls about 5 miles S. W. of Plymouth Breakwater in circa 50 m. depth of water. The Diatom population in different seasons. It is considered that much of the organic phosphorus compounds in Diatoms may pass undigested through animals and remain in solution in the sea until regeneration to phosphate takes place in late summer.

**Issel R.** - Ciclo annuale del microplancton di superficie nel Golfo di Napoli (Golfo interno) [*Agitur de cyclo annuo microplantonico ad superficiem in Sinu Neapolitano*]. 2 fig., 6 tav., Pubbl. Staz. Zool. Napoli, XIV, 1, 1-50. Napoli (1934). **b - 760**

Osservazioni sul ciclo annuale di circa 190 specie del microplancton, sistematicamente raccolte per un triennio nel Golfo interno di Napoli, e confronto delle varie fasi del ciclo con quelle caratteristiche di altre stazioni costiere del Tirreno.

**Issel R.** - I fattori che regolano la distribuzione del plancton nelle acque di Venezia e della Laguna veneta [*Agitur de factoribus qui moderantur distributionem planctonicam Venetiis et in lacuna veneta*]. Boll. Zool., VI, 1/3, 191-193. Napoli (1935). **b - 761**

Le condizioni della popolazione planctonica nelle acque dei porti-canali che mettono in comunicazione la Laguna col mare aperto sono sostanzialmente le stesse dell'Alto Adriatico. Addentrandosi nella Laguna si notano differenze evidenti nei valori termici, mentre l'acqua può dirsi normale nei riguardi biologici dal punto di vista della concentrazione ionica e dell'ambiente respiratorio. Il complesso planctonico si va riducendo e trasformando verso le parti più interne della laguna mentre si va sviluppando una fauna natante a facies salmastra, costituita soprattutto da Rotiferi e Copepodi. Il plancton vero e proprio si estingue in grandissima parte nella zona dei canali.

**Issel R.** - Plankton [*De plancton*]. Rapp. Pr.-Verb. Cons. Expl. Scient. Méditerranée, IX, (n. sér.), 85-94. Paris (1935). **b - 762**

Apparition de formes nouvelles dans la Méditerranée: *Phytoplancton, Copepoda, Cladocera, Amphipoda.* Contribution à la connaissance des cycles annuels du plankton de la Méditerranée. Distribution verticale et horizontale du plankton. Espèces particulières. Bibl.

**Iwanow A. W.** - Ueber die Erforschung des Benthos an den Küsten des Ussuri-Landes und der Tatarischen Meeresstrasse im Jahre 1931 [*Studium de benthon prope litora regionis* Ussurijskaja *et freti* Tatarskij, *A. 1931*]. (In Russ., Dtsch. Rés.). 2 tab., Expl. Mers URSS, 19, 93-113. Léningrad (1933). **b - 763**

Vorläufige allgemeine Bemerkungen über die verschiedenen Zonen des Benthos, Angabe der Arten und Tiefen, Vergleich unter den Zonen und Ursachen der verschiedenen Verteilung.

**Jespersen P.** - Quantitative Investigations on the Distribution of Macroplankton in Different Oceanic Regions [*Investigationes quantitativae in distributionem macroplanctonicam in Oceani diversis regionibus*]. 28 figs., charts, Carlsberg Found. Oceanogr. Exped. round the world 1928-30, and previous « Dana » Exped., Dana-Rep. N. 7, 1-44. Copenhagen & London (1935). **b - 764**

Determinations have been made in the North Atlantic and Caribbean Sea, Pacific and Tasmanian Sea, Indo-Malayan region, waters west of Sumatra, Indian Ocean, South Atlantic, Straits of Gibraltar and adjacent waters, and Mediterranean, each of which is described here separately. As a general conclusion A. finds that the quantity of macroplankton in the deeper layers (hauls with at least 1000 m. w.) is comparatively small and fairly uniform in most of the tropical and temperate oceanic regions. Exceptions are the Gulf of Panama and the northerly areas of the North Atlantic with a comparatively rich plankton fauna in the deeper layers.

**Kisselev I. A.** - The Arctic and Mediterranean Elements in the Phytoplankton of the Amur Delta, their Origin and Distribution [*Agitur de elementis arcticis et mediterraneis in phytoplancton ad deltam fluminis* Amur *pertinente. Agitur etiam de origine et distributione eorundem elementorum*]. (In Russ). Bull. Pacif. Comm. Acad. Sc., USSR, 3, 41-43. Leningrad (1934). **b - 765**

Report sent to the Fifth Pacific Science Congress. Brief comment on the influence of waters of different origin on the hydrological characteristics of the Amur estuary and on its phytoplankton, whose distribution clearly indicates the origin of the waters of the estuary which come from the River, the Arctic Sea and the Japan Sea.

**Kisselev I. A.** - Seasonal Variations of the Phytoplankton in the Patrocles Bay in the Japan Sea [*Agitur de variationibus, pro anni tempore, in phytoplancton in baja* Patrocles *in mari Japonio*]. (In Russ.). Bull. Pacif. Comm. Acad. Sc. USSR, 3, 45-48. Leningrad (1934). **b - 766**

Report sent to the Fifth Pacific Science Congress. Brief account on the investigation carried on by the hydrological station established by the Pacific Scientific Institute of Fisheries on the entrance in the Patrocles Bay in the Japan Sea at 43° 04′ l. N., and 131° 57′ l. 0. on the seasonal variations of the composition of the phytoplankton of the Bay intimately collegated with the variations of the hydrological elements, i. e. the currents, the temperature and the salinity of the water.

**Leavitt B. B.** - Quantitative Studies of the Vertical Distribution of the Larger Zoöplankton in Deep Water [*Studium quantitativum distributionis verticalis zooplanctonicae per aquas peraltas*]. 3 figs., 5 tabl., Biol. Bull. LXVIII, 1, 115-130. Lancaster, Pa. (1935). **b - 767**

The A. has measured the total volumes of all the catches and has identified and counted all the *Euphausiacea* that have been collected 100 to 300 miles south and east of Woods Hole during the summer of 1933. It has been sufficiently established at least for this part of the ocean and time of year that Euphausiids as a group reach their highest development in the upper water layers.

**Leavitt B. B.** - Investigations of Bathypelagic Zoöplankton and Experiments with Closing Nets [*Investigationes in plancton bathypelagicum et experientiae retium auxilio clausura praeditorum*]. Woods Hole Oceanogr. Instit., App., Rep. 1934, 24. Woods Hole, Mass. (1935). **b - 768**

Brief account on studies of the vertical distribution of the larger forms of the zoöplankton in deep water, on improvement of releasing devices for closing nets and on development of more satisfactory methods of rigging and handing large nets.

**Le Blanc R.** - Sur quelques Chaetocéros de l'Etang de Thau [*Agitur de quibusdam exemplaribus ad Chaetocera pertinentibus in Stagno* Thau]. 6 fig., C. R. Acad. Sci., CCI, 139-140. Paris (1935). **b - 769**

Le Plankton du juillet 1935 contient de nombreuses chaînes de *Chaetoceros Lauderi, C. pseudobreve, C. danicum, C. paradoxum,* pourvues d'auxospores. Comparaisons et remarques.

**Liebman E.** - Oceanographic Observations on the Palestine Coast [*Observationes oceanographicae apud litora Palestinae*]. 2 graphs, Rapp. Pr. Verb. Cons. Expl. Scient. Mediterranée, IX (n. série) 181-186. Paris (1935). **b - 770**

One table gives comparative values on the quantitative seasonal distribution of plankton collected at the Palestine Coast with two maxima periods (April and September). The great increase of Plankton in Autumn is of vital importance for sea-fisheries as is seen from the vaste shoals of fish which appear near the shores. Studies on the temperature and salinity of these waters.

**Mielck W. & Künne C.** - Fischbrut- und Plankton-Untersuchungen auf dem Reichsforschungsdampfer « Poseidon » in der Ostsee, Mai-

Juni 1931 [*Investigationes in ova piscium, atque etiam in plancton, peractae inter navigationem navis* «Poseidon» *per mare Balticum a mense Majo ad Junium A. 1931*]. 8 Taf. a. T., 12 Abb., Anh. v. 39 Tab., Wiss. Meeresunters. hrsg. Komm. wiss. Unters. Dtsch. Meere i. Kiel u. Biol. Anst. Helgoland, N. F., Abt. Helgoland. XIX, 3, 7, 120 S. Leipzig & Kiel (1935). **b - 771**

I. Teil (Mielck). Feststellung der Verbreitung und Mengenverhältnisse der Fischbrut (besonders Sprott, Dorsch und andere Nutzfische) und Planktons. Methoden und Geräte. Untersuchungen und Aufarbeitung des Materials an Bord. Feststellung von drei verschiedenen Laichgebieten. Allgemeine Beobachtungen über die Fischbrut: Volumenvergrösserung der planktonischen Fischeier in der Ostsee, verschiedene Herkunft der Eier an demselben Platze, Laichzeiten, Vergleich zwischen Ostsee–und Nordseelarven derselben Art. Hydrographische Beobachtungen.

2. Teil (Künne). Die Verbreitung der grösseren Planktontiere (ausser Fischbrut). Vertikal- und Horizontalverbreitung des Grossplanktons. Beziehungen zwischen Grossplankton und Fischbrut. *Coelenterata, Vermes, Arthropoda, Chaetognata, Tunicata*. Tabellanhang über die verschiedenen Fänge. Bibl.

**Pavillard J.** - Péridiniens et Diatomées pélagiques recueillis par Alain Gerbault entre les îles Marquises et les îles Galapagos [*Peridineae et Diatomeae pelagicae, collectae ab* Alain Gerbault *inter insulas* Marquises *et* Galapagos]. 2 fig., Bull. Inst. Océanogr., 669, 1-8. Monaco (1935). **b - 772**

L'A. met en évidence quelques-unes des particularités essentielles du plankton de Gerbault en ce qui concerne l'abondance et la distribution de quelques espèces. Enfin il donne les tableaux des espèces recueillies aux différentes stations.

**Retovskij L. O.** - Preliminary Data on the Plankton of the Obj Bay, the Tazova Bay and the Ghydo-Jamo Gulf [*Data priora de plancton in baja* Obj, Tazova *et Sinu* Ghydo-Jamo]. (In Russ.). Bull. Arct. Inst., 7, 195-96. Leningrad (1935). **b - 773**

Brief account of the composition of the plankton of the area under investigation, determined on hand of 80 samples, hauled from its waters. Author concludes that the plankton of the area contains fresh-water fluviatic organisms, fresh-water organisms belonging to the waters of the bays and the Gulf and several forms belonging to the brackish-water species.

**Russell F. S. & Colman J. S.** - The Zooplankton. (2): The Composition of the Zooplankton of the Barrier Reef Lagoon. (3): A Comparison of the Abundance of Zooplankton in the Barrier Reef Lagoon with that of some Regions in Northern European Waters. (4): The Occurrence and seasonal Distribution of the *Tunicata, Mollusca,* and *Coelenterata* (*Siphonophora*) [*De zooplancton.* (2): *De compositione zooplanctonica in lacuna* Barrier Reef *nomine.* (3). *Comparatio inter abundantiam zooplanctonicam a lacuna* Barrier Reef *provenientem et copiam a ceteris regionibus europaeis provenientem.* (4): *Praesentia et distributio, pro anni tempore, Tunicatorum, Molluscorum et Coelenteratorum*]. Brit. Mus. (Natur. Hist.). Great Barrier Reefs Exped., 1928-29. Scient. Rep. II, 6-7, 159-276. London (1934-35). **b - 774**

Discussion on the methods of collecting. Abundance of Copepods, other animals of importance: Tunicates, Molluscs, Echinoderm Larvae, Ostracods, Decapod Larvae and *Siphonophora*. Comparisons show that the Barrier Reef samples have more volume but fewer animals. Influence of temperature.

**Russell F. S.** - On the Value of Certain Plankton Animals as Indicators of Water Movements in the English Channel and North Sea. [*Agitur de valore aliquorum animalium planctonicorum pro motibus aquae Freti Britannici et Maris Nordici*]. 7 figs., Journ. Mar. Biol. Assoc., XX, 2, 309-332. Plymouth (1935). **b - 775**

It is shown that the planktonic indicators for «western» waters are *Sagitta elegans, S. serratodentata, Aglantha rosea, Stephanomia bijuga, Clione limacina, Meganyctiphanes norvegica, Thysanoessa inermis,* and *Cosmetira pilosella* (in spring and summer only). *Sagitta setosa* is regarded as an indicator of «Channel» water. *Muggiaea,* Salps, Doliolids, *Liriope exigua* and *Euchaeta hebes* are regarded as indicators of «south-western» water. The geographical distribution of *S. setosa* is discussed.

**Savage R. E. & Hardy A. C.** - Phytoplankton and the Herring. Part I. 1921 to 1932 [*De phytoplancton deque aringis. Pars I^a^ a 1921 ad 1932*]. Many tabl., 41 figs., Fish. Invest. 1934, XIV, Ser. II, 2, 1–73. London (1935). **b - 776**

The object of this paper is to give an account of the distribution and movements of any dense phytoplankton concentrations in the Southern North Sea and their influence on the herring fishery. Early work. Analysis of data for years 1921-23, 1924-32. The nature of phytoplankton barriers. Appendix A. Other Diatom concentrations. Appendix B. List of cruises.

**Tagatz W.** - Some Knowledge About Zooplankton of the Bay of Patrokl (Japan Sea, Near Vladivostok) in Summer 1926 [*Data de zooplancton in baja* Patrokl, *aestate 1926*]. (In Russ.; Engl. Summ.). 10 figs., 3 diagrs., Expl. Mers URSS, 19, 59-71. Leningrad (1933). **b - 777**

Account of meteorological, hydrological and hydrobiological observations carried out during the summer 1926 in the Bay of Patrokl. The influence of the Strait of East Bosphor on the hydrological regime of the Bay.

List on the general composition of the zooplankton as observed on 0-5, 5-10, 10-15, and 15-20 m. A. ascribes the strong luminousness of the water of the Bay of Patrokl to the *Dinoflagellata* of the plankton.

**Thompson H. & Frost N.** - The Plankton in 1934 [*De plancton A. 1934*]. 1 figs., 2 tables, Rep. Newfoundl. Fish. Research, Labor., II, 3, 19-23. Newfoundland (1935). **b - 778**

Results of observations on the fluctuations of the plankton; predominating influence of the Atlantic water on the increases and decreases of the plankton; results of the analysis of several groups of plankton, and in particular on the very important *Ceratium* group; some evidence on the unusual occurrence in 1934 of southern warm water along the Labrador coast.

**Ussatschew P. I.** - Die Zusammensetzung und Verteilung des Phytoplanktons des Barentsmeeres im Sommer 1931 [*De compositione et distributione phytoplanctonica per mare Barentsium, aestate 1931*]. (Russ. Text., dtsch. Rés.). Tab., 21 Abb., Trans. Arct. Inst., XXI, 5-94. Leningrad (1935). **b - 779**

Fangmethoden. Verzeichnis der gesammelten Planktonarten mit Tabelle über das gegenseitige Verhältnis der Hauptgruppen. Drei Hauptgruppen werden in Betrachtung der dominierenden Formen unterschieden, die damit zusammenhängenden ökologischen Faktoren besprochen und in Tabellen wiedergegeben.

**Woloszyńska J.** - Quelques remarques sur l'*Attheya decora* West, diatomée planctonique très rare [*Data de «Attheya decora» West, diatomaea planctonica rara praetermodum*]. Acad. Pol. Sc. et Lettr., C. R. Mensuels Cl. Sc. Mathém. et Natur., 3, 8. Cracovie (1935). **b - 780**

L'A. a noté et décrit pour la première fois cette diatomée dans la Baltique et precisément dans le Golfe de Gdańsk.

**Wulff A.** - Oekologische Untersuchungen der Biologischen Anstalt. *b*) Plankton [*Investigationes oecologicae stationis biologicae.* b) *Plancton*]. Biologe, III, 175-177. München (1934). **b - 781**

# ZOOLOGIA SYSTEMATICA ET DESCRIPTIVA

## Bacteria.

**Bertel R.** - Les Bactéries marines et leur influence sur la circulation de la matière dans la mer [*De Bacteriis marinis eorumque influentia in circulationem substantiae in mari*]. 3 fig., Bull. Inst. Océanogr., 672, 1-12. Monaco (1935). **b - 782**

L'A. a fait la culture des plus importants types de Bactéries marines et a exploré leurs fonctions biologiques et biochimiques dans la circulation de la matière dans la mer.

**Burke V.** - Interchange of *Bacteria* between Fresh Water and the Sea [*Bacteria. Quaestio de permutatione inter aquam dulcem et mare*]. Journ. Bacteriol., XXVII, 201-205. Baltimore (1934). **b - 783**

**Kimata Masao** - Decomposition of Fish Muscle and Rate of Growth of Bacteria in Relation to the Number of Seeding Bacteria [*Agitur de decompositione musculi piscis deque velocitate accretionis Bacteriorum pro numero eorumdem bacteriorum satorum*]. 4 figs., Bull. Jap. Soc. Scient. Fish, IV, 4, 215-216. Tokyo (1935). **b - 784**

Results of the experiments undertaken on *Trachyurus japonicus* inoculated with *Pseudomonas fluorescens*.

**Mariani G.** - Studio di un ceppo batterico isolato dal fango marino [*Agitur de quodam stipite bacterico a luto marino separato*]. Giorn. Batteriol. e Immunol, XV, 3, 469-474. Torino (1935). **b - 785**

L'A. ha studiato un ceppo batterico isolato dal fango del fondo marino, classificandolo fra gli antracoidi. Ritiene utile rendere note le sue ricerche perchè dimostrano le difficoltà incontrate nella classificazione che attualmente si deve fare tenendo conto dei recenti studi sopra le mutazioni del *B. carbonioso*.

**Parisi R.** - Una nuova matrice dello *Schizophyllum commune* Fr. [*Matrix quaedam nova speciei «Schizophyllum commune»*]. Atti Soc. Ital. Progr. Sc. (XXIII Riun., Napoli), III, 138. Roma (1934). **b - 786**

Si comunica il rinvenimento dello *Schizophyllum* su una matrice insolita, quale lo scheletro di una balenottera (*Balaenoptera physalus* L.).

**Pierantoni U.** - Sulle cause della luce nei batterii fotogeni [*Quaestio de luce in Bacteriis photogenis*]. Riv. Fis. Nat. e Sc. Nat., X, 1/2, 53-54. Napoli (1935). **b - 787**

L'A. discute le recenti scoperte sull'origine batterica della luce negli organi fotogenici degli animali marini, e sulla fotogenesi nei batteri. Conclude affermando che la luminiscenza nei batteri è strettamente associata alla struttura cellulare e non alla produzione e reazione di speciali sostanze.

**Waksman S. A.** - The Distribution and Conditions of Existence of *Bacteria* in the Sea [*De distributione et condicionibus pro existentia Bacteriorum in mari*]. Ecol. Monogr., IV, 3, 523-529. Brooklyn (1934). **b - 788**

Two necessary factors are considered: the supply of available nutrients and the environmental conditions. The importance of the marine *Bacteria* for the plant and animal life in the sea.

**Waksman S. A. & Carey C. L.** - Decomposition of organic Matter in Sea Water by Bacteria. I. Bacterial Multiplication in Stored Sea Water. II. Influence of Addition of organic Substances upon bacterial Activities [*De decompositione materiae organicae in aqua marina per Bacteria. I. Multiplicatio Bacteriorum in areis clausis aquae marinae. II. Influentia adiunctionis substantiarum organicarum ad activitates bactericas*]. 6 figs., Journ. Bacteriol., XXIX, 5, 531-543; 545-561. Baltimore (1935). **b - 789**

Time and temperature of maximum development of Bacteria. Importance of O concentration for bacterial activities. Parallelism between the decomposition of the organic matter in the water by Bacteria and bacterial multiplication.

**Waksman S. A., Carey C. L., Ostroff R. & Renn C. E.**, assisted by **Kirsch D.** - Studies in Marine Bacteriology [*De bacteriologia marina*]. Woods Hole Oceanogr. Instit., App., Rep. 1934, 35-36. Woods Hole, Mass. (1935). **b - 790**

Brief account of the investigations in marine bacteriology carried out during the summer 1934 and centered around four general problems: (1) decomposition of the organic matter in sea water, (2) the rôle of Bacteria in the cycle of nitrogen in the sea, (3) associative growth of Diatoms and Bacteria, (4) the specific nature of the organism responsible for the disappearance of the eel-grass, *Zostera marina*.

**Zobell C. E.** - Microbiological Activities at Low Temperatures with particular Reference to Marine *Bacteria* [*De activitate microbiologica, demis-*

*sis temperaturis. Agitur particulatim de Bacteriis marinis*]. Quart. Rev. Biol., IX, 4, 460-466. Baltimore (1934). **b - 791**

**Zobell C. E. & Feltham C. B.** - The Occurrence and Activity of Urea-splitting *Bacteria* in the Sea [*De praesentia et activitate in mari Bacteriorum quae uream dissolvunt*]. Science, LXXXI, 2096, 234-236. New York (1935). **b - 792**

Observations have been made to ascertain if there are any significant numbers of urea-splitting *Bacteria* that are functional in and indigenous to the sea, or if those found in the sea are merely passive terrestrial contaminants. The relative abundance of urea-splitting *Bacteria* was estimated and pure cultures were obtained.

The three different types of urea-splitting *Bacteria* isolated from the sea.

**Zobell C. E. & Allen E. C.** - The Significance of Marine *Bacteria* in the Fouling of Submerged Surfaces [*Quae Bacteria significant quoad putredinem rerum submersarum*]. 2 figs., 3 tabl., Journ. Bacteriol., XXIX, 3, 239-251. Baltimore (1935). **b - 793**

The observations made by the AA. show quite conclusively that *Bacteria* and, to a lesser extent, other microörganisms are the primary film-formers on submerged glass slides, and that such films favor the subsequent attachment of the larger and more inimical fouling organisms (Barnacles). The film of *Bacteria* may promote the attachments of macroscopic organisms in different ways. Description of three new Bacteria: *Acromobacter marinoglutinosus*, *A. membranoformis* and *Flavobacterium amocontactus*.

**Zobell C. E. & McEwen G. F.** - The Lethal Action of Sunlight upon *Bacteria* in Sea Water [*De lucis solaris actione letali in Bacteriis marinis*]. 2 figs., 6 tabl., Biol. Bull., LXVIII, 1, 93-106. Lancaster, Pa (1935). **b - 794**

Observations on the vertical, diurnal, and seasonal distribution of *Bacteria* in the sea fail to show evidence of a lethal action of sunlight. While the seasonal fluctuation in the bacterial population is more or less inversely proportional to the intensity of sunlight, it is recognized that there are multifarious interlinked biological, physical, and chemical factors which also influence the bacterial population of sea water.

## Protozoa.

**Bohn G.** - La Cellule et les Protozoaires. Leçons de Zoologie et Biologie Générale [*De cellula et Protozois. Praecepta zoologiae et biologiae generalis*]. I. Actualités Scient. et Industr., 43 fig., CVI, 1-121. Paris (1934). **b - 795**

Organisation chimique physique et multiplication de la cellule. *Flagellata*, *Amoebae*, *Foraminifera*, *Infusoria ciliata*, *Radiolaria* et *Heliozoa*, *Sporozoa* et *Cnidosporida*.

**Casasnovas Colom G.** - Notas sobre Foraminíferos. Las especies de la familia *Peneroplidae* actuales y fósiles de las Baleares [*De Foraminiferis. Species praesentes et fossiles ad familiam « Peneroplidae » pertinentes, insularum Balaearium*]. 5 figs., 9 láms., Bol. Soc. Españ. Histor. Natur., XXXV, 1/2, 83-102. Madrid (1935). **b - 796**

Historia de la fam. *Peneroplidae*, Subfam. *Spirolininae*, gen. *Peneroplis*: *P. pertusus*, *P. carinatus*, *P. planatus*, *P. loevigatus*; gen. *Spirolina*: *S. semi-litmes*, *S. arietinus*, *S. navarroi n. sp.*

Especies fósiles: *Peneroplis* cf. *planatus*, *P.* cf. *discoideus*, *Spirolina* cf. *cylindrica*; sufam. *Orbitolitinae*: *Amphisorus hemprichii*.

**Chatton E. & Biecheler B.** - Les *Amoebophrya* et les *Hyalosaccus*; leur cycle évolutif. L'ordre nouveau des *Coelomastigina* dans les Flagellés [*« Amoebophrya » et « Hyalosaccus ». Cyclus evolutionis. Novus ordo Coelomastiginorum in Flagellatis*]. C. R. Acad. Sc., CC, 7, 505-507. Paris (1935). **b - 797**

Parenté très étroite sinon l'identité des deux genres *Amoebophrya* et *Hyalosaccus* relevée par la connaissance de l'évolution complète dans l'hôte y compris la formation des spores flagellées. Placement des *Amœbophrya* dans la classe des Flagellés, création d'un nouvel ordre *Coelomastigina* (L. S.).

**Chatton E. & Lwoff A.** - Les Ciliés apostomes. I. Aperçu historique et général; étude monographique des genres et des espèces [*Ciliata apostomata. I. Compendium historicum generale. Studium monographicum generum et specierum*]. Arch. Zool. Exp. et Gén., LXXVII, Fasc. 1. Paris (1935). **b - 798**

**Clemens W. A.** - Red « Water-Bloom » in British Columbia Waters [*Coloratio rubra aquarum Columbiae Britannicae*]. Nature, CXXXV, 3412, 473. London (1935). **b - 799**

Occurrence of blood-red water at Nanaimo, British Columbia, during the week of April 28, 1933, caused by *Mesodinium rubrum*, Lohman. This ciliate has also been found in Oysters in Ladysmith Harbour, fifteen miles south of Nanaimo and in local Clams.

**Cushman J. A.** - *Foraminifera*, their Classification and Economical Use [*Foraminifera. Quaestio de distributione in classes deque utilitate oeconomica*]. 2nd Ed., 31 pls. & text-figs., Cushman Labor. Foramin. Res., Spec. Publ. 4, 349 pp. Sharon, Mass. (1933). **b - 800**

Second edition improved and brought up to date of the widely used handbook of living and fossil *Foraminifera*. The key of the genera has been amplified and the 45 families and 412 genera of the first edition have grown into 47 families and 532 valid genera and subgenera. The families of *Fusulinidae* and *Orbitoididae* are described by Carl O. Dunbar and T. Wayland Waughan respectively.

**Cushman J. A.** - An Illustrated Key to the Genera of the Foraminifera [*Foraminifera. Aditus scientificus ad genera explicanda*]. 40 pl., Cushman Labor. Foramin. Res. Spec. Publ., 5, 24 pp. Sharon, Mass. (1933). **b - 801**

This key now published in a separate volume has been presented in the first edition of « Foraminifera, their Classification and Economic Use », of which also a new second improved and amplified edition has been issued.

**Cushman J. A.** - Fourteen New Species of Foraminifera [*Foraminifera. Species novae XIV*]. 3 pls., Smiths. Miscell. Collections, Publ. 3327, XC, 21, 1-9. Washington, D. C. (1935). **b - 802**

This material completes that formerly obtained by the Challenger-expedition in the area on the north coast of Puerto Rico. Description of 14 new species with holotypes.

**Dangeard P. A.** - Mémoire sur l'*Apistonema submarinum* sp. nov. et considérations générales sur la structure des Protozoaires et des Protophytes [*Memoria de specie « Apistonema submarinum » considerationesque generales de structura*

*quoad «Protozoaria» et «Protophyta»*]. 4 pl., 6 fig., Botaniste, XXVI, 3, 261-345. Paris (1934). **b - 803**

Cette nouvelle espèce a été trouvée au milieu d'autres organismes d'eau salée; Morphologie, cytologie, reproduction. Expériences des réactions de couleur avec *Apistonema submarinum* et *Monas biocellata* n. sp., *M. longicilia*, *M. vorax* n. sp., *Chromulina maxima* n. sp., *Oxyrrhis marina*, *Synedra*, *Rhodochorton*, *Ectocarpus reptans* et *Vaucheria*.

**Deflandre G.** - Sur un Silicoflagellé aberrant, *Dictyocha recta* (Schulz), à squelette non tubulaire [*De quodam silicoflagellato aberrante «Dictyocha recta» scheletro praedito nontubulari*]. 5 fig., Bull. Soc. Franç. Microsc., III, 4, 115-118. Paris (1934). **b - 804**

L'A. trouve que la forme connue jusqu'ici sous le nom de *Dictyocha triacantha* Ehr. var. *recta* Schulz est un silicoflagellé vrai, bien que le caractère fondamental du squelette soit absent. Enfin, il remanie la diagnose de la famille des Silicoflagellés.

**Dons C.** - *Echinofolliculina Mortenseni* n. gen., n. sp., – 2 fig., Kgl. Norsk. Vidensk. Selsk. Forh., 1934, VII, 9, 28-30. Trondheim (1935). **b - 805**

Diese Art ist dem Material von Folliculiniden, die von Dr. Th. Mortensen während seiner Südsee-Expedition 1914 gesammelt war, entnommen und an der NO-Küste von New Zealand gefunden worden. Diagnose, Vergleich mit anderen Karaffentierchen, Verpflanzung.

**Dons C.** - Uebersicht der Folliculiniden [*Folliculinida*]. Kgl. Norsk. Vidensk. Selsk. Forh. 1934, VII, 10, 31-32. Trondheim (1935). **b - 806**

Kurze Uebersicht der wichtigsten und sicheren Arten mit Bestimmungsschlüsseln für die Genera.

**Frisch J. A.** - Experimental Adaptation of Fresh-water Ciliates to Sea Water [*Ciliata aquae dulcis et aquae marinae. Quaestio de adaptatione experimentali*]. Science, LXXXI, 2109, 537. New York (1935). **b - 807**

Short note on experiments undertaken with *Paramecium caudatum* and *P. multicronucleatum*. Negative results.

**Georgévitch J.** - Protistologie. Les Myxosporidies des Poissons de la Mer [*Protistologia. Myxosporida piscium marinorum*]. Rapp. Pr.-Verb. Cons. Expl. Scient. Méditerranée, IX (n. sér.), 137-144. Paris (1935). **b - 808**

Après quelques remarques générales sur l'organisme des Myxosporidies l'A. concentre ses études sur le rôle du cycle chromosomique dans le processus de la sporogénèse en citant aussi les recherches faites par Naville. Selon l'A. les Myxosporidies sont des organismes à noyaux diploïdes.

**Giambra R.** - Alcune Peridinee del mare di Palermo [*Peridineae maris Panormitani*]. Boll. Pesca, Piscicolt. e Idrobiol., XI, 1, 33-35. Roma (1935). **b - 809**

L'A. prende in esame il fitoplancton del mare di Palermo; comunica l'elenco delle specie di Peridinee fin qui determinate.

**Hall R. P.** - A Note on the Flagellar Apparatus of *Peranema trichophorum* and the Status of the Family *Peranemidae* Stein [*Nota de apparatu flagellari speciei «Peranema trichophorum» deque condicionibus familiae Peranemidarum*]. Trans. Amer. Microsc. Soc., LIII, 3, 237-244. Lancaster, Pa. (1934). **b - 810**

Previous reports of the biflagellate condition of *P. trichophorum* are confirmed. Discussion on the behaviour of the flagellar apparatus in binary fission. Criticism of Calkins' classification of *Euglenida*.

**Lackey J. B.** - Studies on Marine Protozoa [*Protozoa marina*]. Woods Hole Oceanogr. Instit., App., Rep. 1934, 23. Woods Hole, Mass. (1935). **b - 811**

Brief summary of the investigation, during which over 250 species of marine Protozoa were identified from the inshore waters of the Woods Hole area. Their abundance, as well as their succession during the summer months were determined.

**Lacroix E.** - *Discammina fallax* et *Haplofragmium emaciatum*. – 9 fig., Bull. Inst. Océanogr., 667, 1-16. Monaco (1935). **b - 812**

D'après l'étude de la texture et de la structure de ces deux espèces l'A. a pu non seulement les identifier, mais tirer au clair, par des techniques variées, plusieurs points intéressants de la morphologie et de la biologie des Arenacés labyrinthiques.

**Lalicker C. G.** - Two New *Foraminifera* of the Genus *Textularia* [*Foraminifera duo nova ad genus «Textularia» pertinentia*]. 1 pl., Smiths. Miscell. Collections, Publ. 3328, XCI, 22, 1-2. Washington, D. C. (1935). **b - 813**

*Textularia calva* n. sp. and *T. lateralis* n. sp. obtained during the Johnson-Smithsonian Expedition of 1933.

**Le Calvez J.** - Sur quelques Foraminifères de Villefranche et de Banyuls - Protistologica LV [*De quibusdam Foraminiferis ad* Villefranche, *et* Banyuls *pertinentibus. Protistologica LV*]. 11 fig., Arch. Zool. Expér. et Gén., XXVII, 2, 79-98. Paris (1935). **b - 814**

Description et distribution de quelques espèces de Foraminifères dont certaines sont nouvelles. Fam. *Allogromiidae*, *Astrorhizidae*, *Rhiizamminidae*, *Saccaminidae*, *Lituolidae*, *Ophtalmidiidae*.

**Le Calvez J.** - Flagellispores du Radiolaire: *Coelodendrum ramosissimum*. Protistologica LVI [*Flagellisporae Radiolarii «Coelodendrum ramosissimum». Protistologica LVI*]. 2 fig., Arch. Zool. Expér. et Gén., LXXVII, 2, 99-103. Paris (1935). **b - 815**

Prise de plancton, effectuée à 200 mètres de profondeur; étude des flagellispores de ce Radiolaire qui ne doit pas être considéré comme un parasite.

**Myers E. H.** - Morphogenesis of the Test and the Biological Significance of Dimorphism in the Foraminifer *Patellina corrugata* Williamson [*De morphogenesi quoad concham deque significatione biologica quoad dimorphismum in Foraminifero «Patellina corrugata»*]. 1 fig., Bull. Scripps Instit. Oceanogr. Univ. Calif., La Jolla, Calif., Techn. ser., III, 16, 393-404. Berkeley, Calif (1935). **b - 816**

Systematic position of this species. Organization and development of test. The addition of new chambers. Rate of reproduction. Dimorphism.

**Savage R. E., More A. & Lumby J. R.** - A Note on *Amoebae* living in a Sea Water Sample [*De Amoebis viventibus repertis in specimine aquae*

*marinae*]. Journ. Cons. Expl. Mer., X, 2, 185-186. Copenhague (1935). **b - 817**

The specimens, which the AA. concluded to be *Entamoeba*, have probably come into the sampler from the bilge of the ship.

**Schott W.** - Die Foraminiferen in dem äquatorialen Teil des Atlantischen Ozeans [*De Foraminiferis in regione aequatoriali Oceani Indiani*]. 40 Abb., 40 S., Wiss. Ergebn. Dtsch. Atlant. Exped. « Meteor », 1925-1927. B. III, 3. Teil, Lief. 1 B., Walter de Gruyter & Co., Berlin & Leipzig (1933-35). **b - 818**

Wichtige Schlussfolgerungen in Bezug auf die Verteilung der pelagischen Foraminiferen.

**Schreiber G.** - Primi risultati di ricerche biometriche sui Radiolari [*Resultatus priores ex investigationibus biometricis in Radiolaria*]. Boll. Zool., VI, 1/3, 71-74. Napoli (1935). **b - 819**

Limiti di variabilità delle forme tipica e batibia di alcune specie di Feodari del genere *Protocystis*, e precisamente: *P.* (*Challengeria*) *xiphodon* Haeckel, *P. tritonis* Haeckel e *P. naresi* Murray.

**Schreiber G.** - Ricerche biometriche sui Radiolari. I. Variabilità e distribuzione del *Challengeron diodon* Haeckel [*Investigationes biometricae in « Radiolaria ». De variabilitate et distributione speciei « Challengeron diodon »*]. 3 fig., 1 tav., Pubbl. Staz. Zool. Napoli, XV, 1, 1-15. Napoli (1935). **b - 820**

La ricerca biometrica sulla variabilità del diametro della gabbia nella popolazione di *Challengeron diodon* Haeckel del Golfo di Napoli, mostra nettamente l'esistenza di due forme, una piccola e una grande, ognuna variabile entro limiti di grandezza propri e nettamente distinti. La forma grande è esclusiva degli strati profondi (1000 m.) mentre la piccola è distribuita in tutti i livelli, pur essendo più frequente nelle pescate a 600 metri.

Non sembrano esservi differenze morfologiche apprezzabili fra le due forme, nè nelle sculture della gabbia nè nella disposizione delle spine. La distribuzione stagionale è differente in superficie e in profondità. La forma tipica ha un massimo in primavera ed uno in autunno a 600 metri mentre sembra più frequente in estate che in inverno a 1000. La forma batibia è più costante.

**Sorrentino S.** - Considerazioni sulla variabilità dei caratteri di *Alveolina* e *Flosculina* dal punto di vista del loro raggruppamento e determinazione I. [« *Alveolina* » *et* « *Flosculina* »: *considerationes quoad variabilitaten caracterum ex eorum conglobatione scientifica et determinatione*]. 3 graf., Boll. Soc. Natur. Napoli, XLVI, 121-152, Napoli (1934). **b - 821**

Caratteri di variabilità delle Alveolinidi in base ai quali si precisa e si giustifica l'istituzione della « Famiglia ». Si dimostra la possibilità di tradurre in « quantitativi » i caratteri qualitativi allo scopo di tracciare dei grafici che permettano e rendano più evidente la distinzione di forme affini e dubbie.

**Steemann N. E.** - Untersuchungen über die Verbreitung, Biologie und Variation der Ceratien im südlichen Stillen Ozean [*Ceratia. Investigationes in distributionem, biologiam et variationem in Oceano Pacifico Meridionali*]. 11 Karten, 37 Abb., Carlsberg Foundation's Oceanogr. Exped. round the world 1928-30 and previous « Dana » Exped. Dana-Rep. N° 4, 1-67. Reitzels Forlag. C. A., Oxford Univ. Press., Copenhagen & London (1934). **b - 822**

Die Hydrographie des südlichen Stillen Ozeans. Beschreibung von etva 60 bisher festgestellten Ceratienarten von denen 4 neu sind. Schematische Uebersicht über die biologischen Typen; die Variation und die darauf einwirkenden Faktoren. Die Ceratienbevölkerung des südlichen Stillen Ozeans im Verhältnis zu denjenigen der übrigen Ozeane. Appendix: Stationsliste und die horizontale und vertikale Verbreitung der Ceratien.

**Thomas Dighton H.** - The Economic Importance of the Foraminifera. [*Foraminifera. Quaestio de eorum momento oeconomico*]. 1 fig., Nature, CXXXVI, 3430, 130-132. London (1936). **b - 823**

Some information on the value of the *Foraminifera* as indicators of oil-bearing soil. (See also post-script by Heron-Allen, the same rev. pp. 132-133).

## Porifera.

**Arndt W.** - Porifera (Systemat. Teil.) [*Porifera. Pars systematica*]. 239 Abb., Die Tierwelt der Nord–und Ostsee gegr. v. G. Grimpe & E., Wagler. Hrsg. v. G. Grimpe., Lief. 27, Teil 3-*a*, Akad. Verlagsg. Leipzig (1935). **b - 824**

**Breitfuss L.** - Le spugne calcaree dell'Atlantico con riflesso a tutto il Mediterraneo [*De Spongiis calcariis Oceani Atlantici. Nota extenditur ad Mediterraneum*]. 1 tav., 3 tab., Mem. R. Comit. Talassogr. Ital. (C. N. D. R.), N° CCXXIII, 1-46. Venezia (1935). **b - 825**

Prospetto generale delle singole specie di spugne e dei loro sinonimi; in tutto vengono elencate 42 spugne calcaree dell'Adriatico e 74 di tutto il Mediterraneo, compreso il Mare Egeo, il Mar di Marmara ed il Mar Nero. Le specie sono elencate secondo il sistema di Hentschel: sono citati soltanto i sinonimi più importanti. In apposite tabelle è riportata la distribuzione geografica e batimetrica delle Spugne calcaree. Di 67 specie di Spugne calcaree del Mediterraneo, 36 s'incontrano anche nell'Oceano Atlantico, 24 nell'Oceano Pacifico e 21 nell'Oceano Indiano, globalmente dunque 40 specie, cioè il 72 %; di 34 specie adriatiche si rinvengono altrove 22 specie, cioè il 60 %.

**Burton M.** - Sponges [*Spongiae*]. 8 pls., 8 figs., Res. Swedish Antarctic Exped. 1901-1903, III, 2, 1-58. Stockholm (1934). **b - 826**

The following forms (from Falkland Isl.) are new: *Hoplochalina glacialis*, *Pachypellina fistulata*, *Isodictya delicata* v. *megachela*, *Rhaphidophlus lissocladus*, *Stylostichon tuberculata* and *Microciona basispinosa*.

**Burton M.** - Notes on some Marine Sponges from the Belgian Congo [*Notae de Spongiis marinis ad Congo Belgicum pertinentibus*]. Rev. Zool. Bot. Afric., XXIV, 4, 410-411. Bruxelles & Gand (1934). **b - 827**

*Spongia officinalis* and *Plocamia plena*.

**Burton M.** - Notes on British Sponges, with a Description of a new Genus and Species [*Nota de Spongiis britannicis cum descriptione novi cuiusdam generis novaeque speciei*]. Ann. and Magaz. Hist., XV, 90, 651-653. London (1935). **b - 828**

11 spp. from the west coast of Scotland are recorded, of which *Rhaphidostyla* n. gen. and *R. kitchingi* n. sp.

**Ferrer Hernández F.** - Primera Campaña biológica a bordo del « Xauen » en aguas de Mallorca (Abril de 1933). Esponjas [*De prima navigatione biologiae causa per navem* « Xauen » *peracta in Balearem Majorem.* (*Mense Aprili 1933*). *Spongiae*]. Notas y Resúm., ser. II, 80, 1-3. Madrid (1934). **b - 829**

Lista de las Esponjas capturadas: *Calcarea. Tetraxonida. Keratosa.*

**Laubenfels (de) M. W.** - Some Sponges of Lower California (Mexico) [*De Spongiis ad Californiam Meridionalem pertinentibus*]. 9 figs., Amer. Mus. Novit., 779, 1-14. New York (1935). **b - 830**

The present collection consists chiefly of Sponges manifesting one or other of two types of relationships; either to those from the north of them in California, or to Sponges of the Indo-Australian region. One new genus, *Hypsispongia*, is established, and eight new species and one new variety are described.

**Laubenfels (de) M. W.** - A Collection of Sponges from Puerto Galera Mindoro, Philippine Islands [*Collectio quaedam Spongiarum a* Puerto Galera *provenientium ex insulis Philippinis*]. Philipp. Journ. Sc., LVI, 3, 327-337. Manila (1935). **b - 831**

Nine species representing nine genera of the class *Demospongiae* collected in very shallow water, two of which are new: *Lissodendoryx roxasi* n. sp., *Monanchora dianchora* n. sp.

## Coelenterata – Insulae et scopuli coralliferi.

**Carlgren O.** - Some *Actinaria* from Bering Sea and Arctic Waters [*Actinaria ad mare* Bering *aquasque arcticas pertinentia*]. 1 fig., Journ. Wash. Acad. Sc., XXIV, 8, 348-353. Washington (1934). **b - 832**

13 spp. belonging to 6 families are reported. *Cnidopus ritteri* is new.

**Carlgren O.** - Di alcune Attinie e Zoantari raccolti nel Golfo di Genova (trad. dall'inglese di Issel) [*Actiniae et Zoantharia collecta in Sinu Genuensi*]. 4 fig., Boll. Mus. e Lab. Zool. e Anat. Comp. Genova, XV, 81, 3-14. Genova (1935). **b - 833**

Descrizione di una collezione di Anemoni di Mare raccolti ad una profondità di 200-300 metri. *Hormathia mediterranea* n. sp., *Epizoanthus mediterraneus* n. sp., Fam. *Parazoanthidae.*

**Deichmann E.** - Report on Coelenterates, Worms etc. [*Relatio de Coelenteratis, Vermibus etc.*]. Ann. Rep. Mus. Comp. Zoöl. Harvard College 1934-1935, 47-49. Cambridge U. S. A. (1935). **b - 834**

Revisional work of Marine Worms *Acropora*, and *Pennatulacea* collections; exchange of collections of Sponges; new exhibits of deep sea deposits and plankton; gifts.

**Fraser McLean C.** - Hydroids from the Queen Charlotte Islands [*Hydroidea insularum* Queen Charlotte]. 1 table, Journ. Biol. Bd Canada, I, 6, 503-507. Toronto (1935). **b - 835**

*Tubularia aurea, Ophiodes corrugata* and *Selaginopsis trilateralis* are described as new. The gonangium of *Thuiaria distans* is described. *Tubiclava cornucopiae, Turris neglecta, Perigonimus serpens, Campanularia gigantea* and *Clytia minuta* are now first reported from the Pacific. (A: s abstr.).

**Gudger E. W.** - Coelenterates as Enemies of Fishes. II. Jellyfishes as Fish-eaters [*Coelenterata piscibus obnoxia. II. Medusae piscium edaces*]. 16 figs., Bull. New. York Zool. Soc., XXXVII, 2, 47-58. New York (1934). **b - 836**

**Hill D.** - British Terminology for Rugose Corals [*Terminologia britannica Coralliorum rugosorum*]. Geol. Magaz., LXXII, 481-519. London (1935). **b - 837**

This terminology is based on one proposed by Milne Edwards and Haime and includes also a critical review of the usage of terms. Skeletal formation, simple and compound coralla, increase of the corallum, calice, epitheca septa, stereozones, tabulae and dissepiments, axial structures and ontogeny of the *Rugosa* are dealt with. Bibl.

**Komai Taku** - On the Structure of *Ctenoplana* [*Ctenoplana. Quaestio de structura*]. 8 figs., Mem. Coll. Sc., Kyoto Imp. Univ., IX, ser. B, 4, 245-256. Kyoto (1934). **b - 838**

Introductory notes on the discovery of *Ctenoplana.* General structure in creeping and floating attitudes shown by diagrammatic figures. Anatomy and histology. Discussion on the tentacular apparatus. Systematic position.

**Komai Taku** - On *Stephanoscyphus* and *Nausithoë.* — 43 figs., 2 pls., Mem. Coll. Sc., Kyoto Imp. Univ., X, ser. B, 5 (Art. 14), 290-339. Kyoto (1935). **b - 839**

Historical. *Stephanoscyphus* (= *Spongicola*): external appearance; structure; strobilation. *Nausithoë*: materials examined; *Ephyra* and young medusa; development of gonad; fate of germ cells of *Stephanoscyphus*; irregular specimens of Seto as compared with those from other localities. Remarks on *Stephanoscyphus* as a scyphopolyp.

**Krempf A.** - Enregistrement du cycle marégraphique de 18 ans 2/3 par le polypier en voie de croissance de quelques Coralliaires [*Inscriptio per 18 annos et 2/3 cycli mareographici per crescentem polyparium quorumdam Corallariarum*]. Ann. Sc. Nat., 10e Sér., Zool., XVIII, 135-143. Paris (1935). **b - 840**

**Leloup E.** - Contribution à la répartition de *Tetraplatia volitans* (Busch) [*Contributio in partitionem speciei* « *T. volitans* »]. 1 carte, 1 tabl., Bull. Mus. R. Hist. Nat. Belgique, XI, 4, 1-7. Bruxelles (1935). **b - 841**

Résultats d'une étude d'exemplaires adultes de *T. volitans* (Busch) récoltés par l'expédition du « Météor » lors de son exploration, en 1925-27, de l'océan Atlantique tropical et austral jusqu'aux terres antarctiques, avec référence spéciale à l'extension géographique de cette ptéroméduse, à l'époque et à la profondeur de ses captures, et à l'éthologie de *T. volitans.*

**Leloup E.** - *Halammohydra* et les siphonophores chondrophorides [*Quaestio de* « *Halammohydra* » *et Siphonophoris condrophoridicis*]. Bull. Mus. R. Hist. Nat. Belgique, XI, 23, 1-4. Bruxelles (1935). **b - 842**

Note critique sur la première partie du travail de R. Weill publié dans le Bull. Soc. Zool. de France, LX, 1 1935, pp. 73-87, dans laquelle M. Weill affirme que la *Halammohydra* Remane par son cnidome et sa position systématique présente des affinités avec les siphonophores

chondrophorides et avec *Protohydra leuckarti* Greef; l'A. de la présente Note démontre que « malgré l'identité du cnidome, *Halammohydra* ne se rapproche nullement des Chondrophorides, mais, selon l'hypothèse de A. Remane, ce genre aberrant se rattache aux Narcoméduses.

**Leloup L. & Hentschel E.** - Die Verbreitung der Calycophoren Siphonophoren im südatlantischen Ozean [*Siphonophora calycophora Oceani Atlantici Meridionalis. Quaestio de distributione*]. Wiss. Ergebn. Dtsch. Atlant. Exped., « Meteor » 1925-1927, XII, 2 Teil, Lief. 1. Walter de Gruyter & Co., Berlin & Leipzig (1933-35). **b - 843**

**Philbert M.** - Le phénomène de stolonisation chez trois espèces d'Hydraires fixés sur des Posidonies en Méditerranée [*Quaestio de stolonisatione in tribus ex Hydrariis speciebus fixatis in Posidoniis maris mediterranei*]. 2 pl., Bull. Inst. Océanogr., 663, 1-8. Monaco (1935). **b - 844**

Etude de trois espèces intéressantes par leur stolonisation, à savoir: *Orthopyxis asymetrica* Stechow, *Sertularia perpusilla* Stechow et *Plumularia obliqua* (Saunders). Ces trois espèces présentent un ensemble de caractères qui montrent qu'elles sont bien adaptées à vivre sur les feuilles de Posidonies.

**Philbert M.** - Les Hydraires de la région malouine [*Hydraria ad regionem apud* Saint-Malo *pertinentia*]. 6 fig., Bull. Inst. Océanogr., 673, 1-36. Monaco (1935). **b - 845**

Dans la première partie de cette note l'A. a étudié les divers points explorés de la côte en énumérant pour chacun d'eux les Hydraires qui y furent récoltés, dans la seconde partie il a étudié les Hydraires eux-mêmes au point de vue soit morphologique, soit biologique.

La plupart des Hydraires récoltés appartiennent à des espèces communes, cependant certains d'entre eux n'avaient pas encore été cités sur la côte nord de Bretagne.

**Philbert M.** - Contribution à l'étude des Hydraires dans les Iles Anglo-Normandes [*Hydraria ad insulas Anglico-Normannas pertinentia. Contributio in eadem studenda*]. 1 fig., Bull. Mus. Nat. Hist. Natur., VII, 1, ser. 2, 85-88. Paris (1935). **b - 846**

Une excursion faite aux îles Anglo-Normandes au mois d'août 1934, montre que, dans la zone de balancement des marées, toute cette région est riche en Hydraires; mais le grand intérêt n'est pas tellement la diversité des espèces que la prolifération de certaines d'entre elles. Tel est le cas d'*Orthopyxis integra*, trouvé à l'île Lihon, de *Tubularia indivisa* et de *Campanularia flexuosa*, trouvés dans les grottes du Gouliot.

**Ranson G.** - Contribution à l'interprétation objective des formes et de leurs rapports dans la classe *Hydrozoa* (A suivre) [*Hydrozoa. Contributio in obiectivam interpraetationem formarum earumque correlationum*]. Bull. Mus. Nat. Hist. Natur., VII, 2 sér., 4, 247-253. Paris (1935). **b - 847**

Remarques introductoires sur la nécessité de recourir à toutes les techniques modernes en faisant de la Systèmatique la synthèse des résultats de nos études sur le déterminisme protoplasmique des particularités morphologiques. Discussion sur les relations entre les Méduses et les Hydroïdes et leur groupement. Exemple d'examination: *Campanularia caliculata* Hincks.

**Rawlinson R.** - *Edwardsia callianthus* spec. nov. A New British Species from Menai Straits [« *Edwardsia callianthus* » *species nova Anglica a freto proveniens* Menai *nomine*]. 11 figs., Journ. Mar. Biol. Assoc., XX, 1, 129-146. Plymouth (1935). **b - 848**

Diagnosis (colour, size, occurrence), description (external features, anatomy), habitat, habits, larvae and young individuals of the new species.

**Roever (de) J. W.** - Koraalriffen en -eilanden (in de baai van Batavia) [*De scopulis coralliferis insulisque in baja Batava*]. Onze Aarde, 147-155. Amsterdam (1935). **b - 849**

**Stephenson T. A.** - The British Sea Anemones. II. [*Anemones maris Britannici*]. 18 pls., 67 fig., xii + 426 + 16. Ray Soc. Vol. for the year 1934, CXXI, Dulau and Co., Ltd. London (1935). **b - 850**

Life habits with a special regard to the parasitism and burrowing habits in *Peachia*; reproduction, feeding and action of tentacles; distribution and ecology. Keys and summaries of the most important features of 40 spp. of British *Actinaria*. *Nematostella vectensis* n. sp. and *Edwardsia callianthus* Rawlinson are new for Great Britain.

**Stiasny G.** - I. *Acromitus hardenbergi* nov. spec., eine neue Rhizostome Meduse aus dem Malayischen Archipel. II. Ueber eine Anomalie von *Acromitus flagellatus* (Stiasny) [« *Acromitus hardenbergi* » *species nova ex Medusis rhizostomatibus ad archipelagus* Malacca *pertinentibus. II. De anomalia nova speciei* « *Acromitus flagellatus* » (Stiasny)]. 6 Abb., Zool. Meded., XVII, 1/2, 1-7; 8-10. Leiden (1934). **b - 851**

**Stiasny G.** - Die *Gorgonacea* der Siboga-Expedition. Supplement 1: Revision der *Plexauridæ* [*Gorgonaceae ad expeditionem* Siboga *pertinentes. Supplementum. I. Recognitio Plexauridarum*]. 7 Taf., vi + 106 S., E. J. Brill. Leiden (1935). **b - 852**

**Thiel M. E.** - Die Besiedlung des südatlantischen Ozeans mit Hydromedusen [*Hydromedusae. Quaestio de populatione in Atlantico Meridionali*]. Wiss. Ergebn. Dtsch. Atlant. Exped. « Meteor », 1925-27. XII, 2 Teil, Lief. 1, Walter de Gruyter & Co., Berlin & Leipzig (1933–35). **b - 853**

Die hier behandelten Hydromedusen gehören fast alle den Trachylinen an, deren ganzer Generationscyklus pelagisch ist. Drei verschiedene horizontelle Verbreitungsgruppen werden unterschieden. Die von Vf. frühere verfochtene Theorie über die Bipolarität pelagischer Organismen wird hier bestätigt.

**Weill R.** - *Halammohydra* Remane, genre d'hydrozoaires aberrant. Son cnidome et sa position systématique: affinités avec les siphonophores chondrophorides et avec *Protohydra leuckarti* Greef [« *Halammohydra* » *ex Hydrozoariis aberrantibus. Quaestio de cnidomate eiusque positione systematica affinitateque cum siphonophoris condrophoricis atque etiam cum specie* « *P. leuckarti* »]. 5 fig., Bull. Soc. Zool. France, LX, 1, 73-87. Paris (1935). **b - 854**

Dans le présent travail l'A. s'oppose catégoriquement à l'hypothèse de A. Remane qui a classé *Halammohydra*, le singulier hydrozoaire qu'il a découvert et décrit, parmi les Narcoméduses. L'étude du cnidome amène l'A. à rapprocher cette hydrozoaire aberrant aux siphonophores chondrophorides.

## Vermes.

**Allgén C.** - Freilebende Nematoden aus dem Trondhjemsfjord [*Nematodes liberi a fiordo* Trondhjem *provenientes*]. 1 Karte, 19 Taf., Capita Zool. IV, 2, 1-162. 's-Gravenhage (1933). **b - 855**

Beschreibung, Verteilung, Geschlechtsverhältnisse von etwa 177 Arten auf 76 Genera und 5 Familien verteilt. Viele neue Arten. Bibl.

**Allgén C.** - Ueber einige freilebende marine Nematoden aus den Sammlungen des Hamburger Zoologischen Museums [*Nematodes marini liberi ad collectiones musei zoologici Hamburgensis pertinentes*]. 4 Abb., Fol. Zool. & Hydrobiol., VIII, 1, 25-33. Riga (1935). **b - 856**

Die hier behandelten etwa 25 Arten stammen aus Neufundland, Island, Norwegen, der Murmanküste, Spitzbergen, Franz Josephs Land, den Nordfriesischen Inseln, der Kielerbucht, Helgoland, der Jadebucht und der Elbe-Mündung. *Viscosia Strandi* n. sp.

Huit espèces, toutes connues, ont été reportées.

**Coe W. R.** - New Nemerteans from Hawaii [*Nemertini novi ex insulis* Hawai]. 4 figs., Bernice P. Bishop. Mus., Occas. Papers, X, 18, 3-9. Honolulu (1934). **b - 863**

The collection studied contains: two species of *Baseodiscus* (*Taeniosoma*) reported from the off-shore waters, one hitherto undescribed species of the same genus (*B. Edmondsoni*) and one new species of *Lineus*: *L. albifrons* n. sp.

**Fauvel P.** - Sur quelques Syllidiens du Japon [*De Syllidibus Japonicis*]. 12 figs., Annot. Zool. Jap., XIV, 3, 301-315. (Contr. Seto Mar. Biol. Labor., n. 39). Tokyo (1934). **b - 864**

Description de 8 espèces de *Syllis*, et de quatre espèces appartenant à *Trypanosyllis, Odontosyllis, Exogone* et *Autosyllis*. L'A. donne la diagnose de *Syllis Okadai* n. sp. qui ressemble à *S. torquata*, et il considère que la *S. torquata* de Misaki ne représente qu'une variation de couleur de *S. Okadai* et qu'elle n'est pas identique aux espèces méditerranéennes.

**Fauvel P.** - Annélides polychètes de l'Annam [*Annelida polychaeta ex* Annam *provenientia*]. 8 fig., Mem. Pont. Acad. Sc. Novi Lyncaei, II, 3, 279-354. Città del Vaticano (1935). **b - 865**

**Holly M.** - *Polychaeta* from Hawaii [« *Polychaeta* » *insularum* Hawaii]. 15 fig., 1 pl., Bernice P. Bishop. Mus. Bull., 129, 1-33. Honolulu (1935). **b - 866**

This is the fifth in a series of publications resulting from investigations by Dr. Pietschmann, in different locations of Hawaii 1927-1928. Systematic list and diagnosis of about 15 species belonging to 6 families, 10 species and 2 subgenera of which are new. Most specimens are pelagic forms of nereids captured on the surface of the sea, especially by night.

**Horst C. J.** (van der) - Die Enteropneusten aus den Meeren der U. S. S. R. [*Enteropneusta in maribus ad URSS pertinentibus*]. (In Russ., Dtsch. Rés.). 7 Abb., Expl. Mers URSS, 19, 73-78. Léningrad (1933). **b - 867**

Kurze Uebersicht der dem Vf. von Prof. K. M. Derjugin, P. Uschakov und N. Tarassow zur Bearbeitung überlassenen Sammlung von Enteropneusten, in welcher folgende 3 verschiedene Arten erkannt worden sind: *Saccoglossus mereschkowskii* (Nic. Wagner), *Harrimania maculosa* Ritter und *Balanoglossus proterogonius* Belichov.

**Karling T. G.** - Ein Beitrag zur Kenntnis der Nemertinen des Finnischen Meerbusens [*De cognoscendis Nemertinis Sinus Finnici. Contributio*]. 24 Abb., Mem. Soc. pro Fauna et Flora Fennica 1933-1934, 10, 76-90. Helsinki (1933-35). **b - 868**

Untersuchungen von drei Arten, von denen eine neu ist: *Prostoma obscurum* Schultze, *Stichostemma graecense* Böhmig und *Sacconomertes arenosa* n. gen. n. sp. Morphologische Bemerkungen. Systematische Bemerkungen. Vergleich zwischen den drei Arten mit Beschreibungen. Nachtrag: Bemerkungen zu einer Arbeit von H. Friedrich, in welcher das Blutgefässsystem bei *Amphiporus cordiceps* Jensen mit dem von *Prostoma obscurum* und *Sacconemertes* verglichen wird.

**Karling T. G.** - *Haplobranchus balticus* n. sp. eine neue sedentäre Polychäte aus dem Finnischen Meerbusen [« *Haplobranchus balticus* » *nova species sessilis Sinus Finnici*]. 1 Abb., Mem. Soc. pro Fauna et Flora Fennica 1933-1934, 10, 242-244. Helsinki (1933–35). **b - 869**

Beschreibung der neuen Art. Verwandten. Andere Fundorte der *Halobranchus*-Arten.

**Karling T. G.** - Mitteilungen über Turbellarien aus dem Finnischen Meerbusen. *Dalyella nigrifrons* n. sp. [*Notitiae de Turbellariis Sinus Finnici. I.* « *Dalyella nigrifrons* »]. Mem. Soc. pro Fauna et Flora Fennica 1933-1934, 10, 388-391. Helsinki (1933–35). **b - 870**

Charakteristika, Vergleich mit anderen *Dalyellia*-Arten, Fundort.

**Karling T. G.** - Mitteilungen über Turbellarien aus dem Finnischen Meerbusen. 2. *Promesostoma cochlearis* n. sp. [*Notitiae de Turbellariis Sinus Finnici. II.* « *Promesostoma cochlearis* »]. 3 Abb., Soc. pro Fauna et Flora Fennica 1933-34, 10, 391-395. Helsinki (1935). **b - 871**

Beschreibung mit besonderer Berücksichtigung des männlichen Genitalapparates.

**McGuire I. P.** - Note on a New Species of Polychaete (*Ophelia cluthensis*] [*Nota de specie quadam nova ex Polychaetis:* « *Ophelia cluthensis* »]. Scott. Natur., 212, 45-46. Edinburgh (1935). **b - 872**

**Michaelsen W.** - Ein neuer Strand-Enchyträide von Helgoland [*Species quaedam nova ex Enchytraeidis in ora maritima insulae* Helgoland]. Zool. Anz., CVIII, 135-141. Leipzig (1934). **b - 873**

**Monastero S.** - Resistenza al digiuno e diminuzione di peso in un nemertino. (*Cerebratulus marginatus* Ren.) [*Patientia jejuni et deminutio ponderalis in quodam Nemertino:* « *Cerebratulus marginatus* »]. 1 tabl., Boll. Soc. Sc. Nat. e Econ., XVII, 1-7. Palermo (1935). **b - 874**

Breve descrizione del *Cerebratulus marginatus*. Tenuto un esemplare a digiuno per 14 mesi, l'A. constatò una diminuzione in peso a circa 1/12 di quello iniziale.

**Okada Yo K.** - *Amblyosyllis nigrolineata*, une nouvelle variété de l'*A. speciosa* Izuka [« *Amblyosyllis nigrolineata* », *varietas nova speciei* « *Amblyosyllis speciosa* »]. Annot. Zool. Jap., XIV, 3, 317-320. (Contr. Seto Mar. Biol. Lab. N 40). Kyoto (1934). **b - 875**

Aux Syllidiens japonais rapportés par Fauvel on peut aussi ajouter un nouveau type d'*Amblyosyllis* qui se trouve abondamment à Misaki. Description de la nouvelle variété.

**Okuda Sh.** - Two Species of the Sedentary Polychaete *Pectinaria* [*Descriptio specierum* « *Pectinaria bocki* » *et* « *Pectinaria japonica* » *ad Polychaeta sessilia pertinentium*]. 6 figs., Annot. Zool. Jap., XIV, 3, 321-326. Tokyo (1934). **b - 876**

Revised description of *Pectinaria bocki* and *P. japonica.*

**Okuda Sh.** - On a Tubicolous Polychaete living in Commensal with a Pycnogonid [«*Lecythorhynchus hilgendorfi*» *commensalis cum pycnogonide quodam*]. 3 figs., Annot. Zool. Jap., XIV, 4, 437-439. Tokyo (1934). **b - 877**

Information on a pycnogonid *Lecythorhynchus hilgendorfi* and his commensal *Spirorbis spirillum.*

**Onoda K.** - On *Pseudobonellia*, a New Genus of the Bonellian Echiuroids [« *Pseudobonellia* », *genus novum ex Echiuroideis Bonellianis*]. 1 fig., 1 pl., Annot. Zool. Jap., XIV, 4, 405-411. Tokyo (1934). **b - 878**

Author proposes the new generic name *Pseudobonellia* for *Bonellia misakiensis* Ikeda on account of the absence of ventral hooks. The diagnosis of the form is given. Type species: *P. misakiensis* (Ikeda).

**Prashad B.** - On a Collection of Echiuroids of the Genus *Thalassema* Lamarck in the Indian Museum, Calcutta [*Echiuroidea ad genus* « *Thalassema* » *pertinentia. Agitur de eorum collectione in museo Indiano,* Calcutta]. 1 pl. o. t., Records Ind. Mus., XXXVII, 39–43. Calcutta (1935). **b - 879**

Description of 5 spp. of *Thalassema*, 2 of which are new: *T. arkati*, and *T. marshalli.*

**Prenant M.** - Leçons de zoologie: Annélides [*Lectiones zoologicae. Annelida*]. 91 fig., 4 tabl., 95 pp., Actualités scient. et industr., 196, Hermann et Cie. Paris (1935). **b - 880**

Classification; écologie; organes de reproduction et d'excrétion, reproduction asexuelle et régénération. Détermination du sexe de *Bonellia*; descriptions particulières de plusieurs expèces; le prototype *Polygordius* et *Nereis* (L. S).

**Reisinger E.** - Ergebnisse einer von E. Reisinger & O. Steinböck mit Hilfe des Rask-Ørsted Fonds durchgeführten zoologischen Reise in Grönland 1926. *Proporoplana jenseni* nov. gen. nov. spec., ein morphologisch bedeutsamer Turbellarientyp [*Resultatus ex navigatione zoologiae causa in Groenlandiam, sumptibus* τοῦ Rask-Oersted *peracta, A. 1926. Agitur de* « *Proporoplana jenseni* » *nov. gen. nov. sp. inter Turbellaria, typo notando quoad morphologiam*]. 10 Abb., Vidensk. Medd., XCVIII, 243-259. København (1934–35). **b - 881**

Vorkommen, äussere Gestalt, Gehaben. Anatomie und Histologie. Systematische Stellung. *Proporoplana* und die Phylogenie der Turbellarien.

**Remane A.** (bearb. v.) - *Vermes.* - Dr. H. G. Bronns Klass. u. Ordn. d. Tier-Reichs wissenschaftl. darg. in Wort u. Bild. IV, Abt. 2: Aschelminthen. Buch 1: Rotatorien, Gastrotrichen und Kinorhynchen. Lief. 2, 3, 4; S. 161-576. Akad. Verlagsg. Leipzig (1932-34). **b - 882**

**Rioja E.** - Anélidos poliquetos procedentes de las campañas del Instituto Español de Oceanografia [*Annelida polychaeta provenientia a naviga-*

*tionibus oceanographicis per Institutum Hispanicum Oceanographicum peractis*]. 57 fig., Inst. Españ. Oceanogr., Trab. 13, 5-44. Madrid (1935). **b - 883**

Estudio de un interesante lote de anélidos poliquetos recogidos en las costas del litoral de la Peninsula, costas de Marruecos, etc. Su estudio ha conducido a determinar 80 especien distintas, algunas de las cuales son nuevas par la fauna español. Fam. *Aphroditidae, Phyllodocidae, Syllidae, Nereidae, Glyceridae, Eunicidae, Aricidae, Terebellidae, Sabellidae,* y *Serpulidae.*

**Schuurmans Stekhoven J. H. Jr.** - Additional Notes to my Monographs on the Freeliving Marine Nemas of the Belgian Coast. I and II [*Notae additiciae ad monographiam eiusdem auctoris de Nematodibus marinis liberis qui in litoribus Belgicis vivunt*]. 5 pls., 13 tabls., Mém. Mus. R. Hist. Nat. de Belgique, Mém. 72, 1-36. Bruxelles (1935). **b - 884**

Composition of the studied biocoenoses. Ecological remarks. Survey of the marine and brackwaterspecies. Systematic division of the orders *Chromadoroidea, Araeolaimoidea, Monhysteroidea;* and *Anguilludoidea.* About 30 species new to the Belgian fauna are listed.

**Sciacchitano I.** - Sulla distribuzione geografica degli Oligocheti in Italia [*Oligochaeta. Quaestio de eorum distributione geographica per Italiam*]. Arch. Zool. It., XX, 1-31. Napoli (1934). **b - 885**

L'A. ha riassunto tutto ciò che si è fatto sulla distribuzione geografica degli Oligocheti in Italia dopo la pubblicazione del Catalogo del Chinaglia, tenendo conto anche di quanto si era trovato prima, ma di cui non era stato fatto cenno da detto autore. Infine ha elencato in speciali tabelle tutte le notizie che si hanno sinora sulla distribuzione degli Oligocheti nelle varie regioni d'Italia.

**Sheppard E. M.** - On *Paradrepanophorus crassus* (Quatr.), a Nemertean Worm new to the British Fauna [« *Paradrepanophorus crassus* » *vermis Nemertinus novus pro fauna Britannica*]. Ann. and Magaz. Nat. Hist., 10 th. ser., XV, 86, 232-236. London (1935). **b - 886**

This species, commensal of *Staurocephalus rubrovittatus,* has been found at the south coast of Ireland.

**Skrjabin K. I.** - *Kutassicaulus* n. g., nouveau représentant des Nematodes de la sousfamille des *Dictyocaulinae* Skrjabin 1933 [« *Kutassicaulus* » *repraesentans novus inter Nematodes subfamiliae Dictyocaulinarum* Skrjabin *1933*]. 13 figs., Ann. Parasitol. Humaine et Comp., XI, 5, 359-363. Paris (1934). **b - 887**

*Kutassicaulus* (*Metastrongylidae, Dictyocaulinae*] basé sur *K. andreewoi* a été trouvé dans les organes de respiration et de circulation des *Phoca* dans la mer d'Okhotsk.

**Steinböck O.** - Die Turbellarienfauna der Umgebung von Rovigno. [*Turbellaria Arupinensia*]. (In tedesco, riass., ital.). 13 fig., 1 tav., Thalassia, I, 5, 1-35. Jena (1933). **b - 888**

Dal 24 marzo al 12 aprile 1932, venne constatata la presenza di numerose specie certe di Nematodi e di 12 specie incerte. La posizione sistematica di 4 delle 43 specie certe non è definitiva, non essendo ancora note in tutti i loro dettagli. Alle 43 specie certe raccolte dall'A. si devono aggiungere altre 6, già note per Rovigno. Durante l'estate verranno effettuate ulteriori ricerche, che completeranno i risultati ottenuti in primavera ed appena allora sarà possibile dare un quadro zoogeografico di questo territorio.

**Steinböck O.** - Turbellarien aus Ostgrönland [*Turbellaria Groenlandiae orientalis*]. 5 fig., Vidensk. Medd., XCVIII, 235-241. København (1934-35). **b - 889**

Beschreibung von vier Arten, von denen zwei neu sind: *Protomacrostomum groenlandicum* n. g. n. sp., *Notocaryoplana arctica* n. g. n. sp.

**Stiasny G.** - Beiträge zur Kenntnis der Enteropneusten des Golfes von Neapel [*Enteropneusta Sinus Neapolitani. Contributio in eadem cognoscenda*]. 10 Abb., Pubbl. Staz. Zool. Napoli, XV, 1, 71-105. Napoli (1935). **b - 890**

Uebersicht früherer Studien über *Tornaria*- Larven und deren Verhältnis zu den adulten Enteropneusten. Eingehende Beschreibung von vier verschiedenen *Tornaria*-Arten, von denen zwei für den Golf von Neapel neu sind. Die Lebensweise und das Vorkommen von *Glossobalanus minutus* Kow. im Golf von Neapel und im Golf von Pozzuoli.

**Stolte H. A.** - *Oligochaeta.* 310 Abb. Bronns Kl. u. Ordn. d. Tierreichs: Vermes IV, Abb. III, Buch 1, Lief. 1, 1-160; Lief. 2, 161-359. (1935). **b - 891**

**Wesenberg-Lund E.** - A Viviparous Brackish-water Ampharetid, *Alkmaria romijni* Horst from Ringkøbing Fjord [*De quodam Ampharetide viviparo in aqua salmacida:* « *Alkmaria romijni* » *in Fiordo* Ringkøbing]. 4 fig., Vidensk. Medd., XCVIII, 215-222. København (1934-35). **b - 892**

This species seems to be the first known true brackish-water annelid among the Ampharetids. Former founds. Description and comparison with *Samytha.* Geographical distribution and hydrological conditions in Ringkøbing Fjord.

**Zachs I.** - Polychaeten vom Nordjapanischen Meere (Bucht Peter der Grosse) [*Polychaeta regionis septentrionalis maris Japonici*]. (In Russ., Dtsch. Rés.). Expl. Mers URSS, 19, 125-137. Léningrad (1933). **b - 893**

Bearbeitung des seit 1925 im Nordjapanischen Meere, sowie in anderen Gewässern des Fernen Ostens der URSS, während planmässiger, hydrobiologischer Untersuchungen gesammelten Materials zum Studium der Polychaetenfauna des betreffenden Gebietes. Es sind 159 Arten beschrieben, von denen 28 als neue Formen aufgestellt sind.

## Echinodermata.

**Bassler R. S.** - The Classification of the *Edrioasteroidea* [*Edrioasteroidea. Distributio in classes*]. 1 pl., Smiths. Miscell. Collect. (Publ. 3301), XCIII, 8, 1-11. Washington, D. C. (1935). **b - 894**

Through the study of the Springer and Ulrich collections of *Edrioasteroidea* in the National Museum, and of material lent by other Institutions, the writer has been enabled to review the structure of most of the known genera and species of this group. The old genera are briefly redefined and six new generic names are proposed.

**Boone** - *Echinodermata.* Scientific Results of the World Cruise of the Yacht « Alva » [*Echinodermata inter navigationem pamphilii* « *Alva* » *collecta*]. Bull. Vanderbilt Mar. Mus., VI, 264 pp. Richmond, Va. (1935). **b - 895**

The *Echinodermata* (four Starfishes and ten Sea-Urchins) are described in the second part as particularly as the *Crustacea.* They belong to the littoral fauna of the Indo-Pacific region, e. g. the coral reefs and tidal zone of

the Palm Islands, Queensland, Durian Straits, Bali, New Caledonia, Fijj Archipelago, Marquesas Islands, Samoa, Society Islands and the volcanic shores of Galapagos. New distribution records presented. Index.

**Chang Feng-Ying** - Report on the Holothurians collected from the Coast of China [*Relatio de Holothuriis collectis in litoribus Sinensibus*]. 20 figs., 3 pls., Contr. Inst. Zool. Nat. Acad. Peiping, II, 1, 1-52. Peiping (1934). **b - 896**

Diagnosis, description and distribution of every species, keys to families and genera. *Molpadia chinensis* n. sp.

**Clark A. H.** - On a Collection of Crinoids from the Raffles Museum, Singapore [*Crinoidea. Collectio nova ad Museum* Raffles, Singapore, *pertinens*]. Proc. Biol. Soc. Washington, 47, 9-14. Washington (1934). **b - 897**

12 spp. are reported. *Reometra* n. gen. (*Oreometra* Clark).

**Clark H. L.** - Some new Echinoderms from California [*Echinodermata nova Californiensia*]. Ann. and Magaz. Natur. Hist., XV, 85, 120-129. London (1935). **b - 898**

*Dendraster excentricus* v. *elongatus* n. sp., *Ophiacantha eurythra* n. sp., *Amphiodia psara* n. sp.

**Clark H. L.** - The Holothurian Genus *Caudina* [*Caudina genus Holothurianum*]. Ann. and Magaz. Natur. Hist., XV, 86, 267-284. London (1935). **b - 899**

Author criticizes the old classification of Heding giving here a new definition of *Caudina* with key to 7 spp. of *Caudina* and to 3 spp. and 3 vars. of *Paracaudina*.

**Dieuzeide R.** - Les Échinides réguliers de la Baie de Castiglione [*Echinidae regulares ad bajam* Castiglione *pertinentes*]. 1 fig., Stat. Aquicult. et Pêche Castiglione (1933), 2, 75-81. Alger (1935). **b - 900**

Énumération des Echinides: *Dorocidaris papillata*, *Centrostephanus longispinus*, *Arbacia aequituberculata*, *Echinus acutus*, *E. melo*, *Psammechinus microtuberculatus*, *Paracentrotus lividus*, *Sphaerechinus granularis*.

**Domantay Josè S.** - Four additional Species of littoral *Holothurioidea* of Port Galera Bay and adjacent Waters [*Holothurioidea ad bajam* Port Galera *aquasque adiacentes pertinentia. Species quatuor additiciae*]. 1 pl. Univ. Philipp. Nat. and Appl. Scient. Bull. IV, 1, 109-115. Manila (1934). **b - 901**

2 spp. of *Holothuria*, 1 sp. of *Labibodemas* and 1 sp. of *Pseudocucumis*, *P. roxasi* n. sp.

**Fisher W. K.** - Note on a Starfish from Christmas Island, Indian Ocean [*Nota de « Asterias » ab insula proveniente nomine* Christmas, *in Oceano Indiano*]. Bull. Raffles Mus. 9, 74. Singapore (1934). **b - 902**

New type locality (Indo-Pacific) for *Neoferdina cumingii* Gray.

**Heding S. G.** - *Myriotrochus eurycyclus* n. sp. A New Apedate Holothurian from the Kara-Sea [« *Myriotrochus eurycyclus* » *n. sp. ex Holothuriis sine pedibus a Mare Karensi proveniens*]. Figs. on pl., Vidensk. Medd., XCVIII, 229-234. København (1934-35). **b - 903**

Diagnosis, comparison with *M. rinkii* and *M. mitsukurii* Ohshima.

**Heding S. G.** - *Holothurioidea*. Pars I. *Apoda*. - *Molpadioidea*. - *Gephyrothurioidea*. — 8 tabl., The Dan. Ingolf-Exped., IV, 9, 84 pp., Zool. Mus. Univ. Copenhagen (1935). **b - 904**

**Mortensen Th.** - *Echinodermata*. – 1 fig., Contr. à l'étude de la Faune de Madagascar. III, ed. par G. Petit, Faune Colon. Franç., IV, 5, 590-596. (1934). **b - 905**

22 espèces ont été reportées.

**Mortensen Th.** - New *Echinoidea*. Preliminary Notice [*Echinoidea nova. Nota prior*]. Vidensk. Medd., XCVIII, 161-167. København (1934-35). **b - 906**

Personal remarks. Preliminary description of about 24 new genera, species and var., which will be described in detail in the forthcoming Part II of the Monograph of the *Echinoidea*.

**Mortensen Th.** - A Monograph of the Echinoidea. II. *Bothriocidaroida*, *Melonechinoida*, *Lepidocentroida* and *Stirodonta* [*Monographia de Echinoideis*]. 89 pl., 377 fig., 647 pp. Copenhagen (1935). **b - 907**

This work dealing with the taxonomy of the Echinoids departs widely from the scheme of classification now current; so for instance, the old Paleozoic order *Perisschoechinoidea* is broken down and some of its families united with younger groups to form new orders, to three of which most of this monograph is dedicated. *Bothriocidaris* is no more considered as the ancestral type but only a resembling form not genetically connected with the Echinoids.

**Nümann W.** - Untersuchungen der Skelette an Varianten, Bastarden und Chimären von regulären und irregulären Seeigeln (*Echinus miliaris*, *E. microtuberculatus*, *Echinocyamus pusillus*, *Echinocardium cordatum*) [*Inquisitiones de scheletro in larvis Echinoideorum permixtis et chimaeris, regularibus et irregularibus*]. 49 Abb., Ztschr. Indukt. Abstamm. - u. Vererb.-lehre, LXV, 3/4, 447-522. Berlin (1933). **b - 908**

Eingehende Beschreibung und Verschiedenheiten im Bau der Skelette, Einfluss der Temperatur auf die Skelettbildung. Kreuzungsversuche und deren Bedeutung für die Identifikation der Hybridtypen.

**Ohshima H.** - Eine Holothurie mit zwei Afteröffnungen [*Agitur de Holothuria, duobus praedita foris analis*]. 2 Abb., Annot. Zool. Jap., XIV, 3, 327-330. Tokyo (1934). **b - 909**

Beschreibung eines getrockneten Exemplares von *Holothuria argus* von 45 mm. Länge, welches zum Verkauf vorbereitet war. Nach einer Einwässerung von zwei Tagen erreichte es eine Länge von 80 mm., und Vf. konnte feststellen, dass das beobachtete Spezimen zwei Afteröffnungen besass.

**Ohshima H.** - A Gourd-Shaped Sea-Urchin [*Agitur de Echino instar cucurbita*]. 1 pl., Annot. Zool. Jap., XIV, 3, 331-337. Tokyo (1934). **b - 910**

This specimen, referred with some doubt to *Strongylocentrotus intermedium*, possesses an elongated body axis and the ambulacral and interambulacral plates are arranged obliquely or bent here and there. The actinostome is small.

**Reid D. M.** - The Range of the Sea-Urchin, *Echinus esculentus* [*Spatium in quo habitat « Echinus esculentus »*]. Journ. Animal. Ecol., IV, 7-16. Cambridge (1935). **b - 911**

**Rivera Gallo V.** - Adición a las notas sobre « Algunos Equinodermos de Groenlandia » [*Additio ad Notas « De Echinodermatis Groenlandicis »*]. 2 fig., 5 fotos. Inst. Españ. Oceanogr., Notas y Résum., II, 87, 1-8. Madrid (1935). **b - 912**

Una más minuciosa separación del material heterogéneo remitidos da D. José J. Maffei (v. publ. en 1931 de las « Notas ecc. ») permite a lo autor de ampliar aquellos datos, agregando a las especies ya citadas algunas otras. Las especies están distribuídas en las clases Astéridos, Ofiúridos y Holotúridos.

**Rivera G. V.** - Primera campaña biológica a bordo del « Xauen » en aguas de Mallorca (Abril 1933). Equinodermos [*De prima navigatione biologica navi* « Xauen » *peracta ad Balearem Majorem* (*Mense Aprili 1933*). *Echinodermata*]. Trab. Inst. Españ. Oceanogr., 10, 83-86. Madrid (1934). **b - 913**

Crinoides, Astéridos, Ofiuridos, Equinidos, Holoturidos.

**Russo A.** - La classificazione degli Echinodermi e l'opera didattica di C. Emery nel 50º anno del suo Trattato di zoologia [*Echinodermata. Agitur de eorum distributione in classes atque etiam de opere praeceptivo professoris* C. Emery, *Lº recurrenti anno ab eius Tractatu de Zoologia*]. Monit. Zool. Ital., XLVI, 4, 97-101. Firenze (1935). **b - 914**

**Russo A.** - *Crinoidea, Asteroidea, Ophiuroidea, Echinoidea* raccolti dalla R. N. Amm. Magnaghi in Mar Rosso e zone viciniori nel 1923-24 [*Crinoidea, Asteroidea, Ophiuroidea, Echinoidea collecta a R. N.* « Magnaghi » *in navigando per Mare Rubrum regionesque adiacentes a 1923 ad 1924*]. Rel. Cons. Soc. Gioeniae Catin. Nat. Scient., 68, serie II, 16-20. Catania (1935). **b - 915**

Sono riprodotte in un solo elenco le specie di Echinodermi, già pubblicate in tre note nel 1929, 1931, 1932 (R. Comit. Talassogr., Mem. CLXVI, Mem. CLXXXV, Mem. CXCIV). Sono rappresentati esemplari della fam. *Comatulidae* (Crinoidea), fam. *Astropectinidae, Echinasteridae, Linckiidae, Asterinidae* (Asteroidea), fam. *Ophiolepididae, Amphiuridae, Ophiotrichidae, Ophiacanthidae* (Ophiuroidea), fam. *Diadematidae Toxopneustidae, Echinidae, Cidaridae, Clypeastridae, Laganidae, Scutellidae, Spatangidae* (Echinoidea).

**Saveljeva T.** - Zur Kenntnis der Holothurienfauna des Japanischen und Ochotskischen Meeres [*Contributio in cognoscendam faunam Holothuriarum Maris Japonii et Maris* Okhotsk]. (In Russ., Dtsch. Rés.). 11 Abb., Expl. Mers URSS, 19, 37-58. Léningrad (1933). **b - 916**

Vorläufige Uebersicht der Ergebnisse des Studiums einer Sammlung von Holothurien aus dem Japanischen und Okhotskischen Meere, welche aus den Expeditionen des Hydrologischen Instituts zu Leningrad und des Pazifischen Instituts für Fischwirtschaft zu Wladivostok stammen. Die Sammlung besteht aus 314 einzelnen Exemplaren, welche 24 verschiedenen Arten angehören. Von den beschriebenen Arten sind die zwei folgenden, *Pannychia moseleyi mollis* n. subsp. und *Trochostoma orientale* n. sp., neu.

**Tortonese E.** - Gli Echinodermi del Museo di Torino. Parte II. Ofiuroidi [*De Echinodermatis Musei Taurinensis*]. 8 tav., Boll. Mus. Zool. e Anat. Comp. R. Univ. Torino, XLIV, ser. III, 45, 13-65. Torino (1934). **b - 917**

Nota illustrativa e zoografica sulla piccola raccolta di Ofiure (53) conservate nel Museo Zoologico di Torino.

**Tortonese E.** - Asterie ed Echini della Patagonia e Terra del Fuoco [*Asteriae et Echini Patagonici et ad* Tierra del fuego *pertinentes*]. 2 fig., Boll. Mus. Zool. Anat. Comp. R. Univ. Torino, XLIV, ser. III, 51, 203-212. Torino (1934). **b - 918**

Il materiale studiato comprende due specie di Asterie (*Sporasterias antarctica* Lütk e *Cosmasterias lurida* Phil.) e cinque Echini (*Arbacia Dufresnii* Blainv., *Pseudechinus magellanicus* Phil., *Loxechinus albus* Mol., *Caenocentrotus gibbosus* Ag. Des., *Abatus cavernosus* Phil.) provenienti dalla Patagonia, particolarmente dal Chubut e dallo stretto di Magellano.

## Mollusca.

**Abe Noboru** - The Colony of the *Littorina*: *Littorivaga brevicula* (Philippi) [*De colonia Littorinis formata: « Littorivaga brevicula »*]. 5 figs., 9 tabl., Sc. Rep. Tôhoku Imp. Univ., fourth ser., Biol., 279–296 (Contr. Mar. Biol. Stat. No. 115. Asamushi, Aomori–Ken). Sendai (1935). **b - 919**

Distribution, positions and directions of the colonies compared with those of *Acmaea dorsuosa* Gould in relation to the high-water line. Experiments on colony formation. General remarks on the habitats and movements of *Littorina*.

**Adam W.** - Notes sur les Céphalopodes. V. *Ozaena cirrhosa* (Lamarck, 1798) sur la côte belge [*De cephalopodis. V. « Ozaena cirrhosa » in litoribus Belgicis*]. Bull. Mus. R. Hist. Natur. Belgique, X, 43, 1-3. Bruxelles (1934). **b - 920**

Description et dimensions d'un exemplaire mâle d'*Ozaena cirrhosa* recueilli à marée basse dans une mare, sur l'estran à l'Est d'Ostende. Cette espèce n'avait jamais été signalée sur la côte belge.

**Baba Kikutarô** - A Pelagic Nudibranch, *Cephalopyge orientalis* n. sp. from Japan [*De Nudibranchiatis pelagicis. « Cephalopyge orientalis » a Japonia proveniens*]. 1 pl., Annot. Zool. Jap., XIV, 1, 157-163. Tokyo (1933). **b - 921**

Comparison with other spp. of *Cephalopyge*.

**Bertolini F.** - Nota sulla sistematica dei *Phylliroidae* [*Phylliroidae. Notae de systematica*]. 4 fig., Pubbl. Staz. Zool. Napoli, XV, 1, 60-70. Napoli (1935). **b - 922**

Notati per la prima volta nel plancton del Golfo di Napoli vari esemplari di *Phylliroë*, l'Autore ritiene di identificarli con la *Ph. atlantica* e la *Ph. Sanzoi*, che sarebbero fra loro sinonimi.

La fam. *Phylliroidae* comprende il gen. *Phylliroë*, con le specie *Ph. bucephala, Ph. atlantica, Ph. amboinensis, Ph. punctulata, Ph. rosea:* il gen. *Acura*: *A. pelagica* e *A. lanceolata*; il gen. *Boopsis*; *B. mediterranea, B. trematoides:* il gen. *Ctilopsis: C. picteti*.

**Bouxin J. & Legendre R.** - Céphalopodes du genre *Vitreledonella* trouvés dans des estomacs de Germons, au large du Golfe de Gascogne [*De Cephalopodis ad genus «Vitreledonella» pertinentibus repertis in stomachis alicuius tynni speciei, longe a litoribus Vasconicis*]. C. R. Acad. Sc., CC, 8, 692-694. Paris (1935). **b - 923**

En se basant sur l'examen des proies contenues dans les estomacs de Germons pêchés au large du Golfe de Gascogne, l'Auteur signale trois Céphalopodes appartenant au genre *Vitreledonella* Joubin, dont on ne connaissait

jusqu'à présent que 5 individus répartis en 4 espèces. Les individus observés se rapprochent à *V. translucida*, mais en même temps, étant donné la disposition des ventouses sur les bras, se rapprochent également de *V. pellucida*.

**Brown H.** - A Study of a Tectibranch Gasteropod Mollusc: Life-history of *Philine aperta* (L.). [*Studium mollusci cuiusdam Gasteropodi tectibranchiati. Historia speciei « Philine aperta »*]. Trans. R. Soc. Edinburgh, LVIII, Pt. I, 9, 179-210. Edinburgh (1934). **b - 924**

Detailed anatomical description of the development of *Philine*: the egg, the veliger, the larva, the metamorphosis, the adult.

**Clemens W. A.** - The *Cephalopoda* of British Columbia Waters [*Cephalopoda Columbiae Britannicae*]. Ann. Rep. Biol. Bd. Canada, 1933, 74. Ottawa (1934). **b - 925**

Brief account of the results of an examination of the collection of *Cephalopoda* occurring along the coast of British Columbia, belonging to the Museum of the Pacific Biological Station, Nanaimo.

**Clench W. J.** - Report on the Mollusks [*Relatio de Molluscis*]. Ann. Rep. Mus. Comp. Zoöl. Harvard College, 1934-1935, 11-12. Cambridge U. S. A. (1935). **b - 926**

Expeditions. Collections: new valuable accessions and revisional work.

**Coen G.** - Due nuovi Lamellibranchi adriatici [*De duobus novis Lamellibranchiatis hadriaticis*]. 2 tav., Notiz. Ist. Biolog. Rovigno, 14, 3-6. Venezia (1934). **b - 927**

L'Autore descrive due nuove specie di Lamellibranchi raccolti presso Rovigno: *Uncidens arupinensis* e *Clathroconcha istriensis*.

**Coen G.** - Recente rinvenimento adriatico della *Mitra* (*Episcomitra*) *zonata* Marryatt [*De recentiore inventione in Hadriatico conchae « Mitra (Episcomitra) zonata-concolor »*]. 1 tav., Notiz. Ist. Biolog. Rovigno, 15, 3-5. Venezia (1934). **b - 928**

Descrizione di *Mitra* (*Episcomitra*) *zonata-concolor*, che rappresenta una nuova varietà di questa rarissima conchiglia, trovata presso Rovigno. L'animale, di mm. 86 di lunghezza, è il più lungo fra i 20 esemplari sino ad oggi conosciuti.

**Cuénot L.** - La seiche commune de la Méditerranée. Etude sur la naissance d'une espèce [*Sepia communis maris Mediterranei. Studium de ortu speciei*]. 1 fig., Arch. Zool. Exp. et Gén. 310-330. Paris (1933). **b - 929**

Comme il existe deux espèces de seiches dans l'Atlantique bien divisée par leurs mœurs et qui ne se croisent pas entre elles, ainsi il existerait dans la Méditerranée deux formes de seiches séparables par leurs caractères sexuels.

**Dalmon J.** - Note sur la biologie du pétoncle. (*Chlamys varia* L) [*De biologia speciei « Chlamys varia »*]. 8 fig., Rev. Trav. Off. Scient. Pêches Marit., VIII, 3, n. 31, 268-281. Paris (1935). **b - 930**

Le pétoncle (*Chlamys varia* L.) est un mollusque dont la biologie est peu connue; l'Auteur résume sa bionomie et indique les caractères spécifiques qui permettent de le distinguer des autres bivalves voisins, et surtout la croissance de la coquille, puisque c'est, en effet, sur cette dernière que s'inscrivent toutes les phases de la vie de ce mollusque. Observation, d'une manière pratique, des zones d'accroissement de la coquille, qui fournissent d'utiles renseignements sur l'âge et la valeur comestibles de l'animal. Le matériel a été récolté sur le Banc de la Flotte (Ile de Ré) à différentes saisons, pour avoir tous les stades d'évolution du test.

**Dautzenberg Ph.** - Gastéropodes marins. 1º *Terebridae*. 2º *Mitridae*. Résultats Scientifiques du voyage aux Indes Orientales Néerlandaises [*Gasteropoda marina. 1º Terebridae. 2º Mitridae. Resultatus e navigatione in Indias orientales Hollandicas scientiae causa*]. 4 Pls., Mém. Mus. R. Hist. Natur. Belgique, II, 17, 1-208. Bruxelles (1935). **b - 931**

On a traité les familles des *Terebridae* et des *Mitridae*, cette dernière avec les genres *Mitra*, *Strigatella*, *Turricula*, *Cylindromitra* et *Imbricaria*. Pour chaque espèce l'Auteur a donné la liste des synonymes, la localité, la dispersion géographique et les remarques.

**Dieuzeide R.** - Contribution à l'étude de deux types de Gastéropodes Pulmonés marins: *Siphonaria algesirae* Quoy et Gamiard; *Gadinia garnoti* Payrandeau [*Contributio in typos duos ex Gasteropodis pulmonatis marinis studendos: « Siphonaria algesirae », « Gadinia garnoti »*]. 13 pl., 41 fig., Stat. Aquic. et Pêche Castiglione (1934), 1/2, 7-196. Alger (1935). **b - 932**

Étude anatomique et biologique sur *Siphonaria algesirae et Gadinia garnoti*. L'Auteur a pu suivre les mœurs, la fonte et la segmentation de l'œuf jusqu'à l'éclosion de la larve véligère. Observations personnelles, à l'aide aussi de l'histologie, sur les rapports des organes entre eux. Comparaison entre *Gadinia* et *Siphonaria;* les divergences ne sont pas suffisantes pour séparer les deux types, qui doivent être considérés comme des Pulmonés ayant fait retour à la vie marine. Bibl.

**Dons C.** - Norges strandfauna V. Chitonider [*De fauna litorea Norvegica. V. Chitonida*]. 1 Karte, Kgl. Norsk. Vidensk. Selsk. Forh. 1934, VII, 2, 4-7. Trondheim (1935). **b - 933**

*Callochiton laevis* Mont., *Acanthochiton fascicularis* Lin., *Trachydermon cinereus* Lin., *Lepidopleurus asellus* Spgl., *Tonicella marmorea* Fabr., *T. rubra* Lin., *Chondropleura alba* Lin. Fundorte und Grenzen.

**Erdmann W.** - Untersuchungen über die Lebensgeschichte der Auster. Ueber die Entwicklung und die Anatomie der «ansatzreifen» Larve von *Ostrea edulis* mit Bemerkungen über die Lebensgeschichte der Auster [*Investigationes in Ostreae cyclum vitalem. Agitur de progressione corporea deque anatomia larvarum maturarum quae sunt paratae ut Ostreae eduli adherescant. Observationes adiunguntur de Ostreae cyclo vitali*]. 8 Taf., 5 Abb., Wiss. Meeresunters. hrsg. Komm. wiss. Unters. Dtsch. Meere i. Kiel u. Biol. Anst. Helgoland, N. F., Abt. Helgoland, XIX, 3, 6, 25 S. Kiel & Leipzig (1935). **b - 934**

Ueberblick über die Entwicklung bis zur planktonischen Larve und Bemerkungen zur Lebensgeschichte. Konservierungs-und Färbemethoden. Ausrichtung des Larvenkörpers im Raum. Die Entwicklung der ansatzreifen Larven: morphologische Uebersicht, Entwicklung der einzelnen Organe. Bibl.

**Friedberg W.** - *Turritella scalaria* de Buch und einige Bemerkungen über evolute Gastropodenschalen [*Species « T. scalaria » observationesque quoad conchas evolutas Gasteropodorum*]. 1 Fig., 1 Taf. a. T., Bull. Int. Acad. Polon. Sc. & Lettres,

Cl. Sc. Mathém. & Natur., 3/5, B II, 137-144. Cracovie (1935). **b - 935**

Vf. hatte in zwei seiner Arbeiten *T. scalaria* als eine Varietät der *T. bicarinata* beschrieben; im vorliegenden Artikel, an Hand eines grösseren Materials, schlägt er vor, diese Form als eine selbständige Art zu betrachten.

**Grabau Amadeus W.** - Studies of *Gastropoda* [*De Gasteropodis studia*]. viii + 159 pp., Nat. Univ. Press. Peking (1935). **b - 936**

**Haas F.** (bearb. v.) - *Mollusca* - Dr. G. Bronns Klass. u. Ordn. d. Tier–Reichs wissenschaftl. darg. in Wort u. Bild. III, Abt. 3, *Bivalvia*. Lief. 4, 385-544. Akad. Verlagsg. Leipzig (1933-34). **b - 937**

**Hertling H.** - Der Seehase (*Aplysia*) bei Helgoland [*Aplysia apud* Helgoland]. 1 Abb., Natur u. Volk., LXV, 3, 103-108. Frankfurt a. M. (1935). **b - 938**

Während der Monate Juni-September 1933 wurden auf der Nord-Binnenreede von Helgoland verschiedene Exemplare von *Aplysia punctata* gefangen und dann in das Aquarium der Biologischen Anstalt geführt. Beobachtungen über das Leben der Tiere im Aquarium: Laichablage usw.

**Hobson A. D., Storrow B., Leach T. S. & Wright F. S.** - A Survey of the Mussel Beds at Blyth, Budle Bay and Holy Island [*De inspectis banchis Molluscorum in* Blyth, *Baja* Budle *in* Holy Island]. 3 maps, Dove Mar. Labor., Rep. Year End. July 31st., 1935, Ser. 3, 3, 27-36. Newcastle o. Tyne (1935). **b - 939**

Results of the survey of the three areas in order to determine their importance as sources to add to the bait supplies of the district. Some considerations concerned with attempt to develop these beds.

**Hoffmann H.** (bearb. v.) - *Mollusca* (Weichtiere). Dr. G. Bronns Klass. u. Ordn. d. Tier-Reichs wissenschaftl. darg. in Wort u. Bild. III. Abt. 2: *Gastropoda*. Buch 3: *Opisthobranchia*. Lief. 1, S. 152. Akad. Verlagsg. Leipzig (1932-1934). **b - 940**

**Jensen A. S. & Spärck** - Blöddyr. II. Saltvandsmuslinger [*Mollusca II. Bivalvia aquae salsae*]. 175 figs., Danmarks fauna 40, 1-208. Gads forlag. København (1934). **b - 941**

Descriptions with keys to families, genera, and species of *Lamellibranchiata, Bivalvia, Pelecypoda,* and *Acephala.*

**Johnson Ch. W.** - List of marine Mollusca of the Atlantic Coast from Labrador to Texas [*Index Molluscorum marinorum ad litora atlantica pertinentium a* Labrador *ad* Texas]. Proc. Boston Soc. Nat. Hist., XL, 1, 1-204. Boston (1934). **b - 942**

**Joubin L.** - Sur les Céphalopodes planctoniques de l'Océan Atlantique (croisières du «Dana», 1921-1922) [*De Cephalopodis planctonicis Oceani Atlantici* (*Navigatio navis* «Dana» *1921-1922*)]. C. R. Acad. Sc., CC, 23, 1896-1897. Paris (1935). **b - 943**

Ces Céphalopodes, exclusivement planctoniques, forment la plus grande collection du monde, environ 30.000 échantillons. Leur étude conduit l'Auteur à formuler la conclusion que les Céphalopodes planctoniques sont des animaux abondants, très prolifiques, dont les larves peuplent en foule les eaux éclairées de l'Océan Atlantique.

**Keep J.** (rev. by Bailey J. L. Jr.) - West Coast Shells [*Mollusca ad litora occidentalia pertinentia*]. 334 figs., xi + 350 pp. Stanford Univ. Press (Stanford Univ. Calif.) & Humphrey Milford & Oxford Univ. Press. (London). (1935). **b - 944**

New edition recommended by the American Malacological Union of the well–known book appeared in 1887. Manual of the principal marine and other Molluscs of Alaska, British Columbia, and the United States west of the Sierra. The nomenclature has been brought up to date und several new illustrations added.

**Kolesnikov V.** - Ueber die Sarmatische Fauna Bulgariens [*De fauna sarmatica Bulgariae*]. (In Russ. u. Deutsch). 1 Tab., C. R. Acad. Sc., U. R. S. S., II, 7, 428-430. Léningrad (1934). **b - 945**

Ergebnisse eines Studiums der dem Vf. aus Bulgarien übersandten sarmatischen Muscheln. Namen der Muscheln mit Ortbenennung ihres Vorkommens sind in der beigelegten Tabelle angegeben. Die folgenden Arten sind als neu bezeichnet: *Cardium lithopodolicum* Dub. var. *bulgarica* nov. var., *C. gočevi* n. sp.; sie sind vom Vf. in seiner Arbeit « Neue Arten sarmatischen Mollusken » beschrieben worden.

**Kubo Itsuo** - Catch of Octopods in Relation to Precipitation and Air-Temperature in Inland Sea of Japan [*De captandis Octopodis pro praecipitatione et aëris temperatura in mari japonico*]. (In Jap., Engl. Rés.). 2 tabl., 1 graph, Bull. Jap. Soc. Scient. Fish, IV, 4, 253-258. Tokyo (1935). **b - 946**

From the researches undertaken it seems that the precipitation during the breeding season of a certain year has a certain influence on the size of the next year's catch of Octopods (*Polypus vulgaris*) especially in the prefecture Hirosima, and also in Kagawa and Okayama.

**Kuroda T.** - A list of the Genera of Japanese *Mollusca* [*Index generum Molluscorum Japoniensium*]. (In Jap. and Engl.). Venus III, 5, 281-289 (1932); IV, 1, 44-54; 3, 184-191; 4, 258-265 (1933-34). Kyoto (1932 & 1934). **b - 947**

**Kuroda T.** - On Some Rare Shells from Sagami Bay Collected by His Majesty the Emperor of Japan [*De quibusdam Molluscis raris a baja* Sagami *provenientibus collectis ab Imperatore Japoniensium*]. (In Jap.). Venus, IV, 4, 204-208. Kyoto (1934). **b - 948**

**Lamy E.** - Sobre algunos Moluscos procedentes de la campañas del Instituto Español de Oceanografia [*De quibusdam Molluscis a navigatione provenientibus per Institutum Oceanographicum Hispanicum peracta*]. Notas y Resúm., ser. II, 78, 1-13. Madrid (1934). **b - 949**

Lista de los Moluscos capturados: *Gastropoda, Amphineura, Scaphopoda, Pelecypoda.* Lista de pescas.

**Lamy E.** - Primera campaña biológica a bordo del «Xauen» en aguas de Mallorca (Abril 1933). Moluscos [*De prima navigatione biologica navis* «Xauen» *ad Balearem Majorem* (*mense Aprili 1933*). *Mollusca*]. Trab. Inst. Españ. Oceanogr. 9, 80-82. Madrid (1934). **b - 950**

Lista de las especies de las siguientes familias: *Calyptraeidae, Turbinidae, Trochidae, Fissurellidae, Pectinidae, Arcidae, Carditidae, Cardiidae, Cyprinidae, Veneridae, Myidae, Tellinidae.*

**Lamy E.** - Notes sur les espèces Lamarckiennes des genres *Crenatula, Malleus* et *Vulsella* [*Notae de speciebus Lamarchianis generum « Crenatula », « Malleus »* et *« Vulsella »*]. Bull. Mus. Nat. Hist. Natur., VII, 1, 64-70. Paris (1935). **b - 951**

Considérations au sujet des sept espèces de *Crenatula*, des six espèces de *Malleus* et sept de *Vulsella* admises par Lamarck.

**Lamy E.** - Notes sur les espèces Lamarckiennes des genres *Avicula* et *Meleagrina* [*Notae de speciebus Lamarchianis generum « Avicula » et « Meleagrina »*]. Bull. Mus. Nat. Hist. Natur., VII 2, 127-134. Paris (1935). **b - 952**

Considérations au sujet des 15 espèces d'*Avicula* et 2 de *Meleagrina* décrites par Lamarck dans l'« Histoire Naturelle des Animaux sans vertèbres ».

**Lebour M. V.** - The Breeding of *Littorina neritoides* [*Reproductio speciei «Littorina neritoides»*]. 11 figs., Journ. Mar. Biol. Assoc., XX, 2, 373-378. Plymouth (1935). **b - 953**

The A. reports her own researches as well as those of Dr. Linke, by which it has been ascertained that *Littorina neritoides* undoubtedly lays planktonic egg capsules. Description and figures of the egg capsules.

**Leloup E.** - Contribution à la connaissance de la faune des Chitons de Villefranche-sur-mer et des environs (France, Méditerranée) [*Contributio in cognoscendam faunam Chitonidarum ad* Villefranche-sur-mer *et vicina loca pertinentium*]. 16 fig. Bull. Mus. R. Hist. Natur. Belgique, X, 47, 1-20. Bruxelles (1934). **b - 954**

Les Chitons qui font l'objet de cette note se répartissent en cinq espèces: *Lepidopleurus cajetanus, Ischnochiton Rissoi, Callochiton laevis, Chiton olivaceus, Acanthochiton aeneus.* Ces espèces sont connues en Méditerranée.

**Le Souef A. S. & Joyce K. A.** - Habits of the Sydney Octopus (*Octopus cyaneus*) in Captivity [*Consuetudines speciei «Octopus cyaneus» in captivitate*]. 1 pl., Austral. Zool., VII, 5, 373-376. Sydney (1933). **b - 955**

Description of the egg mass and brooding of the ♀.

**Lowe H. N.** - New Marine *Mollusca* from West Mexico, together with a List of Shells collected at Punta Penasco, Sonora, Mexico [*Mollusca marina Mexicana. Index adiungitur Molluscorum collectorum*]. 4 pl., Trans. San Diego Soc. Natur. Hist., VIII, 6, 15-34. San Diego (1934). **b - 956**

**MacDonald R. & Clench W. J.** - Descriptions of a New Genus and two New Species of Squids from the North Atlantic [*Descriptio novi generis novarum duarum specierum ex Sepiis Atlantici Nordici*]. Occ. Pap. Boston Soc. Nat. Hist., VIII, 145-152. Boston (1934). **b - 957**

*Bigelowia* n. gen., type *B. atlanticus*, and *Mastigoteuthis iselini.*

**Magaz J.** - Catálogo provisional de los Moluscos cefalópodos vivientes en las costas de la Península Ibérica y Baleares [*Catalogus provisorius Molluscorum cephalopodorum viventium in litoribus paeninsulae Hibericae et in insulis Balearibus*]. Notas y Resúm. Inst. Españ. Oceanogr., ser. II, 82, 1-53. Madrid (1934). **b - 958**

Antes de entrar en una examen detenido de las especies de las costas españolas, el A. ha creído interesante recoger lo ya publicado. Como apéndice ha puesto una clave lo bastante sencilla para poder llegar a clasificar los géneros de las especies consignadas en el presente catálogo. Las especies llevan, aparte, la sinonimia y localidad de la costa donde se la encuentra, una sinopsis y, a veces, una cita o comentario en aquellas que han suscitado diversos problemas de orden biológico.

**Makarov W. W.** - Eine neue Gattung der Familie *Lithodidae* aus dem Japanischen Meer [*Genus quiddam novus ex Lithodidis ad mare Japonicum pertinentibus*]. Zool. Anz., CVIII, 251-254. Leipzig (1934). **b - 959**

**Murayama S.** - On the Development of Japanese Abalone *Haliotis gigantea* [*De accretione corporea speciei « Haliotis gigantea » Japonicae*]. Journ. Coll. Agric. Tokyo Imp. Univ., XIII, 227-234. Tokyo (1935). **b - 960**

**Myers E. H.** - The Life History of *Patellina corrugata* Williamson, a Foraminifer [*Cyclus vitae in Foraminifero « Patellina corrugata »*]. 6 pl., 1 fig., Bull. Scripps Inst. Oceanogr. Univ. California, Techn. ser., III, 15, 355-392. Berkeley, Calif. (1935). **b - 961**

The account presented here, which is opposed to other theories concerning the life cycle of *Patellina corrugata*, is based on permanent cytological preparations and photographs of living organisms reared in cultures under continuous laboratory control and prolonged observations of individuals *in situ*. Methods. Ecology. Cysts in the life cycle. Observations of reproductive activities in life. Cytology.

**Nau Dam L.** - On the Utilisation of Oxygen by *Mya arenaria* [*De utilitate percipienda ab oxygeno speciei « Mya arenaria »*]. Journ. Exper. Biol., XII, 80-94. London (1935). **b - 962**

Study on the variations of oxygen absorption by the Lamellibranchs at low tide. Description of a new method applied at the experiments.

**Nikitin V. V.** - The Gudaut Oyster Bank (Essay of Ecological and Fishery Investigations) [*Banchus ostrearum in* Gudaut. *De tentata quadam investigatione oecologica et piscatoria*]. (In Russ., Engl. & Georg. Summ.). 38 figs., 21 tabls., 5 pls. Trav. Stat. Piscic. & Biol. Géorgie, I, 1, 51-179 Batoum-Tiflis (1934). **b - 963**

Part I: Ecology of the oyster bed biocenosis of the Gudaut Bank: 1. Methods of gathering and working up material: 2. Distribution of the bottom fauna in the sea region near Gudaut;. 3. Conditions of oyster bed formation; 4. Lower and upper limits of oyster bank; 5. Hydrological conditions in the area of the Gudaut oyster bank; 6. Composition of the oyster bed fauna; 7. Components of the oyster bed biocenosis; 8. Quantitative relation of the « basic » components of the biocenosis.

Part II: Quantitative distribution and size of the oyster-stock on the Gudaut-Bank: 1. Taxonomical position of the Gudaut-Bank oysters; 2. Method of the quantitative determination of the oyster-stock; 3. Age composition and fishery-stock of the Gudaut-Bank oysters.

Appendix 1: List of stations and gathered materials.

Appendic 2: Tables of measurement and weighing of oysters caught in 1930, 1931 and 1932. Bibl.

**Nomura S.** - Miscellaneous Notes on Shells [*Miscellanea de conchis*]. Venus, IV, 6, 374-379. Kyoto (1934). **b - 964**

**Nomura S. & Hatai K.** - On Some Recent Brachiopods from Northeast Japan [*De Brachiopodis viventibus in Japonica regione nord-occidentali*]. 2 pls., Saitô Hô-on Kw. Mus. Res. Bull., 2, 20 pp. Saitô Hô-on, Jap. (1934). **b - 965**

Description of the recent Brachiopoda of the collection of the Saitô Hô-on Kw. Museum. Author enumerates also for comparison the other forms collected from Northeast Japan. *Hemithyris psittacea, Terebratulina crossei, T. japonica, T. coreanica, Laqueus rubellus.*

**Nomura S. & Hatai K.** - Catalogue of the Shell-Bearing Molluscs Collected from the Kesen and Motoyoshi Districts, Northeast Honsyû, Japan, Immediately after the Sanriku Tunami, March 3, 1933, with Descriptions of Five New Species [*Catalogus Molluscorum cum conchis collectorum in districtis* Kesen *et* Motoyoshi *postquam ventus halitavit* tunami *nomine, in regione* Sanriku *die 3 mensis Martii 1933. Descriptio adiungitur quinque novarum specierum*]. 2 pls., Saitô Hô-on Kw. Mus. Res. Bull., 5, 1-47. Saitô Hô-on, Jap. (1935). **b - 966**

List of 74 species of *Pelecypoda*, 3 of *Scaphopoda*, 138 of *Gastropoda*, and 5 of *Amphineura*, found upon the shore. Description of the most important features of the collected material and summary of data, from which authors conclude that, in spite of the great magnitude of the waves, their digging and shearing activities are restricted to the littoral zone roughly within the depth of 10 meters.

**Nomura S. & Hatai K.** - On the Fathomic Records of Some Species of Mollusca from the Continental Shelf Bordering Mostly Northeast Japan [*Profunditatis tabulae aliquarum specierum Molluscorum ad plateam continentalem pertinentium quae limitat litora nord-occidentalia Japoniae*]. Saitô Hô-on Kw. Mus. Res. Bull., 5, 49-53. Saitô Hô-on, Jap. (1935). **b - 967**

List of the depths at which several common marine *Mollusca* have been found in the area considered.

**Orton J. H.** - On the Biological Condition of Relaid Oysters [*De biologicis condicionibus Ostrearum translatarum*]. Econ. Proc. R. Dublin Soc., II, 533-540. Dublin (1935). **b - 968**

**Ostergaard J. M.** - Recent and Fossil Marine Molluscs of Tongatabu [*Mollusca recentiora et fossilia ad regionem* Tongatabu *pertinentia*]. 1 map, 1 pl., 59 pp., Bernice P. Bishop Mus. Bull., 131. Honolulu (1935). **b - 969**

The chief purpose of this paper is to form a basis for the determination of the geological age of the limestone and its climatic and ecological conditions.

Geography and geology of Tongatabu; list of living and fossil Molluscs of the different zones. Systematic treatment.

**Paris P.** - Faune de la Saône moyenne [*De fauna medii Araris*]. Bull. Scient. Bourgogne (1934), IV, 100-113. Bourgogne (1935). **b - 970**

Présence dans la Saône moyenne de *Lithoglyphus naticoides*, immigré récemment de la Mer, qui s'étend de plus en plus dans la Saône. On ne rencontre plus *Margaritana auricularia*.

**Powell A. W. B.** - New Species of Marine Molluscs from the Subantarctic Islands of New Zealand [*Species novae Molluscorum marinorum ab insulis subantarcticis Novae Zelandiae provenientes*]. 1 pl., 4 figs., Proc. Malac. Soc. London, XX, 5, 232-236. London (1933). **b - 971**

*Perrierina mestayerae* n. sp., *Zeadmete subantarctica* n. sp., *Legrandina aucklandica* n. sp., *Macquariella aucklandica* n. sp., *Subonoba delicatula* n. sp., *S. tenuistrata* n. sp. and *Hypermastus bountyensis* n. sp.

**Powell A. W. B.** - Marine Molluscs from the Bounty Islands [*Mollusca marina insularum* Bounty]. 1 pl., 3 figs., Rec. Canterbury Mus., IV, 1, 29-39. Christchurch, N. Z. (1935). **b - 972**

86 spp. of *Condylocardiidae* are listed, the following of which are new: *Benthocardiella obliquata bountyensis, Scissurella fairchildi, S. bountyensis, Notosetia fairchildi, N. tenuisculpta, Estea minutula* and *Socienna aureola.*

Corrections et remarques sur *Micrella dubia* Bergh *Phlegmodoris* Bergh, *Aplysiopsis, Phyllidiella, Fenrisia* Bergh., *Chromodoriella* Eliot, *Timorella perplexa, Doto, Coecinella* etc.

**Reinhart Ph. W.** - Classification of the Pelecypod Family *Arcidae* [« *Arcidae* ». *Quaestio de distributione in classes*]. 5 pls., 68 pp., Bull. Mus. R. Hist. Nat. Belgique, XI, 13. Bruxelles (1935). **b - 974**

This paper is the outgrowth of a study of the species of *Arcidae* represented on the Pacific Slope of North America. It considers: 1) the relation of the *Arcidae* to the class *Pelecypoda*; 2) the family, and specific characteristics of the *Arcidae*; 3) the time of differentiation and the classification based both upon a study of the literature and an examination of specimens of hundreds of species, including the type species of the various groups dealt with, except in the few cases where these were not available. It includes two new systematic names: the subgenus *Larkinia* and the subfamily *Anadarinae.*

The present paper is mainly devoted to a résumé of the results of former studies of the author, which were reached by observations on North American and Canadian actinoceroid Cephalopods. It deals with the nomenclature and classification of these Cephalopods and describes further their shell morphology, with special regard to the siphuncle and the intracameral deposits. The author illustrates also the mode of life and the ontogeny of the Actinoceroids.

Part I. Natural History: Taxonomic position, anatomy, reproduction, development and metamorphosis. Ecdysis. Natural food, habitat, migration; proportion of sexes. Part II. Utilization: History of the industry, the canning process, the value of the industry, marketing, and export. Frozen tail industry. Boats, equipment, methods of fishing and fishing grounds. Protective legislations. Bibl.

**Boone L.** - Scientific Results of the World Cruise of the Yacht « Alva » 1931, William K. Vanderbilt, Commanding. *Crustacea: Anomura, Macrura, Euphausiacea, Isopoda, Amphipoda* and *Echinodermata: Asteroidea* and *Echinoidea* [*Resultatus scientifici navigationis per orbem pamphilii* « Alva », *A. 1931. Duce* W. K. Vanderbilt]. Num. tabl. & figs., Bull. Vanderbilt Mar. Mus., VI, 264 pp., Print. privately (Whittet & Shepperson). Richmond, Va. (1935). **b - 1001**

The first part deals with the above mentioned *Crustacea* representing about 20 families with subfamilies, from true deep-sea forms from dredgings of 140 to 400 fathoms in the Eastern Atlantic Ocean, off the Canary Islands, to littoral, freshwater and terrestrial forms of the Indo-Pacific region. For every group are given families, subfamilies, and genera with types, distribution, material examined, descriptions with plates or figures, and references. One new genus, *Vanderbiltia*, with the species *V. rosamondae* n. sp., remarkably interesting for its most unusual specialization in adaptation to its life in the coral crevices, as well as ten other new species are described. Discussion as to the systematical classification of the species and list of their geographical distribution. Bibl.

**Dons C.** - Norges Strandfauna VII. Amphipoder [*De fauna litorea Norvegica. VII. Amphipoda*]. Kgl. Norsk. Vidensk. Selsk. Forh. 1934, VII, 30, 107-110. Trondheim (1935). **b - 1011**

Bericht über 31 Spezies, die in den Jahren 1922-1934 auf der Strecke Flor-Kirkenäs gesammelt worden sind. Fundorte und Verbreitung.

**Duboscq O. & Tuzet O.** - Sur un crabe mal connu, *Brachynotus gemmellari* Rizza (*Heterograpsus lucasi* Milne-Edw.) [*De cancro parum noto* « *Brachynotus gemmellari* »]. C. R. Soc. Biol., CXVII (Trav. Labor. Arago Banyuls-sur mer), 418-420. Paris (1934). **b - 1012**

Les Auteurs proposent d'appeler les deux formes de *Brachynotus* de la Méditerranée: *B. gemmellari* Rizza et *B. gemmellari lucasi* Milne–Edw. tout en pensant que la seconde, dont les mâles n'ont pas de vésicules aux pinces, représente la forme primitive.

**Edmondson C. Howard** - New and Rare Polynesian *Crustacea* [« *Crustacea* » *polynesiana nova et rara*]. 2 pls., 11 fig., Bernice P. Bishop. Mus. Occas. Papers, X, 24, 1-40. Honolulu (1935).
**b - 1013**

Description of about 13 species of 7 families belonging to collections taken by various field workers in widely separated parts of Polynesia ranging from Hawaii through the equatorial islands to Fiji, including the Lau Archipelago, and Tongabatu. Interesting records include the occurrence of *Hymenocera elegans* Heller and *Portunus vocans* (A. Milne Edwards) in Hawaiian waters, the latter previously known only from the Atlantic Ocean. A distribution of the little known genus *Lioxanthodes* into the Pacific Ocean is also reported. Two new genera are created, *Mesocaris, Nullicrinis*.

**Elmhirst R.** - The Occurrence of *Gammarus* in Scottish Waters [*Gammarus in aquis Scotis*]. 1 table. Scott. Natural., January-February, 211, 17-21. Edinburgh (1935). **b - 1014**

*G. locusta* show no tendency to enter fresh water in experimental conditions although they approach high-water mark as night-tidal migrants. *G. duebeni* seek fresh water under experimental conditions and occur in pools only salted by spray. Fresh water *Gammarus* from the southwest of Scotland approach *G. duebeni* in several characters.

**Fenizia G.** - La *Dromia vulgaris* (M. Edw.), e le sue abitudini [« *Dromia vulgaris* » *eiusque consuetudines*]. 22 fig., Arch. Zool. Ital.,X XI, 1, 509-539. Napoli (1935). **b - 1015**

L'Autore tratta dell'abitudine che ha la *Dromia* di coprirsi con oggetti svariati; descrive le manovre del crostaceo nel tagliare e conformare l'oggetto al proprio dorso, il comportamento di esso dopo la muta; l'ufficio degli organi di senso in questa attività. Procede così alle conclusioni riguardo al significato, all'utilità ed all'ipotesi sulla origine di tale abitudine.

Brief notes and diagnostic key are given for several species of *Callianassa*. Three new species are described together with a new variety of one of them and a new name is proposed for a specimen that had been assigned to an old, inadequately described species. A new record of occurrence in Jamaica is reported for *Callianassa* (*Callichirus*) *longiventris*. Stimpson's genus *Glypturus* appears no longer tenable, and its unique species therefore reverts to the genus *Callianassa*.

**Senst** - Helgolander Hummern und Austern [*Homaridae et Ostreae ad* Helgoland *pertinentes*]. Dtsch. Fischwirtsch., II, 32, 631-632. Berlin (1935). **b - 1062**

List of about 60 species. Localities and dates.

**Steuer A.** - Die Copepodenfamilie der *Macrosetellidae* [*De familia « Macrosetellidae » ex Copepodis*]. 1 Abb., 2 Kart. Sitz.-ber. Akad. Wiss. Wien, CXLIV, 7/8, Abb. 1, 391-399. Wien (1935). **b - 1070**

Diese Familie wurde 1932 von Scott für *Macrosetella gracilis* Dana = (*Setella gracilis* Dana) aufgestellt. Bestimmungsschlüssel. Verwandtschaft und Verbreitung.

**Taton H.** - Contribution à l'étude du copepode gallicole *Mesoglicola Delagei quidor* [*Contributio in copepodum galliculum studendum « Mesoglicola Delagei quidor »*]. Trav. Stat. Biol. Roscoff, 12, 53-68. Paris (1934). **b - 1071**

Toute l'évolution du *Mesoglicola Delagei* a lieu dans la galle qu'il détermine sur la *Corynactis*. La pénétration se fait par l'extérieur et au stade Nauplius. Le développement doit comporter une succession de formes jeunes dont deux stades sont étudiés ici. Ensuite viennent les étapes de croissance sous la forme définitive jusqu'à l'adulte mûr des deux sexes. La ponte et le développement des oeufs ont lieu dans la galle. Les Nauplius sont libérés par déhiscence de l'assise ectodermique de la galle. (A).

**Templeman W.** - Local Differences in the Body Proportions of the Lobster, *Homarus americanus* [*De localibus differentiis quoad proportiones corporeas speciei « Homarus americanus »*]. 11 figs., Journ. Biol. Bd. Canada, I, 3, 213-226. Toronto (1935). **b - 1072**

The claws of males and the width and depth of abdomen of females increase at a higher rate than body length with approaching sexual maturity. Consequently for Lobsters over 20 cm. in length, males possess claws relatively larger and females an abdomen relatively wider and deeper in an area such as that near Pointe du Chêne where sexual maturity occurs at about 20 cm. than in that near Grand Manan where Lobsters only become sexually mature at about 34 cm.

**Ten Cate-Kazejewa B.** - Quelques observations sur les Bernards l'Ermite (*Pagurus arrosor*) [*Observationes circa speciem « Pagurus arrosor »*]. 24 fig., Arch. Néerl. Physiol. Homme et Animaux, XIX, 502-508. La Haye (1934). **b - 1073**

Expériences d'irritations mécaniques sur le *Pagurus arrosor*. Réactions.

*bus* (*in Oceano Indiano*)]. 3 pls., Bull. Raffles Mus., 9, 5-28. Singapore (1934 & 1935). **b - 1074**

Systematic account of a collection of *Brachyura* comprising 35 spp., 12 of which are new.

**Willey A.** - Harpacticoid *Copepoda* from Bermuda L. [*Copepoda Harpacticoidea ad* Bermuda *pertinentia*]. 188 figs., Ann. and Magaz. Natur. Hist., XV, 85, 50-100. London (1935). **b - 1075**

Descriptive data on 36 spp. with several new subspecies and variations. 15 new species.

**Zariquiey Cenarro R.** - Los *Palinuridae* de las costas de España (Crust. Decap.) [*Palinuridae ad litora Hispanica pertinentes* (*Crustacea Decapoda*)]. 12 fig., Bol. Soc. Españ. Hist. Natur., XXXV 6, 311-330. Madrid (1935). **b - 1076**

El A. ha creido que podia tener intéres hacer un estudio de las langostas españolas y ello desde varios puntos de vista: 1° Estudiar el crecimiento de *Palinurus vulgaris* para ver si al crecer lo hace uniformemente, conservando en sus diferentes tamaños la misma proporcionalidad de sus órganos, o bien si el crecimiento modifica las relaciones de unas y otras, estableciendo diferencias que pudiesen conducirnos a error en la clasificación.

2° Ver si *P. vulgaris* conserva en el Mediterráneo los mismos caracterés que en el Atlántico.

3° Dejar bien sentado si en el Mediterráneo vive solo *P. vulgaris* o si hay además alguna otra especie.

**Zariquiey Cenarro R.** - Crustáceos del Mediterraneo (Decápodos macruros): *Nephrops norvegicus* Linné var. *meridionalis* [*Crustacea maris mediterranei* (*Decapoda macrura*): « *Nephrops norvegicus var. meridionalis* »]. 7 figs., Bull. Inst. Catal. Hist. Natur, XXXV, 7. Barcelona (1935). **b - 1077**

Caratteristiche che differenziano il *Nephrops norvegicus* descritto da Linneo e la specie che vive nel Mediterraneo. L'A. conferma che gli esemplari delle coste cantabriche e atlantiche corrispondono a quelli del Mediterraneo e propone per tutti la creazione della varietà *meridionalis* considerandola una sotto-specie o razza geografica.

## Pisces et Cyclostomata.

**Amemiya I.** - On the Local Variation of the Japanese Sardine, *Sardina melanosticta*, Especially on the Variation of the Number of Vertebrae [*Variationes pro locis speciei « S. melanosticta ». Agitur particulatim de numero vertebrarum*]. (In Jap.). Suisan Sikenz. Hôkoku, VI, 1, 1-12 (?) (1934). **b - 1078**

The Japanese sardine is distributed in a very wide range from Kyûsyû to Hokkaido in the Pacific as well as in the Japan Sea. This fish does not show any marked local variation externally, but a statistical study reveals that the mean value of the number of vertebrae is lower in south (warm) district than in the north. The cause of this local variation is discussed , and author concludes that the difference of the temperature of the water, in which the embryos and larvae of the fish develop seems to be the chief agent of the variation of the number of vertebrae.

**Awerinzew S.** - Einige Ergebnisse von Beobachtungen an *Clupea harengus* des Barentsmeeres [*Resultatus ex observationibus speciei « Clupea harengus » ad mare Barentsium pertinentis*]. Journ. Cons. Expl. Mer, X, 1, 66-74. Copenhague (1935). **b - 1079**

Erörterung des Rassenproblemes; Herkunft des Rassenbestandes, fluktuierende Merkmale. Bedeutung der Meeresströmungen für die Biologie der Heringe; Möglichkeit einer Veränderung der Biologie des norwegischen *C. harengus.*

**Balé H.** - Observations sur un Turbot anormal *Scolphthalmus* (*Rhombus*) *maximus* L. (Poisson Téléostéen Pleuronectidé) [*Observationes circa speciem « Scolphthalmus* (*Rhombus*) *maximus »*]. 6 fig., Bull. Soc. Scient. Bretagne, XI, 168-176. Rennes (1934). **b - 1080**

On remarque qu'en ce turbot l'œil droit est au sommet de la tête au lieu d'être près de l'autre œil. Observations sur la pigmentation et sur la présence de tubercules sur les deux côtés du corps du turbot.

**Barnard K. H.** - New Records and Descriptions of two New Species of South African Marine Fishes [*Adnotationes descriptionesque duarum novarum specierum piscium marinorum ad Africam merid. pertinentium*]. 3 figs., Ann. and Magaz. Natur. Hist., XIII, 74, 228-235. London (1934). **b - 1081**

*Pachymetopon germanum* n. sp., *Bidenichthys* near *Monothrix*, erected for *B. capensis* n. sp.

**Barnard K. H.** - Notes on South African Marine Fishes [*Notae de piscibus marinis sudafricanis*]. 7 figs., 3 pls. o. t., Ann. South Afric. Mus., XXX, 5, 645-658. Edinburgh (1935). **b - 1082**

This paper continues that published in February 1934 (Ann. Mag. Nat. Hist., XIII, 10, 228-235), and contains two new records: the description of a new genus and species of Clinid (i. e. *Climacoporus* n. g. and *C. navalis* n. sp.); an account of certain anatomical features of *Rhineodon*; notes on pug-headedness in a species of *Pagrus*, on an abnormal specimen of *Mola*, and on the gill-filaments of this genus. (A).

**Belloc G.** - Etude monographique du Merlu. *Merlucius merluccius* L. (Troisième partie) [*Studium monographicum speciei « Merluccius merluccius »*]. Nombr. figs et tabl., Rev. Trav. Off. Pêch. Marit., VIII, Fasc. 2, 30, 145-179. Paris (1935). **b - 1083**

Moyenne vertébrale du merlu. Triangle de fluctuation. Le marquage. Lieux de pêche. Carte des fonds chalutables des côtes de France. Feuilles de pêche des chalutiers rochelais. Échelle des coefficients de pêche. Courbe du croissance du merlu. Les migrations: Déplacements accidentels, migrations naturelles, déplacements du merlu pendant la première période de croissance.

**Bertin L.** - Les Poissons apodes appartenant au sous-ordre des Lyomères [*De piscibus apodis ad subordinem « Lyomeridae » pertinentibus*]. 2 pl., 47 fig., Carlsberg Found. Oceanogr. Exped. round the World 1928-30 and previous « Dana » Exped. Dana Rep., 3, 1-56. Copenhagen, London (1934). **b - 1084**

Le présent travail, consacré à l'anatomie et à la systématique des *Eurypharynx* et *Saccopharynx* adultes, se divise en trois parties: I Sous-ordre des Lyomères. II. Famille des Eurypharyngidés. III. Famille des Saccopharyngidés. Etymologie, synonymie, diagnose, distribution géographique, écologie. Deux nouvelles espèces: *Saccopharynx johnsoni*, *S. schmidti*.

**Bertin L.** - *Oxystomus Rafinesque* est une forme bien distincte, parmi les larves leptocéphaliennes [« *Oxystomus Rafinesque* » *forma est di-*

*stincta inter larvas Leptocephalorum*]. C. R. Acad. Sc., CC, 22, 1878-1880. Paris (1935). **b - 1085**

Sur les matériaux de *Oxystomus* dans un excellent état de conservation recueillis par le «Dana» l'A. met en évidence certains caractères différenciés d'*Oxystomus* et désigne les spécimens du Dana sous le nom de *O. Rafinesque* qui constitue probablement une phase de métamorphose de *Leptocephalus lanceolatus* Strömman (L. S.).

Descrizione di un esemplare di pesce luna di grandi dimensioni catturato nelle acque di Rimini (lungh. tot. m. 2,55; alt. mass. m. 2,75).

**Bruun A. Fr. -** Flying-Fishes (*Exocoetidae*) of the Atlantic. Systematic and Biological Studies [*De piscibus volantibus* (*Exocoetidae*) *Oceani Atlantici. Studia systematica et biologica*]. 7 pls., 30 figs., Carlsberg Found. Oceanogr. Exped. round the World 1928-30 and previous « Dana » Exped., « Dana »-Rep. No. 6, 1-106. Copenhagen & London (1935). **b - 1093**

Preceding studies on Flying Fishes. Generic nomenclature within the *Exocoetidae*. Methods of investigation. Key for determination of adult specimens of the Atlantic species of *Exocoetidae*. Description of 17 species among which is a new subspecies *Oxyparhamphus micropterus similis*. Proposed synonymy. Relationships. Distribution. Synopsis of the geographic-biological differentiation.

**Bruun A. Fr. -** *Parexocœtus*, a Red Sea Flying Fish in the Mediterranean [« *Parexocœtus* » *piscis volans ad mare Rubrum pertinens in mari Mediterraneo repertus*]. Nature, CXXXVI, 3440, 553. London (1935). **b - 1094**

On account of two specimens of *Parexocœtus* found in the eastern part of the Mediterranean A. here suggests research workers to take up the question as to the immigration of this species from the Red sea.

**Bückmann A. & Kotthaus A. -** Ein Vergleich der Schollenbevölkerung der Flämischen und der Deutschen Bucht. (Dtsch-Text, Engl. Rés.) [*Comparatio inter populationem Pleuronectidarum sinus Flandrici et eamdem populationem Sinus Germanici*]. 3 graph. Fig., 3 Tab., Rapp. Pr.-Verb. Cons. Expl. Mer, XCIV, 3ème partie, Appendices (1934-35), 42-56. Copenhague (1935). **b - 1095**

Die zugrunde dieser Studien liegenden Untersuchungen sind grösstenteils 1931-1934 mit « Nautilus » ausgeführt worden. Verschiedenheiten in Bezug auf Verteilung, Bevölkerungsdichte, Alterszusammensetzung, Grössenverhältnisse und Wachstumgeschwindigkeit sind bestätigt worden. Es wird behauptet, dass diese Unterschiede in den verschiedenen Fangmethoden, den natürlichen Arealen sowie den verschiedenen Nahrungsverhältnissen ihren Grund haben. Weitere Untersuchungen sind aber nötig um genauere Ergebnisse zu erhalten.

**Budker P. -** Description d'un genre nouveau de la famille des Carcharinidés [*Carcharinidea. Descriptio novi generis*]. 3 fig., Bull. Mus. Nat. Hist. Natur., VII, 2, 107-112. Paris (1935). **b - 1096**

Caracteres et synonymia duorum genotyporum systematicorum:* « *Achirus achirus* » *et* « *Trinectes maculatus* »]. 11 fig. Bull. Inst. Océanogr., 661, 1-24. Monaco (1935). **b - 1101**

Problème taxonomique. *Pleuronectes achirus* Linné 1758 et *Pleuronectes lineatus* Linné 1758. Clef dichotomique des unités morphologiques du genre *Achirus-Trinectes maculatus* Schneider. Clef dichotomique des unités morphologiques du genre *Trinectes*. Clef dichotomique d'autres genres. Catalogue systématique de la famille des *Achiridae*.

**Chabanaud P.** - Poissons et Méduses acalèphes [*De piscibus et medusis acalephis*]. VII^e Congr. Int. Aquicult. & Pêche Paris 1931, III, 346-348, Impr. du Loiret. Orléans (1935). **b - 1102**

Etude sur la question de la symbiose ou du parasitisme existant entre les Cœlentérés et *Trachurus trachurus* L. ainsi que entre *Gadus, Stromateus fiatola, Schedophilus medusophagus* et très rarement le jeune *Scomber*.

**Chevey P.** - Révision synonymique de l'Oeuvre ichtyologique de G. Tirant [*Reinspectio synonymica operis ichthyologicae cuius auctor* G. Tirant]. Note Inst. Océanogr. Indoch., Stat. Marit. Cauda, 7, 1-291. Saigon (1934). **b - 1103**

Mise au point des noms spécifiques et parfois même génériques, employés par G. Tirant dans son œuvre ichtyologique, dont la réimpression a été publiée en 1929.

Enumeration des poissons de la Basse Cochinchine et du Cambodge.

Chaque page contient: 1) les appellations de Tirant, avec les synonymies, références et noms indigènes cités par lui; 2) la liste chronologique des synonymes avec les références bibliographiques et les commentaires nécéssaires; 3) les noms actuellement valables pour chaque espèce, avec l'indication des savants auxquels l'A. s'est principalement référé pour établir la validité des noms spécifiques ou génériques.

**Chevey P.** - Sur la présence du genre *Anguilla* en Indochine Française [*De genere* « *Anguilla* » *in Indosinica regione Gallica*]. C. R. Acad. Sc., CCII, 26, 1422-1424. Paris (1935). **b - 1104**

Note sur la récente découverte par le Service de Pisciculture de l'Institut des recherches agronomiques de Hanoï, d'un poisson, nommé Cà linh ou Cà thiêt linh en Tonkinois pêché dans le fleuve Rouge à Thauh-Tri (Province de Hadong) et dans lequel l'A. a reconnu l'*Anguilla japonica* Schlegel, espèce des régions tempérées du Pacifique NW. Cette découverte présente un triple intérêt: 1) parce qu'elle remet en cause l'exactitude de la détermination par Tirant de l'*Anguilla Elphinstonei* Sykes (= *bengalensis* Gray) parmi les poissons de la rivière de Hué; 2) elle étend à tout le Nord de l'Indochine l'aire de répartition d'*A. japonica* et 3) elle vient à l'appui des conceptions exposées par Krempf et par l'A. sur la circulation des eaux dans la mer de la Chine.

**Clemens W. A. & Clemens L. S.** - Contributions to the Life-History of the Sockeye Salmon (n°. 20) [*Contributio in cyclum evolutionis speciei* « *Oncorhynchus nerka* »]. 31 tables, 4 graphs, Rep. Comm. Fish. Brit. Columb., 1934, App., 20-58. Victoria B. C. (1935). **b - 1105**

Twentieth annual contribution to the series of papers on the life-history of the sockey salmon, which covers the period 1913 to 1934, inclusive. It contains a most valuable report of the sockey-salmon runs to the four main river systems of British Columbia. Under the title « Sex distribution », authors discuss the general question of the sex proportions of the various age-groups in the four river systems and the effect of sampling upon these ratios.

**Clemens W. A.** - The Pacific Salmon in British Columbia Waters [*Salmo Oceani Pacifici in aquis Columbiae Britannicae*]. 1 table. Rep. Comm. Fish. Brit. Columb., 1934, 103-105. Victoria, B. C. (1935). **b - 1106**

Identification of the adults of five species of British Columbia Salmon and their life-history. Certain characters commonly used in the identification of the five species are pointed out in detail and a key is provided which may be used for the identification of the various species.

**Davis F. M.** - British Hake Research [*Investigationes a Britannis susceptae in speciem* « *Merlucius vulgaris* »]. Rapp. Pr.-Verb. Cons. Expl. Mer, Rapp. Atlantique 1933, 93, 31. Copenhague (1935). **b - 1107**

Short note on Mr. Hickling's hake investigations in Portugal and their applications on the catches of hake at British ports.

**De Buen F.** - Primera campaña biológica a bordo del « Xauen » en aguas de Mallorca (Abril 1933). Peces [*De prima navigatione biologiae causa in navi* « *Xauen* » *ad Balearem Majorem.* (*Mense Aprili 1933*). *Pisces*]. Trab. Inst. Españ. Oceanogr., 11, 87-89. Madrid (1934). **b - 1108**

*Echelidae, Syngnathidae, Gadidae, Merlucciidae, Gobiidae, Callionymidae, Trachinidae, Uranoscopidae, Rhombidae, Caproidae, Labridae, Scorpaenidae, Triglidae, Serranidae, Lophidae*. Lista de las especies capturadas.

**De Buen F.** - Fauna ictiològica. Catàlogo de los peces Ibéricos: de la planicie continental, aguas dulces, pelàgicos y de los abismos pròximos. Parte I, II [*Fauna ichthyologica. Catalogus piscium hibericorum plateae continentalis, aquarum dulcium, pelagicorum abyssorumque proximorum. Pars I, II*]. 20 + 33 lam., 1 mapa. Ist. Españ. Oceanogr., Notas y Resùm., II, 88, 1-89; 89, 91-149. Madrid (1935).

(—) Prim. Conf. Oceanogr. Ibero-Americana-Trab-Pres. n° 1, 1-83 Madrid. **b - 1109**

Catàlogo de la fauna ictiològica ibérica, no sòlo de aquellas especies continentales que pueblan las aguas dulces, o, también, los habitantes de la prolongaciòn sumergida de las tierras firmes, sino igualmente las propriamente pelàgicas o de los abismos no alejadas de la Penìnsula Ibérica. Ne los catàlogo se precise para cada especie la profundidad o clase de fondo que frecuentan y se tiene referencia en la repartiiciòn geogràfica de los peces. Obras consultatas al organizar el Catálogo.

Clase *Cyclostomata* (4 especies) y Clase *Elasmobranchii* (296 especies). En la segunda parte descrición de las especies de las fam: *Syngnathidae, Hippocampidae, Atherinidae, Mugilidae, Scombridae, Cybiidae, Thunnidae, Carangidae, Serranidae Sparidae, Scorpaenidae, Cottidae, Triglidae, Labridae, Gobiidae, Blennidae*, etc.

**Delpino I.** - La diffusione e la distribuzione in Italia della *Trutta genivittata* (Heckel-Kner, 1858) [*De diffusione et distributione in Italia speciei* « *Trutta genivittata* »]. 6 fig., Boll. Pesca, Piscicolt. e Idrobiol., XI, 2, 196-210. Roma (1935). ( — ) Atti R. Acc. Naz. Lincei, Rend. Cl. Sc. Fis. Nat., XXI, 1, 54-58. Roma (1935). **b - 1110**

Descrizione dei caratteri somatici, dentatura, numero dei raggi delle pinne, etc., di alcuni esemplari di *Trutta genivittata* catturati nell'Adige; area di distribuzione di questo salmonide in Italia a mezzo di una cartina schematica del bacino del Po, nel cui corso superiore, compresi gli affluenti, essa è comunemente diffusa.

**Desbrosses P.** - Présence inusitée de *Balistes balistes capriscus* (Linné; Ed. Gmelin) sur les côtes du Morbihan en 1931 et sur les côtes de France en 1930 et 1931 [*Agitur de inusitata praesentia speciei* « *Balistes balistes capriscus* » *in litoribus regionis* Morbihan *A. 1931 et in litoribus Gallicis A. 1930 et 1931*]. Bull. Soc. Zool. France LIX, 236-241. Paris (1934). **b - 1111**

La présence du *Balistes* fut causée par l'extension maxime novénaire (prévue par Le Danois) des eaux Atlantiques chaudes vers le Nord, et qui a eu lieu en Novembre 1930.

**Desbrosses P.** - Contribution à la connaissance de la biologie du rouget-barbet en Atlantique Nord (II) *Mullus barbatus* (Rond), *surmuletus* (Fage) [*Contributio in cognoscendam biologiam speciei* « *Mullus barbatus surmuletus* » *Oceani Atlantici Nordici* (*II*)]. 4 fig., 3 tabl., Rev. Trav., Off. Scient. Pêches Marit., VIII, 3, nº. 31, 255-267. Paris (1935). **b - 1112**

L'A. avait exposé dans un ouvrage antérieur (« Rev. Trav. », VI, 3, 1933), les resultats sur la croissance, la longévité, la taille et l'âge à la première maturité sexuelle, la formule vertébrale du rouget-barbet d'Atlantique Nord. Dans le présent ouvrage il cherche, à l'aide de la technique des marquages, une confirmation à ces données sur la croissance et sur les migrations de l'espèce, avec référence spéciale aux pêches saisonnières et aux prévisions dans le rendement de ces pêches.

**Di Caporiacco L.** - Spedizione Nello Beccari nella Guiana Britannica; Pesci [*Agitur de expeditione ad Guianam Britannicam*, Nello Beccari *duce*]. Monit. Zool. Ital., XLVI, 3, 55-70. Firenze (1935). **b - 1113**

L'A. illustra il materiale ittiologico raccolto dalla spedizione N. Beccari nella Guiana britannica (1931-32). I pesci raccolti erano 263, appartenenti a 69 specie.

**Dons C.** - Den zoologiske avdeling. Fiskesamlingen [*Sectio zoologica. Pisces*]. 3 fig., Kgl. Norsk. Vidensk, Selsk. Mus. Årsber., 1933, 41-45. Trondhjem (1934). **b - 1114**

New acquisitions: *Polyprion americanus, Callionymus lyra, Trigla gurnardus, Sparus centrodontus, Raniceps raninus, Gaidropsarus argenteolus, Mugil auratus, Scombresox saurus, Bothus rhombus, Myctophum elongatum, Labrus berggylta, Lampris guttatus, Regalecus glesne, Mola mola, Acipenser sturio, Galeus vulgaris.*

**Dons C.** - Notes on Fishes. II. On the Distribution of some *Labridae* [*Notae de piscibus. Labridae, earumque distributio*]. Kgl. Norsk. Vidensk. Selsk. Forh. 1934, VII, 24, 85-86. Trondhjem (1935). **b - 1115**

5 species are mentioned, 4 of which are generally very scarce, all belonging to the coasts of Møre, Trøndelag, and Nordland.

**Dons C.** - Norges strandfauna. VI. Fisk. [*De fauna litorea. VI. Pisces*]. Kgl. Norsk. Vidensk. Selsk. Forh. 1934, VII, 25, 87-90. Trondhjem (1935). **b - 1116**

Fundorte für 21 Spezies.

**Ebina Ken-ichi** - Descriptions of Two New Fishes from Kominato, Prov. Bôsyû [*Descriptio duorum novorum piscium a* Kominato *provenientium*]. 5 figs., 3 tabl., Journ. Imp. Fish. Inst., XXX, 3, 211-217. Tokyo (1934). **b - 1117**

A collection of tide-pool Fishes was made in August, 1932 in the above mentioned region, including two new species *Apogon kominatoensis* and *Clariger papillosus* which are described in the present paper.

**Ege V.** - The Genus *Stomias* Cuv., Taxonomy and Bio-Geography. (Based on Adolescent and Adult Specimens) [*Agitur de genere* « *Stomias* ». *Quaestio de taxonomia et biogeographia cuius fundamenta ponuntur in exemplaribus adulescentibus atque adultis*]. Charts, 1 pl., 12 figs. Carlsberg Found. Oceanogr. Exped. round the World 1928-30 and previous « Dana »-Exped., « Dana »-Rep., No. 5, 1-58. Copenhagen & London (1934). **b - 1118**

Description and synonymies of 6 species. Systematic review and geographical survey. Literature. Appendix: List of records.

**Ehrenbaum E.** - Naturgeschichte und wirtschaftliche Bedeutung der Seefische Nordeuropas [*De historia naturali et momento oeconomico piscium marinorum in Europa Sept.*]. 276 Abb., 26 Taf., Sonderausgabe aus Handb. Seef. Nordeuropas, Band II. Stuttgart (1936). **b - 1119**

Dies Werk ist aus grossem Interesse für Fischerei-Interessenten aus der Praxis sowohl als für Fischereibiologen. Beschreibung und Systematik der einzelnen Arten und Rassen; Erbrütung und künstliche Zucht von Seefischen, Verpflanzungsversuche, Schwankungen und Erschöpfung der Bestände, Fangstatistik, getrennt nach Arten, Ländern und Fanggebieten usw. Sachregister und Bibliographie.

**Fage L.** - Sur la présence du *Cottus bubalis* Euphrasen (Poisson Téléostéen) en Mediterranée (Sète) [*De* « *C. bubalis* » *in Mediterraneo*]. C. R. Séances Soc. Biogéogr., XI, 90, 21-23. Paris (1934). **b - 1120**

L'A. signale la capture, au large de Sète, d'un *Cottus bubalis*, genre dont les espèces se trouvent en Europe, seulement dans l'Atlantique septentrional. Hypothèse de l'A. sur cette capture.

**Fowler H. W.** - Natal Fishes obtained by Mr H. W. Bell-Marley [*De piscibus a* Natal *provenientibus a* H. W. Bell-Marley *obtentis*]. 14 figs., Ann. Natal Mus., VII, 3, 403-433. London (1934). **b - 1121**

*Anchoviella indica* new to S. African coast, *Fundulus sukuziensis* n. sp., *Rhinogobius Robinsoni* n. sp. and some other spp.

**Fowler H. W.** - The Fishes of Oceania. Supplement 2 [*De piscibus Oceaniae. Supplementum II$^{um}$*]. 4 figs., Mem. Bernice P. Bishop Mus., XI, 6, 385-466. Honolulu (1934). **b - 1122**

This supplement includes chiefly distributional references that have appeared in ichthyological papers since the publication of author's « Fishes of Oceania » and « Supplement I ». Description of species. Bibliography. Index.

**Fowler H. W.** - Zoological Results of the third de Schauensee Siamese Expedition, Part I. Fishes. Part V. Additional Fishes [*Resultatus zoologici tertiae expeditionis Siamensis a* de Schauensee *peractae Pars. Ia, Pisces*]. 129 + 13 figs., Proc. Acad. Natur. Sc. Philadelphia 1934, LXXXVI, 67-163; 335-352 Philadelphia (1935). **b - 1123**

The first collection containing specimens obtained from the markets, the seashore and fresh waters of Bali, Dutch Indies, numbers 727 specimens represented by 77 species, of which 3 gobies are described as new. The second collection from Siam contains 4500 specimens, over half of which are cyprinoids. 50 species are new, represented by 9 new genera or subgenera. The fifth collection comprises 149 specimens referable to 41 species, 9 of which are new, 1 new genus and 1 new subgenus, all from Siam.

**Fowler H. W.** - The Buckler Dory and Descriptions of Three New Fishes from off New Jersey and Florida [« *Zenopsis conchifer* ». *Descriptio trium novorum piscium a* New Jersey *et* Florida *provenientium*]. 4 pls., Proc. Acad. Natur. Sc. Philadelphia, 1934, LXXXVI, 353-361. Philadelphia (1935). **b - 1124**

*Macrorhamphosus Otteri*, n. sp., *Parathunnus Rosengarteni* n. sp., *Antigonia Browni*, n. sp. The distribution of the Buckler dory *Zenopsis conchifer* (Lowe) is studied.

**Fowler H. W.** - Fishes Obtained by Mr. H. W. Bell-Marley Chiefly in Natal and Zululand in 1929 to 1932 [*De piscibus captis ab* H. W. Bell-Marley *praecipue in Provinciis* Natal *et* Zululand *A. 1929-1932*]. 52 figs., Proc. Acad. Natur. Sc. Philadelphia, 1934, LXXXVI, 405-514. Philadelphia (1935). **b - 1125**

The collection studied includes 855 specimens represented by 330 species, 21 of which are new to science.

*Pseudocrenilabrus, Drepanoscorpis* and *Leiœleotris* are new genera. Many of the species are additions to the South African fauna, besides noteworthy, and for this reason the A. has given a number of descriptive notes.

**Fraser-Brunner A.** - A new Species of Eel of the Genus *Ophichthus* Ahl. [*Anguillae species nova ad genus* «*Ophichthus*» *pertinens*]. 1 fig., Ann. and Magaz. Nat. Hist., XIII, 76, 465-468. London (1934). **b - 1126**

*Ophichthus cyclorhinus* n. sp. from Queensland.

**Fraser-Brunner A.** - New or Rare Fishes from the Irish Atlantic Slope [*Pisces novi seu rari ad Plateam Continentalem Hibernam Atlanticum spectantem pertinentes*]. 5 figs., Proc. R. Irish Acad., XLII, B 19, 319-326. Dublin (1935). **b - 1127**

The species described in this paper belong to the following families: *Hexanchidae, Squalidae, Myctophidae, Coryphenoididae, Gadidae, Trachichthyidae, Apogonidae, Carangidae, Stromateidae, Oneirodidae, Gigantactinidae.* The novelties are as follows: *Nematomerus farrani, Dolopichthys inimicus, D. hibernicus, Gigantactis filibulbosus.*

**Furnestin J.** - La Cardine. (*Lepidorhombus megastoma* Donovan = *Lepidorhombus Whiff.* Walbaum). Etude critique des résultats de la mensuration des civelles pêchées à trois reprises dans le bassin d'Archachon, concernant en particulier les dimensions et le poids des civelles par rapport à leur âge.

**Gandolfi-Hornyold A.** - La petite anguille jaune de l'Etang de l'Or (Hérault) [*De anguillula flava ad stagnum* de l'Or (Hérault) *pertinente*]. Tabl., Communications VIIe Congr. Int. Aquicult. & Pêche, Paris 1931, III, 216-222. Impr. du Loiret. Orléans (1935). **b - 1131**

Recherches conduites à la Station zoologique de Sète sur 258 petites Anguilles concernant sexe, âge, croissance et formation des écailles. Expériences sur la prépondérance du sexe féminin après transplantation.

**Gill E. L.** - Flying Fishes [*De piscibus volantibus*]. Nature, CXXXVI, 3438, 478-479. London (1935). **b - 1132**

Analysis of the different movements of flight observed by the A. on fishes at the west coast of Africa.

**Gilson G.** - Herring Work in 1934-35. Spent Herring in the Coastal Zone of the Intermediate Channel-North Sea Region [*Investigationes de Aringis A. 1934-35. De aringis qui ova deposuerunt in zona litorea canalis intermediarii regionis Maris Nordici*]. 2 diagrs., Rapp. Pr.-Verb. Cons. Expl. Mer, XCIV, 3ème partie. Appendices (1934-1935), 72-74. Copenhague (1935). **b - 1133**

Being a clearly distinct concentration of spent fishes the shoal of Herrings that regularly visits the French and Belgian coasts between Cape Gris-Nez and the Scheldt offers a favourable object for the study of the life cycle of the species in the Southern North Sea. The results obtained are expressed in diagrams concerning number examined, mean weight of a day's capture, total weight landed in the season, mean value of 100 kg., total value of the season, number of individuals destroyed during 1930-35.

**Giltay L.** - Notes ichthyologiques. IX. Contributions à l'étude du genre *Xenopomatichthys* (*Kneriidae*) [*Notae ichthyologicae. IX Contributio in studendum genus* « *Xenopomatichthys* (*Kneriidae*) »]. 14 fig., Bull. Mus. R. Hist. Natur. Belgique, X, 44, 1-22. Bruxelles (1934). **b - 1134**

Dans cette courte étude l'A. a signalé quelques-unes des particularités du genre *Xenopomatichthys*, de la famille des *Kneriidae*, qui comprend en outre le genre *Kneria* et qui est exclusivement africaine. A plusieurs reprises il a rapproché les *Xenopomatichthys* des *Chanidae* avec lesquels ils ont des affinités certaines. Les observations de l'A. confirment de la sorte les idées de Tate Regan qui réunit dans le même voisinage les *Chanidae*, les *Phractolemidae* et les *Cromeriidae*.

Tab., 4 Taf. a. T., Rep. Karelia Scient. Res. Fish. Stat., I, 173-225. Leningrad (1935). **b - 1137**

Ergebnisse der in den Jahren 1930 und 1931 durchgeführten Forschungen über den Lachs aus dem Wyg-Flusse. Beobachtungen über die Migrationen des Lachses in dem Flusse, welcher im unteren nördlichen Teil der Onjega-Bucht des Weissen Meeres mündet. Besondere Beschreibungen des Frühjahrs- und des Sommerzuges des Lachses. Die verschiedenen Fangmethoden mit besonderer Berücksichtigung des sogenannten Zaunfanges, welcher einzig gewerblich in Betracht kommt. Der Einfluss der Migrationen des Fisches auf die Dynamik der Fänge. Die zwei Perioden der Lebensgeschichte des Lachses. Verringerung der Laichplätze durch Verunreinigung des Wassers.

**Gridelli E.** - Le trote della Venezia Giulia [*De Truttis in regione Venetia Julia*]. Not. Ist. Biol. Rovigno, 16, 1-10. Rovigno (1935). **b - 1138**

Sistematica delle trote della Venezia Giulia e dell'Italia settentrionale . *Salmo trutta* L. - *fario* L. si trova nella Venezia Giulia, originariamente solo nei torrenti e fiumi del bacino del Tarvisio. La diffusione del *S. marmoratus.*

**Gudger E. W.** - Two Partially Ambicolorate Flatfishes (*Heterosomata*). I. A Summer Flounder, *Paralichthys dentatus.* II. A Rusty Dab, *Limanda ferruginea* [*Heterosomata duo partialiter ambicolorata*: « *Paralichthys dentatus* » *et* « *Limanda ferruginea* »]. 3 figs., Amer. Mus. Novit., 768, 1-8. New York (1935). **b - 1139**

Detailed description of the specimens. General notes.

**Gudger E. W** - A Photograph and Description of *Masturus lanceolatus* Taken at Tahiti, May, 1933. The sixteenth Adult Specimen on Record [*Photographia et descriptio speciei* « *Masturus lanceolatus* » *captae* Tahiti. *XVI*$^a$ *species adulta adnotata*]. 2 fig., Amer. Mus. Novit., 778, 1-7. New York (1935). **b - 1140**

Capture of *Masturus* at Tahiti. Discovery of *Masturus* at Mauritius. Relationships of *Masturus*. History and distribution.

**Gudger E. W.** - The Oblong or Truncate-tailed Ocean Sunfish, *Ranzania truncata*, at Mauritius [*Piscis oceanicus* « *Ranzania truncata* », *apud* Mauritius]. Nature, CXXXV, 3414, 548. London (1935). **b - 1141**

The brief, untechnical description made by Nicolas Pike sixty-two years ago constitutes the first record of the presence of the oblong sunfish in the Indian Ocean.

In the Barnard's « Monograph » three specimens are listed from False Bay, Table Bay and Dassen Island. According to the A. *Ranzania* was brought from Mauritius or elsewhere in the western Indian Ocean by the currents to South Africa.

**Gudger E. W. & Firth F. E.** - An almost totally ambicolorate Halibut, *Hippoglossus Hippoglossus*, with partially rotated Eye and hooked dorsal Fin, the only recorded Specimen [« *Hippoglossus Hippoglossus* » *totus ambicoloratus, oculo praeditus partialiter rotato pinnaque dorsali incurvata, species una adnotata*]. 2 figs., Amer. Mus. Novit., 811, 1-7. New York (1935). **b - 1142**

This specimen, probably one of the most anomalous flatfishes found, was taken in 200 fathoms of water on St. Peter's Bank of the northern part of Nova Scotia. Detailed description of this species in comparison with a normal one. Color abnormalities; position of eye; behaviour.

**Hardenberg J. D. F.** - Miscellaneous Notes on Indian Fishes, I-IV [*Miscellanea de piscibus indianis. I-IV*]. Natuurk. Tijdschr. Ned. Ind., XCV, 49-57. Den Haag (1935). **b - 1143**

The behaviour and occurrence of fish-species and other animals, which are attracted by light, is described. Fishspecies which are attracted by light belong chiefly to the different families of the *Synentognathi* and to the genera *Mugil* and *Atherina*. A list of species is given. Furthermore the propagation of *Arius maculatus* is described. The young are kept in the mouth of the father, which seems to receive eggs from more than one female. The inner ventral ray of the ripe female is flattened and thickened and has probably a function at the copulation. Also a white individual of *Rachycentron canoctus* and a *Zenarchopterus* individual with an inversed colourpattern is described. (A.)

**Hardenberg J. D. F.** - Some new or rare Fishes of the Indo-Australian Archipelago. IV [*De piscibus novis rarisque ad archipelagus Indoaustraliense pertinentibus*]. Treubia, XV, 2, 131-140. Buitenzorg (1935). **b - 1144**

Contains detailed and eventually emended descriptions of *Narcine timlei* (Schneider), *Hemisilurus heterorhynchus* (Blkr.), *H. scleronema* Blkr, *H. moolenburghi* Weber and de Beaufort, *Arius leptonotacanthus* Blkr., *Ichthyocampus carce* Ham. Buch., new diagnosis of the genus *Typhlachirus* (Hubbs.) Hardenberg (Fam. *Soleidae*), *Caranx* (*Caranx*) *ignobilis* (Forsk.), *Seriola bonariensis* C. V., *Grammatorcynus bilineatus* (Rüpp.), *Plectropoma oligacanthus* Blkr., *Pempheris sasahii* (Jordan and Hubbs.), and *Pempheris nyctereutes* Jordan and Evermann (A.).

**Herre A. W.** - Some Chinese Gobies with Description of one new Species [*Gobiidae sinenses cum descriptione novae speciei*]. Lingn. Sc. Journ. XII, 3, 429-430. Canton (1933). **b - 1145**

*Cryptocentrus cheni*, n. sp. 17 other spp. are recorded.

**Herre A. W.** - New Fishes Obtained by the Crane Pacific Expedition [*Pisces novi ab expeditione* Crane *in Oceanum Pacificum provenientes*]. Field Mus. Natur. Hist., Zool. Ser. (Publ. 335), XVIII, 12, 381-438. Chicago (1934). **b - 1146**

Seven new genera and about 56 new species.

**Hikita T.** - Flatfishes found in Northern Japan [*Pleuronectidae in Japonia sept. repertae*]. (In Jap., Engl. Rés.). Bull. School of Fish., IV, 10-15. Sapporo, Jap. (1934). **b - 1147**

**Hora S. L.** - Physiology, Bionomics and Evolution of the Air-Breathing Fishes of India [*De physiologia, bionomia, evolutione piscium pulmonatorum Indiae*]. 1 pl., Trans. Nat. Inst. Sc. India, I, 1. 16, pp. Calcutta (1934). **b - 1148**

**Horsburgh D. B.** - The Templeton Crocker Expedition of the California Academy of Sciences, 1932. A Revision of two Species of *Vinciguerria*, A Genus of Deep Sea Fishes [*De expeditione* Templeton Crocker *ab Academia Scientiarum peracta A. 1932. Reinspectio duarum specierum ad « Vinciguerria » pertinentium, genus piscium in aqua profunda viventium*]. Proc. Calif. Acad. Sc., XXI, 19, fourth ser., 225-232. San Francisco (1935). **b - 1149**

Six species are known at present, two of which are doubtful and described here with indication of synonyms: *Vinciguerria lucetia* (Garman) and *V. nimbaria.*

**Horst (van der) C. J.** - Two New Fishes from Transvaal [*Pisces duo novi ad* Transvaal *pertinentes*]. 2 figs., Ann. Transvaal Mus., XV, 3, 281-282. Pretoria (1934). **b - 1150**

*Engraulicypris whitei* and *Haplochilus carlislei.*

**Hubbs C. L.** - The scientific Name of two Sunfishes, *Helioperca macrochira* (Rafinesque) and *Eupomotis microlophus* (Günther) [*Nomen scientificum duorum piscium*]. Occas. Pap. Mus. Zool. Univ. Michigan, 305, 1-12. Michigan (1935) **b - 1151**

*Helioperca macrochira* (Raf.) = (*H. incisor* C. & V.), *Pomotis heros* B. & G.), *Labrus palladus* Mitchill, is probably and *L. appendix* M. is certainly a syn. of *Lepomis auritus* (L.). *Pomotis holbroocki* Cuv. & Val. is probably a syn. of *Eupomotis gibbosus* (L.) = (*Pomotis notatus* Ag.). *Eupomotis microlophus* (Günther) is the oldest available name for a southern *Eupomotis.*

**Jensen A. J. C.** - On a Great Change in the Size–Composition of the North Sea Plaice during the Latest Years [*De magna quadam mutatione quoad magnitudinem speciei « Pleuronectes platessa » proximos annos*]. 2 tabl., 1 fig., Rapp. Pr-Verb. Cons. Expl. Mer., XCIV, 3ème partie Appendices (1934-1935), 7-8. Copenhague (1935). **b - 1152**

From the fishing experiments carried out by the S/S « Dana » it has been shown that the change in the composition of the stock is due to the fluctuations in the strength of the year-classes. This change in the plaice stock has given rise to a shifting of the fishing places of the Danish fishery.

**Johansen B. G.** - Morphologische und biologische Besonderheiten der Sibirischen Neunaugen [*Lampetrae (Cyclostomata) siberianae. Peculiaritates morphologicae et zoologicae*]. (In Russ., Dtsch. Rés.). 9 Abb., 8 Tab., 2 Taf., Zool. Zhurn., XIV, 2 359-370; 3, 501-522. Moskva (1935). **b - 1153**

Vorliegende Arbeit ist eine Zusammenfassung der Untersuchungen über die Neunaugensammlung des Zoologischen Museums zu Tomsk und der Literatur über die Neunaugen der nördlichen Halbkugel. Nach einer kurzen Beschreibung der 11 eurasischen Neunaugen bespricht Vf. eingehender die 2 in Sibirien vertretenen Formen: die grosse durchgehende (*Lampetra japonica septentrionalis*), und die kleine Standform, *L. japonica kessleri*, mit besonderer Berücksichtigung ihrer morphologischen und biologischen Merkmale. Er schildert ausserdem das Verbreitungsgebiet, die Wanderungen und Larvenform beider Fische und betont die Notwendigkeit weiterer Untersuchungen zur Feststellung aller objektiven morpologischen Merkmale der sibirischen Neunaugen.

**Kaganovskij A. G.** - Matériaux pour la connaissance de la sardine de l'Extrême-Orient (*Sardinops melanosticta*, Temm. & Schleg.) [*Res collectae ad speciem cognoscendam « Sardinops melanosticta »*]. (En russe). 1 tabl., Rybn. Choz. Daljn. Vostoka, XIII, 1, 35-38. Khabarovsk (1935). **b - 1154**

Informations concernant les rendements de la pêche de *S. melanosticta*, sa propagation, ses migrations, l'influence du plankton et de la température sur ses déplacements, le cycle évolutif et le pourcentage des différents groupes d'âge dans les captures.

**Kaganovskaja S. M.** - Caractéristique morphologique de la sardine (*Sardinops melanosticta*, Temm. & Schleg.) [*Peculiaritas morphologica speciei «Sardinops melanosticta »*]. (En russe). 2 tabl. Rybn. Choz. Daljn. Vostoka, XIII, 1, 38-40. Khabarovsk (1935). **b - 1155**

Résultats de l'analyse des matériaux recueillis sur *S. melanosticta* dans le but d'établir quelles sont les caractéristiques morphologiques les plus variables de ce poisson afin de pouvoir en distinguer les races particulières éventuelles, avec référence spéciale à ce que l'on pourrait appeler les modifications morphologiques saisonnières.

**Kahl W.** - Einige Beobachtugen über den Stint [*Observationes de specie «Osmerus eperlanus»*]. 1 Fig., 5 Tab., Fischmarkt, III, 6, 147-151. Cuxhaven (1935). **b - 1156**

Kurze Zusammenstellung einer Reihe von Beobachtungen über den Stint, welche im Zusammenhang mit anderen Untersuchungen während des Winters 1934/35 von der Fischereibiologischen Abteilung des Zoologischen Staatsinstituts im Hafengebiet der Elbe gemacht worden sind, mit besonderer Berücksichtigung der Nahrungsverhältnisse, des Alters, des Gewichtes, des Wachstums und der Geschlechtsverhältnisse dieses Fisches, an Hand von drei umfangreichen Proben von Angelstint von insgesamt 270 Stück.

**Katayama Masao** - Biometric Study of Dog Salmon, *Oncorhynchus Keta* (Walbaum). [*De biometria speciei « Oncorhynchus keta »*. (In Jap., Engl. Rés.). 5 tabl., Bull. Jap. Soc. Scient. Fish., IV, 3, 171-173. Tokyo (1935). **b - 1157**

Sexual dimorphism. Races.

**Kimura Kinosuke** - Sardines from the Waters in the Neighbourhood of Tokyo(1). Fishing Season, Size and Form of Sardines in the North-eastern Parts of the Bays of Sagami and Suruga [*Sardinae in aquis apud* Tokyo. *Tempus piscandi, magnitudo et forma sardinarum in regione nord-orientali bajae* Sagami *et* Suruga]. (In Jap., Engl., Rés.). 12 figs., 4 tabl., Bull. Jap. Soc. Scient. Fish. III, 6, 312-326. Tokyo (1935). **b - 1158**

Fishing season, averaged body-length of fish groups, averaged fatness and fatness-index of groups are studied for the following species: *Sardinia melanosticta*, *Engraulis japonicus*, *Etrumeus micropus*, *Spratelloides japonicus.*

**King G. W. & La Monte Fr.** - The World of Fishes. Guide to the Fish Collections of the American Museum of Natural History [*Collectio piscium Musei Americani Historiae Naturalis*]. 18 figs., Guide Leaflet Ser., 81, 7-90. New York (1934). **b - 1159**

Part. I: Recent fishes: Section I: Archaic fishes: sharks, rays, chimaeroids, lampreys and hags, lungfishes. Section II: The biology of fish: reproduction, parental care, locomotion and body form. Section III: Deep sea and reef fishes. Section IV: Gamefishes. Section V: The higher fishes: ganoids, teleosts. Part II: Fossil fishes. Index.

S.** - Biologisch-systematische Studien des Stints des Weissen Meeres, der Tscheskaja Bucht und des Flusses Petschora [*Studia biologico-systematica specierum « Osmerus eperlanus » et « Osmerus dentex » ad Mare Album, bajam* Tscheskaja *et flumen* Petschora *pertinentium*]. (In Russ., Dtsch. Rés.). 61 Taf., Works Labor. Ichthyol., Trans. USSR Inst. Fish. & Oceanogr., II, 101-194. Moscow (1935). **b - 1160**

Beschreibung der Arbeitsmethode zum Studium des vorhandenen Materials. Veränderungen der erforschten Altersindexe Wachstumstempo, Studium der einzelnen biologischen Merkmale und des allgemeinen Entwicklungsganges. Biologie. Schlussfolgerungen in Bezug auf die Biologie und Systematik der nördlichen Formen von *Osmerus* in den nordrussischen Gewässern.

**La Cascia P.** - Sul *Cetorhinus maximus* Gunn. (*Selache maxima*) nel Mediterraneo. Catture nel mare di Palermo [*« Cetorhinus maximus » in mari Mediterraneo. Agitur de capturis mari panormitano*]. 3 tav., 6 tab., 60 fig., Bull. Ist. Zool. Univ. Palermo, II, 8/11, 137-176. Palermo (1934). **b - 1161**

Catturati nel 1928–31 per la prima volta nel mare di Palermo quattro esemplari di *Cetorhinus maximus*, l'A. ne dà l'esatta descrizione morfologica, e i dati somatometrici più importanti al fine di distinguere l'identità delle forme *rostrata* e *maxima*. Differenze con gli esemplari atlantici, ipotesi di una migrazione dei *Cetorhinus* dell'Atlantico settentrionale nel Mediterraneo.

**Le Gall J.** - Le Hareng *Clupea harengus* Linné. I. Les populations de l'Atlantique Nord-Est [*« Clupea harengus ». Populatio Oceani Atlantici nord-orientalis*]. 98 fig., Ann. Inst. Océanogr. XV, 1, 1-215. Paris (1935). **b - 1162**

1) Le Hareng (*Clupea harengus* Linné): place dans la classification; caractères spécifiques; distribution. 2) La méthode de travail suivie. Étude particulière d'une population: les harengs de l'Atlantique Nord-Est; choix des caractères à étudier. 3) Les populations de l'Atlantique Nord–Est: les Harengs de la bordure du Plateau Continental Atlantique; les Harengs de printemps Atlanto-Scandinaves; les Harengs Hiberno-Calédoniens; les Harengs Atlantiques; les Harengs de la Manche; les Harengs d'automne de la Mer du Nord; les Harengs des Détroits Danois; les Harengs de la Baltique; les Harengs dans des mers étroites; les populations des Harengs de l'Atlantique Nord-Est. 4) Les conditions du milieu marin et la répartition des différentes populations de Harengs de l'Atlantique Nord-Est: les différents domaines de l'Atlantique Nord; influence de la température et de la salinité sur les variations de quelques caractères fluctuants; influence des variations des conditions du milieu sur le déplacement des bancs de Harengs; la périodicité des transgressions atlantiques et les fluctuations de la pêche.

**Le Gall J.** - Statistiques biologiques et considérations sur la population de Harengs de la Manche orientale et du Sud de la Mer du Nord. (Matériel prélevé en 1934) [*Statistica biologica considerationesque circa populationem aringorum Freti Britannici orientalis Marisque nordici*]. 2 fig., Rev. Trav. Off. Pêches Marit., VIII, 1, 43-53. Paris (1935). **b - 1163**

La population de Harengs concentrée sur les frayères du Sud de la Mer du Nord et de la Manche orientale, pendant la saison d'hiver 1933-1934, peut se caractériser par l'abondance de Harengs de 5 ans (4 anneaux d'hiver), classe 1929. Les jeunes Harengs de 3 ans (2 anneaux d'hiver, classe 1931) apparaissant pour la première fois dans les concentrations de ponte, se sont également montrés relativement nombreux (13,5 p. 100).

L'étude de la moyenne vertébrale des Harengs étudiés a montré qu'une forte pénétration en Manche orientale des Harengs de la Mer du Nord s'est faite pendant le mois de novembre et de décembre. Au contraire, la pénétration de Harengs du type « Manche » a été limitée et ne s'est produite qu'à la fin de saison, après le ponte sur les frayères de la Manche orientale et au sud de la Somme.

**b - 1172**

Review of the species of *Parapercidae*, inhabiting Philippine waters. Keys and synonyms, diagnosis. Two new species: *Parapercis dorsonebulosa*, n. sp. and *P. montillai* n. sp.

**Matsubara Kiyomatsu** - Studies on the Scorpaenoid Fishes of Japan. I. Descriptions of One New Genus and Five New Species [*Scorpaenidae ad Japoniam pertinentes. Novi generis, descriptio quinqueque novarum specierum*]. 4 figs., Journ. Imp. Fish. Inst., XXX, 3, 199-210. Tokyo (1934).
**b - 1173**

External and internal characters of the new genus *Hozukius*, different from those of the genus *Helicolenus*, and the following new species: *Sebastodes* (*Primospina*) *wakiyai*, *S.* (*Zalopyr*) *melanostictus*, *S.* (*Z.*) *kawaradae*, *Sebastichthys* (*Pteropodus*) *latus*, *S* (*P.*) *longispinis* are described and their measurements given.

**Matsubara Kiyomatsu** - Studies on the Scorpaenoid Fishes of Japan. II. Statistical Observations on *Sebastodes inermis* (C. et V.) [*Scorpaenidae ad Japoniam pertinentes. II. Observationes statisticae speciei* « *Sebastodes inermis* »]. 2 graph. figs., 9 tabl., Bull. Jap. Soc. Scient. Fish., IV, 4, 217-223 (Contr. Zool. Labor. Imp. Fish. Inst. No. 39). Tokyo (1935).
**b - 1174**

Discussion on the division of *Sebastodes inermis* into four species. Measurements of all the body parts utilized for taxonomy expressed in graphs and tables for nine different localities.

**Mayorowa A. A.** - Position taxonomique de l'anchois, pêché auprès des côtes de la Géorgie [« *Engraulis encrasicholus* » *ad litora Georgiana captus. Quaestio de eius positione taxonomica*]. (En russe, rés. franç. & géorg.). 2 tabl., Trav. Stat. Piscic. & Biol. Géorgie, I, 1, 5-20. Batoum-Tiflis (1934).
**b - 1175**

Résultats de recherches sur l'anchois pêché auprès des côtes de la Géorgie et celui capturé près de Sébastopole, qui permettent à l'A. d'affirmer, sur la base de diagnoses respectives, qu'il existe dans la partie orientale et occidentale de la Mer Noire deux formes distinctes d'*Engraulis encrasicholus ponticus* que l'A. désigne sous les noms de *E. encrasicholus ponticus occidentalis natio nova* et *E. encras. ponticus orientalis natio nova.* Dans le texte russe de l'article les deux diagnoses sont aussi données en latin.

**Mayorowa A. A.** - Une nouvelle espèce de hareng habitant le lac Palaeostome [*Species nova ex Aringis in lacu* Palaeostome]. (En russe, rés., franç. & géorg.). 6 tabl., 1 pl., Trav. Stat. Piscic. & Biol. Géorgie, I, 1, 21-30. Batoum-Tiflis (1934).
**b - 1176**

Résultats d'une analyse biométrique du hareng du lac Palaeostome et de l'embouchure du fleuve Rion, et sa comparaison avec les harengs de la Mer Noire et de la Mer d'Azov, *Caspialosa nordmanni* Antipa et *C. tanaica* Grimm., dont l'A. conclut qu'il existe une différence tellement considérable entre ces trois formes qu'il est autorisé à considérer le hareng du lac Palaeostome comme une forme à part, à laquelle il a donné le nom de *Caspialosa palaeostomica* sp. n.

**Menshikov M. I.** - Contribution to the Taxonomy and Biology of *Stenodus leucichthys nelma* of the Lower Irtysh [*Contributio in taxonomiam et biologiam speciei* « *Stenodus leucichthys nelma* » *in* Irtysh]. (In Russ., Engl. Rés.), 9 tabl., 1 diagr., Bull. Inst. Rech. Biol. Perm, X, 1/2. Perm (1935).
**b - 1177**

Biometrical analysis, methods of investigation; taxonomic signs and their alterations depending on age; migrations; sexual maturity, growth rate; parasites.

**Meyer P. F.** - Ueber das Vorkommen von *Labrus bergylta* Ascanius (gefleckter Lippfisch) in der Ost-und Beltsee [« *Labrus bergylta* » *in mari Baltico marique* Belt]. Zool. Anz., CVIII, 270-271. Leipzig (1934).
**b - 1178**

**Molander A. R.** - Ueber das Vorkommen der jüngsten Altersgruppen der Scholle an der schwedischen West-und Südküste [*Species* « *Pleuronectes platessa* ». *Agitur de praesentia cumulorum juniorum in litoribus occid. et merid. Suetiae*]. 9 graph. Fig., 4 Tab., Rapp. Pr-Verb. Cons. Expl. Mer, XCIV, 3ème partie. Appendices (1934-1935), 31-41. Copenhague (1935).
**b - 1179**

Die von 1929 an jährlich unternommenen Untersuchungen, hier graphisch gezeigt, geben vorhanden, dass die schwedische Westküste ein sehr wichtiger Grund für junge Schollen mit sehr verschiedener Ausbreitung and Stärke ist. Wie die meisten Untersuchungen beweisen, lebt die jüngste Altersgruppe der Südküste gewöhnlich im flachsten Wasser. Ein Addendum von J. P. Jacobsen über den Wasseraustausch zwischen der Ostsee und dem Kattegat ist am Ende dieser Arbeit hinzugefügt.

**Molander A. R.** - Further Data concerning the Witch (*Pleuronectes cynoglossus* L.) [*Data circa speciem* « *Pleuronectes cynoglossus* »]. 22 tabl., 13 fig., Sv. Hydrogr.-Biol. Komm. Skr., Ny ser. Biol., I, 6, 25-31. Stockholm (1935).
**b - 1180**

The Witch fishery in Bohuslän. The distribution of witch in the North Sea, the Skagerrak and the Kattegat. The presence of witch and the hydrographical conditions. The distribution of males and females. Growth, age-groups, Are there different races of witch ?

**Montilla J. R.** - A Rewiew of Philippine *Menidae* and *Gerridae* [« *Menidae* » *et* « *Gerridae* » *ad Philippinas insulas pertinentes*]. 3 Pls., Philipp. Journ. of Sc., LVIII, 2, 281-295. Manila (1935).
**b - 1181**

Description, synonyms and habitats of: *Mene maculata*, *Gerres abbreviatus*, *G. filamentosus*, *G. kapas*, *G. oyena*, *G. oblongus*, *G. baconensis*, *G. macrosoma*, with key to species of *Gerres*.

**Morris R. T.** - Note on Lampreys [*Notae de Lampetris*]. Canad. Field. Natural., 49, March, 60. Ottawa (1935).
**b - 1182**

**Mothervell J. A.** - Condition of British Columbia Salmon-Spawning Grounds [*Condicio locorum reproductionis pro salmonibus in Columbia Britannica*]. 1 table, Rep. Comm. Fish. Brit. Columb., 1934, App., 59-67. Victoria, B. C. (1935). **b - 1183**

Information on seeding and run in 10 principal and 13 sub-districts. Statistical statements of salmon-eggs collected in British Columbia and placed in the hatcheries.

**Murat M.** - Sur la Capture d'une Coryphène dans la Baie de Castiglione [« *Coryphaena hippurus* ». *Quaestio de captura in baja* Castiglione]. Stat. Aquicult. et Pêche Castiglione (1933), 2, 61-71. Alger (1935). **b - 1184**

Histoire, captures, description de la Coryphène.

**Murat M.** - Contribution à l'étude de la Sardine (*Sardina pilchardus* Walb.) de la Baie de Castiglione [*Contributio in studendam speciem* « *Sardinia pilchardus* » *in baja* Castiglione]. Stat, Aquicult. et Pêche Castiglione (1933), 2, 95-196. Alger (1935). **b - 1185**

Importance et difficulté de l'examen des écailles des Clupes; critérium pour distinguer un anneau vrai d'un faux; observations à la lumière polarisée; considérations par suite de la formation discontinue des écailles sur l'allure de la croissance pendant une année; méthodes pour la détermination de la courbe de croissance; longévité de la Sardine algérienne. Quelques données biométriques sur le nombre des vertèbres et les proportions du corps; valeur de certains rapports en vue de la distinction des races· Variation du poids des sardines. Sexualité.

**Nakamura H.** - On a Rare Shark from Formosan Waters [*De specie* « *Galeocerdo tigrinus* » *in aquis apud Formosam*]. (In Jap.). 1 pl., Trans. Nat. Hist. Soc. Formosa, XXIV, 135, 486-488. Taihoku (1934). **b - 1186**

Description and diagnosis of *Galeocerdo tigrinus* Müller et Henle from Formosan waters.

**Nall G. H.** - The Sea Trout of Mull [*Trutta marinu regionis* Mull]. 34 tabl., 4 pl., Fish. Bd Scotl. Salmon Fish., I,3-44. Edinburgh (1935). **b - 1187**

The paper is based on scales read and measured by the author. Introduction and survey of results: 1. The Island of Mull; 2. List of centres in alphabetical order; number of fish in each sample; 3. Survey of results: *a*) parr life; *b*) sea life; *c*) age at maturity; 4. heaviest and oldest sea-trout. II. Samples from the different centres.

**Nall G. H.** - Sea-Trout of the Montrose District. Part II. Growth on the Scales of Recaptured Fish [*Trutta marina in districtu* Montrose. *II. Accretio squamarum piscis denuo capti*]. 15 pls., 4 tables. Fish. Bd Scotl., Salmon Fish., II, 3–22. Edinburgh (1935). **b - 1188**

This second paper on the Sea-trout of the Montrose Area deals with recaptures of marked fish and consists of the following paragraphs: I. The principles on which the reading and measurement of scales are based. II. Illustrations of these principles from recaptured scales. III. Difficulties in the application of these principles. IV. Misleading scales. V. A fuller discussion of checks. VI. Measurements of growth at certain seasons. VII. No indication that marketing affects subsequent growth. Bibl.

**Netchaeff A.** - The Black Sea « *Sarda sarda* », Bloch [*Species* « *Sarda sarda* » *Ponti Euxini*]. (In Bulg., Engl. Rés.). Trav. Stat. Ichthyol. à Sozopol-Bulgarie, II, 3–13. Burgas (1934). **b - 1189**

**Netchaeff A.** - Some Observations over the little *Sargus annularis* L. [*Observationes de parva specie* « *Sargus annularis* »]. (In Bulg., Engl. Rés.). Trav. Stat. Ichthyol. à Sozopol-Bulgarie, II, 27-30. Burgas (1934). **b - 1190**

**Nichols J. T.** - Variation in Pacific *Trachurops crumenophthalmus* [*Variationes speciei* « *Trachurops crumenophthalmus* » *Oceani Pacifici*]. 1 fig., Amer. Mus. Novit., 815, 6 pp. New York (1935). **b - 1191**

Description and comparison of 5 full-grown specimens of similar size from different parts of the eastern Pacific. The most aberrant form is here described as a new subspecies, *T. crumenophthalmus crockeri.*

**Nichols J. T. & Breder C. M.** - New Pacific Flying-fishes Collected by Templeton Crocker [*De novo pisce volante apud* Templeton Crocker *collecto*]. 3 figs., Amer. Mus. Novit., 821, 4 pp. New York (1935). **b - 1192**

Series collected through the eastern Pacific; three species of the genus *Cypselurus* are here described as new: *C. pitcairnensis* n. sp., *C. angusticeps* n. sp., *C. ventralis* n. sp.

**Nichols J. T. & La Monte F. R.** - The Tahitian Black Marlin, or Silver Marlin Swordfish [*Piscis tahitiensis* « *Makaira nigricans tahitiensis* »]. 1 fig., Amer. Mus. Novit., 807, 1. New York (1935). **b - 1193**

Description of *Makaira nigricans tahitiensis* n. subsp.

**Nichols J. T. & Maxwell A.** - A probably undescribed Codfish from Arctic America [*Species ex* « *Gadus* » *ab America arctica proveniens, nondum probabiliter descripta*]. Copeia, I, 26. New York (1933). **b - 1194**

*Boreogadus pearyi* n. sp. Greenland.

**Nikitina V. R.** - Bibliographie Ichtyologique de la Mer Noire et de la Mer d'Azov [*Bibliographia ichthyologica Ponti Euxini et Paludis Moeotidis*]. (Introd. en russe). Trav. Stat. Piscic. & Biol. Géorgie, I, 1, 237-280. Batoum-Tiflis (1934). **b - 1195**

Aperçu général et liste bibliographique de 693 travaux publiés en différentes langues et concernant l'ichtyologie de la Mer Noire et de la Mer d'Azov. Les travaux sont divisés en 7 groupes ainsi qu'il suit: 1. Systématique et zoogéographie; 2. Ecologie; 3. Pêches et pisciculture; 4. Morphologie; 5. Maladies et parasites de poissons; 6. Varia; 7. Mammifères marins de la Mer Noire et de la Mer d'Azov.

**Ninni E.** - *I Callionymus* dei mari d'Europa, con un'aggiunta di quelli esotici esistenti nei Musei d'Italia e una nuova specie di *Callionymus* del Mar Rosso [*De* « *Callionymus* » *ad maria europaea pertinentibus. Notae adiunguntur de exemplaribus esoticis in Museis Italicis atque etiam descriptio novae speciei ex* « *Callionymus* » *ad Mare Rubrum pertinentis*]. 13 tav., Notas y Résum., Inst. Españ. Oceanogr., ser. II, 85, 1-59. Madrid (1934). **b - 1196**

L'A. prima di tutto passa in rassegna le descrizioni delle diverse specie di *C.* fatte da autori precedenti, poi le divide basandosi sulla forma e sul numero di aculei di cui sono provviste le spine preopercolari e ne dà una descrizione dettagliata. Tratta infine dei *Callionymus* esotici esistenti nei Musei d'Italia e descrive dettagliatamente la nuova specie *C. erythraeus* n. sp.

**Ninni E.** - Alcune osservazioni d'indole biologica sul genere « *Salarias* » (Cuv.) [*Observationes quaedam biologicae de genere « Salarias »*]. 1 fig., Natura (Riv. Sc. Nat.), XXVI, 3, 100-103. Milano (1935). **b - 1197**

Brevi osservazioni sulle abitudini di vita di due specie del genere *Salarias*, raccolte dall'A. nel Mar Rosso e nell'Oceano Indiano, e cioè: il *Salarias unicolor*, Rupp. ed il *Salarias tridactylus*, Bl. Schn.

**Otterstrøm C. V.** - Laks og Ørred. En Vejledning til Bestemmelse [« *Salmo salar* » *et* « *Salmo trutta* ». *Auxilium pro determinatione*]. 23 fig., 10 pp., Ferskvandsfiskeribladet, XXXIII, 4. København (1935). **b - 1198**

Description of eggs and fry. Keys for the determination of the two species in different stages, also on hand of figures.

**Paspaleff G. W.** - Beitrag zur Morphologie und Biologie von *Bothus maeoticus* Pall. [*Contributio in morphologiam et biologiam speciei « Bothus maeoticus »*]. 10 Tab., 4 Abb., Arb. Biol. Meeresstation a. Schwarzen Meer in Varna, Bulg., 3, 17-53. Sofia (1934). **b - 1199**

Vorhergehende Beschreibungen. Material. Morphologie. Vorkommen. Das Verhalten der *B. m.* Pall. bei starken Aenderungen des Salzgehaltes und der Wassertemperatur. Laichzeit und biologische Minimalmasse. Das zahlenmässige Verhältnis der Geschlechter. Eier. Laichplätze. Ernährung: Altersbestimmung. Das Wachstum von *B. m.* Pall. Das Verhältnis zwischen den Gewichts-und Grössenabmessungen. Wirtschaftliche Bedeutung.

**Pellegrin J.** - Un poisson rare pour la faune française le Cubiceps grêle [*Piscis rarus in fauna gallica, « Cubiceps gracilis »*]. Ass. Franc. Av. Sc., C. R., 57 Sess., 496-498. Chambéry (1933). **b - 1200**

*Cubiceps gracilis* Lowe, rejeté sur la plage de Guèthary.

**Pellegrin J.** - Poisson abyssal du genre *Melamphaes* pêché en surface, nouveau pour les côtes françaises [*De pisce quodam abyssali ad genus « Melamphaes » pertinente, novo in litoribus gallicis, ad superficiem capto*]. Bull. Soc. Zool. France, LIX, 266-267. Paris (1934). **b - 1201**

Amplitude des migrations verticales qui permettent à quelques espèces abyssales de se rapprocher de la surface.

**Pellegrin J.** - Poisson marin nouveau de la réunion de la famille des Serranidés [*Agitur de nova specie « Holantias furcatus »*]. Bull. Mus. Nat. Hist. Natur., VII, 1, 51-53. Paris (1935). **b - 1202**

*Holanthias furcatus* nov. sp.

**Phillips J. B.** - A large Northern Halibut in Monterey [*Magnus « Hippoglossus hippoglossus » in baja* Monterey *captus*]. Calif. Fish a. Game, XXI, 3, 262. Sacramento (1935). **b - 1203**

This specimen weighing 89 pounds and measuring 5 feet 3 inches from tip of snout to tip of tail is the largest specimen of northern halibut taken so far south.

**Podenzana G.** - La cattura di una *Selache maxima*, Gunn. in Bocca di Magra (Golfo della Spezia) [« *Selache maxima* » *apud* Bocca di Magra *capta*]. 1 fig., Mem., Acc. Lunig. di Sc., Capellini, XV, 1, 50-52. La Spezia (1935). **b - 1204**

**Popow A. M.** - Beiträge zur Ichthyofauna des Japanischen Meeres [*Contributio in ichthyofaunam maris Japonici*]. (In Russ., Dtsch. Rés.). 1 Taf., Expl. Mers U. R. S. S, 19, 139-155. Léningrad (1933). **b - 1205**

Bearbeitung des während verschiedenen Expeditionen in der Gegend zwischen der Bucht Peter dem Grossen und dem Amur-Liman im Japanischen Meere gesammelten Materials, welches insgesamt 80-31 Familien angehörenden Arten enthält. Von diesen 80 Arten sind die folgenden 3 neu: *Careproctus batialis* n. sp., *Alectrias tarasovi* n. sp. und *Lycozoarces regani* n. sp.

**Probatov A. N.** - Contribution to the Study of Kama Sterlet [*Contributio in studendam speciem « Acipenser ruthenus » ad* Kama *pertinentem*]. (In Russ., Engl. Rés.). 5 tabl., Bull. Inst. Rech. Biol. Perm, X, 1/2, 29-41. Perm (1935). **b - 1206**

Fishery and commercial importance. Sexual maturity, length, weight, migration, food, parasites.

**Raitt D. S.** - The Occurrence of four Species of Sand Eels, of economic Importance in Scottish Waters, one of which is new to Science [« *Ammodytes lanceolatus* ». *Species quattuor magni momenti oeconomici in Scotia*]. Scott. Natur., 213, 61-62. Edinburgh (1935). **b - 1207**

**Roberts W. A.** - The Shad [*Alosa sapidissima*]. Fish & Oyst. Rep., XVI, 8, 5 & 8. Tampa, Fla. (1935). **b - 1208**

Brief notes on the life history, distribution, migrations, stock and commercial importance of *A. sapidissima*.

**Rollefsen G.** - Observations on the Propagation of the Cod and the Plaice [*De propagatione specierum « Gadus morrhua » et « Pleuronectes platessa »*]. 1 fig., Kgl. Norsk. Vidensk. Selsk. Forh., 1934, VII, 11, 33-34. Trondheim (1935). **b - 1209**

Observations undertaken at the biological Station of Trondheim in spring 1934 in order to study the question as to the predilection of the cod of the transition layers between the warm Atlantic water in the deep and the cold surface layer for spawning.

**Roxas H. A.** - A Review of Philippine Isospondylous Fishes [*De piscibus Isospondylibus ad insulas Philippinas pertinentibus*]. 3 pl., Philipp. Journ. Sc., LV, 3, 231-295. Manila (1934). **b - 1210**

An attempt is made here to present a systematic record of the material contained in the collection of the Fish and Game Administration of Manila, so that the confusion arising from wrong identification and from non-uniformity of taxonomic treatment may be partially if not completely eliminated.

**Roule L.** - (Transl. by Elphinstone). Fishes. Their Ways of Life [*Piscium modus vivendi*]. 52 figs., viii + 312 pp. Georg Routledge & Sons, Ltd. London (1935). **b - 1211**

**Roule L.** - Nouvelles observations sur quelques espèces de Poissons abyssaux provenant de Madère [*Observationes novae de piscibus abyssalibus a* Madera *provenientibus*]. Bull. Inst. Océanogr., 674, 1-6. Monaco (1935). **b - 1212**

Détermination de huit espèces, dont cinq ont été prises par l'engin de pêche profonde dit « Camera de lobos » et trois ont été retirées, avant digestion, de l'estomac de poissons qui les avaient ingurgitées. Diagnose du nouveau genre *Candonia*.

**Rounsefell G. A. & Dahlgren H. E.** - Races of Herring, *Clupea pallasii,* in Southeastern Alaska [*Species « Clupea pallasii » in Alaska sudorientali*]. 9 tabl., 10 fig., Bull. Bur. Fish., XLVIII, 17, 119-141. Washington (1935). **b - 1213**

Necessity of studying the individuality and distri bution of herring populations in order to unterstand depletion and variations of the stock. Spawning and feeding localities. Analysis of vertebral counts. Analysis of growth rates, year classes. Tagging.

**Runnstrøm S.** - The Relationship between the Spring-Spawning Herring Population of the Northern North Sea and the Norwegian West Coast [*De correlationibus inter Aringos qui vere reproductionem faciunt in Mari Nordico septemptr. et litora occid. Norvegica*]. 1 map. Rapp. Pr.-Verb. Cons. Expl. Mer, XCIV, 3ème partie, Appendices (1934-1935), 3-6. Copenhague (1935). **b - 1214**

The spawning migrations to the Norwegian coast during recent years, of which the A. here gives an account, seem to have a certain connection with the current conditions in the Northern North Sea. A clear westerly displacement of the spawning shoals has been noticed in certain years, further investigations as to the distribution of the pelagic herring larvae from the hatching centres will, however, be necessary for the elucidation of the interchange between different spawning groups.

**Salnikov N. I. & Maljatskij S. M.** - Sur la systématique du grand esturgeon (*Huso huso* L.), du bassin de la Mer Noire et de la Mer d'Azov [*Quaestio de systematica speciei « Huso huso » ad Pontum Euxinum Paludemque Moeoticam pertinentis*]. (En russe, rés. franç. et géorg.). 3 tabl., 2 pl., 1 carte. Trav. Stat. Piscic. & Biol. Géorgie, I, 1, 31-50. Batoum-Tiflis (1934). **b - 1215**

Compte rendu des résultats d'une étude biométrique sur le grand esturgeon de la Mer Noire recueilli dans les environs de Sébastopole et de Batoum et sur celui de la Mer d'Azov, recueilli dans le voisinage de la côte Nord de la péninsule de Kertsch. Sur la base de ce matériel les A. A. divisent le grand esturgeon *Huso huso* L. du bassin de ces deux mers en deux sous-espèces, et précisément: *Huso huso maeoticus* (Mer d'Azov) et *H. huso ponticus* (Mer Noire); à son tour ils distinguent dans la sousespèce pontine deux *natio*: a) *H. huso ponticus orientalis* et b) *H. huso ponticus occidentalis*. Dans le texte russe la diagnose des formes considérées est aussi donnée en latin. Une description morphologique, écologique et biologique des poissons est aussi contenue dans l'ouvrage.

**Santucci R.** - La presenza nelle acque del Mar Rosso del « *Rhineodon typus* » A. Smith. Squalo gigantesco [*Species « Rhineodon typus » squalus permagnus in Mari Rubro*]. 7 fig., Boll. Mus. e Lab. di Zool. e Anat. Comp. R. Univ. di Genova, XIV, 76, 3-14. Genova (1934). **b - 1216**

L'A. segnala per la prima volta la cattura nelle acque del Mar Rosso del *Rhineodon typus*, squalo gigantesco dell'Oceano Indiano e Pacifico, dandone la descrizione con particolari ancora sconosciuti o poco noti.

**Sborowskaja M. B.** - Zur Kenntnis des Fanges und der Biologie des Onega-Lachses (*Salmo salar relictas* Malmgreen) [*Contributio in cognoscendas piscationem et biologiam salmonis ad* Onega *pertinentis*]. Tab., 2 Taf. a. T., Rep. Karelia Scient. Res. Fish. Stat., I, 257-280. Leningrad (1935). **b - 1217**

Ergebnisse von der Bearbeitung der gesammelten Materialien über den Lachs des Onega-Sees, welcher eine Form des atlantischen Lachses darstellt, aber nicht den Zug in die See durchführt.

**Schaposchnikowa G. Kh.** - Biologie des jungen Lachses und des Tinda-Jakobslachses im Wyg-Flusse [*De biologia juvenis salmonis atque etiam exemplarium « Grilse » nomine in flumine* Wyg]. (In Russ., Dtsch. Rés.). Tab., 2 Taf. a. T., Rep. Karelia Scient. Res. Fish. Stat., I, 227-240. Leningrad (1935). **b - 1218**

Ergebnisse einer Erforschung der Biologie der jungen Lachse und der sogenannten « Tynda », welche eine örtliche Benennung der den Fluss zwecks Laichen zum ersten Male aus dem Meere hinaufsteigenden junger Lachse ist, mit besonderer Berücksichtigung des Charakters des Anwachsens der Skleriten, des Wachstumstempos der jungen Lachse, ihrer Ernährung und ihrer Laichgewohnheiten.

**Schmidt J.** - Danish Eel Investigations during 25 Years 1905-1930 [*Investigationes a Danis peractae in Anguillas per 25 annos (1905-1930)*]. 24 figs., Carlsberg Found. oceanogr. Exped. round the world 1928-30, and previous Danish oceanogr. exped. under the leadership of the late Prof. J. Schmidt, 1-16. Bianco Luno A/S. Copenhagen (1935). **b - 1219**

Genesis of eel. Previous investigators. Distribution, spawning place of *Anguilla vulgaris, A. rostrata, A. obscura, A. megastoma, A. bicolor, A. mauritiana* and others. Papers on Eel-investigations by J. Schmidt. J. Schmidt's Eel-expeditions.

**Schultz L. P.** - A new Ceratiid Fish from the Gulf of Alaska [*Piscis novus Ceratoideus ad Sinum Alaskianum pertinens*]. 4 figs., Copeia, 2, 66-68. New York (1934). **b - 1220**

*Dolopichtys thompsoni* n. sp.

**Scott E. O. G.** - Notes on the Gobies Recorded from Tasmania, with Description of a New Genus [*Gobiidae a Tasmania provenientes cum descriptione novi generis*]. 2 figs., 1 pl., Pap. & Proc. R. Soc. Tasmania 1934, 47-62. Hobart (1935). **b - 1221**

Four species of *Gobiidae* are described with synonymies, localities and habits. *Tasmanogobius* gen. nov. with the species *T. lordi* sp. nov.

**Setna S. B.** - Development of the Trout Scale [*Progressio squamarum speciei truttae*]. 4 pls., Journ. Univ. Bombay, II, 5, 17-32. Bombay (1934). **b - 1222**

Description of a new method of impregnating with silver nitrate for the study of the growth of the different scale layers.

**Slastenenko E.** - A New Blennoid Fish, *Blennius Knipowitschi* sp. nov., from the Black Sea [*Piscis novus in Ponto Euxino: « Blennius Knipowitschi »*]. (In Russ. & Engl.). 1 fig., C. R. Acad. Sc., U. R. S. S., I, 6, 357-360. Léningrad (1934). **b - 1223**

Account of the discovery of a new form of Blennoid fish in the material in possession of the Academy of Sciences, the Biological Station of Sebastopol, etc., to whom A. has given the name of *Blennius Knipowitschi* sp. nov., in honor of Prof. N. Knipowitsch. Diagnosis of the new species.

**Slastenenko E. P.** - I *Blennius* del Mar Nero [*« Blennius » ad Pontum Euxinum pertinentes*]. 8 fig., Pubbl. Staz. Zool. Napoli, XIV, 1, 95-109. Napoli (1934). **b - 1224**

Descrizione del genere *Blennius* e delle sue specie. Descrizione delle 7 specie osservate nel Mar Nero, determinate in base al carattere dei tentacoli sopraorbitali: *B. ponticus* e *B. tentacularis* con tentacoli complicati e molto sviluppati; *B. sanguinolentus* con tentacoli a forma di forchetta; *B. sphinx* con tentacoli semplici, sviluppati, filiformi, *B. pavo* con tentacoli semplici, molto piccoli; *B. galerita* con tentacoli impari tra gli occhi e *B. Knipowitschi* privo di tentacoli.

**Slastenenko E. P.** - The *Scorpaena* of the Black Sea [*De « Scorpaena » ad Pontum Euxinum pertinente*]. (In Russ. & Engl.). 1 fig., C. R. Acad. Sc., I, 1, 74-80. Léningrad (1935). **b - 1225**

After a short introduction, in which Author describes the differences between Mediterranean forms of *Scorpaena* and those of the Black Sea, he emphasizes some biological peculiarities of the species of this fish with especial regard to the migration of *S. scrofa* in larval stage, giving then a diagnosis of the two species of *Scorpaena* of the Black Sea, i. e.: *S. porcus* and *S. scrofa* infrasp. *afimbria* nov.

**Slastnikov G. S.** - The Char of the Novaja Zemlja, Its Age and Rate of Growth [*Species « Salvelinus alpinus » ad* Novaja Zemlya *pertinens. Quaestio de aetate et progrediendi rapiditate*]. (In Russ., Engl. Rés.). 3 grs., 11 tabl., 1 pl. o. t., Scient. Res. Biol. Exp. Novaja Zemlja, 1931-1934, no. 2. Trans. Arct. Inst., XVII, 70-88. Leningrad (1935). **b - 1226**

Author gives an account of the results obtained during the study of the material, consisting of scales, opercula, subopercula, and first rays of dorsal, pectoral and anal fins of *S. alpinus* L., collected in 1931 in Krestovaja Bay (Novaja Zemlja) by the Scientific Fishery Expedition of the Arctic Institute of U. S. S. R. Some conclusions are drawn as to the age and the rate of growth of this fish.

**Smith J. L. B.** - Marine Fishes of seven Genera new to South Africa [*Septem genera piscium marinorum in Africa merid. novorum*]. 2 pls., 1 fig., Trans. R. Soc. S. Africa, XXII, 1, 89-100. Cape Town (1934). **b - 1227**

*Microphis brachyurus, Scolopsis vosmeri, Grammonus opisthodon* n. sp., *Papyrichthys pellucidus* n. sp., *Schedophilus medusophagus, Setarches güntheri* and *Batrichthys albofasciatus* n. sp.

**Smith J. L. B.** - The Fishes of the Family *Mugilidae* in South Africa [*Pisces ad « Mugilidae » pertinentes in Africa Merid.*]. 17 figs., 8 pls. o. t., Ann. South. Afric. Mus., XXX, 5, 587-644. Edinburgh (1935). **b - 1228**

In this paper the A. has tackled a very difficult problem in systematics of the members of the family *Mugilidae*, known in South Africa as « Harder », which previous writers have left severely alone, in spite of the fact that from the scientific point of view it is important to have the species occurring in South African waters defined as accurate as possible. The general diagnosis of *Mugilidae* in South African waters; growth changes; scales; scaly basal process of first dorsal; dentition; ventral fins; gills and gill-rakers; dimensional relationship, etc. Key to the South African species and description of single species, two of which are new to science: *Mugil tricuspidens* n. sp. and *M. canaliculatus* n. sp.

**Šoljan T.** - Skrb riba za potomstvo i njena sistematika [*Patrimonium ichthyologicum, piscicultura eiusque systematica*]. (Dtsch. Rés.). Extr. Rec. Trav. offert à Jivoïn Georgévitch à l'occasion de son soixantième anniversaire, 191-210. Beograd (1933). **b - 1229**

Definierung des Begriffes Nachkommenschaft. Kritik des von Meisenheimer aufgestellten Systems. Differenzierung des Systems in eine synparentale und eine extraparentale Gruppe.

**Souché G.** - Sur un poisson rare de la Manche [*De pisce quodam raro ad Fretum Britannicum pertinente*]. 1 fig., Bull. Stat. Biol. Arcachon, XXX, 2, 277-281. Bordeaux (1934). **b - 1230**

Renseignements donnés sur le poisson *Pleuronectes maculatus* par des ichthyologistes précédents. Recherches de l'A., dont on peut conclure que c'est l'absence de cette espèce sur les marchés qui a fait penser à sa grande rareté. Sa présence dans la Manche, se trouve maintenant établie.

**Souché G.** - Sur un *Flesus vulgaris* à pigmentation anormale [*Species « Flesus vulgaris » anormali praedita pigmentatione*]. 2 fig., Bull. Stat. Biol. Arcachon, XXX, 2, 285-288. Bordeaux (1934). **b - 1231**

**Souché G.** - Note sur l'habitat, les mœurs et l'utilisation de *Cyclopterus lumpus* L. [*Species « Cyclopterus lumpus ». De habitat, consuetudinibus, utilitate*]. Bull. Stat. Biol. Arcachon, XXX, 2, 289-296. Bordeaux (1934). **b - 1232**

Résumé des diverses connaissances fournies par les auteurs précédents. Considérations sur la distribution géographique de cette espèce, sa fréquence, son habitat, sa morphologie.

**Storrow B. & Cowan D.** - Herring Investigations [*Investigationes de Aringis*]. Tabl. Armstrong Coll. Dove Mar. Labor., Rep. for the Year ending July 31st 1934. Third ser. No. 2, 9-21. Cullercoats Northumb. (1934). **b - 1233**

These investigations concern Yarmouth samples and those from the north of Scotland and the northwest of Ireland. Data referring to size, sex, maturity, age and growth as calculated from the scales have been obtained from 11 samples comprising 1.857 fish.

**Supino F.** - Osservazioni sul *Belone acus* [*Observationes speciei «Belone acus »*]. 3 fig., Natura (Riv. Sc. Natur.), XXVI, 1, 1-9. Milano (1935). **b - 1234**

In questo breve studio l'A. accenna ad alcuni caratteri morfologici del *Belone acus* sia allo stato adulto che nei vari stadi di sviluppo. Fa confronti con altri Scomberesocidi nonchè con alcuni Scombridi.

**Svetovidov A.** - On the Black Sea Subspecies of the Whiting (*Gadus merlangus euxinus*) [*De subspecie « Gadus merlangus euxinus »*]. (In Russ., Engl. Summ.). 2 fig., 1 table, C. R. Acad. Sc. U. R. S. S., I, 6, 421-427. Léningrad (1935). **b - 1235**

Description, diagnosis and comparison between *G. merlangus* Linné and *G. euxinus* Nordmann, from which the A. concludes that *G. euxinus* is neither a separate species non identical, but a subspecies of *G. merlangus* L. inhabiting the Black Sea.

**Svetovidov A.** - A Second Species of Cod of the Genus *Boreogadus* (*Boreogadus agilis* Reinhardt) [*De secunda quadam specie ex merluccis ad genus « Boreogadus » pertinente*]. (In Russ. & Engl.). 2 figs., 1 table. C. R. Acad. Sc. U. R. S. S., I, 6, 427-432. Léningrad (1935). **b - 1236**

Among the specimens of the cod family preserved in the collections of the Zoological Institute of the Academy of Sciences, USSR, there are three small cod fishes, presented by J. Reinhardt in 1842 from the coasts of Greenland, of which two specimens have been formerly identified as *Gadus agilis* Reinhardt and one, as *G. ogak* Reinh. Being closely related to *Boreogadus saida* (Lep.), these specimens have a number of particular characteristics, and therefore must be referred to a separate species *B. agilis* (Reinhardt), whose description is given in this paper.

**Syrovatskij J.** - Zur Biologie der Fische des Schwarzen Meeres [*De biologia piscium ad Pontum Euxinum pertinentium*]. (Russ. Text, Dtsch. Rés.). C. R. Acad. Sc. U. R. S. S., II, 3, 197-200. Léningrad (1934). **b - 1237**

Zusammenfassende Wiedergabe der von der Ukrainischen Abteilung des Institutes für die Fischereikunde des Schwarzen und des Azowschen Meeres in dem nord-westlichen Teile des ersten Meeres durchgeführten Forschungen mit besonderer Berücksichtigung der Biologie von *Scomber scombrus, Spratella sprattus phalerica, Sarda sarda* und *Caspialosa pontica*. Die Ergebnisse haben auch eine grosse praktische Bedeutung für die Fischerei der oben erwähnten Fischarten.

**Taranetz A.** - A Short Review of the Fishes of the Genus *Gymnogobius* with a Description of One New Species and Notes on Some Related ones [*Inspectio brevior piscium ad genus « Gymnogobius » pertinentium cum descriptione novae cuiusdam speciei notisque de speciebus affinibus*]. (In Russ., Engl. Rés.). C. R. Acad. Sc. U. R. S. S., III, 5, 397-400. Léningrad (1934). **b - 1238**

Diagnosis of the following forms: *Gymnogobius* Gill.: *G. macrognathus* (Bleeker), *G. raninus* sp. n.; *Chasmichthys* Jordan.

**Taranetz A.** - On the Species of the Genus *Hypomesus* in the Basin of the Sea of Japan [*De speciebus ad genus « Hypomesus » pertinentibus in Mari Japonico*]. (In Russ. & Engl.). C. R. Acad. Sc. U. R. S. S., III, 8/9, 675-676. Léningrad (1934). **b - 1239**

Description and diagnosis of *Hypomesus pretiosus* (Girard) and *H. olidus* (Pallas).

**Taranetz A.** - Sur la question de la différence entre *Sardinops melanosticta* et *S. caerulea* [*Quaestio de differentia inter « Sardinops melanosticta » et « Sardinops caerulea »*]. Rybn. Choz. Daljn. Vostoka, XIII, 1, 40. Khabarovsk (1935). **b - 1240**

Sur la base de l'examen de 69 exemplaires de la sardine californienne *S. caerulea* de San Pedro Baie et de 79 exemplaires de la sardine de l'Extrême Orient, *S. melanosticta*, l'A. affirme qu'il n'y a pas de différence assez marquée entre ces deux formes, et que, par conséquent on ne peut pas les considérer comme deux espèces diverses, mais seulement comme deux sous-espèces. Etant donné que la sardine californienne a été décrite plus tard de la sardine de l'Extrême Orient, l'A. propose de lui donner le nom de *S. melanosticta caerulea* (Girard).

**Taranetz A. & Andriaschev A.** - On a New Genus and Species, *Petroschmidtia albonotata* (*Zoarcidae, Pisces*) from the Okhotsk Sea [*Species « Petroschmidtia albonotata » (Zoarcidae, Pisces) ad Mare* Okhotsk *pertinens*]. (In Russ. & Engl.). 2 figs., C. R. Acad. Sc. U. R. S. S., II, 8, 506-512. Léningrad (1934). **b - 1241**

Extract from a more detailed paper containing a survey of the genus *Lycodes* Reinhardt and some other closely allied genera. The material for this survey has been furnished by the numerous expeditions organized in 1931-1933 by the Pacific Scientific Institute of Fisheries and the State Hydrological Institute in the Chukhotsk, Bering, Okhotsk and Japan Seas and by the collection of *Zoarcidae* from Russian Far Eastern Seas of the Ichthyological Section of the Zoological Institute of the USSR Academy of Sciences. Among these collections a new form has been discovered, of which only a single species is known from the Okhotsk Sea, *Petroschmidtia albonotata*, n. gen., n. sp.

**Taranetz A. & Andriaschev A.** - On a New Fish of the Family *Zoarcidae* from the Littoral Fauna of the Commanders' Islands [*Piscis novus ex « Zoarcidis » a fauna litorea insularum* Commanders' *proveniens*]. (In Russ., Engl. Rés.). 2 figs., C. R. Acad. Sc. U. R. S. S., I, 267-270. Léningrad (1935). **b - 1242**

Among the fishes collected on the shores of the Commanders' Islands, the author had discovered several specimens of a species not corresponding to any of the known genera of the family *Zoarcidae*, which is described in the present Note as a new genus and species *Commandorella Popovi*, n. g. n. sp.

**Tchang T. L.** - Study of the gymnodont Fishes of Tsingtao [*De piscibus gymnodontis ad* Tsingtao *pertinentibus*]. 1 fig., 2 pls., Lingn. Scient. Journ., XIV, 2, 315-320. Canton (1935). **b - 1243**

Description of *Triacanthus brevirostris, Cantherines modestus* and 5 spp. of *Spheroides*.

**Tomiyama I.** - Four new Species of Gobies of Japan [*Gobiidae. Species quattuor ad Japoniam pertinentes*]. 5 figs., Journ. Fac. Sc. Imp. Univ. Tokyo, Sect., 4, Zool. III, 3, 325-334. Tokyo (1933). **b - 1244**

*Rhinogobius barbatus* n. sp., *Tridentiger nudicervicus* n. sp., *Gobiodon gnathus* n. sp. and *Apocryptodon punctatus* n. sp.

**Tortonese E.** - Pesci della Persia raccolti dal marchese Giacomo Doria (1862) [*De piscibus persianis a marchione* Doria *collectis. A. 1862*]. 1 tav., Boll. Mus. Zool. e Anat. Comp. R. Univ. Torino, XLIV, 49, 153-170. Torino (1934). **b - 1245**

Il materiale descritto assomma a 23 specie provenienti da Schiras nell'interno della Persia e Bender Abbas, sulla costa.

**Tortonese E.** - Su alcune specie africane del genere *Clarias* [*De speciebus africanis ad genus « Clarias » pertinentibus*]. Boll. Mus. Zool. e Anat. Comp. R. Univ. Torino, XLIV, ser. III, 53, 231-239. Torino (1934). **b - 1246**

Caratteri descrittivi, sistematici e habitat di alcune specie africane del genere *Clarias* (*Ostariophysi, Siluroidei*, fam. *Claridae*): *C. gariepinus* (Burch.), *C. mossambicus* Peters, *C. carsonii* Blgr. e *C. liocephalus* Blgr.

**Tortonese E.** - La collezione ittiologica del R. Museo Zoologico di Torino [*Collectio ichthyologica in Museo Zoologico Taurinensi*]. Boll. Mus. Zool. e Anat. Comp. R. Univ. Torino, XLIV, ser. III, 54, 241-247. Torino (1934). **b - 1247**

**Tortonese E.** - Elenco dei pesci italiani con annotazioni sistematiche [*Elenchus piscium italicorum cum notis systematicis*]. Boll. Pesca, Piscicolt. e Idrobiol., XI, 2, 211-254. Roma (1935). **b - 1248**

L'A. ha raggruppato l'ittiofauna italiana in un nuovo elenco uniformandosi a criteri sistematici moderni, e ove necessario, aggiornando la nomenclatura delle specie che la compongono. La classificazione seguita è quella del Regan.

**Uchida Keitaro** - *Coryphaena equisetis* caught in the southwestern Japan Sea [*Species « Coryphaena equisetis » capta in regione sud-orientali maris Japonici*]. (In Jap., Engl. Rés.). 2 tabl., 3 figs., Bull. Jap. Soc. Scient. Fish., IV, 4, 224-228. Tokyo (1935). **b - 1249**

*Coryphaena equisetis* hitherto unknown from Japanese waters is now well known among the fishermen off the coast of Shimane Prefecture. Appearance and migrations; life habits; size.

**Umali F. A.** - Little-known Fishes from the Philippines [*De piscibus parum notis ad insulas Philippinas pertinentibus*]. 1 pl. o. t., Philipp. Journ. Sc., LVI, 3, 319-325. Manila (1935). **b - 1250**

Systematic description of three rare Philippine Fishes based on seven specimens collected from the Manila markets and Lingayen Gulf mixed with catches of the beam trawls. The specimens belong to the families *Uranoscopidae* and *Ophidiidae*.

**Uno M.** - Drift-net Skipper in the Northeastern Waters of Japan (Preliminary Report I) [*Species « Scomberesox saurus » in retibus fixis in Japonia nordorientali*]. (Engl. & Jap. Text.). 1 tabl., Bull. Jap. Soc. Scient. Fish., IV, 1, 45-46. Tokyo (1935). **b - 1251**

Body length, weight measurements, age, sex and maturity determinations of 2170 samples of driftnet skipper.

**Villadolid D. V. & Manacop P. R.** - The Philippine *Phallostethidae*, a Description of a New Subspecies, and a Report on the Biology of *Gulaphallus mirabilis* Herre [*« Phalostethidae » ad Philippinas Insulas pertinentes. Descriptio novae subspeciei « G. mirabilis » eiusque biologia*]. 3 figs., 5 pl., 5 tabl., Philipp. Journ. Sc., LV, 3, 193-220. Manila (1934). **b - 1252**

The writers describe the new species *Gulaphallus amaricola* sp. nov., collected from the brackish water about Manila Bay. The Philippine *Phallostethidae*. Breeding habits. Spawning season. Food and feeding habits of *Gulaphallus*. Embryology of *G. mirabilis*. Postembryonic development, with special reference to the development of the male copulatory organs.

**Vladykov V. D.** - Environmental and Taxonomic Characters of Fishes [*Piscium peculiaritates ex ambiente et taxonomia*]. Trans. R. Canad, Instit., XX, part I, 43, 100-140. Toronto (1934). **b - 1253**

I. Variations in morphological characters: Vertebrae, scales, rays of vertical fins, rays of paired fins, gill rakers, body proportions, size, additional examples. II. Physiological variations: landlocked forms, sex reversal. III. Action of environment: period of influence, environmental factors (temperature, salinity, space). Bibl.

**Vladykov V. D.** - « Three-eyed » Haddock (*Melanogrammus aeglefinus*) caught at St. Andrews, New Brunswick [*Species « Melanogrammus aeglefinus » capta apud* St. Andrews (New. Brunswick)]. Canad. Field-Natural., 49, 64. Ottawa (1935). **b - 1254**

**Vladykov V. D.** - Haddock Races Along the North American Coast [*Species « Gadus aeglefinus » praeter litora Americae septentrionalis*]. 2 figs., Canad. Fisherm., XXII, 6, 15-17. Gardenvale, Que. (1935).

(—) Progr. Rep. Atlant. Biol. Stat., 14, 3-7. St. Andrews, N. B. (1935). **b - 1255**

Results of a preliminary investigation conducted by the Atlantic Fisheries Experimental Station on the racial characteristics and composition of the haddock schools from various grounds in North American waters, which indicate that there are three distinct haddock populations (Newfoundland, Nova Scotia and New England), which do not migrate from one region to the other.

**Walford L. A.** - The Sharks and Rays of California [*« Squalus » et « Raja » ad Californiam pertinentes*]. 58 figs., Div. Fish & Game California, Fish Bull. 45, 3-66. Sacramento (1935). **b - 1256**

Commercial uses of sharks and rays. Key to identification of sharks and rays found in California (including the ratfish). Descriptions and illustrations of fishes.

**Wang King F.** - Study of the Teleost Fishes of coastal Region of Shantung 1. [*De piscibus teleosteis ad litora* Shantung *pertinentibus*]. 39 figs., Contr. Biol. Lab. Sc. Soc. China, Zool. ser. IX, 1, 1-76. (1933). **b - 1257**

Isospondyles, a few Eels and Ostariophysi, Synentognaths, Flatfishes, Lophobranchs, Percesoces and other groups forning together 74 spp. of 32 fam. and 55 genera.

**Watson D. M. S.** - The Interpretation of Arthrodires [*« Arthrodira ». Quaestio de interpretatione*]. Proc. Zool. Soc. London 1934, 3, 437-464. London (1934). **b - 1258**

Classification, morphology: dentition and bone structure, comparison with *Coccosteus* and *Dinichthys*. New genus: *Rhamphodopsis* erected for *R. threiplandi* n. sp.

**Whitley G.** - The Oblong Sunfish (*Ranzania*) in the Indian Ocean [*« Ranzania » in Oceano Indiano*]. Nature, CXXXVI, 3435. 338. London (1935). **b - 1259**

Some records and bibliographical references on the occurrence of *Ranzania* in the Indian Ocean.

**Whitley G.** - Fishes from Princess Charlotte Bay, North Queensland [*Pisces ad bajam* « Princess Charlotte » *in* Queensland *septemtr. pertinentes*]. 11 fig., Rec. South Austr. Mus., V, 3, 345-365. Adelaide (1935). **b - 1260**

Description of about 30 species with synonymies belonging to 14 Families. 5 new genera recorded and 2 new spp. Remarks on some typical specimens of *Chandidae*, examined for comparison with *Ambassis telkara* Whitley.

**Yessipov W. K.** - Materials on the Life History and Fishery on the Char of Novaja Zemlja (*Salvelinus alpinus* L.) [*Res collectae quoad cyclum evolutionis et piscationem speciei « Salvelinus alpinus » ad* Novaja Zemlja *pertinentis*]. (In Russ., Engl. Rés.). 15 figs., 15 tabl., Scient. Res. Biol. Exp. Novaja Zemlja, 1931-1934, n. 2, Trans. Arct. Inst., XVII, 5-70. Leningrad (1935). **b - 1261**

Life history of the char of Novaja Zemlja based upon the work carried out in 1931 and 1932 in Krestovaya Bay and in the River Nekhvatova (Western shore of the Southern Island of Novaja Zemlja): Distribution on Novaja Zemlja. Migration and spawning Fecundity. Feeding. Fishery and biological characteristics. Fishing localities and gears on Novaja Zemlja. Methods of preparation.

**An.** - Rare Fish Caught in B. C. [*Piscis rarus in Columbia Britannica captus*]. Canad. Fisherm., XXII, 9, 25. Gardenvale, Que. (1935). **b - 1262**

Communication of the landing in the traps of Todd Canneries in the Strait of Juan de Fuca of an extremely rare fish, the rag fish, *Acrotus Willoughby*, a skin-fish without any scales which is believed to be a member of the deepwater colony. Of this fish only five specimens are known. Short description.

**An.** - Many Varieties of Fish in Carteret Waters [*Varietates piscium in* Carteret]. Fish & Oyst. Rep., XVI, 6, 5 & 8. Tampa, Fla. (1935). **b - 1263**

Summary of information given by Dr Herbert F. Prytherch, director of the U. S. Fisheries Biological Laboratory in Piver's Island at Beaufort, according to which a total of 291 different species of fish have been collected in waters adjacent to and within the boundaries of Carteret county.

**An.** - No Ocean Sunfish in Stomachs of Dolphin Dr. Gudger Dissected [*In stomachis Delphinorum a Dr.* Gudger *secatorum non reperitur species «Mola mola»*]. Fish & Oyst. Rep., XVI, 10, 13. Tampa, Fla. (1935). **b - 1264**

Brief account of a letter from Dr. Gudger, ichthyologist of the American Museum of Natural History in New York, followed by some supplementary remarks concerning the ocean sunfish.

**An.** - Third List of Fishes in the Newfoundland Fishing Area [*Elenchus tertius piscium in* Newfoundland *area piscosa repertium*]. Rep. Newfoundland Fish. Res. Comm., II, 2, App. D, 115-117. Plymouth (1934). **b - 1265**

## Mammalia.

**Arsenjev V. A.** - Quelques données sur *Delphinapterus leucas* Pall. et sa chasse sur l'Ile Sakhaline [*Notae de specie « Delphinapterus leucas » deque captura in insula* Sakhalin]. (En russe). 12 tabl., Rybn. Choz. Daljn. Vostoka, XIII, 1, 89-99. Khabarovsk (1935). **b - 1266**

L'A. décrit les migrations de *D. leucas* Pall. le long de la côte Est de l'Ile de Sakhaline, les époques, la direction, et décrit enfin la composition des captures de ce cétacé, au point de vue de l'âge, du sexe et du poids des exemplaires.

**Edinger T.** - Das Loch Ness-Monster [*De monstro in* Loch Ness]. Naturwiss., XXIII, 19, 309-310. Berlin (1935). **b - 1267**

Kritische Betrachtung von zwei über das Loch Ness-Monster erschienenen Werken. Der Vf. ist der Ansicht, dass es sich um eine Otter oder eine Robbe (*Halichoerus gryphus*) handelt.

**Ferreira E.** - Gigantes dos Mares dos Açores [*De animalibus gigantibus ad insulas* Açores *pertinentibus*]. 2 fig., Açoreana, I, 2, 74-85. Açôres (1935). **b - 1268**

Das catorze especies dos Cetaceos: *Delphinus delphis* L., *D. marginatus* Duv., *Phocaena communis* Cuv., *Tursiops tursio* Fabricius, *Grampus griseus* Cuv., *Globicephalus melas* Flower, *Orca gladiatoria* Gray, *Physeter macrocephalus* L., *Kogia breviceps* Blaim., *Balaena biscayensis* Eschricht, *Balaenoptera acuto-rostrata* Lacépède., *B. musculus* L., *B. sibbaldii* Gray, *Megaptera boops* Muller) para os açorianos a mais importante è o cachalote (*Physeter macrocephalus*), ainda têm procura o azeite, a espermacete e o ambar cinzento.

**Gould R. T.** - The Loch Ness Monster and Others [*De monstro in* Loch Ness *aliisque*]. 7 pl., 46 fig., XII + 228 pp. Geoffrey Bles. London (1934). **b - 1269**

**Gray R. W.** - Do Whales Descend to Great Depths? [*Num Balaenae in maximas descendunt profunditates ?*]. Nature, CXXXV, 3401, 34-35; 3417, 656-657 London (1935). **b - 1270**

The A. presents some awkward facts to those who, on theoretical grounds, deny that Whales descend below very moderate depths. In answer to Dr. Ommanney's objection, the A. recapitulates Scoresby's observations which have led him to infer that Whales can descend to great depths, 700-800 fathoms (not 2,500 fathoms as stated in Nature of March 16, p. 429). Sir Leonard Hill expresses the opinion that Whales need not suffer from caisson disease after deep diving as there is not enough air in their lungs to produce bubbles of nitrogen in the blood when the animals come back to the surface. (Nature's abstract on page 659).

**Hatt T. R.** - A Manatee collected by the American Museum Congo Expedition, with Observations on the Recent Manatees [*Trichechus collectus perdurante expeditione a Museo Americano cuius nomen* American Museum Congo *peracta. Observationes adiunguntur de recentibus Trichechis*]. 1 pl., 2 figs., Bull. Amer. Mus. Natur. Hist., LXVI, 4, 533-566. New York (1934). **b - 1271**

Nomenclature and criteria for the classification of the Manatees and their morphology. The distribution of *Trichechus* in the African region. Uncertain or erroneous reports of *T. senegalensis*. Bibl.

**Hausman L. A.** - On the Structure of the Hair of the sea Whale (*Balaenoptera borealis*) [*Pilus balaenae. Quaestio de structura*]. Amer. Natural., LXVIII, 84-88. New York (1934). **b - 1272**

Studies on the microscopical and morphological structure of the hair and its colour. No characteristical difference from other Mammals can be pointed out.

**Irving L.** - The Protection of Whales from the Danger of Caisson Disease [*De tutela Balaenarum in morbos*]. Science, LXXX, 2110, 560-561. New York (1935). **b - 1273**

Discussion on the respiratory activity and the nitrogen capacity of Whales, case of danger. Comparison with the circulation of human divers. Other factors than respiratory and cardio-vascular systems should not be combined with the disease.

**Matsuura Yoshio** - On the Sperm Whale found in the Adjacent Waters of Japan [« *Physeter macrocephalus* L. » *repertus in Japoniae propinquitatibus*]. (In Jap., Engl. Rés.), 13 tabl., 4 fig., Bull. Jap. Soc. Scient. Fish., IV, 2, 101-112. Tokyo (1935). **b - 1274**

The sperm whale (*Physeter macrocephalus* L.) is found exclusively on the Pacific side of the islands of Japan and its whaling has been carried on chiefly in the northern part of the empire. Migration of Males and Females separately. Times of reproduction.

**Matsuura Yoshio** - The Distribution and Habits of Humpback Whales in the Adjacent Waters of Japan [« *Megaptera* ». *Distributio et consuetudines in Japoniae propinquitatibus*]. (In Jap., Engl., Rés.). 9 tabl., 7 fig., Bull. Jap. Soc. Scient. Fish., IV, 3, 161-170. Tokyo (1935). **b - 1275**

A remarkable diminution of Humpbacks, *Megaptera nodosa* (Bonnaterre) has been noticed in Japan as in other parts of the world. Migration, length, sexual maturity and reproduction. Bibl.

**Mayorowa A. A. & Danilevskij N. N.** - Matériaux sur la biologie du dauphin de la Mer Noire [*Res collectae ad studendam biologiam speciei « Delphinus delphis » Ponti Euxini*]. (En russe, rés., franç. et géorg.). 4 graph., 14 tabl., 2 tabl. h. t., Trav. Stat. Piscic. & Biol. Géorgie, I, 1, 181-210. Batoum-Tiflis (1934). **b - 1276**

Résultats d'une étude sur la biologie, la morphologie, la distribution, la reproduction, la composition des troupeaux, la proportion des différents groupes d'âge et la composition sexuelle des stocks du dauphin de la Mer Noire qui se composent principalement d'individus appartenant à l'espèce *Delphinus delphis*.

**Naoumoff S. P.** - Les Phoques de l'URSS [*De phocis ad URSS pertinentibus*]. (En russe). 18 fig., 105 pp., Koizd., Moskva-Leningrad (1933). **b - 1277**

**Ommanney F. D.** - Do Whales Descend to Great Depths ? [*Num balaenae in maximas descendunt profunditates ?*]. Nature, CXXXV, 3411, 429-430. London (1935). **b - 1278**

Mr. R. W. Gray's suggestion that Whales can descend to 2,500 fathoms or more without suffering from caisson disease is disputed by the A. He remarks that observations upon the behaviour of Whales struck by harpoons offer little indication of their normal habits, and that descent even to two hundred fathoms would involve compression of the lungs to 1/35 of their usual volume. (Nature's abstract on page 437).

**Oudemans A. C.** - The Loch Ness Monster [*De monstro in* Loch Ness]. 7 fig., 14 pp. Late E. J. Brill. Leyden (1934). **b - 1279**

The Algae reported have formed deposits rather mechanically than physiologically. *Gleocapsa viridis, G. granosa* v. *chlora, Plectonema atroviride, Scytonema androsense* and *S. crustaceum* v. *catenula* are new.

**Børgesen F.** - Some Indian *Rhodophyceae*, especially from the Shores of the Presidency of Bombay. III. [*De Rhodophyceis indianis, praecipue a litoribus Provinciae* Bombay *provenientibus*]. 5 pls., 20 figs., Kew Bull. Miscell. Inform., 3, 113-142. London (1933). **b - 1312**

38 spp. and vars. are reported, 9 of which are new.

**Børgesen F.** - A List of Marine Algae from Bombay [*Index Algarum marinarum a* Bombay *provenientium*]. 10 pls., 25 figs., Kgl. Dansk. Vidensk. Selsk. Biol. Medd., XII, 2, 1-64. København (1935). **b - 1313**

Descriptions, localities and distributions of 82 spp., 9 of which are new, with diagnosis in Latin: *Rhizoclonium grande* Boergs., *Cladophora saracenica, C. colabense, C. bombayensis, C. monumentalis, Dictyota dumosa, Peyssonnelia obscura* Web. v. Bosse var. *bombayensis* Boergs., *Cruoriella bicolor*, and *Ectocarpus coniger*.

**Bursa A.** - Liste des algues recueillies dans les eaux de la Baltique Polonaise [*Index algarum collectarum in Baltico Polonico*]. Bull. Int. Acad. Polon. Sc. & Lettres, Cl. Sc. Math. di Nat., 1/3, BI, 69-76. Cracovie (1935). **b - 1314**

Liste comprenant les suivantes espèces d'algues, recueillies entre avril et novembre 1934 au cours d'un séjour à la Station Maritime de Hel. Ordo: *Ulothrichales, Ulvales, Siphonocladiales, Charales, Ectocarpales, Sphacelariales. Laminariales, Fucales, Nemalionales, Gigartinales*.

**Carter N.** - A comparative Study of the Algal Flora of two Salt Marshes. I, II, III [*De flora Algarum in duabus salsis paludibus. Studium comparativum*]. 31 figs., Journ. Ecol., XX, 2, 341-370 (1932); XXI, 1, 128-208, 2, 385-403 (1933). Cambridge (1932-33). **b - 1315**

The Algae studied here belong to the salt marshes in the estuaries of the R. Thames and the R. Dovey in Whales. Part I deals with the zonation observed in the seed plants and Algae associated in each zone. Part II contains a list of all the Algae with ecological notes. In Part III the Algae are grouped into 12 communities discussed here with regard to their zonal distribution and seasonal periodicity.

**Chamagne G.** - Les algues marines dans les carences alimentaires [*De Algis marinis quoad carentias alimentares*]. Rev. Pathol. Comp. et Hyg. Gén., XXXIII, 172-175. Paris (1933). **b - 1316**

**Colla S.** - Ricerche sui gas nei vegetali. I. I gas contenuti negli organi cavi delle alghe [*Investigationes de gas in vegetalibus. I. De* gas *in algarum organis cavis*]. 19 fig., Nuovo Giorn. Bot., XLII, 1, 173-197. Firenze (1935). **b - 1317**

Il gas degli organi cavi delle alghe è una miscela costituita da $O_2$ e $CO_2$; il residuo è azoto. La miscela gassosa varia giornalmente di volume e di pressione: tali variazioni producono delle deformazioni nei tessuti. La curva delle variazioni giornaliere di $O_2$ presenta un massimo nelle ore più luminose della giornata ed in parallelo si trovano i massimi del volume, e della pressione; l'aumento di $O_2$ è dovuto alla fotosintesi, e l'aumento della pressione è dovuto a quello della pressione parziale dell'ossigeno sviluppato. Da cui si ricava che l'ossigeno viene emesso dalla pianta sotto una pressione parziale maggiore

di quella dell'O$_2$ atm. Il CO$_2$ presenta un massimo durante la notte ed uno nel pomeriggio. Le ricerche morfologiche e fisiologiche sono corredate da altre riguardanti la secrezione gassosa da parte delle alghe nel loro ambiente naturale.

**Cottam C.** - Wildlife Research and Management Leaflet [*Fasciculus de investigationibus in faunam et floram silvaticas deque ratione investigationum*]. BS-III, February, U. S. Dpt. Agricult. Washington (1935). **b - 1318**

Summary of data concerning the diminution of *Zostera marina* in the Atlantic Ocean.

**Dangeard P.** - Sur l'identité de *Laminaria Lejolisii* Sauvageau et de *L. iberica* (Hamel) Lami [*De « Laminaria Lejolisii » et « L. iberica ». Quaestio de identitate*]. C. R. Acad. Sc., CCI, 15, 615-617. Paris (1935). **b - 1319**

D'après les observations et les considérations de l'A., on peut conclure que le *Laminaria iberica* vivant sur les côtes atlantiques du Maroc et de la péninsule ibérique ne devrait être séparé du *L. Lejolisii* décrit à Roscoff par Sauvageau.

**Deflandre G.** - Réflexions sur la notion de l'espèce et les variations chez les Diatomées, à propos d'une *Biddulphia* à valves dissemblables [*De speciebus cognoscendis variationibusque in Diatomaeis pro quadam « Biddulphia », valvis praedita dissimilibus*]. 1 fig., Bull. Soc. Franç. Microsc, IV, 1, 14-16. Paris (1935). **b - 1320**

Une *Biddulphia elegantula* Grev. provenant d'une diatomite de Kekko présentait les deux valves tout à fait dissemblables. L'observation sur d'autres préparations porte l'A. à considérer ces formes comme de simples variations pourvu que le genre *Biddulphia* soit incontestablement très polymorphe.

**Emerson R. & Green L.** - Manometric Measurements of Photosynthesis in the marine Alga *Gigartina* [*De mensuris manometricis photosynthesis in alga marina « Gigartina »*]. Journ. gen. Physiol., XVII, 817-842. Baltimore & New York (1934). **b - 1321**

The photosynthesis of *Gigartina harveyana* is compared to that of *Chlorella* and other *Chlorophyceae*. It varies according to temperature intensity of light.

**Frémy P.** - Initiation à l'étude des Cyanophycées [*Introductio in studium Cyanophycearum*]. Tabl., 10 fig., Bull. Soc. Franç. Microsc., III, 3, 1-102. Paris (1934). **b - 1322**

Caractères généraux. Stations des Cyanophycées: Cyanophycées des eaux salées, des eaux douces, des eaux thermales, subaériennes et aériennes. Récolte, conservation et préparation. Détermination. Systématique: groupes, familles (description et clefs des principaux genres). Bibliographie.

**Fritsch F. E.** - The Structure and Reproduction of the *Algae*. Vol. I. Introduction, *Chlorophyceae, Xanthophyceae, Chrysophyceae, Bacillariophyceae, Cryptophyceae, Dinophyceae, Chloromonadineae, Euglenineae,* colorless *Flagellata* [*De Algarum structura et reproductione. Vol. I.um*]. 245 figs., xvii + 791 pp. Macmillan Co. New York (1935). **b - 1323**

General algal textbook covering all groups except the two principal marine classes of *Phaeophyceae* and *Rhodophyceae*. Structure: motile types, palmelloid and dendroid types, coccoid cell, filament, simple and heterotrichous, siphonaceous filament, special adaptations to epiphytic, endophytic and parasitic states, parallelisms of development, particularly with respect to similarities in simple features in *Chlorophyceae, Xantophyceae, Chrysophyceae, Cryptophyceae* and *Dinophyceae*, and in more specialized features for *Chlorophyceae, Phaeophyceae* and *Rhodophyceae*. Four main types of life cycle are distinguished and for each group a skeleton classification is provided. The classification is based on that of Lindemann, Pascher and Schiller. Ample bibliography.

**Gajl G. I.** - Le lin marin (*Phyllospadix Scouleri* Hook) [*Linum marinum. « Phyllospadix Scouleri »*]. (En russe). 2 fig., 2 tabl., Rybn. Choz. Daljn. Vost. (Econ. Pêche Extr.-Orient), 1/2, 130-133. Moskva-Khabarovsk (1934). **b - 1324**

Description de l'aspect et des lieux de propagation de *Phyllospadix* dans les mers de l'Extrême-Orient. Structure de la feuille de *Ph.* Perspectives de l'utilisation des fibres de cette algue dans l'industrie de la soie artificielle et dans celle des matériaux thermo-isolants.

**Gajl G. I.** - Sur la question de la rationalisation de la récolte des algues dans un but industriel [*Quaestio de rationalisatione ad Algarum collectionem pertinente pro industria*]. (En russe). 4 fig., Rybn. Choz. Daljn. Vostoka, XIII, 1, 109-117. Khabarovsk (1935). **b - 1325**

Après quelques considérations introductives sur l'importance de la végétation marine pour la pêche et les possibilités de son utilisation industrielle, l'A. étudie en particulier le cycle évolutif de *Laminaria japonica*, sa distribution et sa propagation dans les mers de l'Extrême Orient, et indique certaines mesures dont il recommande l'application en vue de la rationalisation de la récolte de cette algue.

**Gajl G. I.** - La végétation marine, comme composant de la base alimentaire de l'élevage des animaux domestiques et sauvages [*Vegetatio marina ac basis alimentaris animalium domesticorum et silvaticorum in cultura*]. (En russe). 1 tabl., Rybn. Choz. Daljn. Vostoka, XIII, 1, 119-122. Khabarovsk (1935). **b - 1326**

Après avoir fait observer que les algues marines n'ont pas encore été utilisées de façon satisfaisante comme aliment dans la zootechnique, l'A. communique des données concernant le contenu des algues en albumines, en graisses et pigments, en mannite et hydrocarbures extractifs, en cellulose et en cendres, et donne quelques indications concernant leur emploi dans l'alimentation des animaux sauvages et domestiques, dont on fait l'élevage.

**Germain L.** - La mer des Sargasses [*De mari Sargassorum*]. Bull. Inst. Océanogr., 671, 1-23. Monaco (Princ.) (1935).

( — ) V. rés. Bull. Soc. Océanogr. France, 81, 1414-1418. Paris (1935). **b - 1327**

L'A. résume rapidement l'histoire de la découverte de la mer des Sargasses pour parler ensuite de la biologie des sargasses, de l'origine de ces algues et de la faune qui y vit. Il donne un aperçu sur ce que l'on sait actuellement de la mer des Sargasses et cherche à donner une explication de son origine et de son mode probable de formation. Il conclut en affirmant que la mer des Sargasses, malgré les nombreuses études qui lui ont été consacrées, restera pour longtemps encore, un champ d'étude presque inépuisable pour les biologistes.

**Haas P.** - The Smell Emitted by Seaweeds [*De odoribus a « Fucus » emanatis*]. Nature, CXXXV, 3414, 545-546. London (1935). **b - 1328**

The unpleasant smell given off on drying by certain red sea-weeds (genus *Polysiphonia*) is due to methyl sulphide, according to the A. He points out that methyl sulphide is also found in petroleum from Ohio, a fact which supports to some extent the sea-weed theory of the origin of petroleum (Nature's abstract on page 549).

**Hämmerling J.** - Ueber formbildende Substanzen bei «*Acetabularia mediterranea*», ihre räumliche und zeitliche Verteilung und ihre Herkunft [*Agitur de substantiis formantibus in «A. mediterranea» earumque distributione quoad locum et tempus atque etiam de earum origine*]. 65 fig., Arch. f. Entw. Mech., CXXXI, 1-82. Berlin (1934). **b - 1329**

Morphologische Beschreibung dieser Alge mit besonderer Berücksichtigung ihres Nucleus. Versuche der Merotomie mit Bemerkungen über die folgende Regeneration durch kernhaltige und kernlose Teile, welche sich in verschiedener Weise, je nach ihrem Schnitt, verhalten. Es folgt aus den Versuchen, dass die morphogenetischen Substanzen der *Acetabularia* verschieden verteilt sind und wenigstens zwei rhizoide und apicale Kategorien angehören Diese Substanzen, welche in Bezug auf die Menge je nach dem Alter der Alge wechseln, sind auf den Nucleus zurückzuführen.

**Hart T. J.** - On the Diatoms of the Skin Film of Whales, and their possible Bearing on Problems of Whale Movements [*Diatomeae in superficie pellis balaenarum earumque probabilis influentia in problemata de motibus balaenarum*]. 11 pls., 247 + 282 pp., Discovery Rep., iss. Discovery Comm., Colon. Off. London on behalf Gvmt. Depend. Falkland Isls., X, Univ. Press. Cambridge (1933). **b - 1330**

*Fucus vesiculosis* L. *f. angustifolia* C. A. Ag. and *Tolypellopsis stelligera* (Bauer) Migula recorded from the Bothnian Golf.

**Howe Marshall A.** - Some marine Algae of the Shantung Peninsula [*De Algis marinis ad paeninsulam* Shantung *pertinentibus*]. 1 fig., Lingn. Scient. Journ., XIII, 4, 667-670. Canton (1934). **b - 1332**

Of the 36 spp. enumerated 8 appear to be new records for China.

**Hustedt F.** - Die Kieselalgen Deutschlands, Oesterreichs und der Schweiz, mit Berücksichtigung der übrigen Länder Europas sowie der angrenzenden Meeresgebiete [*Algae siliceae germanicae, austriacae et helveticae. Agitur etiam de algis a variis Europae regionibus provenientibus atque etiam a maribus adiacentibus*]. Rabenhorst's Kryptogamen-Flora, VII, Abt. 1, Lief. 5, 785-920 (1930); Abt. 2, Lief. 2, 177-320 (1932); Lief. 3, 321-432; Lief. 4, 433-576 (Forts. folgt.). Akad. Verlagsg. Leipzig (1930, 1932 & 1933). **b - 1333**

Beschreibung mit Angabe von Schlüssel und Literatur der Formen, Unterfamilien und Gattungen. Berichtigungen und neue Formen, wie z. B. *Cocconeis diruptoides* n. sp., *Mastogloia subaspera* n. sp., *M. decipiens* n. sp., Adriatisches Meer, und *Mastogloia ignorata* n. sp. und *M. mediterranea*, Mittelmeer.

**Hygen G. & Jorde I.** - Beitrag zur Kenntnis der Algenflora der norwegischen Westküste [*Contributio in Algas cognoscendas ad litus occidentale Norvegiae pertinentes*]. Bergens Mus. Årb. 1934, naturv. r., 9, 1-60. Bergen (1935). **b - 1334**

229 marine Algenarten (56 Chlorophyceen, 88 Phaeophyceen und 85 Rhodophyceen) in der Umgegend von Herdla werden aufgezählt mit Angabe von Fundort und Sporangien. Von diesen sind 57 Arten (24 Grünalgen, 16 Braunalgen und 17 Rotalgen) für die Westküste Norwegens neu.

**Konghisser R.** - Hydrobiological Investigations at the Bering Sea off the NE-Shore of the Peninsula of Kamtchatka (Preliminary Notes) [*De explorationibus biologicis mari* Barents *peractis longe a litoribus nordorientalibus paeninsulae* Kamtschatka (*Notae priores*)]. (In Russ., Engl. Summ.). 1 tabl., Expl. Mers URSS, 19, 116-124. Léningrad (1935). **b - 1335**

Account of the scientific results of a motor-boat expedition to the Korff Bay along the coast line of Karaginsky Island with a view to study the distribution and presence of iodine-containing algae. 230 bottom-fangs were made and 415 plankton-samples taken. The thermical and salinity-stratification of the water, as well as its chemical and physico-chemical composition have been determined, and the principal genera of marine algae forming association have been investigated.

**Levring T.** - Ueber einige Meeresalgen bei Kristineberg an der schwedischen Westküste [*De Algis marinis ad* Kristineberg *pertinentibus ad litora occidentalia Suetia*]. 3 Abb., Bot. Not., 6, 455-463. Lund (1935). **b - 1336**

Verzeichnis von etwa 15 Arten mit Angabe von Fundort, teilweise Beschreibung und Synonymen. Eine Art ist neu: *Chantransia penetrans* n. sp. und 5 neu für Schweden.

**Lucas A. H. S.** - Notes on Australian Marine *Algae*. VII. The *Algae* of the Low Islands [*De algis marinis australiensibus. Algae ad* «Low Islands» *pertinentes*]. Proc. Linn. Soc. N. S. Wales, LIX, 348-350. Sydney (1934). **b - 1337**

**Malquori G.** - I «tripoli» siciliani [*De* «tripoli» *siculis*]. 3 fig., Ric. Scient., I, 2, 97-103. Roma (1935). **b - 1338**

Sono stati esaminati campioni di «tripoli» provenienti da diverse località dell'isola, allo scopo di stabilirne caratteristiche inerenti all'apprezzamento del loro valore tecnico.

**Mills F. Wm.** - An Index to the Genera and Species of the *Diatomaceae* and their Synonyms, 1816–1932. [*Index generum et specierum Diatomacearum eorumque synonymorum*]. Parts XVI–XXI. Appendices, Supplement. 564 pp. Wheldon & Wesley, Ltd. London (1933–35). **b - 1339**

**Molander A. R.** - Nya iakttagelser över förekomsten av *Zostera marina* utmed Svenska kusten [*Observationes novae de «Zostera marina» longe a litoribus Suetiae*]. Ny Svensk Fiskeritidskr., 21, 243-245. Göteborg (1934). **b - 1340**

**Nagai Masaji** - Die japanischen Formen von *Fucus evanescens* Ag. [*De formis Japonicis speciei «Fucus evanescens»*]. 14 Abb., Jap. Journ. Bot. Trans., VII, 3/4, 323-348. Tokyo (1935). **b - 1341**

Einleitende Bemerkungen über andere Formen von *Fucus evanescens* Ag. Schlüssel, Diagnose, teilweise in Lateinisch, mit Angabe von Verbreitung und Fundort von 14 Formen, von denen 4 neu sind.

**Okamura K.** - Icones of Japanese Algae [*Imagines Algarum Japonicarum*]. (Descr. in Jap. and Engl.). Publ. by Author. Tokyo (1934). **b - 1342**

Descriptions of a number of Algae pertaining to *Callymenia, Pleonosporium, Monospora, Gloioderma, Carpopeltis, Rhodymenia, Acanthophora, Centroceras, Spermothamnion, Aeodes, Chondria, Wrangelia* and *Cladophora*, most of which are new.

**Okamura K.** - Short Notes on the Japanese marine Algae [*Brevia de Algis marinis japonicis*]. (Engl. & Jap. rés.). Bot. Magaz., XLVIII, 883-888. Tokyo (1934). **b - 1343**

Several emendations are proposed: *Sarcodia crataeriformis* J. Ag., *Rhodophyllitis capensis* Kütz, *Nemalion japonicum* Yendo & Narita, *Helminthocladia purpurea* (Harv.) J. Ag. and *Chrysymenia pacifica* should be omitted as belonging to the Japanese flora. *Pleonosporium Suyehiroi* = *Spermothamnion Suyehiroi* and *P. Sacchorhiza* S. et G. should belong to the genus *Spermothamnion*.

**Papenfuss G. F.** - Alternation of Generations in *Ectocarpus siliculosus* (Dillw.) [*Species « Ectocarpus siliculosus ». Quaestio de alternatione generum*]. 2 pls., 13 figs., Bot. Gaz., XCVI, 3, 421-446. Chicago, Ill. (1935). **b - 1344**

Further information on the alternation of generations studied on *Ectocarpus siliculosus* in the region of Woods Hole, Mass. Asexual plants are widely distributed in this region but sexual plants have been found exclusively on *Chordaria flagelliformis* as Penikese Island.

**Parke M. W.** - Algologist's Report [*Relatio ab algologista redacta*]. Mar. Biol. Stat. Port Erin, Rep. 1934 (No. 47), 14. Liverpool (1934). **b - 1345**

Brief account of a detailed investigation on the brown sea-weeds and the *Algae* penetrating the shell of *Balanus balanoides* carried on at the Marine Biological Station of the Isle of Man.

**Parke M. W.** - Algological Records for the Manx Region [*De Algis repertis in regione* Manx]. Mar. Biol. Stat. Port Erin, Rep. 1934 (No. 47), 29-36, Liverpool (1934). **b - 1346**

List of *Myxophyceae*, *Chlorophyceae*, *Phaeophyceae*, *Rhodophyceae* and genera of doubtful affinity with indication of the locality where the *Algae* were observed, their frequency, occurrence and other data concerned.

**Patrick R.** - Some Diatoms of the Great Salt Lake as Indicators of Present and Geological Water Conditions [*Diatomeae ad* Great Salt Lake *pertinentes ac indices condicionum hodiernarum et diversarum aetatum geologicarum*]. Biol. Bull. (Progr. & Abstr. of Scient. Papers presented at the Marine Biol. Labor.), LXIX, 2, 338. Lancaster, Pa. (1935). **b - 1347**

There is no evidence of a Diatom Flora living in the lake proper today. The origin of fresh waters and the successive increase in salt concentration is shown by different deposits of fresh, brackish water and euryhaline forms.

**Politis J.** - Plantes marines. Sur la flore marine de l'Attique [*Plantae marinae. De flora marina Attica*]. Rapp. Pr.-Verb. Cons. Expl. Scient. Méditerranée, IX (n. sér.), 131-136. Paris (1935). **b - 1348**

A peu près 300 espèces trouvées dans l'Attique sont énumérées. La plupart des espèces récoltées appartiennent au groupe des Diatomées, mais il y a aussi des algues et champignons peu connus en Grèce ainsi que quatre espèces de plantes phanérogames de la famille des Potamogétonacées et une autre espéce, *Halophila stipulacea* (Forsk.) Ascher.

**Prokhorov K. I.** - Les fourrées de roseaux dans le delta du Volga [*Maculae specierum « Typha angustifolia » et « Phragmites communis » in delta fluminis* Volga]. (En russe). 3 fig., 16 tabl., Izv. Gos. Ghéogr. Obstsch. (Bull. Soc. Géogr.), LXVII, 1, 104-129. Moskva-Leningrad (1935). **b - 1349**

Résultats de l'exploration des fourrées de roseaux qui croissent dans l'embouchure du Volga, envahissent ses rives et les îles et îlots disposés, tant dans le delta lui-même que dans la zone côtière de la Mer Caspienne. Quelques considérations concernant la possibilité d'utiliser les roseaux de la région pour l'extraction de la cellulose et la fabrication du papier.

**Ranson G.** - Le déterminisme de la fixation saisonnière de *Navicula fusiformis* Grün. (*N. ostrearia* Bory). Sa culture expérimentale en ostréiculture [*Quo modo accidit fixatio pro anni tempore in « N. fusiformis ». Species « Navicula ostrearia ». Quaestio de eius cultura experimentali in ostreicultura*]. C. R. Acad. Sc., CCI, 16, 684-687. Paris (1935). **b - 1350**

Description de cette Diatomée pélagique qui présente la propriété de devenir benthique par chimiotactisme lorsque sur le sol se trouve du mucus de l'Huître. Etant donnée l'importance de *N. fusiformis* dans la pratique de l'ostréiculture, on a essayé de faire des cultures de cette algue qui ont donné des résultats intéressants.

**Rees T. K.** - The Marine Algae of Lough Ine [*De Algis marinis ad* Lough Ine *pertinentibus*]. Journ. Ecol., XXIII, 69-133. Cambridge (1935). **b - 1351**

**Roberts W. A.** - Irish Moss and Agar-Agar [« *Chondrus* » *et* agar-agar]. Fish & Oyst. Rep., XVI, 8, 11. Tampa, Fla. (1935). **b - 1352**

Some information on the propagation and use of Irish moss, which is an edible sea-weed found at various localities along the New England coast, but particularly in the vicinity of Scituate and Plymouth Mass.; some considerations on the possibility of making agar-agar with a species of seaweed found along the coast of California and another found along the coast of southern Florida.

**Sauvageau C.** - Un genre *Symphoricoccus* Rke est-il justifié ? [*Genus « Symphoricoccus » est comprobandum ?*]. Bull. Stat. Biol. Arcachon, XXX, 2, 179-188. Bordeaux (1934). **b - 1353**

Particularités qui caractérisent le genre *Symphoricoccus*. Revue critique des travaux qui se sont occupés de la systématique de ce genre, en particulier du travail de Kuckuck. Observations de l'A., qui arrive à la conclusion que la présence de sporanges uniloculaires sur les filaments assimilateurs ne suffit pas, comme le croyait Kuckuck, pour justifier un genre *Symphoricoccus*.

**Sauvageau C.** - Sur le *Climacosorus* nouveau genre de phéosporée [*De « Climacosorus » genere novo ex Phaeosporeis*]. 3 fig., Bull. Stat. Biol. Arcachon, XXX, 2, 189-196. Bordeaux (1934). **b - 1354**

Raisons pour lesquelles l'A. considère le spécimen étudié comme appartenant à un genre indépendant: *Climacosorus* et à la nouvelle espèce *C. mediterranea* nov. sp.

Habitat, répartition, développement, croissance. Diagnose du nouveau genre et de la nouvelle espèce.

**Schiffner V.** - *Acystis*, eine neue Gattung der Sargassaceen und über einige Algen aus dem Roten Meere [*De « Acystis » genere novo in Sargassaceis deque algis ad Mare Rubrum pertinentibus*]. 1 Taf., Hedwigia, LXXIV, 2, 115-118. Dresden (1934). **b - 1355**

*Acystis heinii* n. sp., *Sargassum zanardinii* n. sp. und *Ectocarpus arabicus*.

**Schreiber E.** - Forschungen an Meeresalgen [*Inquisitiones in Algas marinas*]. Biologe, III, 177-178. München (1934). **b - 1356**

**Schussnig B. & Koth-Bauer E.** - Der Phasenwechsel von *Ectocarpus siliculosis* (Nach Untersuchungen an Materialien aus der Adria und aus dem Mittelmeer) [*De phasibus speciei « Ectocarpus siliculosus » quoad variationes*]. 4 Abb., Oesterr. Bot. Ztschr., LXXXIII, 2, 81-97. Wien (1934). **b - 1357**

Ein Vergleich unter den hier beschriebenen von Rovigno, von Neapel und von der englischen Küste stammenden Arten von *E. siliculosus* zeigt mehrere Verschiedenheiten beim Phasenwechsel auf. Die adriatischen und englischen Arten sind nur diploid, die neapolitanische Form aber während der Wintermonate diploid und während der Sommermonate haploid.

**Setchell W. A.** - The Templeton Crocker Expedition to Western Polynesian and Melanesian Islands, 1933. Some Marine Plants of Southeastern Melanesia [*De expeditione* Templeton-Crocker *ad insulas Polynesias et Melanesias A. 1933. De plantis quibusdam marinis a Melanesia sudorientali provenientibus*]. 4 pls., Proc. Calif. Acad. Sc., XXI, 21, fourth ser., 259-270. San Francisco (1935). **b - 1358**

Importance of the collection for indicating certain distributional relations between the tropical *Algae* of the Indo-Malayan-Papuan archipelagos, bordering the Asiatic and australian tropics, and the Samoan-Tongan-Fijian groups, with their Polynesian and Micronesian affinities. Determination of 31 species belonging to *Myxophyceae, Chlorophyceae, Melanophyceae, Rhodophyceae* and *Monocotyledonae.*

**Setchell W. A.** - Notes on *Microdictyon.* III [*Notae de « Microdictyon »*]. 3 pls., Univ. Calif. Publ. Bot., XIX, 2, 129-139. Berkeley, Calif. (1935). **b - 1359**

Rediscovery of the type species of this alga. Description of four species.

**Skvortzow B. W.** - Diatoms from Calcutta, India [*Diatomeae a* Calcutta *provenientes*]. 1 Pl., Philipp. Journ. Sc., LVIII, 2, 179-192. Manila (1935). **b - 1360**

List and description of two samples of diatoms collected at Calcutta, one of which contains brackish-water forms, belonging to the genera *Diploneis, Navicula, Amphora, Rhopalodia* and *Nitzschia.*

**Sparrow F. K.** - Investigations on Marine Fungi [*Investigationes de boletis marinis*]. Woods Hole Oceanogr. Instit., App. Rep. 1934, 31. Woods Hole, Mass. (1935). **b - 1361**

Some results of an investigation carried out of the fungous flora in the vicinity of the Woods Hole Oceanographic Institution and especially concerned with a determination of the occurrence of fungi in marine waters and an accumulation of data with respect to their morphology, occurrence and distribution. Twenty strictly marine forms have been encountered including several new species and a new genus. They occurred chiefly as parasites and saprophytes of marine Algae and Diatoms.

**Teodoresco E. C.** - Le développement des Algues et la réfrangibilité de la lumière [*De Algarum accretione lucisque refractione*]. 67 fig., 1 Pl., Rev. Gén. Bot., XLVI, 65-87, 172-192, 229-256, 289-320, 360-384. Paris (1934). **b - 1362**

Action des radiations de différente réfrangibilité sur le développement des algues étudiée avec une grande rigueur et précision scientifique pour éviter toute cause d'erreur. Expériences sur *Dunaliella salina, Kirchneriella lunaris*, etc., dont l'A. tire es conclusions suivantes: les algues se développent dans toutes les régions du spectre visible; mais la multiplication cellulaire est plus intense dans la partie la moins réfrangible du spectre (rouge orangé)- Les résultats permettent de mieux comprendre la physiologie des Algues vivant en profondeur dans la mer.

**Tilden J. E.** - The Algae and Their Life Relations: Fundamentals of Phycology [*De Algis earumque correlationibus vitalibus. Fundamenta phycologica*]. 257 figs., 9 pls., 12 tabl., xii-550 pp., Univ. Minnesota Press, Minneapolis-H. Milford. Oxford Univ. Press, London (1935). **b - 1363**

The present work is designed to give a broad outlook over the whole field of phycology, dealing with freshwater and marine forms alike. It contains three introductory chapters on « Some hypotheses concerning the phylogeny of the algae », the « Distribution of marine algae in time and space », and « Classification based on evolutionary development with special reference to pigmentation ». The system of classification is peculiar and higly original: author distinguishes only five principal classes of algae instead of the customary nine.

**Tokida J.** - The Marine *Algae* from Robben Island, Saghalien (A Supplementary Report) [*De Algis marinis a* Robben Island *provenientibus* (*Relatio supplementaris*)]. Bull. School of Fish., IV, 16-26. Sapporo. (1934). **b - 1364**

**Tschudy R. H.** - Depth Studies on Photosynthesis of the Red Algae [*De photosynthesi Algarum rubrarum in profunditatem perspectarum*]. 3 figs., 5 tabl., Amer. Journ. Bot., XXI, 546-556 (Univ. of Washington, Publ. in Oceanogr., suppl. ser.). Lancaster (1934). **b - 1365**

The purpose of this paper is to present evidence that photosynthesis takes place in the red Algae at depths where very little light of the longer wave lengths commonly used in synthesis by other chlorophyll-bearing plants penetrates, and to discuss the various factors which have bearing on plant life at depths where these plants grow.

**Voronikhine N. N.** - Revue des travaux algologiques des auteurs russes, 1930-1931 [*Inspectio operum de algologia ab auctoribus Russicis redactorum*]. (En russe). Bot. Zhourn., XIX, 2, 187-206. Leningrad (1934). **b - 1366**

**Wołoszyńska J.** - Sur une floraison des Cyanophycées dans le Golfe de Gdańsk et sur le développement abondant de la Diatomée *Chaetoceros Eibenii* Grun. [*De Cyanophyceis in Sinu* Gdańsk *deque permagna accretione speciei « Chaetoceros Eibenii »*]. Acad. Pol. Sc. et Lettr., C. R. Mensuels Cl. Sc. Mathém. et Natur., 3, 8. Cracovie (1935).

( — ) S. in Dtsch.: Bull. Int. Acad. Pol. Sc. et Lettr., 1-3, BI, 101-114. Cracovie (1935). **b - 1367**

En été 1934, on observa dans le Golfe de Gdansk le phénomène de la floraison d'eau sur une grande étendue. Les couches supérieures de l'eau contenaient deux Cyanophycées communes dans la Baltique, à savoir: *Nodularia spumigena* et *Aphanizomenon flos-aquae,* accompagnée de *Botryococcus Braunii.* Les couches inférieures étaient composées presque exclusivement des Diatomées et surtout: *Chaetoceros Eibenii* Grun. et de quelques autres espèces.

**Wołoszyńska J.** - Bemerkungen über eine seltene Planktondiatomee des Brackwassers *Attheya decora* West [*Observationes circa diatomeam*

*planctonicam raram « A. decora » ad aquas salmacidas pertinentem*]. 1 Fig., Bull. Int. Acad. Polon, Sc. & Lettres, Cl. Sc. Mathém. & Nat., 1-3 BI. 65-67. Cracovie (1935). **b - 1368**

Beschreibung der *Attheya decora* West. aus der Ostsee, deren Vorkommen in diesem Gebiete vom Vf. zum erstenmal festgestellt worden und von grosser Bedeutung ist, weil es bedeutet, dass das Brackwasser der polnischen Küstengebiete in der Danziger Bucht vom phytoplanktonschen Standpunkte aus nicht so verarmt ist, als man es früher allgemein angenommen hat.

**Yamada Y.** - The Marine *Chlorophyceae* from Ryukyu, especially from the Vicinity of Nawa [*De Chlorophyceis marinis ad* Ryukyu *pertinentibus, praecipue prope* Nawa]. 53 fig., Jour. Fac. Sc., Hokkaido Imp. Univ., ser. V (Bot.), 3, 33-88. Sapporo (1934). **b - 1369**

59 species belonging to 26 genera and 11 families are considered in this paper Besides some new forms there are one new genus, *Pseudodichotomasiphon* with *P. constricta* (Yamada) comb. nov. and two new species, *Acetabularia* (*Polyphysa*) *clavata*, and *Bryopsis ryukyuensis*.

**Yamada Y.** - Enumeration of Marine Algae in Urup Island, especially in the Neighbourhood of Jema [*Enumeratio Algarum marinarum in insula* Urup, *praecipue prope* Jema]. (In Jap.). 20 fig., Rep. Algal Res. Stat., Fac. Sc., Hokkaido Imp. Univ., 3, 1-50. Sapporo (1934). **b - 1370**

List of 49 species belonging to the following groups: *Chlorophyceae*, *Phaeophyceae* and *Rhodophyceae*, with descriptions and bibliography.

**Yamada Y. & Tanaka T.** - Three new Algae from Formosa [*Algae tres novae a* Formosa *provenientes*]. 5 fig., Trans. Nat. Hist. Soc. Formosa, XXIV, 342-349. Taihoku (1934). **b - 1371**

Description with illustrations of *Spermothamnion gladophorae, S. cordicola* and *Plumaria ramosa*.

**Sch.** - Das Absterben des Seegrases und dessen Folgen [*Carentia speciei « Zostera marina » et quae consequuntur*]. Fischmarkt, III, 10, 267-268. Cuxhaven (1935). **b - 1372**

Kurzer Bericht über die Verbreitung in den nordwesteuropäischen Gewässern von einer Erkrankung des breitblättrigen Seegrases, die vielfach zu völligem Absterben der Seegrasbestände führt. Die Ursachen der Krankheit und ihre Folgen sind an Hand von den Arbeiten von H. Blegvad und E. Wohlenberg besprochen (S.: H. Blegvad: « An Epidemic Disease of the Eel Gras (*Zostera marina* L.) in « Rep. of the Danish Biol. Stat. », XXXIX, 1934 und E. Wohlenberg: « Beobachtungen über das Seegras, *Zostera marina* L. und seine Erkrankung im nordfriesischen Wattenmeer », in « Nordelbingen. Beiträge zur Heimatforschung in Schleswig–Holstein, Hamburg und Lübeck », XI, 1935; Velstholst. Verl., Heide).

# PALAEOBIOLOGIA

**Alberici E. & Tamini E.** - Contributo allo studio dei Molluschi del Quaternario marino di Rodi (Egeo) [*Contributio in studenda Mollusca aetatis quaternariae marinae insulae Rhodos*]. 1 tav., Rend. R. Ist. Lomb. Sc. Lett., LXVIII, 1/5, 213-228. Milano (1935). **b - 1373**

In questo studio viene esaminata una fauna fossile proveniente dalla Conca di Candillì, nel tratto compreso tra la sella, le quote 123 e 140 del Mufti Dagh e la testata del fosso immediatamente a nord di Cara Osman Dagh contrassegnato come « strato 210 » e costituita da 94 specie di Gasteropodi e 66 specie di Lamellibranchi. Tale strato può essere riferito alla parte superiore del Cambriano. Tra i fossili studiati, 73 forme di cui 39 di Gasteropodi e 34 di Lamellibranchi, risultano nuove per il Quaternario marino di Rodi.

**Alloiteau J.** - Sur la nécessité de l'étude de sections pour la détermination des Polypiers du Crétacé [*De studendis sectionibus ad polyparios aetatis cretaceae determinandos*]. C. R. Acad. Sc., CCI, 3, 232-234. Paris (1935). **b - 1374**

Description de deux formes nouvelles portant la détermination *Trochosmilia inconstans* de From, mais n'ayant en commun que l'aspect général et s'éloignant toutes deux des *Trochosmilia*. Nécessité d'une nouvelle systématique.

**Androsova V. P.** - The Microfauna of the North Dwina Post-Pliocene (on the History of the North Dwina Post-Pliocene) [*De microfauna in Pliocene regionis septemtrionalis* Dwina]. 4 tabl., 17 fig., Trans. Inst. Mar. Fish. & Oceanogr., Geol. Works on Novaya Zemlya, I, 110-132. Leningrad (1935). **b - 1375**

Method of research. Many important conclusions have been drawn from this study especially as to the homogeneity of the gray-green clay layers determining the period of sea-transgression and its limits; the high salinity of the former sea-basin, lack of carbon dioxide accumulations near the bottom owing to the shallowness of the basin. Predominating species of *Foraminifera*: *Cassidulina crassa* d'Orb., *C. laevigata* d'Orb., *Nonionina depressula* Wal. et Jac. and *Polystomella striatopunctata* Ficht. et Moll.

**Arambourg C.** - Observations sur quelques poissons fossiles de l'ordre des Halécostomes et sur l'origine des Clupéidés [*Observationes circa pisces fossiles ad Halecostomata pertinentes atque etiam circa originem Clupeidarum*]. C. R. Acad. Sc., CC, 25, 2110-2112. Paris (1935). **b - 1376**

Dans la présente note l'A. en se servant des résultats de son étude récente de poissons provenant du Crétacé de la côte occidentale d'Afrique, comble le vide apparent qui sépare les Leptolépidés des Clupéidés et montre le polyphylétisme et la différenciation précoce de ces derniers. Il décrit la famille des Clupéidés comme l'aboutissement d'une série de rameaux très précocément differenciés et dont chacun a parcouru, indépendamment des autres, les stades ganoïdes halécostomes et téléostéens.

L'A. a pu constater la continuité du phénomène évolutif entre les représentants de deux groupes zoologiques distincts: Ganoïdes et Téléostéens.

**Argamakova V.** - Ueber einige Ophiuren von der Ostküste Sachalins [*De Ophiuroideis ad litus orientale* Sakhalin *pertinentibus*]. (In Russ. u.

Dtsch.). C. R. Acad. Sc. U. R. S. S., III, 5/6, 348-352. Léningrad (1934). **b - 1377**

Nach einigen allgemeinen Betrachtungen über die Reste von fossilen Ophiuren, deren Erhaltungszustand gewöhnlich unbefriedigend ist, die Eigentümlicheit ihrer Evolution und die Ophiure der Gegenwart, gibt Vf. eine kurze Beschreibung von *Ophiocten miocaenicum* n. sp., *Ophiocten* sp. und *Amphiophiura aenigma* n. sp., welche in den miozän-tufogenen Ablagerungen an der Ostküste der Insel Sachalin entdeckt worden sind.

**Arnold B. W. & Clark H. L.** - Some additional Fossil Echini from Jamaica [*Aliae Echinidae fossiles Jamaicenses*]. 5 pls., Mem. Mus. Comp. Zool. Harvard Coll., LIV, 2, 139-156. Cambridge U. S. A. (1934). **b - 1378**

Supplementary report to that published in 1927 (this rev. L, I.) on a large collection of fossil Sea-Urchins (Cenozoic) made in Jamaica. One new genus, *Homeopetalus*, and 13 new species are described.

**Ashby E. & Cotton B. C.** - Descriptions of Fossil Chitons from Europe in the Ashby Collection at the South Australian Museum [*De descriptis Chitonidis fossilibus europaeis ad collectionem* Ashby *pertinentibus in Museo Sudaustraliensi*]. Rec. South Austral. Mus. V, 3, 389-394. Adelaide (1935). **b - 1379**

Description of 13 species, all from Eocene and Miocene beds named here.

**Bassler R. S. & Kellett B.** - Bibliographic Index of Paleozoic *Ostracoda* [*Ostracoda palaeozoica. Index bibliographicus*]. 24 figs., Geol. Soc. Amer., Spec. Pap., 1, xiii-500 pp., Washington D. C. (?) (1934). **b - 1380**

Entire bibliography and synonymy of the genera and species, with locality and horizon, of the world's known *Ostracoda*, including about 2380 species and varieties grouped in 164 genera or subgenera and 17 families. The work is completed by a description and illustration of the morphology of the Ostracods, of the methods of study, the orientation of the valves, and criteria of classification.

**Billings M. P. & Cleaves A. B.** - Brachiopods from Mica Schist, Mt. Clough, New Hampshire [*Brachiopoda in schistis micaceis montis* Clough (New Hampshire)]. 2 figs., Amer. Journ. Sc., XXX, 180, 530-536. New Haven, Conn. (1935). **b - 1381**

Fossils from crystalline schists are rare, but two brachiopods have been found in high-grade (katazonal) metamorphic rock on Mt. Clough, New Hampshire. One of the specimens has been identified by the A. A. as *Spirifer* sp. ind. The brachiopods dealt with in this paper constitute one line of evidence, along with other data, to demonstrate that some of the high-grade metamorphic rocks of western New Hampshire are of Devonian age.

**Blanc A. C.** - Stratigrafia del canale Mussolini nell'Agro Pontino [*De stratigraphia canalis* Mussolini *in Agro Pontino*]. Atti Soc. Tosc. Sc. Nat. Proc. Verb., XLIV, 2, 52-56. Pisa (1935). **b - 1382**

Viene segnalata e sommariamente descritta la stratigrafia posta in evidenza dalla escavazione del Canale Mussolini nell'Agro Pontino (prov. di Littoria), che comprende: uno strato inferiore a fauna marina (con *Eastonia rugosa*, Chemn.), e strati sovrapposti di torbe, sabbie ed argille, contenenti relitti di grandi mammiferi quaternari.

**Blanc A. C. & Tavani G.** - Una fauna marina nelle breccie ossifere dei monti d'oltre Serchio [*De fauna marina in glareis ossiferis montium trans flumen* Serchio]. Atti Soc. Tosc. Sc. Nat. Proc. Verb., XLIV, 2, 49-51. Pisa (1935). **b - 1383**

Viene segnalata la presenza di una fauna marina inclusa in breccie ossifere, presso Vecchiano (Monti d'oltre Serchio). Essa costituisce l'indizio dell'esistenza di una linea di riva marina, geologicamente recente di oltre 68 metri più alta dell'attuale. I sedimenti di questo mare, altrove completamente dilavati sono stati trasportati da acque superficiali entro le spaccature dei calcari, ove si sono cementati nelle breccie.

**Brough J.** - On *Lekanichthys howsei*, a new dorypterid Fish from the Permian [*Species « Lekanichthys howsei » piscis novus dorypteridis a strato permianico proveniens*]. 1 pl., 2 figs., Ann. and Magaz. Natur. Hist., XIV, 81, 253-266. London (1934). **b - 1384**

**Deflandre G.** - Les Discoastéridés, microfossiles calcaires incertae sedis [« *Discoasteridae* » *microfossiles calcariae, incertae sedis*]. 31 fig., Bull. Soc. Franç. Microsc., III, 2, 59-67. Paris (1934). **b - 1402**

Les *Discoasteridae* sont connues déjà depuis un siècle mais très peu étudiées. Théories de Tan Sin Hok et d'Ehrenberg sur leur origine; différentes espèces et variétés distinguées par Tan Sin Hok. L'existence ou non-existence d'un noyeau central chez plusieurs formes. Appendice sur un travail de Ed. Paréjas concernant quelques *Actiniscus*.

**Deflandre G.** - Considérations biologiques sur les microorganismes d'origine planctonique conservés dans les silex de la craie [*Considerationes biologicae de microrganismis planctonicis in silice cretacea servatis*]. 11 fig., 5 pl., Bull. Biol. Fr. et Belge, LXIX, 213-244. (1935). **b - 1403**

Dans le rognon de silex du bassin de Paris et de Provence, l'A a trouvé Foraminifères, Radiolaires, Flagellés, etc., très bien conservés. Considérations sur l'évolution des Dinoflagellés.

**Doncieux L. & Cuvillier J.** - Les Foraminifères du Lutétien inférieur dans le sud du désert arabique [*De Foraminiferis ad aetatem Lutetianam inferiorem pertinentibus in regione meridionali deserti arabici*]. C. R. Acad. Sc., CC, 22, 1873-1874. Paris (1935). **b - 1404**

Analyse des Foraminifères trouvés dans un même dépôt, dont les uns appartiennent au début de l'Eocène moyen, les autres au Lutétien supérieur: *Alveolina oblonga* d'Orb., *Nummulites* cf. *irregularis* de la Harpe, *N. discorbina* Schl., *N. gizehensis* Forsk., *N.* aff. *Lucasi* d'Arch.

**Ehrmann F. & Flandrin J.** - Au sujet des grandes Lépidocyclines de l'Eocène des Beni-Afeur (S. de Taher, département de Constantine) [*De magnis Lepidocyclinis ad aetatem eocenicam pertinentibus in* Beni-Afeur]. C. R. Acad. Sc., CC, 2, 152-154. Paris (1935). **b - 1405**

Etant donné que l'examen de quelques échantillons récoltés à la base des dépôts numidiens de Taher, au sud de Djidjelli, avait permis d'y reconnaître *Nephrolepidina marginata* Michl. et *Eulepidina dilatata* Michl., qui sont des Foraminifères caractéristiques de l'Oligocène supérieur et même du Miocène inférieur, et que la présence de ces Foraminifères posait un problème qui pouvait se résoudre soit par le rajeunissement du Numidien, soit par le recul dans le temps de l'apparition des Lépidocyclines, les A. A. ont entrepris une étude qui devait conduire au choix de l'une ou de l'autre de ces deux solutions et dont il rend compte dans la présente note.

**Elias K. M.** - Cephalopods of the Pierre Formation of Wallace County, Kansas, and Adjacent Area [*De Cephalopodis ad formationem* Pierre *pertinentibus in* Wallace County *et propinquitatibus*]. Pls., Univ. Kansas Bull., XXI, 9, 289-363. Lawrence, Kansas (1933). **b - 1406**

3 new species and 4 new varieties of the Ammonites of the genera *Scaphites* and *Bacculites* are described.

**Fallot P. & Dubar G.** - Sur la présence du Lias à *Rhynchonellina* dans le Rif espagnol [*De* Lias *quod « Rhynchonellina » continet in* Rif *hispanico*]. C. R. Acad. Sc., CC, 2, 154-156. Paris (1935). **b - 1407**

Les résultats démontrent que le genre *Rhynchonellina* qui était connu pour s'être propagé au Lias dans le domaine alpino-dinarique, a dépassé les étroites limites qu'on lui assignait; son extension à l'extrémité de la Méditerranée occidentale et son abondance dans la dorsale calcaire du Rif, indiquent, à l'aube du Lias, d'étroites relations fauniques et paléogéographiques entre la chaîne du Rif et le sillon nord sicilien et dinarique de la Thétys secondaire.

**Floridia G. B.** - Contributo alla conoscenza stratigrafica del neogene della Cirenaica [*Contributio in stratigraphiam aetatis neogenicae Cyrenaicae cognoscendam*]. Atti Soc. Ital. Sc. Nat. e Mus. Civ. St. Nat., LXXIV, 1/2, 19-42. Milano (1935). **b - 1408**

Dallo studio di alcune località fossilifere della Cirenaica risulta evidente la presenza dell'Oligocene e del Miocene e viene ad essere ampliata la diffusione geografica dell'*Alveolina Bradyi* Silv., riscontrata con certezza in 16 località. Infine, sono state determinate con sicurezza 78 specie fra Gastropodi e Lamellibranchi di cui 37 risultano nuove per la Cirenaica.

(Ung. Text, Dtsch. Rés.). 1 Taf., Földtani Közlöny (Geol. Mitt.), LXIV, 7-9, 241-265. Budapest (1934). **b - 1429**

Folgende neue Arten und Varietäten sind gefunden: *Rhacophyllites Telegdi Rothi* nov. sp., *Phylloceras tenuistriatum* Mgh. var. *intermedia*, nov. var., *Ph. dubium*, Fuc. var. *medioliasica* nov. sp., *Lytoceras angustoumbilicatum* nov. sp., *L. kávásense* nov. sp., *Amblycoceras planicostatum* Sow., var. *Sziládyu* nov. var.

**Lambert J.** - Sur quelques échinides fossiles de Valence et d'Alicante communiqués par M. le Prof. Darder Pericàs [*De Echinidis fossilibus Valentiae et Lucentiae a Prof.* Darder Pericàs *relatis*]. 2 pl. Bol. Soc. Españ. Hist. Nat., XXXV, 7, 359-371. Madrid (1935). **b - 1430**

Dans le présent ouvrage l'A. mentionne seulement les espèces des échinides de Valence et d'Alicante déjà connues, mais, par contre, présente quelques observations sur celles dont il importe, soit de préciser le niveau stratigraphique, soit de discuter la détermination, et donne la description des suivantes espèces nouvelles: Crétacé: *Balanocidaris darderi* Lamb. n. sp., *Pseudopyrina darderi* Lamb. sp. n., *Echinocorys darderi* Lamb. n. sp. Tertiaire: *Echinolampas visedoi* Lamb. n. sp., *Linthia darderi* Lamb. n. sp.

**Leonardi P.** - Il Trias Inferiore delle Venezie [*De aetate Triassica inferiore in regione Veneta*]. 3 fig., 8 tav., 13 pp., Soc. Cooper. Tipogr., Padova (1935). **b - 1431**

Cenni generali sulla fauna e rassegna delle località fossilifere principali; descrizione paleontologica degli Anellidi (*Spirorbis*), Brachiopodi (*Lingula*), Molluschi (Lamellibranchi, Gasteropodi, Cefalopodi) ed Echinodermi (Ofiuroidi e Asteroidi); relazioni tra la fauna Werfeniana delle Venezie e quelle della formazione a *Bellerophon* e dell'Anisico. Le faune marine del Trias inferiore.

**Licharev B.** - On Some New Genera of Upper Palaeozoic *Brachiopoda* [*De novis ex Brachiopodis generibus ad aetatem palaeozoicam inferiorem pertinentibus*]. (In Russ. & Engl.). C. R. Acad. Sc., U. R. S. S., I, 4, 210-214. Léningrad (1934). **b - 1432**

Short diagnosis of several new genera of Upper Palaeozoic *Brachiopoda* established by the author while preparing for publication a monograph on hand of a collection gathered at Darvas. The described forms are as follows: *Pseudoharttina* gen. nov., *P. ovalis* gen. et sp. nov., *Paeckelmanella* subgen. nov., genoholotype: *Spirifer dieneri* Tschernyschew, *Darvasia* gen. nov., *D. edelsteini* gen. et sp. nov., *Neophricadothyris* gen. nov., genoholotype: *Squamularia asiatica*, *Neogypidula* gen. nov., genoholotype: *Pentamerus* (?) *darvasicus* Tschernyschew, *Camarophorina* gen. nov., *C. antisella* Broili, *Pseudoderbyia* gen. nov., *P. netschajewi* gen. et sp. nov.

**Llopis Llado N.** - La microfauna de Braquiópodos del Triasico de Monte Toro (Menorca) [*Brachiopoda. Quaestio de microfauna ad aetatem Triassicam pertinente in monte* Toro]. 3 figs., Bol. Soc. Españ. Hist. Natur., XXXV, 3/4, 217-226. Madrid (1935). **b - 1433**

Entre una serie de fosiles procedentes del Triásico medio de Monte Toro el A. ha encontrado unas calizas margosas que contenian una abundante microfauna de Braquiópodos: historia, estratigrafia, descripcion de la microfauna, que comprende cuatro especies nuevas para el Triasico: *Orbiculoidea fragilis*, *O. complanata*, *O. elliptica*, *O. minor*.

**Macarovici N. Gh. & Vascautanu Th.** - Le sondage de Socola (Jassy) en 1927 (Faune des Foraminifères). 1° Note [*De explorata regione* Socola *A. 1927. Fauna Foraminiferorum*]. Ann. Scient. Univ. Jassy, XX, 414-421. Jassy (1935). **b - 1434**

Après une couche ayant des debris de Gastéropodes Lamellibranches et Cardiacées, l'A. a rencontré une autre couche jusqu'à une profondeur de m. 274 contenant, dans un sable quarzeux, plusieurs espèces de Foraminifères: *Nubecularia*, *Miliolina*, *Spiroloculina*, *Bigenerina*, *Spiroplecta*, *Bulimina*, *Glandulina*, *Nodosaria*, *Guttulina*, *Truncatulina* et *Polystomella*.

**Macfayden W. A. et als.** - The Mesozoic Paleontology of British Somaliland [*Palaeontologia mesozoica Somaliae Britannicae*]. 25 pls., Gvmt. Somaliland Protectorate, 228 pp. London (1935). **b - 1435**

This volume by eight authors is devoted to the systematic paleontology of the Jurassic and Cretaceous strata of British Somaliland. The *Foraminifera* (28 species) are described by W. A. Macfayden; the Corals and Hydroids (12 species) by H. Dighton Thomas; the Jurassic Echinoids (23 species) by Ethel D. Curie; the Cretaceous Echinoids (9 species) by H. L. Hawkins; the *Crinoidea* (8 species) by F. A. Bather; the Brachiopods (54 species) by H. M. Muir-Wood; the Pelecypods and Gastropods (61 species) by L. R. Cox, and the Cephalopds by L. F. Spath.

**Maillieux E.** - Contribution à l'étude des Echinoïdes du Frasnien de la Belgique [*Echinoidea. Contributio in eadem studenda e Frasniano Belgico provenientia*]. 2 pl., Mém. Mus. Hist. Natur. Belgique, 65, 1-16. Bruxelles (1935). **b - 1436**

Description détaillée, synonymes et génotypes de trois espèces nouvelles, *Xenocidaris Caheni* n. sp., *Devonocidaris Hacquaerti* n. sp. et *D. Dumoni* n. sp. Remarques sur la nature des gisements d'où proviennent les Oursins décrits.

**Maillieux E.** - Brachiopodes et Pélecypodes dévoniens [*Brachiopoda et Pelecypoda devoniana*]. 4 Pls., nomb. tab., Mem. Mus. Hist. Nat. Belgique, 70, 1-31. Bruxelles (1935). **b - 1437**

Description de quelques espèces nouvelles ou peu connues du Dévonien de la Belgique. Les caractères encore inédits de certains Brachiopodes amènent à créer deux genres nouveaux: *Dinapophysia* et *Straelenia*; étude particulière de la sous-famille *Pterineinae*.

**Makiyama J.** - *Sinanodelphis izumidaensis*, a New Miocene Dolphin of Japan [« *Sinanodelphis izumidaensis* » *delphinus novus miocenicus Japonicus*]. 3 pls., Mem. Coll. Sc., Kyoto Imp. Univ., Ser. B, XI, 2, 115-134. Kyoto (1935). **b - 1438**

Description of a new form of dolphin from the Miocene shale in Sinano. The new genus is separated clearly from any other Miocene delphinid genera because it has a closer relationship to the living *Delphinus*.

**Mansfield Wendell C.** - A new Species of *Pecten* from the Oligocene near Duncan Church, Washington County, Florida [*Species nova e Pectinidis ad aetatem oligocenicam pertinens apud* Duncan Church]. 3 figs., Journ. Washington Acad. Sc., XXIV, 8, 331-333. Washington (1934). **b - 1439**

*Pecten* (*Lyropecten*) *duncanensis* n. sp.

**Marino C.** - Sopra alcuni fossili sinemuriani di Sassorosso in Garfagnana (Toscana) [*De quibusdam fossilibus sinemurianis a* Sassorosso *in* Garfagnana (*Tuscia*) *provenientibus*]. 1 tav., Acta

Soc. Gioeniae Catin., XX, 2, N° 18, 15-19. Catania (1934). **b - 1440**

I calcari in esame, sono riferiti al Lias inferiore. Le specie studiate dall'A. sono: *Pentacrinus tubercolatus* Mill., *Terebratula Aspasia* Mgh., *T. Piccininii* Zitt., *Pecten Ugolini* Fuc., *Trochus epulus* D'Orb., alcuni esemplari appartenenti al genere *Phylloceras*, *Deroceras* sp. ind., *Microderoceras* sp., *Arietites jejunus* Dum., *Coroniceras* sp., *Atractites* sp.

**Marvick J.** - Some New Zealand Tertiary Mollusca [*Mollusca nova aetatis tertiariae in Nova Zelandia*]. 2 pls., Proc. Malacol. Soc. London XXI, 1, 10-21. London (1934). **b - 1441**

*Zeatrophon munitus*, *Uttleya arcana*, *U. crenata* (Pliocene); *Bartrumia tenuiplicata* (*Raeta* t. Bartrum), *Zeacolpus pukeuriensis*, *Galeodea apodemetes* (Miocene); *Opella hendersoni*, *Egotistica scirrhoma*, *Cominella* (*Paracominia*) *ferrari* (Oligocene); *Fascioplex liraecostata* (*Galeodes* 1. Suter) (Eocene).

**Maugeri P. G.** - Sopra alcuni coralli del Trias superiore di M.e Scalpello (Enna) [*De quibusdam corallis aetatis Triassicae superioris in monte* Scalpello (*Enna*)]. 1 tav., Accad. Gioenia di Sc. Natur. Catania, 67, ser. 2ª, 40-48. Catania (1934). **b - 1442**

I Corallari descritti provengono dalle marine argillose della regione Acquanova, e sono stati raccolti insieme a una ricchissima fauna di Cefalopodi ed a parecchi altri organismi. Le specie studiate sono: *Montlivaultia styliformis* n. sp. *Isastraea sicula* n. sp. *Latimaeandra* cfr. *labyrinthica* Klpst. sp., *Thamnastraea* sp. ind.

**McLearn F. H.** - The Ammonoid Genera *Gastroplites* and *Neogastroplites* [*De Gastroplitis et Neogastroplitis*]. 4 pl., Trans. R. Soc. Canada, Ser. 3, XXVII, 4, 13-26. Ottawa (1933). **b - 1443**

Diagnosis and description of the following forms: *Gastroplites; G. canadensis* (Whiteaves), *G. canadensis* var., *G. stantoni* McLearn, *G. allani* McLearn, *G. kingi* McLearn, *G. anguinus* Mc Learn, *G. spiekeri* McLearn. *Neogastroplites; N. cornutus* (Whiteaves), *N. selwyni* n. sp.

**McLearn F. H.** - Pelecypods of the Lower Cretaceous Clearwater Formation, Northern Alberta [*Pelecypoda ad formationem* Clearwater *pertinentia aetatis Cretaceae Inferioris in* Northern Alberta]. 3 pls., Trans. R. Soc. Canada, Ser. 3, XXVII, 4, 139-156. Ottawa (1933). **b - 1444**

Description of the Clearwater formation, which outcrops along Athabaska river from Point La Biche to below McMurray. The entire formation is marine and the marine *Deshayesites*, *Beudanticeras affine* or *Inceramus dowlingi* fauna ranges throughout it. Description of nine new species of the pelecypod fauna, which are as follows: *Entolium irenense* n. sp., *Pecten alcesianus* n. sp., *Camptonectes matonabbei* n. sp., *Goniomya matonabbei* n. sp., *Thracia kissoumi* n. sp., *Psilomya peterpondi* n. sp., *P. elongatissima* n. sp., *Arctica limpidiana* n. sp., *Protocardia alcesiana* n. sp., *Turnus lacombi* n. sp.

**Meinzer O. E.** - Geologic Reconnaissance of a Region adjacent to Guantanamo Bay, Cuba. With an appendix: Report on Species of Fossils collected in Cuba by O. E. Meinzer in November and December, 1915 by T. Wayland Vaughan [*Recognitio geologica regionis cuiusdam prope bajam* Guantanamo (*in insula Cuba*). *Appendix. Relatio de speciebus fossilibus in Cuba collectis a* Meinzer *mensibus novembri et decembri A. 1915*]. 2 figs., Journ. Washington Acad. Sc., XXIII, 5, 246-263. Washington (1933). **b - 1445**

The Fossils listed, *Coelenterata*, *Foraminifera*, *Algae*, *Mollusca* and *Brachiopoda*, belong to the Eocene, Miocene and recent epochs.

**Melinossi R.** - Su di un echinide della Patagonia [*De Echinide patagonico*]. 3 fig., Atti Soc. Toscana Sc. Natur., XLIV, 2, 32-39. Pisa (1935). **b - 1446**

Sono descritti due esemplari di un echinide spatangoide della famiglia delle Ananchitidee, appartenenti al genere *Holaster*, e alla nuova specie *H. Feruglioi*, del Cretaceo medio-superiore.

**Mezneries I.** - Stájerországi Slir-fauna és új alakjai - Steiermärkische Schlierfauna und ihre neuen Formen [*De fauna stratigraphica regionis* Steiermark *eiusque novis formis*]. (In Dtsch. Ung. Rés.). 1 Taf., 1 Tab. a. T., Földtani Közlöny (Geol. Mitt.), LXV, 10–12, 332-341. Budapest (1935). **b - 1447**

Ergebnisse einer Bestimmung des Fossilmaterials des Schliers des steierischen Beckens, welches dem Vf. überlassen wurde; das Material enthält zahlreiche marine Conchylien, Foraminiferen, Echinodermen und Brachiopoden, von denen die folgenden neuen Formen in der Arbeit beschrieben sind: *Amussium* (*Variamussium*) *felsineum* For., n. var. *styriaca*, *Pecten* (*Chlamys*) *kautskyi* n. sp., *Lima* (*Mantellina*) *làbeni* n. sp.

**Miller A. K.** - Burlington Goniatites [*Goniatitidae ad* Burlington *pertinentes*]. 3 figs., Amer. Journ. Sc., XXX, fifth ser., 179, 432-437. New Haven, Conn. (1935). **b - 1448**

Goniatites are very rare in the Middle Mississippian or Valmeyer series of America. Five species representing the genus *Münsteroceras* are described here, one of which as new: *M. mitchelli* n. sp.

**Miller A. K. & Britts Owen J.** - Cherokee Nautiloids of the northern Mid-Continent Region [*Nautiloidea marina ad* Cherokee *pertinentia*]. 12 pls., 7 figs., Univ. Iowa Studies, XVI, 3, 186-273. Iowa (1934). **b - 1449**

Morphology, taxonomy, geologic and geographic distribution of Lr. Pennsylvanian Nautiloids of Missouri, Kansas, and Iowa. About 13 species are new.

**Miloradovich B. V.** - Materials to the Study of the Upper Paleozoic *Brachiopoda* from the Northern Island of Novaya Zemlya [*Res collectae ad Brachiopoda studenda palaeozoica ab insula septemtrionali Novae Zemliae provenientia*]. (Russ. & Engl. Text.), 35 fig., 6 tabl., Trans. Arct. Inst., XIX, 1-168. Leningrad (1935). **b - 1450**

Description of about 72 species, 13 of which are new, from nine different parts of Novaya Zemlya. For every place there is a descriptive part with indications of geological stage, location, resemblances and distinctions followed by a conclusion.

**Miranda F.** - Algas coralináceas fósiles del Terciario de San Vicente de la Barquera (Santander) [*Algae corallinaceae fossiles aetatis tertiariae in* San Vicente de la Barquera]. 3 figs., 5 lám., Bol. Soc. Españ. Hist. Natur., XXXV, 5, 279-287. Madrid (1935). **b - 1451**

*Archaeolithothamnium Lugeoni*, *Lithothamnium camarasae*, *L. Vaughani*, *Lithophyllum simplex*, *L. Royoi* nov. sp., *Melobesia Lemoinei* nov. sp., *M. melobesioides*, *Jania Mengaudi*.

**Morley D.** - Tertiary Faunas. Vol. I. Systematic (Foraminifera, Echinoids, Lamellibranchs, Gastropods. Other Invertebrates. Vertebrates). Vol. II. The Sequence of Tertiary Faunas [*Faunae*

*tertiariae. Systematica. Series faunarum tertiariarum*]. Illustr., T. Murby & Co. London (1934–35). **b - 1452**

**Morrow A. L.** - *Foraminifera* and *Ostracoda* from the upper Cretaceous of Kansas [*Foraminifera et Ostracoda aetatis Cretaceae superioris in* Kansas]. 3 pls., Journ. Paleontol., VIII, 2, 186-205. Oklahoma (1934). **b - 1453**

Description of 37 spp. of *Foraminifera* and 7 spp. of *Ostracoda*. Several new species.

**Muir-Wood H. M.** - On the International Structure of Some Mesozoic *Brachiopoda* [*Brachiopoda quaedam mesozoica. Quaestio de interna structura*]. 14 figs., 2 pl., Phil. Trans. R. Soc., ser. B, CCXXIII, 505, 511-567. London (1934). **b - 1454**

Study on the homoeomorphy of seven common Mesozoic species of as many different genera (including *Digonella* nov.) of *Brachiopoda*; general description and characteristics of the forms studied; discovery of new morphologic structures, such as accessory sockets, denticulum, denticula cavity, and septalial plate.

**Nagao T.** - Cretaceous Mollusca from the Miyako District, Honshû, Japan [*De Molluscis aetatis cretaceae a districtu* Miyako *provenientibus*]. Journ. Fac. Sc. Hokkaidô Imp. Univ., IV, 2, 177-277. Sapporo (1934). **b - 1455**

Among the fossils found in the Cretaceous deposits of the Miyako district, *Lamellibranchiata* and *Gastropoda* have not been yet much studied, in spite of their richness and remarkably good state of preservation. In the present paper author treats 39 species of *Lamellibranchiata*, of which 21 are new, and 28 species of *Gastropoda* most of which are new. Calcareous *Algae*, *Foraminifera*, Corals and Echinoids have also been found.

**Nikiforova A. I.** - Contribution to the Stratigraphy of the Upper Palaeozoic of the North-Eastern Outskirts of the Great Donetz Basin [*De stratigraphia Paleozoicae aetatis superioris zonae septemtrionalis orientalis Bacini* Donetz]. (In Russ., Engl. Rés.). 1 table, C. R. Acad. Sc. U. R. S. S., III, 5, 393-397. Léningrad (1934). **b - 1456**

Results of a study of a collection of *Bryozoa* gathered in the north-eastern part of the Great Donetz Basin at a depth of 273.40-275.40 m. Comparison of the fauna under discussion to those of the Upper Carboniferous of North America (Upper Pennsylvanian), and in particular to the fauna from the Cisco group Graham Formation, Texas, which shows an obvious affinity with the fauna compared.

**Nomura S. & Hatai K.** - On two Species of *Phalium* from the Neogene of Japan [*Species duae ad « Phalium » pertinentes, a strato neogenico Japonico provenientes*]. 1 pl., Jap. Journ. Geol. & Geogr., Trans., XI, 1/2, 49-53. Tokyo (1933). **b - 1457**

Description of *Phalium yokoyamai* n. n. *Phalium yabei* n. sp.; earlier records and habitats; comparison and relation between those two forms.

**Oostingh C. H.** - Die Mollusken des Pliozäns von Boemiajoe (Java) [*De Molluscis aetatis pliocenicae* Boemiajoe (*in* Java)]. 31 Abb., 1 Karte, 17 Taf. VIII + 247 S., Wetensch. Meded. Dienst Mijnb. Ned. Ind. 26. Bandoeng (1935). **b - 1458**

Die meisten hier beschriebenen Mollusken, von denen viele neu sind, stammen aus einem Meer mit geringer Tiefe.

**Öpik A.** - *Ristnacrinus*, a new Ordovician Crinoid from Estonia. With a Note by F. A. Bather [« *Ristnacrinus* », *novus crinoidis ordovicianus in Estonia. Nota adiungitur* auctore F. A. Bather]. Pl., Publ. Geol. Inst. Univ. Tartu, 40, 8 pp. Tartu (1934). **b - 1459**

**Öpik A.** - *Amphipora ramosa* (Phil.) in the marine Devonian of Estonia [« *Amphipora ramosa* » *in Devoniano marino Estoniae*]. Publ. Geol. Inst. Univ. Tartu, 41, 8 pp. Tartu (1935). **b - 1460**

**Öpik A.** - *Hoplocrinus*, Eine stiellose Seelilie aus dem Ordovizium Estlands [*Hoplocrinus, trunco carens ad aetatem Ordovicianam Estoniae pertinens*]. Taf., Publ. Geol. Inst. Univ. Tartu, 43, 8 pp. Tartu (1935). **b - 1461**

**Opitz R.** - Lebensbilder aus dem Hunsrückschiefer– Meer [*De fossilibus ad mare argilaceum* Hunsrück *pertinentibus*]. 4 Abb., Nat. u. Volk, LXV, 10, 504-509. Frankfurt a. M. (1935). **b - 1462**

Ein Teil der besonders gut erhaltenen Fossilien-serie aus den unterdevonischen Dachschiefern von Bundenbach und Gemünden wird hier an Hand sehr wohl gelungener Abbildungen gezeigt und beschrieben: *Hapalocrinus frechi* Jaekel, *Gemündina stürtzi* Traquair, *Palaeoisopus problematicus* Broili.

**Pagani M. P.** - Su alcuni Brachiopodi paleozoici di Sérdeles (Fezzan) [*De Brachiopodis palaeozoicis in* Serdeles (Fezzan)]. 1 tav., Atti Soc. Ital. Sc. Nat. e Mus. Civico di St. Natur., LXXIII, 3, 254-260. Milano (1934). **b - 1463**

Illustrazione dei fossili di Sérdeles: *Spirifer carinatus* Schnur. *S. carinatus* Schnur. var. *latissima* Scupin., *S. carinatus* Schmur. var. *serdelensis* n. f.

**Parona C. F.** - Osservazioni sul « *Permosoma tunicatum* » Jaekel della fauna permiana di Sicilia (Palazzo Adriano) e rivista sommaria della fauna stessa in rapporto colle faune coeve [*Observationes circa speciem « Permosoma tunicatum » ad faunam Permianicam Siculam pertinentem. Inspectio adiungitur compendiosa de eadem fauna pro faunis eiusdem aetatis*]. Atti R. Accad. Sc. Torino, Cl. Sc. Fis. Mat. e Nat., LXVIII, 7/10, 288-304. Torino (1933). **b - 1464**

Rivista della fauna fossile della Sicilia con speciale riguardo agli Evertebrati meno conosciuti: *Bryozoa*, *Echinodermata* ed *Anthozoa*. L'A. è del parere che *Permasoma tunicatum* Jaekel appartenga alle *Spongiae* invece che ai tunicati e sia da identificarsi con il *Sphaerospongia permotessellata* Parona.

**Poulsen Chr.** - The Silurian Faunas of North Greenland. I. The Fauna of the Cape Schuchert Formation [*De fauna siluriana Gröenlandiae Nordicae. De fauna pertinente ad formationem* Cape Schuchert]. 3 pls., 5 figs., Medd. om Grönland, LXXII, 1, 46 pp. København (1934). **b - 1465**

The fauna described in this paper consists of 42 species, of which 28 are specifically named and 20 are new. There are 2 Corals, 5 Graptolites, 12 Brachiopods, 20 Trilobites and 2 Ostracods.

**Principi P.** - Alcune osservazioni sulle analogie esistenti fra i terreni terziari dell'Albania e quelli dell'Italia centrale [*Observationes circa*

*conformitates inter terrena aetatis tertiariae in Albania et Italiae centralis terrena*]. (Bibl.). Atti R. Accad. Naz. Linc. Rend. Cl. Sc. Fis. Matem. e Natur., XX, 5/6, 200-204. Roma (1934). **b - 1466**

In ambedue queste regioni l'Eocene è caratterizzato dalla presenza di Nummuliti; solo nell'Oligocene alle Nummuliti si associano le Lepidocicline, le quali, poi, unite a forme di Anfistegine, Miogipsine ed Operculine, perdurano sino al Miocene medio. Analogie con alcune regioni appenniniche del Bolognese e delle Marche.

**Rathbun M. J.** - Fossil Crustacea of the Atlantic and Gulf Coastal Plain [*De crustaceis fossilibus ad planitiem pertinentibus in litoribus Oceani Atlantici*]. 26 pls., 2 figs., Geol. Soc. Amer. Spec. Pap., 2, 160 pp. Washington (?) (1935). **b - 1467**

Author deals with both the genesis and the stratigraphy of the known Crustacea (essentially crabs and lobsters) from the Cretaceous and Cenozoic formations of the Coastal Plain from Massachussetts to Texas. Three new genera are described: *Prehepatus, Ophtalmoplax* and *Scyllarella*. Of decapodes, the Cretaceous has 66 (34 new), the Eocen 51 (35 new); the Oligocene 5 (4), the Miocene 25 (8 new and 12 still living): the Pliocene 5, and the Pleistocene 14. Twelve new forms of Isopoda are described and two formerly known Stomatopoda.

**Raymond P. E.** - Report on Invertebrate Paleontology [*Relatio de palaentologia invertebratorum*]. Ann. Rep. Mus. Comp. Zoöl. Harvard College, 1934-1935, 33-36. Cambridge U. S. A. (1935). **b - 1468**

Collections of Trilobites in northern Vermont from older Paleozoic strata of Norway, Sweden and Esthonia with a view to facilitate comparison between American and northern European faunas. *Foraminifera* – collection of 960 spp. presented by Dr Cushman. List of accessions. Revisional work especially of Cephalopods.

**Rjazankine J.** - Les Ammonites de l'expédition maritime de Kara, 1934 [*Ammonites ad expeditionem maritimam pertinentes in mare Karensi A. 1934*]. (En russe). Vzryvn. Djelo, IX (17), 35-42. Moskva (1934). **b - 1469**

**Robertson G. M.** - The Ostracoderm Order Osteostraci [*Ordo « Ostracoderma » ad « Osteostraci » pertinens*]. Science, LXXXII, 2125, 282-283. New York (1935). **b - 1470**

With reference to the works of Stensiö and Patten the A. here gives a provisional classification with a key to characterize the families. Further research work is being carried out on the members of the order.

**Ruedemann R.** - Paleozoic Plankton of North America. Part I & II [*Substantiae planctonicae aetatis palaeozoicae in America Sept.*]. Geol. Soc. Amer. Mem., 2, 7-97. Washington D. C. (?) (1934). **b - 1471**

This memoir deals with the fossil representatives of floating or planktonic life found in the shallow-water deposits of epicontinental seas, and more particularly with the typical graptolite associations. Part I is an analysis of the small faunas in the typical graptolite associations. Part II of the memoir is concerned with the rare fossil associates of the graptolite, of which 49 are described, divided among 12 classes of organims; 22 new species and 3 new genera (2 cnidarians and 1 worm) are proposed.

**Ruedemann R. & Decker C. E.** - The Graptolites of the Viola Limestone [*Graptolites ad* Viola Limestone *pertinentes*]. 4 pls., Jour. Paleontol. VIII, 3, 303-327. Oklahoma (1934). **b - 1472**

Description of 30 spp. and vars. from Oklahoma, the following of which are new: *Desmograptus oklahomensis, Dicranograptus nicholsoni geniculatus, D. nicholsoni longibasalis* and *Climacograptus typicalis crassimarginalis.*

**Runzheimer H.** - *Proetus* (*Proetus*) *crassimargo* (F. A. Roemer, 1850) und einige verwandte Formen: *P.* (*P.*) *orbitatus* Barr., *P.* (*P.*) *koenemi* Maur., *P.* (*P.*) *gryphus* n. sp. [*Species « Proetus* (*Proetus*) *crassimargo » formaeque affines* (*in superiore titulo memoratae*)]. 5 Taf. a. T., Senckenbergiana, XVII, 3/4, 182-206. Frankfurt a. M. (1935). **b - 1473**

Eingehende Erörterung mit Berichtigungen früherer Fehlbestimmungen von den *Proetus* (*Proetus*) – Arten *crassimargo, orbitatus* und *koeni*. Beschreibung des ersten zusammenhängenden Panzers von *P.* (*P.*) *crassimargo* und *P.* (*P.*) *orbitatus*. Feststellung der Gesichtsnaht als sicherster Trennungsfaktor.

**Sakaura Katuhiko** - Pliocene and Pleistocene *Bryozoa* from Bôsô (I). I. *Bryozoa* of the Dizôdô Beds [*Bryozoa pliocenica et pleistocenica* Bôsô. I. « *Bryozoa* » *a stratis* Dizôdô *provenientia*]. 7 pls., Journ. Fac. Sc. Imp. Univ. Tokyo, IV, sect. II, 1, 1-48. Tokyo (1935). **b - 1474**

59 species of *Cheilostomata* and 18 species of *Cyclostomata*, including 20 new species and 3 new varieties are described.

**Saurin E.** - Sur la présence du Lias dans la province du Phu Yên (Sud Annam) et sur l'âge des grès supérieurs de l'Indochine du Sud-Ouest [*De Liassica aetate in Provincia* Phu Yên *deque aetate petrarum arenariarum superiorum in Indosinica regione sud-occidentali*]. C. R. Acad. Sc., CC, 4, 332-334. Paris (1935). **b - 1475**

Distribution des grès supérieurs dans l'Indochine du Sud-Ouest. Ces grès contiennent des intercalations peu épaisses d'une lumachelle calcaire dans laquelle l'A. a reconnu: *Pecten* (*Amussium*) *pumilus*, Lmck. var. *donaiensis mansuy*; *Trigonia* cf. *striata* Mill., avec de nombreux Ostréidés et de gros Pleurotomaries, espèces caractéristiques des affleurements toarciens. Au point de vue paléogéographique et structural, cette nouvelle zone de Toarcien marin permet d'envisager la continuité du sillon toarcien qui, partant de la Cochinchine, s'étend en direction NNE, jusqu'au Darlac septentrional.

**Schmid K.** - Biometrische Untersuchungen an Foraminiferen (*Globorotalia menardii* (d'Orb.), *G. tumida* (Brady) und *Truncatulina margaritifera* Brady, *T. margaritifera granulosa* Fisher) aus dem Pliozän von Ceram (Niederl. Indien) [*Investigationes biometricae in Foraminifera quorum species in superiore titulo memorantur ex Pliocenica aetate in* Ceram]. 3 Tab., 4 Abb., Eclogae Geol. Helvetiae, XXVII, 1, 45-134. Basel (1934). **b - 1476**

Durch seine Untersuchungen ist der Vf. zum folgenden Schluss gekommen: *Globorotalia* (*Pulvinulina*) *tumida* (Brady) ist die A-oder makrosphärische Form und *G.* (*P.*) *menardii* (d'Orb.) ist die B- oder mikrosphärische Form von *Globorotalia menardii* (d'Orb.). Die zwei anderen *Truncatulina*- Formen sollten eigentlich als *Truncatulina margaritifera* Brady mit einer A- oder makrosphärischen Form (*T. margaritifera* v. *granulosa*) und einer B-oder mikrosphärischen Form (*T. margaritifera*) bezeichnet werden. Ausserdem sind sämtliche Formen dimorphisch und nicht ritmorphisch.

**Schmidt H.** - Fischreste aus dem Taunusquarzit [*Piscium relicta aetatis quarziferae* Taunus]. 6 Abb., Palaeontol. Ztschr., XV, 4, 228-245. Berlin (1933). **b - 1477**

Von den hier beschriebenen, etwa 15 Formen (*Cyclostomata, Placodermata, Selachia, Acanthodea*), ist *Taunaspis eurystethes* neu.

**Schmidt H.** - Conodontenfunde in ursprünglichem Zusammenhang [*De Conodontis, originaria eorum connexione repertis*]. 8 Abb., 1 Taf., Paläontol. Ztschr., XVI, 76-85. Berlin (1934). **b - 1478**

Diese Arbeit ist aus grosser Bedeutung für die Paläoanatomie der Fische. Dem Vf. ist es gelungen, aus den Schiefern des ältesten Oberkarbons Westfalens, Ablagerungen eines stillen Meeresbodens, neun verschiedene Gruppen zu unterscheiden. (S. auch Bespr. von Edinger, Naturwiss. 46, S. 789, 1935).

**Schmidt H.** - Die bionomische Einteilung fossiler Meeresböden [*Partitio bionomica fundorum marinorum fossilium*]. 24 Abb., 154 S., Fortschr. Geol. u. Paläontol., XII, 38. Berlin (1935). **b - 1479**

Die Einteilung der verschiedenen Sediment-typen wird in diesem Werke vom hydrobiologischen Standpunkt d. h. auf Grunde des Zusammenhanges zwischen Sedimentbeschaffenheit und Benthos behandelt. Besonders berücksichtigt werden das Adriatische Meer und das Mittelmeer, die atlantische Küste Frankreichs, die Nord-und Ostsee.

**Schneegans D.** - Sur la découverte des couches à *Cardita Beaumonti* au Gabon (Afrique équatoriale Française) [*De inventis stratis speciem « Cardita Beaumonti » continentibus, in* Gabon (*Africa Aequatoriali Gallica*)]. C. R. Acad. Sc., CC, 2, 159-161. Paris (1935). **b - 1480**

Résultats de l'étude de la côte au Nord de l'embouchure de la lagune d'Iguéla; découverte dans les couches silicifiées qui la constituent, de fossiles, parmi lesquels l'A. a pu reconnaître plusieurs formes du groupe de *Cardita Beaumonti* d'Arch. Importance de ces gisements.

**Semichatova S. V.** - Die carbonischen Brachiopoden von der Berch'insel (Nowaja Semlja). [*De Brachiopodis carboniferis insulae* Berch]. (Russ. Text, Dtsch. Rés.). 2 Taf., Trans. Inst. Mar. Fish. & Oceanogr., Geol. works on Novaya Zemlya, I, 72-109. Leningrad (1935). **b - 1481**

Diese Arbeit stellt die erste Beschreibung der carbonischen Fauna von der Berch'insel dar, die Bestimmung wird aber auf Grund des schlechten Erhaltungszustandes des Materiales erschwert. Liste der gefundenen Arten, von denen 4 Arten und 2 Varietäten für die Berch'insel neu sind.

**Sickenberg O.** - Beiträge zur Kenntnis tertiärer Sirenen. I. Die eozänen Sirenen des Mittelmeergebietes. II. Die Sirenen des Belgischen Tertiärs [*Contributio in Sirenia aetatis tertiariae cognoscenda. I. Sirenia eocenica regionis Mediterraneae. II. Sirenia ad aetatem tertiariam Belgicam pertinentia*]. Zahlr. Fig. i. T. u. a. T., Masstabellen. Mém. Mus. R. Hist. Natur., 63, 1-352. Bruxelles (1934). **b - 1482**

Die eozänen Sirenen des Mittelmeergebietes: 1. Teil. Die eozänen Sirenen Aegyptens. Allgemeine Bemerkungen über die Zusammengehörigkeit der Funde. 2. Teil. Die eozänen Sirenen Europas: Die eozänen Sirenen Italiens. Die eozänen Sirenen Siebenbürgens. Anhang: Ungarn, die eozänen Sirenen Frankreichs. Uebersicht über die zeitliche und systematische Gruppierung der eozänen Sirenen. *Eotherium* Owen: *E. aegyptiacum* Owen, *E.* (*Eosiren*) *abeli* n. sp., *Protosiren* Abel, *P. fraasi* Abel, *Prototherium* de Zigno, *P. veronense* de Zigno, Die Sirenen des belgischen Tertiärs: Die oligozänen und miozänen Sirenen Belgiens. Erhaltungzustand. Lebens- und Nahrungsweise. Verwandtschaftliche Stellung. *Halitherium schinzi* f. *delheidi* Hartl., *Miosiren kocki* Dollo. Nachtrag: Kurze Besprechung von zwei nach der Veröffentlichung dieses Werkes erschienenen Arbeiten, welche für die Kenntnis der Sirenen sehr wichtig sind.

**Silvestri A.** - Rocce e fossili del paleozoico superiore raccolti dalla spedizione geografica italiana nel Caracorum (1929). II. I fossili [*Saxa et fossilia aetatis palaeozoicae superioris collecta perdurante expeditione Italica ad* Caracorum (*1929*). *Fossilia*]. 3 tav., Mem. Pont. Acad. Scient. Novi Lyncaei, II, 3, 79-118. Roma (1935). **b - 1483**

Si illustrano i fossili raccolti nel Caracorum dalla spedizione condotta dal Principe Ajmone di Savoia, Duca di Spoleto, nel 1929, che confermano pienamente nelle regioni esplorate la presenza di due orizzonti dell'Antracolitico marino, cioè dell'Uraliano superiore a *Fusulinidae* e dell'Artinschiano superiore a *Neoschwagerinae*.

**Smiser J. S.** - A Revision of the Echinoid Genus *Echinocorys* in the Senonian of Belgium [*Reinspectio generis « Echinocorys » in strato senoniano Belgico*]. 2 pls., 25 figs., tabls., Mem. Mus. R. Hist. Natur., 67, 1-51. Bruxelles (1935). **b - 1484**

Character of value in separating species and varieties of *Echinocorys*. Descriptions and occurrences of species belonging to the family *Ananchitidae*, genus *Echinocorys breynius*. Evolution and stratigraphic distribution.

**Spath L. F.** - Catalogue of the Fossil *Cephalopoda* in the British Museum. Part 4: The *Ammonoidea* of the Trias [*Index Cephalopodorum fossilium in* British Museum. *Ammonoidea aetatis Triassicae*]. 18 pls., xvi + 521 pp., Brit. Mus. (Natur. Hist.). London (1934). **b - 1485**

This part includes only about half of the Triassic Ammonoids, namely, the Pronoritida, Xenodiscida, Meekoceratida and part of the Ceratida of Lower and Middle Trias. The remaining groups of Middle and Upper Trias will be dealt with in a forthcoming volume.

**Stefanini G.** - Sulla scoperta di resti fossili di Vertebrati nella Sirtica Orientale [*De inventis relictis fossilibus ad Vertebrata pertinentibus in Orientali regione Syrtica*]. Tav. 2 f. t., Boll. Geogr., 5/6, 153-157. Tripoli (1934). **b - 1486**

L'A. riferisce sul riconoscimento, presso Sahabi di marne gessose verdastre alternanti con qualche filaretto calcareo e con sabbie silicee, nelle quali alcuni livelli erano ricchi di avanzi di Vertebrati marini: conchiglie, avanzi di pesci (Squali, Teleostomi vari) e avanzi di animali terrestri.

**Sutton A. H.** - Evolution of *Pterotocrinus* in the Eastern Interior Basin during the Chester Epoch [*Evolutio generis « Pterotocrinus » in interiore sinu orientali, aetate Chesteriana*]. 2 pls., Journ. Palaeontol., VIII, 4, 393–416. Oklahoma (1934). **b - 1487**

Three subgeneric groups (gentes) are defined and discussed, each named after its type species. Thirteen previously defined spp. are redescribed and 13 new species erected.

**Suzuki Kôiti & Takai Huyuzi** - Fossiliferous Bed in the Vicinity of Tako–mati, Tiba Prefecture [*De strato fossilifero apud* Tako-mati]. (In Jap.). Journ. Geol. Soc. Japan., XLII, 1–35. Tokyo (1935). **b - 1488**

In the fauna contained in the fossil bed there are determined 1 species of coral, 202 of *Mollusca*, 1 of *Brachiopoda*, 2 of *Balanus* and 3 of *Echinoidea* which are mostly Japanese endemic forms.

**Tavani G.** - Sulle anomalie negli ambulacri di alcuni Echini del Miocene della Cirenaica [*De abnormitatibus in ambulacris aliquorum Echinorum aetatis Miocenicae Cirenaicae*]. 3 fig., Atti Soc. Tosc. Sc. Nat., Proc. Verb., XLIV, 5, 119-123. Pisa (1935). **b - 1489**

Sono descritte le anomalie presentate da due Echini del Miocene della Cirenaica. Vengono riprese in esame le categorie create in proposito dal Thiéry e dal Séguin e ne viene proposta una nuova – [A.].

**Thompson M. L.** - The Fusulinids of the Des Moines Series of Iowa [*Fusulinidae ad seriem* Des Moines, Iowa, *pertinentes*]. 4 pls., Univ. Iowa Studies, XVI, 4, 277-332. Iowa (1934). **b - 1490**

Description of 16 spp., 13 of which are new belonging to the genera *Fusulinella*, *Wedekindellina*, and *Fusulina*. All known American representatives are listed.

**Thorpe M.** - A Newly Mounted Specimen of *Portheus molossus* Cope [*Exemplar « Portheus molossus » denuo recompositum*]. 2 figs., 1 table. Amer. Journ. Sc., XXVIII, 164, 121-126. New Haven, Conn. (1934). **b 1491**

Detailed description of a magnificent skeleton of the primitive Cretaceous teleostean fish *P. molossus* recently mounted and placed on exhibition in the Great Hall of the Peabody Museum of Natural History.

**Troedsson G.** - Ueber die Verbreitung von *Dalmanites eucentrus* und *Dalmanites mucronatus* im untersten Gotlandium Schwedens [*De distributione specierum « Dalmanites eucentrus » et « D. mucronatus » in strato geologico inferiore Gotlandico Suetio*]. Senckenbergiana, XVII, 3/4, 177-181. Frankfurt a. M. (1935). **b - 1492**

Ergänzung und kritische Betrachtung der Arbeit von H. Schmidt « Das Verhältnis von *Dalmanites eucentrus* (Ang.) zu *Dalmanites mucronatus* (Brongn.) (Senckenb. XVII, 1935). Vf. vertritt die Ansicht von Transgressions-Erscheinung als Ursache der Veränderungen der Fazies und Fauna des *Dalmanites*- Schiefers.

**Ueji T.** - *Lamprotula nojimensis* n. sp. a Fossil Unionid from the Kitamatsuura Coal-Field, Northern Kyushu, Japan [*De « L. nojimensis », Unionide fossilium in depositis carboniferis in regione* Kitamatsuura]. 8 figs., Venus, IV, 5, 284-288. Kyoto (1934). **b - 1493**

Description of this new fossil species belonging to the Oligocene.

**Vincienne H.** - Sur l'extension et la position stratigraphique des bancs à Stromatoporoïdés dans l'Ouest du Jura méridional, aux environs de Villereversure (Ain) [*De extensione et positione stratigraphica vadorum quae Stromatoporoidea continent in* Jura *meridionali apud* Villereversure]. C. R. Acad. Sc., CC, 16, 1420-1423. Paris (1935). **b - 1494**

L'A. démontre que la présence des Hydrozoaires stromatoporoïdés, dont la plupart appartiennent à l'espèce *Burgundia trinorchii*, qui est particulièrement constante dans la région ouest du Jura méridional, constitue un nouveau repère caractéristique pour la détermination du Lusitanien supérieur; il semble que les conditions des mers en cette période aient été très favorables au développement de ces organismes.

**Wade R. T.** - On a New Triassic Catopterid Fish from New South Wales [*Piscis novus catopteridis aetatis triassicae ad regionem* New South Wales *pertinens*]. 3 figs., Ann. and Magaz. Natur. Hist., XII, 67, 121-125. London (1933). **b - 1495**

*Brookvalia* erected for *B. gracilis*, *B. propennis* n. sp., and *B. parvisquamata* n. sp.

**Wade R. T.** - The Triassic Fishes of Brookwale, New South Wales [*De piscibus aetatis triassicae in regione* Brookwale (New South Wales) *repertis*]. 10 pls., xiv + 110 pp., Brit. Mus. (Natur. Hist.). London (1935). **b - 1496**

**Wanner J. & Sieverts H.** - Zur Kenntnis der permischen Brachiopoden von Timor 1. *Lyttonidae* und ihre biologische und stammesgeschichtliche Bedeutung [*De cognoscendis Brachiopodis permianicis ad* Timor *pertinentibus. « Lyttonidae » earumque momentum biologicum et genealogicum*]. 25 Abb., 4 Taf., N. Jahrb. Beil., LXXIV, Abt. B, 201-281. Stuttgart (1935). **b - 1497**

7 neue Formen sind hier aufgezeichnet. Ein besonderes Kapitel ist ihrer Entwicklungsgeschichte gewidmet.

**Wells J. W.** - Notes on some European Upper Cretaceous Corals [*De corallis quibusdam europaeis ad stratum cretaceum superius pertinentibus*]. Ann. and Magaz. Natur. Hist., XIV, 81, 385-390. London (1934). **b - 1498**

Emendments of some spp.: *Astrocoenia formosissima* n. sp. instead of *Astraea f. Sowerby*, *Stephanocoenia striata* n. sp. instead of *Astraea s.* Goldfuss, *Nefocoenia ambigua* n. sp. instead of *Astraea a.* Sow. = *N. decussata* Oppenheim; other spp. of *Stephanocoenia* prove to be synonymous with *S. striata*; *Aulopsammia* Reuss is not synonym with *Epiphaxum* Lonsd. but there is a possible synonymy pointed out between *Mesomorpha* and *Thamnasteria*.

**Wells J. W.** - Corals from the Cretaceous and Eocene of Jamaica [*De corallis ad strata cretacea et eocenica pertinentibus in* Jamaica]. 3 pls. Ann. and. Magaz. Natur. Hist., XV, 86, 183-194. London (1935). **b - 1499**

*Astrocoenia dixae* n. sp., *Favia ? gregoryi* n. sp., *Colpophyllia duncani* n. sp., *Cyclolites thomasi* n. sp., *Pseudocolumnastraea eyrei* n. sp. (Columnastraea e. Duncan), *Trechmannaria montanaroae* n. sp., *Meandrarea clarendonensis* n. sp. and *Elephantaria tottoni* n. sp.

**Wetzel O.** - Die in organischer Substanz erhaltenen Mikrofossilien des Baltischen Kreidefeuersteins [*De microfossilibus qui continentur in substantia organica petrae siliceae Maris Baltici*]. 15 Textfig., 7 Taf., Palaeontographica, LXXVII & LXXVIII, 141-186, 1-110. Stuttgart (1933). **b - 1500**

Ein sehr interessantes Werk, in welchem eine ganze Welt von marinen Mikrofossilien beschrieben ist, mit besonderer Berücksichtigung von Flintsteinen originaler aber diagenetischer Herkunft, welche scheinbar öfters in proterozoischen Strata hervorkommen. Methoden.

**Wheeler H. E.** - New Trilobite Species from the Anthracolithic of Northern California and *Griffithides conwayensis*, a new Name for a Trilobite Species from the Atoka Formation of Arkansas [*Trilobita. Species novae ab Antracolitico Califor-*

*niano Nordico provenientes. Agitur etiam de « Griffithides conwayensis » nomine novo speciei trilobiticae assignato ad formationem* Atoka (Arkansas) *pertinente*]. 6 pl., Trans. San Diego Soc. Natur. Hist., VIII, 8, 47-58. San Diego (1935). **b - 1501**

*Proetus « ellipticus »* of the Baird formation of northern California has been renamed and described as *P. bairdensis* n. sp. *Griffithides nosoniensis* n. sp. is described by the A. in another paper.

**Withers R. B. & Keble R. A.** - The Palaeozoic Starfish of Victoria [*Stella marina palaeozoica in* Victoria]. 3 Pl., Proc. R. Soc. Victoria, n. ser., XLVI, 2, 220-249. Melbourne (1934). **b - 1502**

There are now fifteen species known from Victoria, belonging to eight genera: *Hudsonaster, Caractacaster, Promopalaeaster, Petraster, Urasterella, Salteraster, Schuchertia* and *Palasterina.*

**Woodward Smith A.** - Notes on some recently discovered Palaeozoic Fishes [*De piscibus quibusdam palaeozoicis nuper inventis*]. Ann. and Mag. Natur. Hist., XIII, 77, 526-528. London (1934). **b - 1503**

Emendments and similarities of several species.

**Yabe H. & Hanzawa S.** - *Foraminifera?* Remains from Ordovician Limestone of Manchuria [*Foraminifera. Relicta a calcare ordoviciano Manciuriae provenientia*]. 3 figs., Proc. Imp. Acad., XI, 2, 55-57. Tokyo (1935). **b - 1504**

Results of a miscroscopic examination of a fine-grained, gray limestone with numerous round spots collected from the upper part of the Ordovician Ssu-yen formation, Manchuria; the spherical bodies observed strongly remind of certain monothalamous Foraminifera in form and size, like *Orbulina*, and sometimes form more or less prominent relief on weathered surface of the limestone, closely resembling shells of arenaceous Foraminifera, such as *Psammosphera.*

**Yabe H. & Hatai K.** - On Some Brachiopoda from the « Ryûkyû Limestone » of Kikai-zima and Southwestern Formosa (Taiwan) [*Brachiopoda quaedam ab Albarese regionis* « Ryûkyû » *provenientia, praecipue a regionibus* Kikai-zima *et Formosa sudoccidentali*]. 1 pl., Jap. Journ. Geol. & Geogr., Trans., XII, 3/4, 93-102. Tokyo (1935). **b - 1505**

This limestone appears to bear a faunal facies not found in northern Formosa or Japan proper which may indicate a warm water condition. Seven forms are described, four of which are new.

**Yabe H. & Mabuti S.** - On Two Upper Palaeozoic Nautiloids from Japan and China [*De novis duobus Nautiloideis palaeozoicis a Japonia et regione Sinensi provenientibus*]. 1 pl., Jap. Journ. Geol. & Geogr., Trans., XII, 1/2, 9-12. Tokyo (1935). **b - 1506**

After some general remarks as to the formation in which the specimens dealt with in this article have been collected, the authors give the description of *Shansinautilus* gen. nov., *S. ozakii* sp. nov., and *Metacoceras* Hyatt, *Metacoceras* sp. indet.

**Yabe H. & Shimizu S.** - Triassic Deposits of Japan [*De triassicis depositis ad Japoniam pertinentibus*]. 1 tabl., Jap. Journ. Geol. & Geogr., Trans., X, 3, 4, 87-98. Tokyo (1933). **b - 1507**

The total surface area of Triassic deposits, their stratigraphical relation to the older and younger formations. Distribution of the different beds: *Pseudomonotis ochotica*, the most widespread one, *Hollandites, Daonella, Oxytoma-Myoconcha, Halobia* etc.

**Yabe H. & Sugiyama T.** - Discovery of *Amphipora* and *Clathrodictyon* in the Permian of Japan [« *Amphipora* » *et* « *Clathrodictyon* » *in strato permianico Japonico reperta*]. 3 fig., Jap., Journ. Geol. & Geogr., Trans., XI, 1/2, 19-23. Tokyo (1933). **b - 1508**

The material described here and collected in a small valley near Nakamura-machi, Iwaki province offers a special interest as it is the first instance of *Amphipora* and *Clathrodictyon* occurring in a geological formation in Japan.

**Yabe H. & Sugiyama T.** - A New Species of the Genus *Ranina* (*Lophoranina*) from Hahazima, Ogasawara Group (Bonin Islands), Japan [*Species nova generis* « *Ranina* » *ab* Haha-zima *proveniens*]. 2 figs., 1 pl., Jap. Journ. Geol. & Geogr., Trans., XII, 1/2, 1-4. Tokyo (1935). **b - 1509**

Description and diagnosis of a crab belonging to a new species of the genus *Ranina*, subspecies *Lophoranina*, – *R.* (*L.*) *toyosimai* sp. n., of which a number of specimens has been collected by the junior author while visiting a calcareous tuffite exposed at a sea cliff of Nisiura on Hahasima, one of the islands of the Ogasawara Group (Bonin Island). The new form described is more like the Indian species than Mediterranean types and is especially similar to *Ranina* (*Lophoranina*) *bakeri* A. M. Edwards.

**Yabe H. & Sugiyama T.** - Note on a New Fossil Coral, *Saipania tayamai*, gen. et sp. nov., Found in the Island Saipan, Mariana Group [*De novo quodam corallo fossili* « *S. tayamai* » *in insula* Saipan *reperto*]. 2 figs., 2 pl., Jap. Journ. Geol. & Geogr., Trans., XII, 1/2, 5-7. Tokyo (1935). **b - 1510**

Diagnosis, locality and geological horizon of *S. tayamai* Yabe and Sugiyama gen. et sp. nov., a peculiar fossil collected by Mr. R. Tayana from a conglomerate bed of Densin-yama on the island Saipan, Mariana Group. It is a small fragmental specimen, but it exhibits very characteristic features and is similar to the genus *Diplochaetes* established by W. Weissermel from the Diamond bed on Bogenfels, South Africa: the two forms are sufficiently different in certain features to warrant their generic separation.

**Yabe H. & Sugiyama T.** - *Circopora* Found in Japan [« *Circopora* » *in Japonia reperta*]. 1 pl., Jap. Journ. Geol. & Geogr., Trans., XII, 1/2, 13-15. Tokyo (1935). **b - 1511**

The present note comprises the diagnosis of two forms of *Circopora* found in Japan, i. e.: *C.* aff. *faveolata* Waagen & Wentzel and *Circopora*? sp. The materials on which the two forms are based are found respectively in the Kitakami Mountainland and Awa province.

**Yakowlew N.** - Crinoidi permiani di Sicilia [*Crinoidea permianica Sicula*]. 2 fig., 2 tav., Palaeont. Italica, Mem. di Paleont., XXXIV, n. ser. IV, 269-283. Pisa (1935). **b - 1512**

Descrizione e illustrazione dei seguenti crinoidi del Permiano in Sicilia: *Paragaricocrinus mediterraneus* n. g. n. sp., *Monobrachiocrinus siciliensis* n. g., n. sp., *Tetrabrachiocrinus fabianii* n. g., n. sp., *Graphiocrinus fossatotuberculatus* n. sp., *Cibolocrinus nodosus* n. sp., *Erisocrinus Stefaninii* n. sp., *Basleocrinus cryptobasalis* n. sp., *Palermocrinus jaekeli.*

**Zilch A.** - Zur Fauna des Mittel-Miocäns von Kostej (Banat), Typus-Bestimmung und Tafeln zu O. Boettger's Bearbeitungen [*De fauna aetatis miocenicae medio-centralis in* Kosley. *Typorum determinatio tabulaeque a* Boettger *perfectae*]. 535 Abb. a. 22 Taf., Senckenbergiana, XVI, 4/6, 193-302. Frankfurt a. M. (1934). **b - 1513**

Hier sind sämtliche Arten zusammengefasst, die überhaupt von Kostei als neu in die Wissenschaft eingeführt worden sind. mit Ausnahme der von Hoernes & Auinger 1879 aufgestellten 9 Gastropoden-Arten. Angabe von Holotypus, Lectotypus, Locus typicus, Material und Vorkommen.

**Zuffardi-Comerci R.** - Corallari paleogenici dell'isola di Rodi [*Corallaria palaeogenica insulae Rhodos*]. 2 fig., Atti R. Acc. Sc. di Torino. Cl. Sc. Fis., Mat., e Nat., LXX, 1, 411-429. Torino (1934-35). **b - 1514**

L'A. descrive un gruppo di fossili paleogenici dell'isola di Rodi costituito da 18 forme di Corallari – di cui due nuove specie – ed una forma di Briozoario. La Corallofauna è nuova per l'isola e, con la presenza di specie caratteristiche, conferma l'esistenza di livelli paleogenici, in particolare dell'Eocene superiore e dell'Oligocene medio già rilevati da altri autori.

## PHYLOGENIA

**Berg L. S.** - Sur les unités taxonomiques chez les Poissons [*De unitatibus taxonomicis in Piscibus*]. Bull. Mus. Nat. Hist. Natur., VII, 1, 79-84. Paris (1935). **b - 1515**

Bref aperçu des principes adoptés par l'A. pour la nomenclature des Poissons: Unités géographiques et héréditaires; unités non-géographiques, héréditaires; formes non-géographiques et non-héréditaires.

**Chatton E. & Biecheler B.** - Les *Coccidinidae* Dinoflagellés coccidiomorphes parasites de Dinoflagellés, et le phylum des *Phytodinozoa* [« *Coccidinidae* » *Dinoflagellata coccidiomorpha parasitica in Dinoflagellatis. De phylogenia in* « *Phytodinozoa* »]. 1 fig., C. R. Acad. Sc., CXCIX, 252. Paris (1934). **b - 1516**

Les formes nouvelles, décrites ici, *Coccidinium* n. gen. *Legeri* n. sp. et *C. Duboscqui*, n. sp., sont des Protistes dont les stades végétatifs et de multiplication sont des Coccidies, tandis que leurs germes sont des Dinoflagellés du type syndinien. Elles constituent le type d'un ordre nouveau: les *Coccidinea* avec la famille des *Coccidinidae* (ou *coccidiniacae*) dont on peut dériver un phylum de souche péridinienne: les *Phytodinozoa*.

**Foxon G. E. H.** - Some Functional Considerations in the Origin and Evolution of the Arthropoda [*Considerationes de functione pro origine et evolutione in Arthropodis*]. Biol. Gen., XI, 2, 107-121. Wien & Leipzig (1935). **b - 1517**

From the study of the pre-oral portion of the head, blood system, appendages, organs of excretion and sense on ancestral *Arthropoda, Arachnida, Diplopoda, Insecta* and *Crustacea*, the A. points out three degrees of evolutional structure. The terrestrial origin of the Arthropoda is discussed and proved.

**Gregory W. K.** - A Study of the Evolution of natural Mechanisms [*Studium evolutionis quoad mechanisma naturalia*]. 2 pls., 302 figs., Trans. Amer. Phil. Soc., XXIII, 2, 75-481. Philadelphia (1933). **b - 1518**

Necessity of a synthesis of taxonomy and phylogeny with the study of the fish skull as a natural mechanism. Evolutional and comparative anatomical studies; the fish skull as a complete natural mechanism, analysis of the different parts of the skull and factors that have determined different types of skulls. Bibl. and index.

**Hubbs C. L.** - Racial and individual Variation in Animals, especially Fishes [*De variationibus ex individuo et ex stirpe praecipue in piscibus*]. Amer. Natural., LXVIII, 115-128. Boston (1934). **b - 1519**

A. proposes an experimental system on a genetical basis instead of the Linnean system collecting material for his study especially from natural fish populations and statistics of variation given by pisciculturists and commercial fishing establishments. The principal factors studied concern migration, phototaxis, distribution, relation between formation of races and the individual development as well as relation between variation and the chemical milieu.

**Kändler R.** - Rassenkundliche Untersuchungen an Plattfischen. 1. Variabilitätsstudien an den Flossenstrahlen- und Wirbelzahlen der Ostseeschollen [*Investigationes phylogeneticae de Pleuronectidis. Studia de variabilitate quoad radios pinnarum deque numeris vertebrarum in soleis Maris Nordici*]. 7 Abb., zahlr. Tab., Ber. Dtsch. Wiss. Komm. f. Meeresf., N. F., VII, 4, 381-493. Leipzig (1935). **b - 1520**

Rassenmerkmale oder Milieu-Einflüsse. Nordseerasse und Baltische Rasse. Material und Methoden. Die Schollen der eigentlichen Ostsee: Der Laichfischbestand, der Jungfischbestand, Charakteristik der Jahrgänge. Die Schollen der westlichen Ostsee. Die Schollen der Nordsee. Die Uebereinstimmung der Variationsreihen mit der Fehlerkurve. Der Mittelwert als « Rassetypus ». Das Verhalten von Mittelwert und Standard-Abweichung im Verbreitungsgebiet der Scholle. Die Wirbelanomalien. Nachtrag: Untersuchungen an der O-Gruppe des Jahres 1934 in der östlichen Ostsee.

**Kobayashi T.** - On the Phylogeny of the Primitive Nautiloids with Descriptions of *Plectronoceras liaotungense*, New Species, and *Iddingsia* (?) *shantungensis*, New Species [*De phylogenia Nautiloidorum primitivorum et novarum specierum* « *P. liaotungense* » *et* « *I. shantungensis* »]. 3 figs., 1 table, 1 pl., Jap. Journ. Geol. & Geogr., Trans., XII, 1/2, 17-26. Tokyo (1935). **b - 1521**

Description of these two new species of primitive Nautiloids, discussion on the genus *Plectronoceras* Ulrich and Foerste, 1933, the family *Plectronoceratidae* n. fam., and the phylogeny of the primitive nautiloids.

**MacBride E. W.** - An ancestral Habit in a Sea-Urchin [*De atavismo in* « *E. cordatum* »]. Nature, CXXXV, 3424, 995. London (1935). **b - 1522**

Habits of the regular Sea-urchins compared with those of the Heart-urchins. Exceptional case observed in a half- grown *Echinocardium cordatum* probably due to atavism.

**Ranson G.** - Contribution à l'interprétation objective des formes et de leurs rapports dans la classe *Hydrozoa* (suite) [*De interpretatione obiectiva morphologica deque relationibus inter Hydrozoa*]. Bull. Mus. Nat. Hist. Natur., 2e Sér., VII, 5, 288-292. Paris (1935). **b - 1523**

(V. pour le commencement, « Bull. Mus. Nat. Hist. Natur., 2ème Sér., VII, 5, p. 247, 1935). Dans cette dernière partie de son ouvrage l'A. examine les rapports morphologiques entre l'hydre et la méduse et affirme que le problème de l'évolution des espèces chez les Hydrozoaires se pose désormais sous la forme de l'acquisition progressive de nouveaux rapports protoplasmiques endodermo-ectodermiques au cours du cercle vital.

**Schenck H. G.** - Types of the Paleozoic Pelecypod *Nuculopsis gibbosa* (Fleming) [*Exemplaria tipica ex Palaeozoicis Pelecipodis. Species « N. gibbosa »*]. 6 figs., 3 tabl., Bull. Mus. R. Hist. Natur. Belgique, X, 40, 1-23. Bruxelles (1934). **b - 1524**

Discussion of the types of *N. gibbosa* (Fleming) on hand of material collected in the Royal Scottish Museum, Edinburgh, in the Musée Royale d'Histoire Naturelle de Belgique, and the British Museum. Author claims in his conclusions that « both paleontologic and zoologic facts prove that a phylogeny of the pelecypods based on the assumption that *Nucula* is the radice is not acceptable ». Bibl.

**Watson D. M. S.** - The Interpretation of Arthrodires [*De interpretatione quoad Arthrodira*]. 8 fig., 1 pl., Proc. Zool. Soc. London, 437-464. London (1934). **b - 1525**

On the basis of observations of the skeleton A. considers the *Arthrodira* as Gnathostomes.

# PISCATUS

## GENERALIA

### *Instituta, Stationes, Laboratoria. Relationes et activitas.*

**Bachkirov K. A.** - Première année de travail de la pêche expérimentale organisée par TIKR (Institut Scientifique de pêche du Pacifique. (En russe). – 4 tabl., Rybn. Choz. Daljn. Vost. (Econ. Pêche Extr.-Orient), 1/2, 2-11. Moskva-Khabarovsk (1934). **b - 1526**

Bref compte rendu des travaux de l'Institut Scientifique de Pêche du Pacifique, avec référence spéciale aux expériences effectuées en vue de la détermination des meilleures méthodes de conservation du poisson, de la meilleure utilisation de la main-d'œuvre disponible, de la flottille de pêche, des engins de pêche, etc.

**Belknap J. C.** - Fisheries Experimental Stations a Real Aid to Industry. – Canad. Fisherm., XXII, 4, 9-10. Gardenvale, Que. (1935). **b - 1527**

Brief account of the work that has been done and is being done in Canada's Biological and Fisheries Experimental Station at Halifax and of the important help it secures to the fishing industry.

**Bell F. T.** - Bureau of Fisheries. – 2 fig., U. S. Dpt. Comm., 25-29. Washington, D. C. (1934). **b - 1528**

Brief description of the organization and activities of the U. S. Bureau of Fisheries, with especial regard to the aim of rehabilitating and conserving the fisheries, and the charge committed to the Bureau of the fur Seals of Pribilof Islands which is the largest herd in the world.

**Bessonow M. N. & Pravdin I. F.** - Bericht über die Tätigkeit der Wissenschaftlichen Forschungsstation für Fischereiwesen in Karelien in den Jahren 1931-1934. (Russ. Text, Dtsch. Rés.). – Tab., Rep. Karelia Scient. Res. Fish. Stat., I, 7-42. Leningrad (1935). **b - 1529**

Gründung und Tätigkeit der im Titel erwähnten Station, die als Filiale des Leningrader Wissenschaftlichen Ichthyologischen Forschungsinstituts 1931 in der Stadt Petrosavodsk entstanden ist. Programm der Arbeiten der einzelnen Sektionen. Kurze Wiedergabe der erzielten Ergebnisse. Der Arbeitsplan für die Jahre 1932-34.

**Bonde (von) C.** - Twelfth Annual Report of the Fisheries and Marine Biological Survey Division for the Year ending 31st December, 1934. (In Engl. & Dutch). – Tables, 3 charts o. t., Dpt. Comm. & Ind., Fish. Surv. Div., 6-120. Pretoria. Union South Africa (1935). **b - 1530**

I. Survey operations. Crawfish. Trammel-net investigations. Snoek investigations. D. Trawling investigations. Linefishing investigations. II. Deep Sea Fisheries (Trawling). III. Inshore fisheries. IV. Fishing harbours survey and development. V. Shore and laboratory research. VI. Appendices. Résumé of operations of the R. S. « Africana »; List of Stations of the R. S. « Africana ». Report on Preliminary fishing experiments with the trammelnet.

**Cameron A. T.** - Annual Report of the Biological Board. of Canada for the Year 1934. – Ann. Rep. Bd. Canada, 1934, 3-8. Ottawa (1935). **b - 1531**

Foundation and development of the Board; list of Stations and Sub-stations at present operated by the Board; problems solved and to be solved: refrigeration, fish oils, smoking of fish, discolouration of halibut, fish culture, trout, oyster culture, cod and haddock, tagging, sinking of gill nets, educational work.

**Carter N. M.** - Report of the Pacific Fisheries Experimental Station, Prince Rupert, B. C. for 1934. – Ann. Rep. Biol. Bd. Canada, 1934, Append. IV, 35-43. Ottawa (1935). **b - 1532**

Investigations: refrigeration, bacteriology, fish oils, miscellaneous. Relations with industry and cooperational activity. Education and public relations.

**Clemens W. A.** - Report of the Pacific Biological Station, Nanaimo, B. C. for 1934. – Ann. Rep. Biol. Bd. Canada, 1934, Append. III, 24-34. Ottawa (1935). **b - 1533**

Account of investigations carried out on fish culture, propagation of sockeye salmon, pink salmon, trout, pathology. Special attention has been paid to the study of measures for the detection of changes in the stock resulting from the intensity of fishing and of the life-history of the fish and shellfish; analysis concerning the comparative food-value of British Columbia fish, and investigation in physiology, biochemistry, anatomy and development.

**Dezuttere Ch.** - Conseil Supérieur de la Pêche Maritime (1932-1933). De Hooge Raad voor de Zeevisscherij. (En franç. & flam.). – Rapp. Pêche Marit., 1932-1933, 5-15. Bruxelles (1934). **b - 1534**

Composition et activité du Conseil Supérieur de la Pêche en 1932 et 1933. Le contingentement des importations de poisson. Les nouvelles installations de pêche à

Ostende. La pêche aux crevettes. Assistance financière du Gouvernement en faveur de la pêche à distance. Examens des mousses de pêche. Taxe de transmission sur le poisson de mer. Le mazout à bord des bateaux de pêche. Mesures minimales du poisson et de mailles des filets. Pêche dans les eaux territoriales franco-belges.

**Essipov V.** - Travaux de la Commission Poaire de l'Académie des Sciences. (En russe). – Sov. Sev., 4, 104-105. Moskva (1935). **b - 1535**

Deuxième liste bibliographique des travaux se référant à l'économie de la pêche dans le Nord de l'URSS.

**Finn D. B.** - Report of the Atlantic Fisheries Experimental Station, Halifax, N. S. for 1934. – Ann. Rep. Biol. Bd. Canada, 1934, 'Append. II, 18-23. Ottawa (1935). **b - 1536**

The investigations carried out deal with canning, fresh fish trade, refrigeration, fish smoking and drying, preparation of salt fish. Research on by-products, engineering problems, oceanography and sea fisheries, analytical and technical service, and educational activity of the Station.

**Hertling H.** - Die Biologische Anstalt auf Helgoland als Meeresstation und Lehrinstitut. – Biologe, III, 167-173. München (1934). **b - 1537**

**Hobson A. D.** - Director's Report. – Armstrong Coll. Dove Mar. Labor., Rep. for the Year ending July 31st. Third ser., No. 2, 3-8. Cullercoats, Northumb. (1934). **b - 1538**

Building and equipment. Investigations: Herring, Salmon, conditioned responses, pollution, faunistic survey, mussel survey. Publications and lectures.

**Kamprath L.** - Pioniere. – 2 Phot., Dtsch. Fisch.-Rundschau, 9, 191-192. Bremerhaven (1935). **b - 1539**

Einige Namen in Verbindung mit der Entwicklung der deutschen Fischwirtschaft.

**Kyte F. L.** - Fishermen's Views on Price Spreads Report. – Canad. Fisherm., XXII, 5, 17. Gardenvale, Que. (1935). **b - 1540**

Summary of the opinions of many of the leaders of the fishing industry in Nova Scotia in regard to the Report of the Commission (S.: the same issue of « Canad. Fisherm. », pp. 7–8).

**Le Danois Ed.** - Rapport sur le fonctionnement de l'Office des Pêches Maritimes pendant l'année 1934. – Rev. Trav. Off. Pêches Marit., VIII, 1, 1-23. Paris (1935). **b - 1541**

Croisières du navire océanographique « Président–Théodore–Tissier ». Travaux des Laboratoires de l'Office: Recherches hydrologiques, recherches biologiques, recherches techniques. Biologie ostréicole, conchylicole et contrôle sanitaire. Conseils Internationaux.

**Leim A. H.** - Report of the Atlantic Biological Station, St. Andrew, N. B. for 1934. – Ann. Rep. Biol. Bd. Canada, 1934, Append. I, 9-17. Ottawa (1935). **b - 1542**

Investigations on cod, haddock, herring, lobster, oyster, scallop and eelgrass as well as on the rearing of trout and salmon.

**Malpas A. H.** - Administration Report of the Marine Biologist for the Year 1934. – 4 pp., Ceylon Govmt. Press. Colombo (1935). **b - 1543**

Pearl fishery (Gulf of Manar). Window–pane oyster fishery (Lake Tamblegam). Chank fisheries. The local fishing industries. Miscellaneous.

**Ross C.** - Zwischen USA und dem Pol. Durch Kanada, Labrador und Antarktis. – 71 Abb., 1 Karte, 310 S. F. A. Brockhaus. Leipzig (1934). **b - 1544**

Ein Reisebericht, in welchem, ausser der geschichtlichen Entwicklung des Landes, auch der heutige Stand der Fischerei im Kanada, Labrador und der Arktis geschildert ist. S. auch: « Kabeljau begründen ein Weltreich. . . . Fisch als Schicksal », mit Genehmigung des Verl. F. A. Brockhaus in « Fischmarkt », n. 10, 269-273, 1934, veröffentlicht.

**Thompson H.** - Introduction (to the Annual Report 1934). – Rep. Newfoundl. Fish. Research Labor., II, 3, 3-14. Newfoundland (1935). **b - 1545**

Brief account of the latest development of the Newfoundland Fishery Research Laboratory transferred in 1934 to the Department of Natural Resources under the Commission of Government. Expansion of the activities of the Laboratory: equipment for biological testing of cod-liver oil and new investigation on its possible applications; report of the experimental canning work undertaken by the Laboratory and on the biological work during the cruise of the s. s. « Cape Agulhas »; tagging operations on codfish; collecting of biological material from the salmon runs on the east coast of Newfoundland.

**Tillessen** - Die Aufgaben der Hauptvereinigung der deutschen Fischwirtschaft. – Dtsch. Fischwirt., II, 47, 873-875. Berlin (1935). **b - 1546**

Vortrag, gehalten auf dem dritten Reichsbauerntag in Goslar: die bisherige praktische Aufbauarbeit der Hauptvereinigung und ihre weiteren Ziele.

**Truitt R. V.** - Opportunity. – 1 photo. Fish. Gaz., LII, 5, 15. New York (1935). **b - 1547**

Summary of the progress and advances made during the past fifteen years in the science pertaining to the shellfisheries in the United States, which serves as introductory remarks to the invitation to the Joint Convention of the National Shellfisheries Association and the Oyster Growers and Dealers Association of North America, at Washington May 20, 21, 22, 1935.

**Truitt R. V.** - Report of the Sub-Committee on Scientific Investigations of the Fisheries Advisory Board. – Science, LXXXII, 2123, 227-228. New York (1935). **b - 1548**

General program. Federal Fishery research. Fishery research by State agencies. Stimulation of research by private agencies.

**Verschelde R.** - Commission de Mariculture et de Mytiliculture (1932-1933) - Commissie voor Mossel – en Zeevischteelt (1932-1933). (En franç. & flam.). – Rapp. Pêche Marit., 1932-1933, 17-23. Bruxelles (1934). **b - 1549**

Composition de la Commission et compte-rendu des questions qui ont été prises en considération au cours du 1932 et 1933: Revision de l'Arrêté Royale concernant la cueillette du naissain de moules sur la côte belge. Existe-t-il sur notre littoral un endroit convenant à la culture intensive de la moule ? Est-il possible de faire renaître dans nos eaux la culture huîtrière ? Moyen d'empêcher la destruction du poisson immature. Pêche du hareng en dehors de la limite des eaux territoriales françaises. Situation et avenir du Braakman. Recherches d'un banc de moules existant probablement sur notre côte Ouest. Encouragement d'expériences avec des engins de pêche nouveaux.

**Wiese E.** - Neues Leben in der Kleinen Hochseefischerei. – 1 Tab., Dtsch. Fischwirt., II, 8, 135-136. Berlin (1935). **b - 1550**

Kurzer Bericht über die Entwicklung der kleinen Hochseeficherei Deutschlands im Jahre 1934, das endlich einmal als ein Jahr des Aufbaus und der Gesundung betrachtet werden kann.

**Zenkovitch B. A. & Erdeli A. S.** - Quelques résultats des travaux de l'Institut de l'Economie de la Pêche du Pacifique (TIKR) pendant l'année 1934. (En russe). – Rybn. Choz. Daljn. Vostoka, XIII, 1, 11-34. Khabarovsk (1935). **b - 1551**

Compte rendu des travaux de l'Institut dans le domaine de (*a*) la biologie des principales espèces commerciales du poisson de l'Extrême-Orient, (*b*) de l'organisation et de la technique de la pêche, (*c*) de la chimie et de la technique du traitement des produits de pêche, (*d*) de l'océanographie, (*e*) de l'économie de pêche et (*f*), des recherches scientifiques auxiliaires.

**Comité du Parti communiste pour l'Extrême Orient** - Sur la préparation à la pêche de 1935. (En russe). – Rybn. Choz. Daljn. Vostoka, XIII, 1, 5-8. Khabarovsk (1935). **b - 1552**

Résolution adoptée au cours de la Session Pleinière du Comité, le 27-30 Mars 1935, concernant le programme des travaux en vue de la saison de pêche 1935, leur organisation, leur distribution, avec référence spéciale à l'amélioration de la flotte et des engins de pêche.

**Deutsche Wissenschaftliche Kommission für Meeresforschung** - Berichte der Deutschen Wissenschaftlichen Kommission für Meeresforschung. – N. F., 126 Abb., 808 S., VI, 1931-1933; VII, 1934-1935. Akad. Verlagsg. Leipzig (1935). **b - 1553**

Die Berichte enthalten eine grosse Zahl faunistischer und tiergeographischer Untersuchungen aus der Nord–und Ostsee.

**Division of Fish & Game, California** - Reports. – tabl., California Fish & Game, XXI, 4, 351-360. San Francisco, Calif. (1935). **b - 1554**

Reports expressed in tables concerning economical conditions and fresh fish landings for April-June 1935.

**Fisheries Commissioner** (of British Columbia). Fisheries Commissioner's Report for 1934. – 2 tabl., Rep. Comm. Fish., 1934, 5-19. Victoria B. C. (1935). **b - 1555**

Value of Canadian Fisheries and the standing of Provinces, 1933. Persons engaged and capital invested. The species and value of fish caught in British Columbia. Salmon-canning industry. Halibut production and investigation. Salmon-trolling production of mild-cured salmon, dry-salt salmon, fish meal and oil investigation. Whale reduction. Miscellaneous reduction. Dry-salt herring. Digest of Statistical Report on sockeye fishing and canning industry in rivers inlet. Digest of the herring-fishery of British Columbia, past and present. Appendices.

**Fishery Board for Scotland** - Fifty-Third Annual Report of the Fishery Board for Scotland Being for the Year 1934. – 5 graphs, 19 tabl., 6-92., H. M. Stat. Off. Edinburgh (1935). **b - 1556**

Means of capture and persons engaged. The herring fishery. Fisheries other than herring. Miscellaneous. Marine Superintendence. Harbours. Scientific investigations. Salmon fisheries. Appendices: Harbour improvement schemes. Salmon fishery close time. Chairmen and clarks of Salmon District Boards.

**Institut de Recherches Scientifiques Polaires** - Travail et activité. (En russe). – Za Rybn. Ind. Sev., 12, 16-18. Leningrad (1934). **b - 1557**

Compte rendu des travaux des sections particulières de l'Institut pour les recherches scientifiques polaires à Mourmansk pendant 1934. Le but principal de l'activité de l'Institut est l'assistance, à l'industrie de la pêche, par ses conseils. L'Institut s'occupe surtout de la découverte des fonds de pêches, de la technique de la pêche et du traitement industriel des poissons comestibles et des phoques de la Mer de Barents.

**Institut für Seefischerei** - Jahresbericht für 1934 des Instituts für Seefischerei. – Dtsch. Fisch.-Rundschau, 14, 319-320. Bremerhaven (1935). **b - 1558**

Bericht über die zahlreichen Untersuchungen und Versuche, die in der Vollkonservenabteilung, dem Fischindustriedienste, der bakteriologischen, und der fischereibiologischen Abteilungen während des Jahres 1934 ausgeführt worden sind, sowie über die veranstalteten Vorträge und das Mitteilungsorgan des Instituts.

**Newfoundland Division of Fishery Research** - Annual Report Year 1934 (April, 1934-March, 1935). – 10 figs., 9 charts. Rep. Newfoundl. Fish. Research Labor., II, 3, 7-79. Newfoundland (1935). **b - 1559**

Continuation of the Reports previously issued by the Fishery Research Commission. Hydrographic and biological investigations. Technical investigations. Appendices: A. Log of «Cape Agulhas» operations. B. Hydrographic data. C. Two new subspecies of *Lumpenus lampetraeformis*. D. Fourth list of fishes in the Newfoundland fishing area.

**North American Council on Fishery Investigations** - Summary of Activities During 1933. – Rapp. Pr.-Verb. Cons. Expl. Mer, XCIII, Rapp. Atlantique 1933, 33-36. Copenhague (1935). **b - 1560**

Administrative Report. Report on subjects of investigation: Hydrology, Chemistry of sea water, plankton, cod, haddock, mackerel, herring, salmon. Fisheries Statistics.

**Office des Pêches Maritimes** - Extrait du procès-verbal de la séance du Bureau du Conseil d'Administration de l'Office des Pêches Maritimes en date du 26 Janvier 1935. – Rev. Trav. Off. Pêches Marit., VIII, I, 39-42. Paris (1935). **b - 1561**

Procès-verbal concernant les mesures à prendre pour remédier à l'appauvrissement des fonds de pêche.

**Secretary of Commerce.** - Bureau of Fisheries. – 1 tabl., Ann. Rep. Bur. Fish., 1934, 77-101. Washington D. C. (1934). **b - 1562**

Activity of the Bureau of Fisheries. National Planning Council (of Commercial and Game Fish Commissioners). Cooperation with States and other federal agencies. Conservation of whales. Legislation. Construction activities. Statistical, marketing, and technological investigations. Biological fisheries investigations. Alaska fisheries and furseal services. Propagation and distribution of food and game fishes. Aquarium. Black bass and anglers division. Vessels. Appropriations.

**Secretary of Commerce** - Work of the Bureau of Fisheries. – Fish & Oyst. Rep., XVI, 5, 5 & 8-9, & 17. Tampa, Fla. (1935). **b - 1563**

Reprinted from the Annual Report of the Secretary of Commerce and dealing with actual conditions of the fishing industry, the National Planning Council (Commercial and Game Fish Commissioners), the cooperation with States, the construction activities of the Office and its marketing investigations.

**K.** - Die Tätigkeit der Deutschen wissenschaftlichen Kommission für Meeresforschung. – 1 Abb., Fischmarkt, III, 5, 116-123. Cuxhaven (1935). **b - 1564**

Untersuchungen über den Hering, den Kabeljau des Barentsmeeres und die Scholle in Nord- und Ostsee. Versuche zur künstlichen Erbrütung von Plattfischen. Die Flunderfischerei der Ostsee.

**S.** - Wieder ein blauer Jahresbericht! – Dtsch. Fischwirt., II, 34, 657-658. Berlin (1935). **b - 1565**

Kurze Zusammenfassung mit begleitenden Beobachtungen des vom Reichs-und Preussischen Ministerium für Ernährung und Landwirtschaft herausgegebenen Berichts über die Deutsche Fischerei im Jahre 1934.

**W. L. S.** - Notes from the State Fisheries Laboratory. – California Fish and Game, XXI, 3, 264. Sacramento (1935). **b - 1566**

Tagging experiments, trips and cruises, tabulation of fish catch data.

**An.** - Fraser Report to Stevens Committee on Atlantic Fish Trade. – Canad. Fisherm., XXI, 7, 7-9. Gardenvale, Que. (1934). **b - 1567**

Summary of the report by L. W. Fraser appointed to investigate conditions in the Atlantic Fish trade, in which he advocates minimum prices to fishermen and Board to eliminate cut-throat competition.

**An.** - C. F. A. Established Twenty Years Ago. – Canad. Fisherm., XXII, 3, 8. Gardenvale, Que. (1935). **b - 1568**

Brief account of the foundation and activity of the Canadian Fisheries Association, founded on February 15th, 1915.

**An.** - The Price Spreads Report. Several Factors Ignored in Recommendations. – Canad. Fisherm., XXII, 5, 7-8. Gardenvale, Que. (1935). **b - 1569**

Criticism of the «Fisheries» section of the Report elaborated by the Price Spreads Commission which suggests the creation of a Fisheries Control Board and the application of other measures in order to improve the actual condition of the Canadian fisheries.

**An.** - Werkstätten der Fischerei-Wissenschaft. – Dtsch. Fischwirt., II, 21, 451-453; 22, 472-473. Berlin (1935). **b - 1570**

Gründung und Entwicklung der wissenschaftlichen Forschung im Gebiete der Fischerei, mit besonderer Berücksichtigung der folgenden Forschungsanstalten: des Instituts für Seefischerei in Wesermünde mit dem Fischerei-Museum, des Fischerei-Instituts in Helgoland, der fischereibiologischen Abteilung des zoologischen Staatsinstituts zu Hamburg, des Forschungsinstituts für die Fischindustrie in Altona, der Deutschen Seewarte, der Preussischen Kommission zur wissenschaftlichen Untersuchung der deutschen Meere, der biologischen Laboratorien der Preussischen Oberfischmeisterämte, der Seefischereistation Neukuhren, des Deutschen Seefischerei-Vereins, der Deutschen Wissenschaftlichen Kommission für Meeresforschung, des Instituts für Meereskunde in Berlin und der Forschungsanstalten für die Binnenfischerei.

**An.** - National Oyster Institute Organized. – Fish & Oyst. Rep., XVI, 10, 16. Tampa, Fla. (1935). **b - 1571**

Information on the formation of the Oyster Institute of North America on August 5th, 1935, for the purpose of promoting high standards of quality and service within the oyster industry and increasing the consumption of fresh oysters.

**An.** - Fishery Advisory Committee Appointed by Government. – Fish. Gaz., LII, 3, 5 & 18; 6, 5. New York (1935). **b - 1572**

Information on the appointment of a Fishery Advisory Committee which represents the first step in the plans elaborated by the U. S. Government in the hope to restore the American fishing industry to a normal degree of prosperity. Some recommendations of the Committee concerning methods of coordination of controlling order to eliminate wasteful methods of fishing; allocation of $ 500.000 for marketing and research study; teaching the dietary value of fish in schools.

**An.** - International Council for Exploration of the Sea. – Fish. Gaz., LII, 9, 8. New York (1935). **b - 1573**

Brief summary of the work performed and decisions taken by the International Council for Exploration of the Sea, especially concerned with haddock-fisheries and large-mesh laws.

**An.** - Marine Biology in Ceylon. – Nature, CXXXVI, 3438, 471. London (1935). **b - 1574**

Short note on a scheme for the establishment of a fisheries research station with an aquarium in Colombo.

## *Congressus – Conventus – Expositiones – Bibliographia piscatoria.*

**Bouckaert D.** - Le XVI^e^ Congrès International de Navigation, Bruxelles, 1935. – Ann. Trav. Publ. Belgique, XXXVI, 5, 798-805. Bruxelles (1935). **b - 1575**

Bref compte rendu du Congrès convoqué en Septembre 1935 à Bruxelles; nombre des adhérents; séance solennelle d'ouverture; les travaux des sections; visite des installations du port de pêche d'Ostende.

**De Angelis R.** (A cura di) - Atti del Convegno di pesca meccanica a Bari, 7 settembre 1934-XII, organizzato dalla Lega Navale Italiana e dal Ministero dell' Agricoltura e delle Foreste. – 89 pp., Soc. Tip. A. Manuzio. Roma (1934). **b - 1576**

**Polizeibehörde von Wesermünde** - Zwei wichtige neue Polizeiverordnungen. – Dtsch. Fisch.- Rundschau, 18, 412-413. Bremerhaven (1935). **b - 1656**

Wortlaut der Polizeiverordnung betreffend die Gesundheits-, Verkehrs- und Feuerpolizei im Hafen- und Geestegebiet Wesermünde vom 5 August 1935 und die Polizeiverordnung zur Aenderung der Polizeiverordnung für die Fischversteigerungen im Fischereihafen Wesermünde (Marktordnung), vom 4. September 1933.

**Reichsarbeitsminister** - Verordnung über das Krabbenschälen in der Heimarbeit, vom 13. Juli 1935. – Dtsch. Fisch.-Rundschau, 16, 364-365. Bremerhaven (1935). **b - 1657**

Wortlaut der Verordnung.

**Reichsminister für Ernährung und Landwirtschaft** - Verordnung über den Zusammenschluss der deutschen Fischwirtschaft. – Fischmarkt, III, 4, 132-135. Cuxhaven (1935). **b - 1658**

Wortlaut der im « Reichsgesetzblatt » n° 43, vom 18. April 1935 veröffentlichen Verordnung über die Bildung und Ziele der « Hauptvereinigung der deutschen Fischwirtschaft ».

**Verwaltungsrat der Wirtschaftlichen Vereinigung der Fischindustrie Deutschlands** - Begriffsbestimmungen fischindustrieller Erzeugnisse. – Dtsch. Fischwirt., II, 20, 437-429. Berlin (1935). **b - 1659**

Wortlaut der Beschlüsse der Wirtschaftlichen Vereinigung der Fischindustrie Deutschlands, welche die Begriffsbestimmungen fischindustrieller Erzeugnisse regeln. S. auch: A. Behre: « Begriffsbestimmung für Fische und Fischzubereitung usw. », ebenda, S. 425-127.

**Ge.** - Das kommende Heringsgesetz in Grossbritannien. – Dtsch. Fischwirt., II, 3, 41-42. Berlin (1935). **b - 1660**

Kommentar des zur Annahme des Parlaments liegenden englischen Gesetzes zur Regelung der Heringswirtschaft Grossbritanniens.

**M.** - Konservierungsmittelverordnung und Dosennormierung als Abschluss jahrelanger Arbeit. – Fischmarkt, 6, 157-159. Cuxhaven (1934). **b - 1661**

Bedeutung der Verordnung über den Zusammenschluss der Fischindustrie und Kommentar der Konservierungsmittelverordnung und der Dosennormierung, die man als Abschluss einer 8-jährigen Arbeit ansehen kann.

**M.** - Zum Vollzug der lebensmittelgesetzlichen Bestimmungen. – Fischmarkt, 9, 237-241. Cuxhaven (1934). **b - 1662**

Kommentar der neu erlassenen Bestimmungen, welche auch für die Fischwirtschaft von grosser Bedeutung sind.

**An.** - Fishery Treaty Urged by International Council. – Canad. Fisherm., XXII, 10, 15. Gardenvale, Que (1935). **b - 1663**

Brief account of the action taken by the North American Council on Fishery Investigations occasioned by the fact that haddock fishery on the banks off the New England and Nova Scotian coasts is facing commercial destruction. Necessity of using nets of larger mesh.

**An.** - New Salmon Treaty Possible. – Canad. Fisherm., XXII, 11, 19. Gardenvale, Que (1935). **b - 1664**

Account of a new move launched in the State of Washington in order to ratify an agreement with Canada in view of the preservation of the Fraser River Salmon.

**An.** - Grundsätzliches zur Neuregelung für Fischmehl. – Dtsch. Fisch.-Rundschau, 5, 98-100. Bremerhaven (1935). **b - 1665**

Kommentar der am 2. Februar 1935 erschienenen Anordnung der Wirtschaftlichen Vereinigung der Fischindustrie Deutschlands über Fischmehl und Höchstpreise für Fischmehl, welches in « Die Landware » vom 16. 2. 1935 veröffentlicht worden ist.

**An.** - Satzung der Hauptvereinigung der deutschen Fischwirtschaft vom 13. Juni 1935. – Dtsch. Fisch.-Rundschau, 13, 292-294. Bremerhaven (1935). **b - 1666**

**An.** - The New Canadian Trade Treaty. How Will It Affect U. S. Fisheries? – Fish. Gaz., LII, 13, 5 & 7. New York (1935). **b - 1667**

Some considerations, on hand of letters of people directly concerned with the Reciprocity Agreement between the United States and Canada.

**An.** - Fishery Provisions Canadian Trade Treaty. – Fish. Gaz., LII, 13, 29. New York (1935). **b - 1668**

Essential fishery facts contained in the provisions of the Reciprocity Agreement concluded between the United States and Canada.

# BIOLOGIA PISCATUI APPLICATA

## *Hydrographia et Hydrologia piscatui applicatae.*

**Antipa G.** - Les bonifications hydrologiques des deltas. – 10 fig., Comm. Int. Expl. Scient. Méditerr., Rapp. Ass. Plén. Bucarest, 22 pp. Paris (1935). **b - 1669**

Ce que l'on doit entendre par « bonification des deltas ». Les systèmes de bonification des deltas: A. - Deltas d'âge ancien (delta du Nil); B. - Deltas d'âge moyen (Mississippi, Rhône); D. - Les deltas jeunes (Danube): La génèse, la structure et l'évolution de delta du Danube - l'amélioration du delta du Danube - son aménagement.

**Antipa G.** - Les bases biologiques de la production des pêcheries dans la région Nord-Ouest de la Mer Noire. – 2 cartes, VII$^e$ Congr. Int. Aquicult. & Pêche, Paris 1931, Communications, III, 36-61. Impr. du Loiret. Orléans (1935). **b - 1670**

L'A. met en évidence les quatre facteurs principaux sur lesquels se base la grande productivité de la région nord-ouest de la Mer Noire et les mesures de protection pour la maintenir.

**Athanassopoulos G. D.** - Sur la production des eaux saumâtres spécialement des formations lagunaires et questions qui s'y rapportent. – VII$^e$ Congr. Int.. Aquicult. & Pêche Paris, 1931, Communications, III, 11-15. Impr. du Loiret. Orléans (1935). **b - 1671**

L'A. en citant trois exemples de formations lagunaires et leur exploitation étudie le problème du point de vue pratique et technique se référant à la production. Nécessité d'une étude scientifique et d'organisation.

**Averintzev S.** - Les courants marins, la biologie des poissons et leur pêche. (En russe). – Za Rybn. Ind. Sev. 10, 12-14. Leningrad (1934). **b - 1672**

L'A. étudie les rapports existant entre les courants marins et la biologie des poissons et leur propagation, en considérant surtout les espèces de poissons vivant dans la Mer de Barents.

**Behning A. L.** - Hydrologische und hydrobiologische Materialien zu einer Fischerei-Karte des Aralsees. (In Russ.). – 3 Kart., Tab., Rep. Aral-See Div. Inst. Mar. Fish., III, 181-205. Araljsk (1934). **b - 1673**

Nach einigen allgemeinen Bemerkungen über die Ausarbeitung einer Fischerei-Karte, übergeht Vf. zu seinem Berichte über die von ihm im Jahre ausgeführten Forschungen im Aralseegebiete mit Bezug auf seine hydrologischen und hydrobiologischen Verhältnisse, mit besonderer Berücksichtigung der Strömungen, der Temperatur, des Salzgehaltes, der Durchsichtigkeit und der Farbe, der Wasserstoffionen-Konzentration, der chemischen Beschaffenheit und elektrischen Leitungsfähigkeit des Wassers des Aralsees. In seinen Schlussfolgerungen schildert er die Entwicklungsmöglichkeiten der Fischerei im Aralsee.

**Lundbeck J.** - Fischereibiologisches über die deutsche Dampferfischerei an der norwegischen Küste. – 4 Taf., Fischmarkt, 8, 200-203. Cuxhaven (1934). **b - 1674**

Beteiligung ausländischer Fischer an der norwegischen Lofotenfischerei. Statistische Angaben über den Umfang der deutschen Fischerei an der norwegischen Küste bis Juni 1934. Besprechung der Veränderungen der Erträge im Zusammenhang mit der biologischen Zusammensetzung der vorhandenen Fischformen: Kabeljau, Schellfisch, Rotbarsch. Auswirkung des Gebrauches von Schleppnetzen auf den Fischbestand an der norwegischen Küste, mit besonderer Berücksichtigung der Kabeljaufischerei.

**Miyamoto Hideaki** - Effect of the Oceanographical Conditions on the Catch of Squids. (In Jap., Engl. Rés). – 3 tabl., 4 figs., Bull. Jap. Soc. Scient. Fish., III, 6, 327-330. Tokyo (1935). **b - 1675**

Looking through the data obtained by the Hokkaido Fisheries Experimental Station in 1928-1932, the writer assumed the water temperature read on the spot, where catch of Squids, *Ommastrephes sloani pacificus* (Steenstrup), took place, as the optimum temperature for the squid angling for each year and for each depth ranging from 0 m to 60 m.

**Nesbit R. A.** - Conditions Affecting the Southern Winter Trawl Fishery. – 3 figs., U. S. Dpt. Comm., Bur. Fish. Circ. 18, 1-12. Washington, D. C. (1935). **b - 1676**

Introduction. Changes in summer fishery. Changes in winter fishery. Changes in temperature. Scup scatter in warm winters. Sea bass in warmer water than scup Fluke in more northerly part of the ground. Outlook for the winter 1935 (Jan.-March). Conservation problems.

**Roule L.** - L'aménagement des deltas. – Comm. Int. Expl. Scient. Méditerr., Rapp. Ass. Plén. Bucarest. 3 pp. Paris (1935). **b - 1677**

Sur la base de deux exemples, celui de l'aménagement du faciés lagunaire tel qu'il est pratiqué au nord de la Mer Adriatique, dans les provinces de Venise et au delta du Pô, et de la méthode préconisée et suivie par M. le Docteur Antipa pour l'utilisation des eaux saumâtres du delta du Danube, l'A. précise les termes du dilemme économique qui se pose à l'égard des deltas, en donnant sa préférence à l'exploitation piscicole de ces derniers qu'il considère comme plus avantageuse que l'exploitation agricole.

**Schnakenbeck W.** - Die biologischen Grundlagen für die Fischerei in der Niederelbe. 2. Das mengenmässige Vorkommen der Fische. – 1 Diagr., Fischmarkt, 2, 32-35. Cuxhaven (1934). **b - 1678**

(1. S.: « Fischm. », 9, S. 256, 1933). Ergebnisse der während vier Jahre (1928 bis 1931) an bestimmten festgelegten Plätzen in der Unterelbe in jedem Monat einmal mit Schleppnetz gemachten Fänge, aus denen klar die Verteilung des Stromlaufes in drei charakterisierte Zonen hervorkommt. Abhängigkeit des mengenhaften Vorkommens der Fische von der Wasserbeschaffenheit, den Strömungsverhältnissen und der Nahrung. Vergleich zwischen dem Fischreichtum der Unterelbe und der Fischarmut des oberen Teiles des Stromes. Einige Betrachtungen fischereiwirtschaftlichen Charakters.

**Schnakenbeck W.** - Ueber einige Einlieferungen aus Fischdampferfängen. – Fischmarkt, III, 11, 299-300. Cuxhaven (1935). **b - 1679**

Einzelnes über einige Einlieferungen aus Fischdampferfängen, mit besonderer Berücksichtigung des Vorkommens von Maifischen unter Island sowie Haie und Sardellen in für sie ungewöhnlichen Gewässern.

## *Influentia temperaturae in piscaturam.*

**Binet L. & Morin G.** - Action de la chaleur sur les poissons. – Journ. Physiol. et Pathol. Gén. XXXII, 2, 372-379. Paris (1934). **b - 1680**

Rapport sur les expériences entreprises avec *Gobius lota* dans l'eau de mer echauffée jusqu'aux 36°-38°.

**Chiappelli R.** - La temperatura dell'acqua in rapporto all'accrescimento dei pesci. – Giorn. Risicolt., 10, 219-220. Vercelli. **b - 1681**

Si dimostra la benefica influenza dell'acqua calda sull'accrescimento dei pesci.

**Eggvin J.** - Biologiske og oceanografiske undersøkelser: Temperaturen i Vestfjorden under Lofotfisket 1935. – Årsber. v. Norg. Fisk. 1935, 2, 99-102. Bergen (1935). **b - 1682**

Sulla temperatura eccezionalmente alta constatata nelle acque del Golfstrøm durante questi ultimi anni e la conseguente alta temperatura nel Vestfjord, specialmente riguardo all'acqua profonda. L'effetto di questa anomalia sulla pesca di Lofoten.

**Jammes L.** - Influence de la température sur les déplacements en hauteur de la Truite commune, *Salmo trutta* L. dans le lac d'Orèdon (Hautes Pyrénées). – VII^e^ Congr. Int. Aquicult. & Pêche. Paris 1931, III, 171-174. Impr. du Loiret. Orléans (1935). **b - 1683**

L'action du facteur température sur les poissons est un phénomène d'ordre général et dans le cas étudié ici il est même possible d'estimer assez bien, d'après la présence ou l'absence de poissons, les variations de température qui se produisent à la surface du lac. Informations particulières sur les déplacements du poisson et les variations de la température de l'eau.

**McKenzie R. A.** - More About Codfish and Water Temperature. – Canad. Fisherm., XXII, 5, 15. Gardenvale, Que. (1935). **b - 1684**

Brief discussion of some points raised by F. W. W. in his account published in an issue of the « Canadian Fisherman » of the cod feeding experiments being carried on under the Biological Board of Canada; the discussion is specially concerned with the habits and « preferences » of the cod in relation to the water temperature.

**Moissjeev P. A.** - Sur la question du régime thermique de la morue de la Mer de Bering. (En russe). – 1 graph., Rybn. Choz. Daljn. Vost. (Econ. Pêche Extr.-Orient), 1/2, 94-97. Moskva-Khabarovsk (1934). **b - 1685**

Résultats des observations sur la température de l'eau qui accompagne la capture de *Gadus morrhua macrocephalus* Tilesius au cours des croisières des chalutiers et des navires de recherche océanographique dans la partie occidentale de la Mer de Bering. Comparaison entre les migrations de la morue dans la région considérée et dans la Mer de Barents, considérations sur l'importance de la température 0° dans l'eau de mer par rapport à la pêche de *G. morrhua*.

**Thompson H.** - Relationship Between Catch of Cod and Water Temperature. – 2 figs., 3 tables. Rep. Newfoundl. Fish. Research Labor., II, 3, 23-31. Newfoundland (1935). **b - 1686**

1. Results of the investigation undertaken on the fishing banks by the research trawler, s. s. « Cape Agulhas ». 2. Great variation in the catches taken year by year in the inshore cod-traps commonly used in Newfoundland, with especial reference to the relationship between water-temperature and the amount of the catch. 3. Observations on the codfish fishery in the Newfoundland area generally showing how much codfish fishery is affected by water-temperature conditions.

**Uda Mititaka** - On the Estimation of Favorable Temperature for Long-line Fishing of Tunny. (Jap. Text., Engl. Rés.). – 1 tabl., 3 fig., Bull. Jap. Soc. Scient. Fish., IV, 1, 61-65. Tokyo (1935). **b - 1687**

On the basis of observations carried out during July 1930 to March 1931 off the North-eastern Japan and off south to Bôsyû including *Thunnus thunnus*, *Th. alalonga*, *Parathunnus sibi* and *Germo macropterus*, the A. has been able to examine the difference between the distributions of total catch as well as of the frequency of catch, referred to the temperature of the layer in which tunnies are angled and the distributions referred to the surface temperature.

**Upton M.** - The Influence of Varying Temperature on the Behaviour of Mackerel. – Woods Hole Oceanogr. Instit., App. Rep. 1934, 34-35. Woods Hole, Mass. (1935). **b - 1688**

Account of a series of experiments to determine the nature of the behaviour of the mackerel when the water containing the fish varies in temperature, carried on in order to verify the idea that the lowering temperature of the coastal waters in the fall might be the essential factor stimulating the autumn migration of the mackerel away from the inshore regions where they spend the summer.

**F. W. W.** - Codfish and Water Temperature. – Canad. Fisherm., XXII, 3, 10. Gardenvale, Que. (1935). b - 1689

Some interesting results of experiments carried out at the Eastern Passage Laboratory, Halifax, showing that codfish will live in warm water. Some hints of the author as to the organization of research in order to establish the temperature « preferences » of the codfish.

## *Piscicultura.*

**Brunelli G.** - La valliculture et la bonification des deltas fluviaux. – Comm. Int. Expl. Scient. Méditerr., Rapp. Ass. Plén. Bucarest, 7 pp. Paris (1935). b - 1690

L'A. traite de la technique de la valliculture (et de ses rapports avec la bonification), en relation avec le problème d'assainissement des deltas fluviaux, avec référence spéciale aux travaux vallicoles exécutés dans la lagune de Venise.

**Coceani B.** - L'industria valliva in Italia. – VII^e^ Congr. Int. Aquicult. & Pêche, Paris 1931. Communications, III^e^, 16-27. Impr. du Loiret. Orléans (1935). b - 1691

Consistenza della industria valliva. Il raccolto delle valli. Sfruttamento. La conservazione delle anguille vive. L'affumicatura delle anguille. L'industria degli ammarinati. La raccolta del novellame. Esperimenti di erpicatura e di aratura dei fondi vallivi.

**De Angelis R.** - Le pescherie litoranee sotto il punto di vista idraulico. – Boll. Pesca, Piscicolt. e Idrobiol., X, 4, 506-513. Roma (1934). b - 1692

Viene illustrato un particolare sistema di bonificazione nelle pescherie litoranee incardinato sulla scienza del disciplinamento delle acque.

**Fritzsche H.** - Die deutsche Teichwirtschaft und Fischzucht. – Dtsch. Fischwirt., II, 21, 444-446. Berlin (1935). b - 1693

Besprechung der wichtigsten Probleme der deutschen Teichwirtschaft und Fischzucht, auch im Bezug zu ihren Verhältnissen gegenüber der Seefischerei.

**Heldt H.** - Modalités d'empoissonnements des lacs côtiers et considérations pratiques pour un meilleur rendement de la pêche aux bordigues. – VII^e^ Congr. Int. Aquicult. & Pêche, Paris 1931, Communications, III, 28-29. Impr. du Loiret. Orléans (1935). b - 1694

L'importance du courant entre la mer et le lac pour la circulation des alevins et des adultes. Nécessité d'intensifier les échanges d'eau entre la mer et le lac pour de meilleures captures aux bordigues. Exemple d'une telle entreprise avec de bons résultats.

**Lo Giudice P.** - Piscicultura. – Boll. Pesca. Piscicolt. e Idrobiol., XI, 4, 524-529. Roma (1935). b - 1695

L'A. descrive il processo di fecondazione artificiale tipico, seguito per le uova dei Salmonidi e applicabile anche ad altri pesci, gli apparecchi che servono per l'incubazione delle stesse, e le norme generali da osservare per le uova fecondate ed embrionate, come pure per l'allevamento degli avanotti e per la loro protezione dalle malattie parassitarie.

**Maiorca V.** - Saline siciliane. – 2 fig., Ann. Merceol. Sicil., II, 102-144. Catania (1933-34). b - 1696

Delle saline marittime in generale. La piscicoltura nelle saline. Importanza terapeutica delle saline. Le saline di Trapani e di Augusta.

**Mola P.** - Relazione per le opportune indagini allo scopo di accertare se nelle acque sarde sia notata all'epoca adatta la frequenza di oratelle da semina, in quantità tale da renderne conveniente la raccolta ed il trasporto per il ripopolamento delle valli sarde e foreste. – Boll. Pesca, Piscicolt. e Idrobiol., XI, 2, 317-321. Roma (1935). b - 1697

**Scarapecchia D.** - La sistemazione della Laguna di Marano. – Corr. della Pesca, 13, 3-4. Roma (1935). b - 1698

Le valli d'allevamento. Progetto e spese relative. Disposizioni, iniziative e prospettive. Flotta peschereccia, case per i pescatori e organizzazione di vendita. Conclusione.

**Supino F.** - L'allevamento dei Muggini in acqua dolce. – 5 fig., Natura (Riv. Sc. Natur.), XXVI, 2, 55-62. Milano (1935). b - 1699

Biologia dei Mugilidi delle nostre acque (*Mugil cephalus, M. auratus, M. ramada, M. saliens, M. chelo, M. labeo*) e i caratteri per la loro determinazione sistematica. L'A. riferisce sui soddisfacenti risultati ottenuti dagli allevamenti di Muggini nella regione pontina.

**Tanaka Rinzo** - On an Egg receiving Apparatus for the Artificial Fertilization of Salmon. (In Jap., Engl. Rés.). – 3 tabl., 1 fig., Bull. Jap. Soc. Scient. Fish., IV, 4, 229-232. Tokyo (1935). b - 1700

The new apparatus proves to work better than the ordinary one in increasing the rate of fertilization and in reducing the number of dead eggs during the incubation.

**Wimpenny R. S. & Faouzi H.** - The Breeding of a Grey Mullet, *Mugil capito*, Cuv., in Lake Quarun, Egypt. – 1 table, Nature, CXXXV, 3425, 1041. London (1935). b - 1701

Short note on the results of the transplantation of 20.000 live fry chiefly of *M. cephalus*.

**Wirolajnen** - Lachszuchtversuche im Wyg-Flusse. (In Russ., Dtsch. Rés.). – 3 tabl., Rep. Karelia Scient. Res. Fish. Stat., I, 241-256. Leningrad (1935). b - 1702

Kurzer Bericht über die Ergebnisse der von der Karelischen Wissenschaftlichen Forschungsstation für Fischereiwesen unternommenen Versuche von künstlicher Zucht des Weissmeerlachses, *Salmo salar brevipes*, in besonderen Behältern. Die Ergebnisse sind als befriedigend zu beurteilen.

**Ministero dell'Agricoltura e Foreste** - Rapporti fra le acque di bonifica e la vallicoltura comacchiese. – 31 tav., 91 pp., Ist. Poligr. dello Stato. Roma (1934). b - 1703

Generalità. Accenni alla questione dei rapporti fra bonifica e vallicoltura. Analisi delle Acque di Valle. Influenza delle acque di bonifica su quelle di valle. La salsedine. Effetti della salsedine sulla fauna e flora acquatica. Le produzioni vallive.

**An.** - Fish Dropped from Planes in Stocking Lakes. – 1 phot., Canad. Fisherm., XXII, 7, 12. Gardenvale, Que. (1935). b - 1704

Brief account of experiments carried on in order to establish the possibility to use sea planes for stocking lakes and showing that fish can be dropped from a height of 1500 feet without harm.

### *Praevisiones de piscatione – Tutela piscium juvenum.*

**Flagg H. W.** - A Plan to Conserve the Texas Fish Supply. – 1 map., Fish., Gaz., LII, 7, 8 & 12. New York (1935). **b - 1705**

Author shows that the opening of Texas coastal waters, which are rather shallow and represent a kind of « natural hatcheries », to commercial fishermen, that is with seines and nets, is antagonistic and contrary to all scientific data and conservation efforts.

**Herrington W. C.** - Modifications in Gear to Curtail the Destruction of Undersized Fish in Otter Trawling. – 15 figs., 10 tabl., Invest. Rep., U. S. Dpt. Comm. Bur. Fish, I, 24, 1-48. Washington D. C. (1935). **b - 1706**

The destruction of undersize haddock became a problem of importance to the New England fishery as the result of a gradual growth in the otter -trawl fleet. The increasing use of the otter trawl met considerable opposition among the line and dory fishermen because of the belief that it was unduly destructive. The trend to a rapid decline in the haddock fishery after 1929 induced the Bureau of Fisheries to organize an investigation designed to determine the cause of the decline in the haddock catch and whether any effective measures could be devised for its relief. The results of these investigations are dealt with in the present booklet.

**Manning J. R.** - Standardization of Fishery Products. – Fish. & Oyst. Rep., XV, 7, 2-3 & 10. Tampa, Fla. (1934). **b - 1707**

Address delivered before the 15th Annual Meeting of the National Association of Marketing Official, Washington, D. C., December 20, 1933, dealing with the standardization of marine products of commerce, with especial reference to the establishing of marketing grades by the fishery industries of the United States.

**Miyosi Kiyoide** - Effect of Liberation of Fry on the Catch. (In Jap., Engl. Rés.). – 2 tabl., Bull. Jap. Soc. Scient. Fish., III, 5, 235-238. Tokyo (1935). **b - 1708**

The yearly records of the catch and the number of liberated fry were analysed statistically for Chum (*Oncorhynchus keta*) in Hokkaido, red Salmon (*O. nerka*) in Alaska and Trout (*O. rhodoris*) in Lake Biwa. The effect of the liberation on the catch was calculated from the slope of regression line.

**Morozoff A. V.** - On the Method of Establishing of the Age-Composition of the Take. (In Russ., Engl. Summ.). – 3 figs., 37 tabl., Bull. State Oceanogr. Inst. U. S. S. R., 15, 1-54. Moscow (1934). **b - 1709**

After a criticism of the usual methods of taking samples from catches in order to establish their age-composition, author describes the methods used at the age-determination of the stock of vobla (*Rutilus rutilus caspicus* Sac.) at the Volga-Caspian Fisheries Station, which take in account not the number of the single individuals but their weight. Author emphasizes the advantage of collecting data on weights of the fish instead of counting in order to obtain an idea of the correlations of different ages in the hauls of a given year, and the quantity of weight we can expect to have from the next year.

**Supino F.** - Le cure per la prole nei pesci. – Rass. Faun., I, 2, 46-48. Roma (1935). **b - 1710**

**Tauti Morisaburo** — The Increase of Large Fishes in the stock Resulted from Saving Small ones. – Bull. Jap. Soc. Scient. Fish., III, 6, 307-311. Tokyo (1935). **b - 1711**

In the present paper the increase of the number of large individuals in the stock due to saving the small ones is discussed, the body weight of individuals being put out of consideration.

**An.** - Prospects for East Anglia. Fishery will Reach its Maximum Round About October 22nd, says this Official Forecast. – Fish Trad. Gaz., 8–IX–1934, 16. London (1934). **b - 1712**

## PORTUS AD PISCANDUM

**Barris** - Port-Etienne, port de pêche international. – VII^e Congr. Int. Aquicult. & Pêche Paris 1931, Communications, III, 329-338. Impr. du Loiret. Orléans (1935). **b - 1713**

Projet d'amélioration du port, possibilité d'exploitation des produits de la pêche. Proposition de réunir une commission de techniciens spécialisés pour formuler les réglementations de la pêche et l'emploi des engins.

**Fortini G. O.** - I nostri centri e i nostri paesaggi pescherecci. Isola delle Femmine. – Boll. Pesca, Piscicult. e Idrobiol., XI, 1, 5-9. Roma (1935). **b - 1714**

**Mola P.** - I nostri paesaggi e i nostri centri pescherecci. Il Golfo dell'Asinara. – 7 fig., Boll. Pesca, Piscicolt. e Idrobiol., X, 3, 323-334. Roma (1934). **b - 1715**

Porto Torres: posizione geografica; importanza economica e commerciale e peschereccia; popolazione marinara; metodi e mezzi di pesca; pesci e molluschi pescati: movimento della pesca. Stintino: delimitazione geografica; attitudini degli abitanti; la pesca dei crostacei; lo Stabilimento di Torre Saline per la salagione e confezione del tonno in barili e scatole; la tonnara delle Saline; le saline di Stintino. Altri centri pescherecci del golfo: l'isola di Asinara, l'isola Piana.

**Pantano M. G.** - I nostri paesaggi e i nostri centri pescherecci. Augusta. – 9 fig., Boll. Pesca, Piscicolt. e Idrobiol., X, 6, 707-732. Roma (1934). **b - 1716**

Origine leggendaria di Augusta, isoletta dell'Ionio, descrizione delle attrattive che presenta. Attitudini marinare della sua popolazione fin dall'antichità. Cenni sulla flottiglia e i sistemi di pesca, e sull'organizzazione professionale tra i pescatori.

**Puglisi A.** - I nostri paesaggi e i nostri centri pescherecci. La Riviera Liburnica. Volosca, Abbazia, Laurana. – 5 fig., Boll. Pesca, Piscicolt., e Idrobiol., IX, 6, 985-989. Roma (1933). **b - 1717**

Dopo una breve descrizione del paesaggio della riviera Liburnica, l'A. espone le condizioni dell'ittiofauna del Carnaro e le specie di pesci prevalenti. Riferisce inoltre sui sistemi tradizionali di pesca esercitati nella riviera Liburnica, sulle caratteristiche della pesca al tonno, molto differente di quelle usate nelle tonnare della Sicilia e della Calabria, e infine accenna alla vendita del prodotto.

**Puglisi A.** - I nostri paesaggi e i nostri centri pescherecci. Trapani. – 6 fig., Boll. Pesca, Piscicolt. e Idrobiol., X, 2, 171-185. Roma (1934). **b - 1718**

Origine storica. Monumenti ed attrattive. Pesca e pescatori. Navigli e sistemi di pesca. Industria della pesca. La pesca del corallo. Le saline.

**An.** - Der Fischereiplatz Wesermünde im Spiegel der Zahlen. – 2 Tab., Dtsch. Fischwirt., II, 13, 213-215. Berlin (1935). **b - 1719**

Zusammenfassende Wiedergabe der in dem Berichte des Seefischmarkts A. G. Wesermünde enthaltenen Statistiken über die Leistungen des Fischereihafens Wesermünde.

# METHODUS ET INSTRUMENTA PISCATIONIS

## *Retia et instrumenta.*

**Alfonsi B.** - Confronto fra due tipi di lampade usate nella pesca luminosa nei riguardi della penetrazione delle loro luci nell'acqua di mare. – 5 fig., Boll. Pesca, Piscicult. e Idrobiol., X, 6, 1062- 1067. Roma (1934). **b - 1720**

Ricerche relative al confronto tra la penetrazione delle luci di due lampade – ad acetilene e a benzina – nell'acqua di mare, allo scopo di studiare la convenienza dell'uso dell'una o dell'altra di esse nella pesca luminosa. Risultati di una prima serie di esperienze.

**Averintzev S.** - La pêche allemande au chalut dans la Mer de Barents pendant les années 1929-1933. (En russe). – Tabl., Za Rybn. Ind. Sev., 11, 20-22. Leningrad (1934). **b - 1721**

**Baranov N. S.** - Le chalut construit par K. F. Gavrilenko. (En russe). – 3 fig., 1 tab., Rybn. Choz. Daljn. Vost. (Econ. Pêche Extr.-Orient), 1/2, 60-65. Moskva-Khabarovsk (1934). **b - 1722**

Description d'un nouveau type de filet pour la pêche du poisson « ivasj » dans les mers de l'Extrême-Orient russe. Avantage économique et pratique de l'emploi du nouvel engin. Résultats des premières expériences de son emploi.

**Belloc G. & Le Gall J.** - Le Chalutage. – 36 fig., tabl., Mém. Off. Pêches Marit., Man. Pêches marit. Franç., Sér. Spéc., 10, 2, 19-50. Paris (1935). **b - 1723**

Premier chapitre de la troisième partie du « Manuel des Pêches Maritimes Françaises », dont le contenu est ainsi qu'il suit: Le chalut: évolution de l'engin à travers l'histoire; le chalut bœuf ou « gangui »; le chalut à perche, à plateau et Vigneron-Dahl; le troisième plateau. Les chalutiers: le chalutiers à voiles et leur motorisation; le chalutier à vapeur; le chalutier frigorifique et le chalutier usine.

**Bonnerjea B.** - North American Fish-Hooks. – Science, LXXXII, 2134, 492. New York (1935). **b - 1724**

Short note on the origin of these hooks.

**Clark G. H.** - San Francisco Trawl Fishery. – Calif. Fish and Game, XXI, 22-37. Sacramento (1935). **b - 1725**

**Croker R. S.** - A New Net Development. – Calif. Fish and Game, XXI, 3, 262-263. Sacramento (1935). **b - 1726**

A miniature purse seine to be used in shallow water developed from an old type in use at San Pedro.

**Graham M.** - Modern Theory of Exploiting a Fishery and Application to North Sea Trawling. – 1 fig., 2 tabl., Journ. Cons. Expl. Mer, X, 3, 264-274. Copenhague (1935). **b - 1727**

After an account of the essentials of the theory and their applications A. concludes that even a stock declining in numbers can be better fished, from the point of view of economy, leisure, and yield, if the fish are allowed to grow; that any reduction of fishing rate would slow down the decline, and that a reduction of say, 16 per cent. in the fishing rate might indeed be sufficient to arrest the decline altogether.

**Johns W.** - Das Echolot in der Fischerei. – 8 Abb., Fischmarkt, 10, 256-258. Cuxhaven (1934). **b - 1728**

Bau und Funktionieren des Echolots; seine Vorteile für die Fischerei: Navigationsinstrument zur Bestimmung des Fischortes, zum Auffinden der Fangplätze, zur Feststellung der Tiefe und deren Einhalten beim Fischen.

**Kamiya S.** - The Distribution of Tensions in the Nets. (In Jap., Engl. Rés.). – 2 figs., 2 tabl., Bull. Jap. Soc. Scient. Fish., III, 1, 5-7. Tokyo (1934). **b - 1729**

Description of experiments based on the study of Pearson's coefficient of variation with cotton nets with a view to examine the actual value of the dispersion of tension caused by the irregularity of meshes.

**Kamiya S. & Yasuda H.** - The Distribution of Tensions in the Nets. II. (In Jap., Engl. Rés.). – Bull. Jap. Soc. Scient. Fish., III, 4, 203-204. Tokyo (1934). **b - 1730**

The present experiment concerns Pearson's coefficient of variation $V$, of the tensions on the arms of the nets of various materials.

**Kimoru Kinosuke** - Statistical Analysis of the Catch by Keddle Nets, Along the Coast of Suruga Bay. – 29 figs., 6 tabl., Rec. Oceanogr. Works Japan, VII, 1, 1-36. Tokyo (1935). **b - 1731**

This statistical analysis concerns the great number of yellowtail and young bluefin tuna that are caught by the keddle nets along the coast of Suruga Bay.

**Knipovitch N.** - Sur l'histoire de la pêche au chalut dans la Mer de Barents. (En russe). – 2 fig., tabl., Za Rybn. Ind. Sev., 5, 4-7. Leningrad (1935). **b - 1732**

**Le Gall J.** - La pêche au filet derivant. – 49 fig., 1 graph., Mém. Off. Pêches Marit., Man. Pêches Marit. Franç., Sér. Spéc., 10, 2, 51-93. Paris (1935). **b - 1733**

Deuxième chapitre de la III-ème partie du « Manuel des Pêches Maritimes Françaises », traitant des différentes pêches et de leurs engins: La pêche du hareng et la pêche du maquereau. Aperçu historique de ces deux pêches, les ports d'armement, les engins et la technique de pêche, les époques et lieux de pêche, les modes d'utilisation des produits de la pêche du hareng et du maquereau.

**Makouchok M. E.** - La pêche au chalut. (En russe). – 44 fig., 80 pp., Sevkrajghiz, Arkhangheljsk (1933). **b - 1734**

**Marchand J. M.** - Report on Preliminary Fishing Experiments with the Trammel-Net. – 3 figs., 1 table. 12th Ann. Rep. Fish. & Mar. Biol. Surv., 111-120. Pretoria, S. Afr. (1935). **b - 1735**

Description of the so-called trammel-net, the method of which is considered as an additional catching method to help the South African line-fishermen.

**Meseck G.** - Zur Verwendung von Sisalhanf und anderen Hartfaserhänfen in der Fischerei. – 6 Tab., Fischmarkt, 4, 92-97. Cuxhaven (1934). **b - 1736**

Besprechung der wichtigsten Ergebnisse der im « Bulletin of the Imperial Institute », n° 1, 1931 und n° 2, 1932 veröffentlichten Berichte über die seit einigen Jahren vom « Imperial-Institute » durchgeführten Tauuntersuchungen zur Verwendung der Taue zu fischereilichen Zwecken. S. auch die deutschen Referate im « Tropenpflanzer », 1931, S. 214 und 1932, S. 446.

**Meseck G.** - Zur Verwendung von Manilatauwerk in der Fischerei. – 4 Tab., Fischmarkt, 9, 235-237. Cuxhaven (1934). **b - 1737**

Zusammenfassende Wiedergabe der von Dr. Olie und Cool ausgeführten Untersuchungen, über welche in der holländischen Zeitschrift « Het Ship » (J. 16, n° 10, 18. Mai, 1934) berichtet worden ist.

**Mikhailov S.** - La pêche allemande au chalut dans la Mer de Barentz. (En russe). – 2 fig., 1 tabl., Za Rybn. Ind. Sev., 6, 5–9. Leningrad (1934). **b - 1738**

**Miraglia L.** - Nuovo sistema di osservazione e di caccia subacquea. – 10 fig., Boll. Pesca, Piscicolt. e Idrobiol., XI, 2, 255-316. Roma (1935). **b - 1739**

L'A. tratta dei mezzi diretti ed indiretti in uso per l'osservazione dei pesci e dei problemi relativi. Descrive le abitudini e l'habitat dei pesci più comuni e più importanti per la pesca, viventi lungo le coste rocciose del Tirreno.

**Miyamoto H.** - The Excess Buoyancy of Gill Nets and the Tension of them. (In Jap., Engl. Rés.). – 1 fig., 1 table. Bull. Jap. Soc. Scient. Fish., III, 3, 147-149. Tokyo (1934). **b - 1740**

Nearly the same proportion of total meshes is occupied by fishes before the net falls down, when the fishes are of the same species or of similar shoals. The tension of net seems to be related with the body weight of similar kinds of fishes e. g. *Cypselurus agoo* (T. & S.) and *Cololabis saira* (Brevoort) (A.).

**Miyosi K.** - On the Flexibility of Netting Cords. (In Jap., Engl. Rés.). – 4 figs., 3 tabl., Bull. Jap. Soc. Scient. Fish., III, 3, 143-146. Tokyo (1934). **b - 1741**

Results of the experiments undertaken to examine the force needed for bending a cord in a circular arc.

**Neuhaus E.** - Ueber den Wert der Netzkonservierung. – Dtsch. Fisch.-Rundschau, 12, 262-264. Bremerhaven (1935). **b - 1742**

Winke zur Ausführung einheimischer Imprägnierung.

**Neuhaus E.** - Neues und Wichtiges über Netzkonservierung. – Dtsch. Fisch.-Rundschau, 25, 577-578. Bremerhaven (1935). **b - 1743**

In n° 12 derselben Zeitschrift hat Vf. schon gründliche Ausführungen über den Wert der Netzkonservierung gemacht. In der vorliegenden Notiz berichtet er über einige Neuigkeiten auf diesem Gebiet an Hand der Ergebnisse der Arbeiten der « Niederländischen Fischereiversuchsanstalt und Laboratorium für Materialuntersuchungen » in Utrecht, Holland.

**Sund O.** - Echo Sounding in Fishery Research. – 1 fig., Nature, CXXXV, 3423, 953. London (1935).

(—) Lofotfisket 1935, Årsber. v. Norg. Fisk. 1935, 2, 89-91. Bergen (1935) **b - 1744**

Short report on records of spawning cod obtained by the Hughes echo sounding gear on board the s/s « Johan Hjort » at Høla, á bight of the Westfjord, in February 1935.

**Takenouti Y.** - The Nature of the Fishing Net and its Application to the Broad Break of the Net. I. – 7 fig., Bull. Jap. Soc. Scient. Fish., IV, 3, 141-146. Tokyo (1935). **b - 1745**

These investigations show that the differences of the nets with trawler knots and those with flat knot are mainly due to the tightness of knot, namely the range of its sliding. As to other factors concerning the strain distribution will be reported later on.

**Tauti M.** - A Relation between Experiments on Model and on Full Scale of Fishing Net. – 4 figs., formulas. Bull. Jap. Soc. Scient. Fish., III, 4, 171-177. Tokyo (1934). **b - 1746**

The study concerns the following possibilities: 1. The elongation of netting cords is negligible in the working conditions. 2. The pieces of net are perfectly flexible. 3. The change in the form of net occurs so slowly as the external forces acting on each elemental portion of net are taken to be in the quasi-equilibrium.

**Uda M. & Honda K.** - The Catch of Keddle Nets in Two Fishing Grounds on the Coasts of Nagasaki Prefecture and Idu Peninsula. (In Jap., Engl. rés.). – 10 figs., 2 tabl., Bull. Jap. Soc. Scient. Fish., II, 5, 263-271. Tokyo (1934). **b - 1747**

Analysis of the fluctuations in the catch of « Buri » (*Seriola quinqueradiata* T. & S.) based on daily records of the catch of keddle nets expressed in equations.

**Uno M.** - Influence of Preservative Dye on the Weakening of Nets. (In Jap., Engl. rés.) – 5 tabl., Bull. Jap. Soc. Scient. Fish., III, 2, 83-86. Tokyo (1934). **b - 1748**

Results of a test-examination carried out by the Japanese Society for the Study of the fixed Net Fishery. The preservative effect of most dyes in the case, where the dyed cords are subject to fishing operation, is nearly proportional to that in the case where the dyed cords hang freely down in the sea.

**Uno M.** - The Form and the Tension on Pursing Line of a Mackerel Ring-net used at Kosaitô, Tyôsen, as Known by a Model Experiment. (Jap. Text, Engl. Rés.). – 56 figs. on pl., 3 tabl., Bull. Jap. Soc. Scient. Fish., IV, 3, 147-152. Tokyo (1935). **b - 1749**

The tension, which is known to act on the pursing line of the original net is of reasonable magnitude as compared with the breaking strength of it.

**Uno M.** - Drift-net Skipper in the North-eastern Waters of Japan. (Prel. Rep. II). (In Jap., Engl. Rés.). – 1 tabl., 1 fig., Bull. Jap. Soc. Scient. Fish., IV, 3, 158-160. Tokyo (1935). **b - 1750**

Calculations on the proportions of length of different age-groups according to the spawning marks in the waters north of Tiba pref. and off Mie Pref.

**Yasuda H.** - Change in the Length and Diameter of Stretched Cotton Cords with Absorption of Water. (In Jap., Engl. rés.). – 4 figs., 2 tabl., Bull. Jap. Soc. Scient. Fish., II, 6, 297-300. Tokyo (1934). **b - 1751**

This experiment was undertaken with the same method as the one used with unloaded cords (this rev. II, 2, 80-84, 1933). The values are expressed in equations and graphs.

**Yasuda H.** - Absorption of Water by Netting Cords and the Change in their Length and Diameter. (In Jap., Engl. Rés.). – 4 figs., 2 tabl., Bull. Jap. Soc. Scient. Fish., III, 4, 205-208. Tokyo (1934). **b - 1752**

Examination of the amount of absorbed water and the change in length and diameter of ramie, Manila hemp and Japanese hemp cords immersed in water.

**“Scott Jock”** - Greased Line Fishing for Salmon. Compiled from the Fishing Papers of the Late A. H. E. Wood, of Glassel. With Contributions by the Rt. Hon. J. W. Hills & G. M. La Branche. – 16 pls., 221 pp., Seeley, Service & Co., Ltd. London (1935). **b - 1753**

**An.** - Wie geht die Herings-Treibnetzfischerei vor sich ? – 5 Abb., Dtsch. Fisch.-Rundschau, 14, 309-313. Bremerhaven (1935). **b - 1754**

Beschreibung des Treibnetzes, der Anordnung des Herings-Treibnetzes deutscher Art, seiner Aussetzung und Einholung; Schilderung der Arbeit, welche von einzelnen Matrosen ausgeführt werden soll, mit besonderer Berücksichtigung der Verarbeitung der gefangenen Heringe.

**An.** - Die Sowjetmethoden taugen für den Fischerei-Betrieb nichts. Eine norwegische Meinung. – Dtsch. Fisch.-Rundschau, 18, 410. Bremerhaven (1935). **b - 1755**

Notiz, welche in «Norges Handels- og Sjöfartstidende» veröffentlicht worden ist und aus welcher es klar hervorkommt, dass die Pläne der Sowietregierung in bezug auf die Seefischerei der nicht sachmännigen Administrations- und Baumethoden wegen nicht durchführbar sind.

**An.** - A Simple and Highly Effective Buoy Light that you can make yourself. – 5 sketches. Fish. Gaz., LII, 1, 25. New York (1935). **b - 1756**

Sketches with explanatory text for the construction of this simple buoy light.

**An.** - Rope, specially treated, able to resist *Teredo*. – Fish. Gaz., LII, 3, 29-30. New York (1935). **b - 1757**

Results of the investigations undertaken by the Plymouth Cordage Company in order to find means to resist this fouling and destructive marine organism.

Chapitre IV de la III-ème partie du «Manuel des Pêches Maritimes Françaises», contenant la description des différentes méthodes de pêche littorale, avec référence spéciale aux filets fixes, aux filets flottants, aux sennes, à la pêche des civelles, aux dragues à coquilles, aux nasses, carrelets, foënes et épuisettes, et à la pêche à l'hameçon le long des grèves.

**Brunelli G.** - La pesca meccanica in relazione alle risorse ittiche dei nostri mari. – Atti Conv. Pesca Meccan. (Bari, 7 settembre 1934-XII), 10-13. Roma (1934). **b - 1762**

La pesca meccanica in Italia, affermatasi da un quindicennio, ha portato un notevole aumento di prodotti sui mercati nazionali. Non solo il mare non si è esaurito, ma nuove qualità di pesce e di crostacei sono state in gran quantità tratte dalle pesche profonde. Il progresso delle costruzioni del naviglio meccanico italiano è adeguato alla possibilità del rendimento dei nostri mari. L'Italia ha nel Mediterraneo l'assoluto primato della pesca meccanica.

Information on the reorganization and development of the fishing fleet in the Barents Sea; new fishing units built.

**An.** - Vor der Ausrüstung einer deutschen Walfangflotte. – 3 Abb., Dtsch. Fisch.-Rundschau, 10, 217-219. Bremerhaven (1935). **b - 1805**

Veröffentlichung eines hamburgischen Pressedienstes, welche Prophezeiungen und Rentabilitätsberechnungen in Bezug auf die Frage der Neubeteiligung Deutschlands an dem internationalen Walfang enthält.

## *Naviculae earumque constructio – Instrumenta – Motores – Radioapparatus.*

**Botchek A.** - Service d'un bateau de chasse et de pêche à l'Ile Wrangel. (En russe). – Za Ind. Sov. Vost., 3, 243-245. Moskva (1934). **b - 1806**

**Bretthofer W.** - Hat die Nordseefischerei noch eine Zukunft? Noch eine Bemerkung zur Frage besonders stark gebauter Fischkutter. – Dtsch. Fischwirt., II, 31, 611. Berlin (1935). **b - 1807**

Einige Betrachtungen über den Bau und Gebrauch grosser Kutter, die sich gleichermassen für die Waden- und Schleppnetzfischerei eignen, in der Nordseefischerei und über die Möglichkeit in dieser Weise diese Fischerei auf eine neue und rentable wirtschaftliche Grundlage zu stellen.

**Corsico M.** - Guida pratica per la costruzione di barche da diporto, corsa, pesca, carico, fluviali, lacuali, lagunari e marine. – 460 fig., 313 pp., Un. Tipogr. Ed. riv. « Motonautica - La vela ed il motore ». Milano (1935). **b - 1808**

Il volume offre al piccolo costruttore una guida facile, piana e sicura, e nel tempo stesso dilettevole e interessante, per la costruzione del piccolissimo naviglio da diporto o di servizio, e specialmente delle barche da spiaggia e da riva, di poca portata e facilmente trasportabili.

**Hill H. O.** - East Cornish Luggers. – 11 fig., 3 pls., Mar. Mirr., XXI, 3, 225-244. London (1935). **b - 1809**

Development of the type of the luggers of the fishing port of east Cornwall, namely Looe, and Mevagissey, illustrated with detailed descriptions of some of the most known boats of this type.

**Ikonnikov** - La radiofication des chalutiers. (En russe). – 3 fig., Za Rybn. Ind. Sev., 5, 28-29. Leningrad (1935). **b - 1810**

**Le Masson H.** - Les Baleiniers modernes sont d'importantes "Usines flottantes". – Rev. Ind., LXV, 2307, 65-69. (1935.). **b - 1811**

Différents types de baleiniers sont décrits et illustrés dans ce travail, dont une partie concerne l'industrie de la pêche à la baleine.

**Nidever H. B.** - Commercial Fishing Boat Numbering System. – 4 figs., 1 table. Div. Fish & Game, Bur. Comm. Fish., Fish Bull., 44, 29-36. Sacramento, Ca. (1935). **b - 1812**

Author illustrates the registering system applied to the fishing boats or vessels in the state's fisheries, since the law has been enforced in 1919 which provides that such boats shall be registered each year. He gives the combination form of boat registration and fisherman's license application initiated April 1, 1933.

**Oomori S.** - Studies on the Piston Ring of Semi-Diesel Engines for Fishing Motor Boat. (Preliminary Report). I. Air Tightness of the Piston Ring. (Jap. Text, Engl. Rés.). – 7 fig., 1 tabl., Bull. Jap. Soc. Scient. Fish., IV, 1, 15-20. Tokyo (1935). **b - 1813**

Tests with one piston ring only, and with three rings together–as well as with surfaces of the ring polished in different ways.

**Whynacht R. M.** - Lunenburg Fishing Schooner 1935 Model. – 7 figs., Canad. Fisherm., XXII, 1, 9-12. Gardenvale, Que. (1935). **b - 1814**

Full details of the lines, construction and equipment of the auxiliary banker « E. F. Zwicker », constructed at Lunenburg. She is able to remain at sea in all weathers and is the last word in every feature that ensures good care of the fish caught, economy of operation, and reduction of time on passages from and to the Banks.

**Zhilinskij A.** - Sur le type de navire pour la chasse maritime. (En russe). – Za Rybn. Ind. Sev., 6, 8-11. Leningrad (1933). **b - 1815**

**Manufacturers' Engineers** - Fishing Boats Engines. – Fish. Gaz., Ann. Rev. Numb., 39-41. New York (1935). **b - 1816**

Description of salient points of different fishing boat engines, made by manufacturers' engineers of American motor-building firms.

**The Technical Editor** - New Equipment for Vessels. – 2 ills., Fish. Gaz., Ann. Rev. Numb., 12-13. New York (1935). **b - 1817**

Brief account of the novelties introduced during 1935 in the fishing vessels' equipment, with special reference to storage batteries, generators, electrical equipment, trawl winches, windlasses, pumps, filters, piston rings, couplings, clutches, stoves, fire alarm and extinguisher.

**The Technical Editor** - Engine Digest. – 1 table. Fish. Gaz., Ann. Rev. Numb., 17, 19, 22, 33-38. New York (1935). **b - 1818**

List including the principal specifications of gasoline, oil and Diesel engines suitable for commercial fishing craft, brought up-to-date for the Annual Review Number of the « Fishing Gazette ».

**An.** - The Trawler Question. – Canad. Fisherm., XXII, 2, 9-10. Gardenvale, Que. (1935). **b - 1819**

Some considerations on the advantages and the disadvantages of the operation of steam trawlers.

**An.** - Der Dieselmotor in Schiffsbetrieb I. – 3 Abb., Dtsch. Fisch.-Rundschau, 10, 222-223. Bremerhaven (1935). **b - 1820**

Beschreibung einiger neuzeitlichen Dieselmotoren, welche sich gut zum Aufbau auf Fischereischiffe eignen.

**An.** - Logger "Grosser Kurfürst" als Versuchsschiff. – 1 Fig., Dtsch. Fisch.-Rundschau, 16, 359-360. Bremerhaven (1935). **b - 1821**

Bericht über den Bau des Loggers « Grosser Kurfürst », welcher den ersten Angriff darstellt, die alljährliche von Dezember bis Mai dauernde tote Saison der Heringsfischerei zu werten. Einige Einzelheiten des Baues des Loggers, die ihm diese Aufgabe erleichtern.

**An.** - Neuzeitliche Funkstationen auf Fischdampfern. 2 Fig., Dtsch. Fisch.-Rundschau, 17, 381-383. Bremerhaven (1935). **b - 1822**

Beschreibung einer modernen Funkanlage an Bord eines Fischdampfers.

**An.** - A Review of the Trend in Vessel Design and Construction. – 2 phot., Fish. Gaz., Ann. Rev. Numb., 10. New York (1935). **b - 1823**

Illustration of two new boats built respectively on the Atlantic and Pacific coasts of the United Stated, showing the trend in fishing vessels' design and construction on both the coasts.

**An.** - Engine Development in Review. -- Fish. Gaz., Ann. Rev. Numb., 14-15. New York (1935). **b - 1824**

Attention is called to the brand-new engines and to some of the new boats and re-powering jobs brought out since the last (1934) Annual Review Number of the « Fishing Gazette ».

**An.** - New and Standard Equipment for Fishing Craft. – 30 figs., Fish. Gaz., LII, 1, 6-15. New York (1935). **b - 1825**

A summary of some of the more important items available to those outfitting their boats, with special reference to the National Motor Boat Show, held January 18-26, 1935, in New York City.

**An.** - Six Engines Recently Introduced. – 6 figs., Fish. Gaz., LII, 2, 11-13. New York (1935). **b - 1826**

Further refinement of design noted in the offerings at Motor Boat Show. Description of new, or fairly new, engines of particular interest to fishermen.

**An.** - A Startling Shortage of Vessels Invites Building Boom and Gain in Equipment Sales. – 4 tabl., Fish. Gaz., LII, 2, 14-15. New York (1935). **b - 1827**

Statistical Government figures which show estimated drop of over 23.000 in number of fishing boats and vessels in 1934, taking 1928 statistics as base. Condition of the fishing industry in 1935 and considerations as to its further development in 1936.

**An.** - Large Type Shrimp Trawler. – 1 fig., Fish & Oyst. Rep., XVI, 10, 15. Tampa, Fla. (1935). **b - 1828**

Description of one of the most modern boats built in recent years and launched in Florida waters in September 1935.

# LOCA AD PISCANDUM

## *Fundi et loca piscosa eorumque inventio – Variatio piscium turmarum.*

**Andersson K. A.** - Baltic Area 1934. – 2 fig., 1 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer, XCIV, 2-ème partie, Rapp. administr. (1934-1935), 55-61. Copenhague (1935). **b - 1829**

Denmark: Biology (Plaice, Flounder, Turbot, food of herring). Germany, Finland: Biology. Latvia: Statistics, Biology (the Fishery Laboratory and the Hydrobiological Station). Poland: Hydrography, Fisheries investigations, Biological Salmon investigations. Sweden: Biology (Herring, Flounder, Plaice, Turbot, Cod, Salmon and Sea Trout. Plankton. Hydrography). Summary of 1934- cruises.

**Bartz F.** - Die Fischereigebiete an der Westküste Afrikas. – Fischmarkt, III, 6, 144-147. Cuxhaven (1935). **b - 1830**

Grösse, Umfang, geschichtliche und wirtschaftliche Bedeutung der nordwestafrikanischen und südwestafrikanischen Gebiete, welche die einzigen atlantischen Schelfregionen sind, in denen der grosse Fischreichtum auf kaltes, aus der Tiefe aufsteigendes Auftriebwasser zurückzuführen ist.

**Belknap J. C.** - Banksmen of Lunenburg. Winter Fishing in the « Marguerite B. Tanner ». – 8 figs., Canad. Fisherm., XXII, 5, 9-12 & 32; 6, 11-14 & 28; 7, 9-10. Gardenvale, Que. (1935). **b - 1831**

Foundation of the town of Lunenberg and its important codfishery (dried salt codfish); diminution of this market during the great war and development of a new branch: fresh fishing. Account of A: s trip on the modern fishing craft of Lunenberg in March 1935.

**Belloc G.** - La coopération de la navigation aérienne. – 2 fig., Mém. Off. Pêches Marit. (Sér. Spéc.), 9: Man. Pêches Marit. Franç., 1, 130-133. Paris (1935). **b - 1832**

Bref compte-rendu des résultats de certaines expériences entreprises depuis 1918 pour le repérage des bancs de poisson par aéronef.

**Blegvad H.** - Transition Area Committee 1934. – 6 fig., Rapp. Pr.-Verb. Cons. Expl. Mer, XCIV, 2-ème partie, Rapp. administr. (1934-1935), 43-54. Copenhague (1935). **b - 1833**

Denmark: Plaice investigations, other Flatfish, Cod and other *Gadidae*, Herring, Mackerel and Eel, Larvae of spring spawning Fishes, Anchovy, Norwegian Prawn, bottom Invertebrates, Plankton, Cod transplantation to the Limfjord, investigations concerning the disease of *Zostera marina* and fish-diseases. Publications. Germany: Plaice. Norway. Sweden: Haddock, Herring, Plankton. Publications.

**Bückmann A.** - Southern North Sea 1934 – 2 tabl., Rapp. Pr.-Verb. Cons. Expl. Mer, XCIV, 2-ème partie, Rapp. administr. (1934-1935), 29-42. Copenhague (1935). **b - 1834**

Introduction. Work at Sea. Fish: General, Cod and Haddock, Herring, Plaice, other Fish. Shellfish. Benthos and Deposits. Plankton. Hydrography. Scientific papers connected with the Committee's work published in 1934.

**Buvik L. E.** - Beretning om fisket i Vårsilddistriktene (Sogn og Fjordane, Vest-Agder fylker) 1932-33. – Tabl., Årsber. v. Norg. Fisk., 1933, 5, 104-119. Bergen (1935). **b - 1835**

Données statistiques et rapports sur le rendement de la pêche, des bateaux, de différents engins de pêche etc., pour harengs et morues.

**Clark S. R.** - Northern North Sea 1934. – Rapp. Pr.-Verb. Cons. Expl. Mer, XCIV, 2-ème partie, Rapp. administr. (1934-1935), 20-28. Copenhague (1935). **b - 1836**

General remarks on the influx from the Atlantic water- masses and the following changes in the composition and distribution of the plankton and the larvae, fluctuations of the stock. Plan of unifying the reports. Denmark. England. France: Work at Sea, Herring, Haddock. Megrim, Plankton. Germany. Holland. Norway. Scotland: Work at Sea, Hydrography, Plankton, Fisheries and Fish. Bottom Fauna. Summary of 1934- cruises.

**Heldt H.** - Nouvelles expériences pour le repérage des bancs de poissons par hydravion et ballon captif remarqué. – VII Congr. Int. Aquicult.

& Pêche, Paris 1931, Communications, III, 83-86. Impr. du Loiret. Orléans (1935). **b - 1837**

De l'impossibilité matérielle pour les naturalistes de poursuivre désormais de telles recherches en Tunisie.

**Hogarth G.** - Use of Aircraft for Locating Fish Shoals. (In Engl., French Rés.). – VII Congr. Int. Aquicult. & Pêche, Paris 1931, Communications, III, 75-82. Impr. du Loiret. Orléans (1935). **b - 1838**

First initiative of use of aircraft for locating fish shoals. Experiments carried out with a special reference to those undertaken by the Fishery Board for Scotland during 1921-1924 and from 1928. Results rather negative; new suggestions.

**Jensen A. J. C.** - Periodic Fluctuations in the Size of various Stocks of Fish and Their Causes. – Medd. Komm. f. Danm. Fisk.- og Havunders., Ser. Fisk., IX, 5. København (1933). **b - 1839**

**Sund O.** - North-Eastern Area 1934. – Rapp. Pr.-Verb. Cons. Expl. Mer, XCIV, 2ème partie, Rapp. administr. (1934-1935), 8-10. Copenhague (1935). **b - 1844**

Germany: Tätigkeitsbericht für die N. O.- Area für 1934. Norway: The Fisheries Directorate, Cod, Herring, Sprat (investigations). German and Norwegian publications on work carried out in the N.–E. Area in 1934. Cruises: Germany, Norway, Scotland.

**Tåning Å. V.** - North-Western Area 1934. – Tabl., Rapp. Pr.-Verb. Cons. Expl. Mer, XCIV, 2ème partie, Rapp. administr. (1934-1935), 11-16. Copenhague (1934). **b - 1845**

Denmark, Faroes, Iceland, Denmark Strait, Greenland: Whales, racial, plankton and other investigations, hydrography. England, France, Germany, Norway, Scotland. Literature. Summary of 1934- cruises.

**The Imperial Fisheries Experimental Station (Japan).** - On the Fishing Bank Lying between Inatori and Ôsima (Sagami Nada). (In Jap.). – 2 pls., Hydrogr. Bull., XIII, 351-352. Tokyo (1934). **b - 1846**

The bank discovered during the expedition of the « Sôyô Maru » has a minimum depth of 208 meters and a base of 6 km. in N.-S. direction, and 3,5 km. in E.-W. direction.

**An.** (trad. du russe par le Capit. Cochin). - Industrie de la pêche dans les mers arctiques. – 3 tabl., Rev. Trav. Off. Pêch. Marit., VII, 3, 334. Paris (1934). **b - 1847**

Données statistiques, empruntées à une publication russe et basées sur les renseignements statistiques publiés récemment par le Congrès International pour l'étude de la Mer, dont il résulte que l'industrie de la pêche s'est accrue d'une manière considérable au cours des dernières années dans la Mer de Barentz, sur les côtes du Groenland et dans les régions Nord et Nord–Ouest de l'Europe.

## *Tabulae et statisticae ad fundos piscosos pertinentes.*

**Clark G. H.** - Logs on California Trawlers. – 3 figs., Div. Fish. & Game, Bur. Comm. Fish., Fish Bull., 44, 37-40. Sacramento, Calif. (1935). **b - 1848**

Author points out the importance of the fishing vessels' log for the development of the fisheries statistics in California and gives some details of the log book plan developed and applied to the boats operating trawls out of San Francisco, and of the first year's records (January-December, 1934).

**Conner G.** - Modernizing Commercial Fisheries Statistics. – 10 figs., Div. Fish & Game, Bur. Comm. Fish., Fish Bull., 44, 11-28. Sacramento, Calif. (1935). **b - 1849**

Development of the statistical system of the Bureau of Commercial Fisheries of California, depending not on paid employees of the state, but upon the people of industry.

**Kouznetzov N. M.** - L'industrie de la pêche de la Région du Nord. (En russe). – Choz. Sev., 9, 39-45. Arkhangheljsk (1934). **b - 1850**

Données statistiques pour les années 1932, 1933 et 1934.

**Lundbeck J.** - Die Ertragsstatistik der Hochseefischerei als Mittel der wissenschaftlichen Fischereiforschung. – 2 Tab., Fischmarkt, III, 8, 200-203. Cuxhaven (1935). **b - 1851**

Bedeutung der Fischereistatistik für die Schätzung der Ergiebigkeit des Meeres und des Wertes der einzelnen Meeresgebiete für die Fischerei. Schwierigkeiten einer eindeutigen Festlegung des Ertrages der Fischerei. Die bei der Fischerei angewandten statistischen Methoden und die mit ihnen erhaltenen Ergebnisse in Bezug auf die Fischerei einzelner Fischereigebiete mit besonderer Berücksichtigung der Fischerei unter Island und im Barentsmeere. Betrachtungen über die Gründung von Forschungsstellen an den einzelnen Fischmärkten.

**Russo A.** - Statistiche raccolte nel 1932 su la pesca con fonti luminose nel Golfo di Catania e dati relativi alla produzione. – Boll. Pesca, Piscicolt. e Idrobiol., XI, 1, 10-32. Roma (1935). **b - 1852**

La pesca luminosa esercitata nel 1932 con la *pulica* e la *menaida*, negli alti fondali del golfo di Catania ha dato una produzione considerevolmente maggiore degli anni precedenti. Il prodotto totale da aprile ai primi di ottobre 1932 è stato di q.li 4326,10 complessivamente. I dati per giorno, mesi, località e profondità, rendimento in quintali per ogni specie di pesce, e prezzo del pesce stesso, sono riuniti in un elenco.

**Scofield W. L.** - Fisheries Statistics: Achievements Through Flexibility. – Div. Fish & Game, Bur. Comm. Fish., Fish Bull., 44, 7-10. Sacramento, Calif. (1935). **b - 1853**

Author looks back over the accomplishments of the last sixteen years in the development of fisheries statistics in California. He illustrates the practical application of those statistics and gives some examples of the direct application of them to conservation practice and a proper management of fisheries resource.

**Thompson D'Arcy W.** - Bulletin Statistique des pêches maritimes des pays du Nord et de l'Ouest de l' Europe publié par le Bureau du Conseil. – 17 tabl., 2 maps, Cons. Perm. Expl. Mer, Bull. Stat. pour 1933, XXIII, 1-51. Copenhague (1935). **b - 1854**

Charts of statistical areas. Part I: A brief summary of the statistical tables. North Sea fisheries, « Small fish » in the North Sea catch. The fisheries of Skagerak and Kattegat. The herring fishery. Part II: Tables. Names of fishes.

**Administration de la Marine - Bestuur Van Het Zeewezen.** - Rapport sur la pêche maritime. Statistiques 1932-1933. Jaarverslag over de Zeevisscherij. Statistieken 1932-1393. (En franç. et flam.). – Tabl., 79 pp. Bruxelles (1934). **b - 1855**

Le présent rapport se compose des parties suivantes: Ch. de Zuttere-Conseil Supérieur de la Pêche Maritime (1932-1933). R. Verschelde: Commission de Mariculture et de Myticulture (1932-1933). G. Velthof: L'Institut Maritime d'Ostende. Tables Statistiques, contenant des données sur la pêche maritime belge, les organisations des pêcheurs, les engins et bateaux de pêche, etc.

Statistical statements concerning the favorable progress of the British Columbia halibut Season. The figures published have been compiled with the assistance of the International Fisheries Commission.

## *Gadidae.*

**Dementjev T. & Tanasijtchouk V.** - Sur la question des races de morue dans la Mer de Barents (En ordre de discussion). (En russe). – 2 phot., 1 graph., 2 tabl., Za Rybn. Ind. Sev., 5, 40-43. Leningrad (1935). **b - 1894**

**Essipov V. K.** (trad. du russe par le Capit. Cochin). - Contribution aux caractéristiques techniques et biologiques de la pêche à la morue et

à l'églefin sur la côte Mourmane orientale. – 3 fig., 2 cartes, 26 tabl., Rev. Trav. Off., Pêches Marit., VII, 3, 245-274. Paris (1934). **b - 1895**

Traduction d'un mémoire publié par le Gouvernement soviétique et qui est de nature à intéresser les armateurs dont les navires fréquentent la côte Mourmane. L'A. en effet, communique les résultats des observations exécutées au cours de l'année 1928 à la station scientifique et technique de l'Institut d'Etudes des Mers Septentrionales à Portchnik et relatives à la pêche à la palanque de la morue et de l'églefin sur la côte Mourmane orientale. On a soumis à l'examen le poisson procuré à la station par les pêcheurs de Zakhrebetnaja et de Chelpino. Chaque spécimen de morue ou d'églefin était mesuré au ruban centimétrique, puis pesé à la balance décimale et ouvert pour définir le sexe et pour examiner l'état des produits sexuels. En outre, on a examiné chaque fois séparément le foie de chaque spécimen, en recueillant des matériaux sur quelques uns des spécimens pour la détermination de leur âge (écailles, otolithes, vertèbres). Le total des spécimens étudiés a été pour la morue 502, et pour l'églefin 175.

**Gismondi E.** - Fasti e nefasti della pesca e del commercio del merluzzo. – Italia Pescher., 15/16, 9-11. Roma (1934). **b - 1896**

Metodi di ricerche. Le uova di merluzzo. Longevità. Influenza del clima. Esportazione. Il merluzzo salato. Riferimenti storici interessanti. Il merluzzo in Italia. Consorzio di distribuzione.

**Gismondi E.** - Pesca e commercio dei merluzzi. – Realtà, XV, 4, 402-413. Milano (1934). **b - 1897**

Dopo alcuni cenni sulla biologia si dànno alcune notizie di carattere generale sulla pesca e sul commercio dei gadidi. I merluzzi si possono dividere in tre grandi famiglie: la prima, quella che compare lungo le coste della Norvegia, la seconda, quella di Terranuova, ed ultima quella dell'Islanda. Ciascun gruppo ha carattereristiche proprie, sia in riguardo al colore della pelle, sia alla struttura del corpo, per cui si può stabilire l'esatta provenienza del prodotto ricevuto.
